Radar vectoring to final approach crs authorized in accordance with approved patterns.
When authorized by ATC, RAP DME may be used to position aircraft for straight-in approach at 5500′ between R-070 clockwise to R-240 via 6-mile DME arc with the elimination of procedure turn.
Procedure turn E side of crs, 142° Outbnd, 322° Inbnd, 4600′ within 10 miles.
Minimum altitude over facility on final approach crs, 4300′.
Crs and distance, facility to airport, 322°—4.0 miles.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 4.0 miles after passing RAP-VOR, make a left climbing turn to 4600′ on R-142 within 10 miles of RAP-VOR. Aircraft on missed approach may be radar controlled after radar identification.
Other change: Deletes caution note.
MSA within 25 miles of the facility: 000°-090°—4300′; 090°-180°—4500′; 180°-270°—8300′; 270°-360°—6600′.

City, Rapid City; State, S. Dak.; Airport Name, Rapid City Municipal; Elev., 3181′; Fac. Class., BVORTAC; Ident., RAP; Procedure No. 1, Amdt. 8; Eff. Date, 12 Dec. 64; Sup. Amdt. No. 7; Dated, 27 Oct. 62

Minimum altitude over 10-mile DME fix R-176 on final approach crs, 3300′.
Crs and distance, 10-mile DME fix R-176 to airport 356°—5.3 miles.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished at 4.7-mile DME fix R-176, climb to 3000′ on R-357 ATY VOR. Return to VOR and hold on R-357.
NOTE: When authorized by ATC, DME may be used to position aircraft on final approach crs at 3400′ between R-160 clockwise to 230° via 16-mile DME arc with the elimination of procedure turn.
MSAs within 25 miles of the facility: 000°–180°—3100′; 180°–270°—4400′; 270°–360°—3700′.

City, Watertown; State, S. Dak.; Airport Name, Watertown Municipal; Elev., 1747′; Fac. Class., BVORTAC; Ident., ATY; Procedure No. VOR/DME No. 1, Amdt. Orig.; Eff. Date, 12 Dec. 64

5. By amending the following instrument landing system procedures prescribed in § 97.17 to read:

ILS STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.
If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

| Transition From— | Transition To— | Course and distance | Minimum altitude (feet) | Ceiling and visibility minimums Condition | 2-engine or less 65 knots or less | 2-engine or less More than 65 knots | More than 2-engine, more than 65 knots |
|---|---|---|---|---|---|---|---|
| Monroe VOR | LOM | Direct | 1400 | T-dn | 300–1 | 300–1 | 200–½ |
| | | | | C-dn | 400–1 | 500–1 | 500–1½ |
| | | | | S-dn-4 | 200–½ | 200–½ | 200–½ |
| | | | | A-dn | 600–2 | 600–2 | 600–2 |

Procedure turn S side of crs, 218° Outbnd, 038° Inbnd, 1400′ within 10 miles. Beyond 10 miles not authorized.
Minimum altitude at glide slope interception Inbnd, 1200′.
Altitude of glide slope and distance to approach end of runway at OM 1187′—4.2 miles; at MM 256′—0.5 mile.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished, climb to 1600′ on NE crs ILS within 20 miles.
CAUTION: 2049′ TV antenna located 20 miles S of airport; 850′ TV antenna located 3.7 miles WNW of airport.
NOTE: 7-mile DME arc 1600′ authorized radially 066° clockwise through 291° from the Monroe VOR to intercept final approach crs eliminating procedure turn.

City, Monroe; State, La.; Airport Name, Selman Field; Elev., 79′; Fac. Class., ILS; Ident., I-MLU; Procedure No. ILS-4, Amdt. 5; Eff. Date, 12 Dec. 64; Sup. Amdt. No. 4; Dated, 14 Mar. 64

| | | | | | | | |
|---|---|---|---|---|---|---|---|

**6. By amending the following radar procedures prescribed in § 97.19 to read:**

RADAR STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach, except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

| Radar terminal area maneuvering sectors and altitudes | | | | | | | | | | | | | | Ceiling and visibility minimums | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| From | To | Dist. | Alt. | Dist. | Alt. | Dist. | Alt. | Dist. | Alt. | Dist. | Alt. | Dist. | Alt. | Condition | 2-engine or less | | More than 2-engine, more than 65 knots |
| | | | | | | | | | | | | | | | 65 knots or less | More than 65 knots | |
| Instrument approach to be conducted in accordance with USN Radar Standard Instrument Approach Procedure. | | | | | | | | | | | | | | Precision radar | | | |
| | | | | | | | | | | | | | | T-dn | 300-1 | 300-1 | 300-1 |
| | | | | | | | | | | | | | | C-dn | 600-2 | 600-2 | 600-2 |
| | | | | | | | | | | | | | | S-dn-24R | 400-1 | 400-1 | 400-1 |
| | | | | | | | | | | | | | | A-dn | 600-2 | 600-2 | 600-2 |

If visual contact not established upon descent to authorized landing minimums or if landing not accomplished, climb to 2500' on a heading of 280°, intercept LIF-VOR R-340 and proceed to Rancho Int.

CAUTION: High terrain N, NE, and E of airport.

NOTE: Military authority required.

City, San Diego; State, Calif.; Airport Name, Miramar NAS; Elev., 475'; Fac. Class. and Ident., Miramar Radar; Procedure No. 1, Amdt. Orig.; Eff. Date, 12 Dec. 64

These procedures shall become effective on the dates specified therein.

(Secs. 307(c), 313(a), 601 of the Federal Aviation Act of 1958; 49 U.S.C. 1348(c), 1354(a), 1421; 72 Stat. 749, 752, 775)

Issued in Washington, D.C., on November 9, 1964.

# Title 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

### SUBCHAPTER A—INCOME TAX

[T.D. 6777]

### PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

### Repeal of Credit for Dividends Received by Individuals and Doubling of Dividend Exclusion for Individuals

On October 15, 1964, notice of proposed rule making with respect to the amendments of the Income Tax Regulations (26 CFR Part 1) under sections 34, 116, and various other sections of the Internal Revenue Code of 1954 to conform the regulations to changes made by section 201 of the Revenue Act of 1964 (78 Stat. 31) was published in the FEDERAL REGISTER (29 F.R. 14181). No objection of the rules proposed having been received during the 30-day period prescribed in the notice, the regulations as proposed are hereby adopted.

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

Approved: December 10, 1964.

STANLEY S. SURREY,
*Assistant Secretary of the Treasury.*

In order to conform the Income Tax Regulations (26 CFR Part 1) under sections 34, 116, and various other sections of the Internal Revenue Code of 1954 to section 201 of the Revenue Act of 1964 (78 Stat. 31), such regulations are amended as follows:

PARAGRAPH 1. Section 1.34 is amended by revising section 34(a) and paragraph (2) of section 34(b) and by revising the historical note. These amended provisions read as follows:

**§ 1.34 Statutory provisions; dividends received by individuals.**

Sec. 34. *Dividends received by individuals*—(a) *General rule.* Effective with respect to taxable years ending after July 31, 1954, there shall be allowed to an individual, as a credit against the tax imposed by this subtitle for the taxable year, an amount equal to the following percentage of the dividends which are received from domestic corporations and are included in gross income:

(1) 4 percent of the amount of such dividends which are received before January 1, 1964, and

(2) 2 percent of the amount of such dividends which are received during the calendar year 1964.

(b) *Limitation on amount of credit.* • • •

(2) The following percent of the taxable income for the taxable year:

(A) 2 percent, in the case of a taxable year ending before January 1, 1955, or beginning after December 31, 1963.

(B) 4 percent, in the case of a taxable year ending after December 31, 1954, and beginning before January 1, 1964.

• • • • •

[Sec. 34 as amended by sec. 3(a), Life Insurance Company Income Tax Act 1959 (73 Stat. 139); sec. 10(e), Act of Sept. 14, 1960 (Pub. Law 86-779, 74 Stat. 1009); sec. 201(a), Rev. Act 1964 (78 Stat. 31); repealed by sec. 201(b), Rev. Act 1964 (78 Stat. 31)]

PAR. 2. Paragraph (a) of § 1.34-1 is amended by revising subparagraph (1). The amended provision reads as follows:

**§ 1.34-1 Credit against tax and exclusion from gross income in case of dividends received by individuals.**

(a) *In general.* (1) Section 34 provides a credit against the income tax of an individual for certain dividends received after July 31, 1954, and on or before December 31, 1964. The credit, subject to the limitations provided in section 34(b), is equal to 4 percent of the dividends received before January 1, 1964, and 2 percent of the dividends received during the calendar year 1964. The credit is allowable with respect to dividends received in any taxable year ending after July 31, 1954, but applies only to dividends received on or before December 31, 1964. The credit applies only to dividends which are received from domestic corporations and which are included in the gross income of the taxpayer. Section 116 provides for the exclusion from gross income of the first $100 ($50 for dividends received in taxable years beginning before January 1, 1964) of certain dividends received by an individual. See § 1.116-1. In determining which dividends are entitled to the credit against income tax provided by section 34, the exclusion from gross income provided in section 116 is applied to the first dividends received in the taxable year. Since the exclusion applies to dividends received at any time during a taxable year ending after July 31, 1954, dividends received before August 1, 1954, may be taken into account in determining the exclusion from gross income under section 116 but do not constitute dividends for which a credit is allowed.

PAR. 3. Paragraph (a) of § 1.34-2 is amended to read as follows:

**§ 1.34-2 Limitations on amount of credit.**

(a) Under section 34(b) the credit may not exceed the lesser of either—

(1) The amount of the tax imposed by chapter 1 of the Code for the taxable year reduced by the foreign tax credit allowable under section 33, or

(2) Whichever of the following is applicable:

(i) In the case of a taxable year ending before January 1, 1955, or beginning after December 31, 1963, 2 percent of the taxable income for such taxable year;

(ii) In the case of a taxable year ending after December 31, 1954, and beginning before January 1, 1964, 4 percent of the taxable income for such taxable year.

In the case of a taxpayer who computes his tax under section 3 or who uses the standard deduction provided by section 141, the taxable income for the taxable year is the adjusted gross income for the taxable year reduced by the standard deduction prescribed in section 141 and the deductions for personal exemptions provided in section 151. Where the alternative tax on capital gains is imposed under section 1201(b), the taxable income for such taxable year is the taxable income as defined in section 63, which includes 50 percent of the excess of net long-term capital gain over net short-term capital loss.

PAR. 4. There is added immediately after § 1.34-5 the following new section:

**§ 1.34-6 Dividends received after December 31, 1964.**

In the case of dividends received after December 31, 1964, section 34 and the regulations issued thereunder do not apply.

PAR. 5. Section 1.35 is amended by revising section 35(b)(1) and the historical note. The amended provisions read as follows:

**§ 1.35 Statutory provisions; partially tax-exempt interest received by individuals.**

Sec. 35. *Partially tax-exempt interest received by individuals.* • • •

(b) *Limitation on amount of credit.* The credit allowed by subsection (a) shall not exceed whichever of the following is the lesser:

(1) The amount of the tax imposed by this chapter for the taxable year, reduced by the credit allowable under section 33, or

• • • • •

[Sec. 35 as amended by sec. 41(b), Technical Amendments Act 1958 (72 Stat. 1639); sec. 201(d)(2) Rev. Act 1964 (78 Stat. 32)]

PAR. 6. Paragraph (a) of § 1.61-9 is amended to read as follows:

**§ 1.61-9 Dividends.**

(a) *In general.* Except as otherwise specifically provided, dividends are included in gross income under sections 61 and 301. For the principal rules with respect to dividends includible in gross income, see section 316 and the regulations thereunder. As to distributions made or deemed to be made by regulated investment companies, see sections 851 through 855, and the regulations thereunder. As to distributions made by real estate investment trusts, see sections 856 through 858, and the regulations thereunder. See section 116 for the exclusion from gross income of $100 ($50 for dividends received in taxable years beginning before January 1, 1964) of dividends received by an individual, except those from certain corporations. Furthermore, dividends may give rise to a credit against tax under section 34, relating to dividends received by individuals (for dividends received on or before December 31, 1964), and under section 37, relating to retirement income.

• • • • •

PAR. 7. Section 1.116 is amended by revising section 116(a), by adding a new paragraph (3) to section 116(c) and by revising the historical note. The amended and added provisions read as follows:

**§ 1.116 Statutory provisions; partial exclusion of dividends received by individuals.**

Sec. 116. *Partial exclusion of dividends received by individuals*—(a) *Exclusion from gross income.* Effective with respect to any taxable year ending after July 31, 1954, gross income does not include amounts received by an individual as dividends from domestic corporations, to the extent that the dividends do not exceed $100. If the dividends received in a taxable year exceed $100, the exclusion provided by the preceding sentence shall apply to the dividends first received in such year.

• • • • •

(c) *Special rules for certain distributions.* For purposes of subsection (a)—

• • • • •

(3) The amount of dividends properly allocable to a beneficiary under section 652 or 662 shall be deemed to have been received by the beneficiary ratably on the same date that the dividends were received by the estate or trust.

• • • • •

[Sec. 116 as amended by sec. 3(a), Life Insurance Company Income Tax Act 1959 (73 Stat. 139); sec. 10(f), Act of Sept. 14, 1960 (Pub. Law 86-779, 74 Stat. 1009); secs. 201(c) and (d)(8)(C), Rev. Act 1964 (78 Stat. 32)]

PAR. 8. Section 1.116-1 is amended to read as follows:

**§ 1.116-1 Partial exclusion of dividends.**

(a) *In general.* Section 116 excludes from gross income the first $100 ($50 for dividends received in a taxable year which ends after July 31, 1954 and begins before January 1, 1964, whether or not the dividend is received after July 31, 1954) of dividends from domestic corporations received by an individual in a taxable year beginning after December 31, 1963.

(b) *Joint returns of husband and wife.* In the case of a joint return of husband and wife, each spouse is entitled to the exclusion in an amount not in excess of $100 ($50 for dividends received in taxable years beginning before January 1, 1964), with respect to the dividends received by such spouse. Thus, if in the calendar year 1955, a husband receives $200 of dividends and his wife $100, the amount to be included in gross income is $200 ($150 of the husband's dividends and $50 of the wife's dividends). If the amounts are received in a taxable year beginning after December 31, 1963, the amount to be included in gross income is $100 ($100 of the husband's dividends and none of the wife's dividends). If the wife receives only $30 of dividends, the entire $30 is excludable, and there is included in gross income in the joint return in the case of a taxable year beginning before January 1, 1964, only $150 ($200 less his $50 exclusion) or in the case of a taxable year beginning after December 31, 1963, only $100 ($200 less his $100 exclusion) consisting of the dividends received by the husband.

(c) *Individuals receiving dividends.* Where two or more persons hold stock as tenants in common, as joint tenants, or as tenants by the entirety, the dividends received with respect to such stock shall be considered as being received by each tenant to the extent that he is entitled under local law to a share of such dividends. Where dividends constitute community property under local law each spouse shall be considered as receiving one-half of such dividends.

(d) *Dividends to which the exclusion applies*—(1) *General rule.* The exclusion under section 116 applies only to distributions of property defined as dividends by section 316. Thus, the exclusion is not allowed with respect to patronage dividends paid by either exempt or taxable farm cooperatives. Nor is it allowed for distributions to nonstockholding policy holders by an insurance company having shares of stock or for any distribution by a mutual insurance company. See subparagraph (2)(i) of this paragraph for an additional restriction with respect to stock life insurance companies. The exclusion is, however, allowed with respect to dividends paid on capital stock by nonexempt cooperatives and with respect to dividends paid on capital stock by building and loan associations. However, see subparagraph (2)(ii) of this paragraph with respect to so-called dividends paid by building and loan associations ineligible for the exclusion. The exclusion is allowed with respect to distributions from any organization taxed as a corporation if the distribution falls within the definition of a dividend in section 316.

(2) *Dividends from certain corporations.* (i) Section 116 (b) and (c) contains further restrictions on the type of distributions which are treated as dividends for purposes of the exclusion. Thus, no exclusion is applicable with respect to dividends received from a corporation organized under the China Trade Act, 1922; from stock life insurance companies before January 1, 1959, in taxable years ending before such date; from corporations which during their taxable year of the distribution or their preceding taxable year were corporations to which section 931 applies (relating to income from sources within possessions of the United States); from corporations which during the taxable year of the dis-

tribution or the preceding taxable year are corporations exempt from tax either under section 501, relating to charitable, etc., organizations, or under section 521, relating to farmers' cooperative associations.

(ii) So-called dividends paid by mutual savings banks, cooperative banks, and building and loan associations which are allowed as a deduction under section 591 are ineligible for the exclusion.

(iii) For special rules as to the limitation on the amount of dividends for which an exclusion is allowable in the case of dividends paid by a regulated investment company, see section 854 and the regulations thereunder.

(iv) See section 857(c) and paragraph (d) of § 1.857–4 for special rules which deny an exclusion under section 116 in the case of dividends received from a real estate investment trust with respect to a taxable year for which such trust is taxable under part II, subchapter M, chapter 1 of the Code.

(e) *Taxpayers not entitled to exclusion.* (1) The exclusion is not available to nonresident aliens with respect to whom a tax is imposed for the taxable year under section 871(a). However, if the taxpayer elects under section 6014 to have the Government compute his tax, the taxpayer is allowed the exclusion under section 116.

(2) For additional rules for the treatment of dividends received by estates or trusts, and the allocation of such dividends between an estate or trust and the beneficiary thereof, see sections 652 and 662 and the regulations thereunder.

(3) For treatment of dividends received by a partnership, see section 702 and the regulations thereunder.

(4) For treatment of dividends received by a common trust fund, see section 584 and the regulations thereunder.

(f) *Time dividends are received.* In cases where it is necessary to determine the time of receipt of dividends the rules established to determine in which taxable year dividends must be included in gross income apply, including the rules relating to constructive receipt. See section 451 and regulations thereunder.

(g) *Special rule relating to receipt of dividends by beneficiary of an estate or trust.* In general, dividends are deemed received by a beneficiary in the taxable year in which they are includible in his gross income under section 652 or 662. However, solely for purposes of determining the amount of the exclusion applicable to dividends received by a beneficiary from an estate or trust, the time of receipt of such dividends by the estate or trust is also considered the time of receipt by the beneficiary.

PAR. 9. Paragraph (b)(1)(vi) of § 1.443–1 is amended to read as follows:

**§ 1.443–1 Returns for periods of less than 12 months.**

* * * * *

(b) *Computation of tax for short period on change of annual accounting period—(1) General rule.*

* * * * *

(vi) If the amount of a credit against the tax (for example, the credits allowable under section 34 (for dividends received on or before December 31, 1964), and 35 (for partially tax-exempt interest)) is dependent upon the amount of any item of income or deduction, such credit shall be computed upon the amount of the item annualized separately in accordance with the foregoing rules. The credit so computed shall be treated as a credit against the tax computed on the basis of the annualized taxable income. In any case in which a limitation on the amount of a credit is based upon taxable income, taxable income shall mean the taxable income computed on the annualized basis.

* * * * *

PAR. 10. Paragraph (a) of § 1.565–3 is amended to read as follows:

**§ 1.565–3 Effect of consent.**

(a) The amount of the consent dividend shall be considered, for all purposes of the Code, as if it were distributed in money by the corporation to the shareholder on the last day of the taxable year of the corporation, received by the shareholder on such day, and immediately contributed by the shareholder as paid-in capital to the corporation on such day. Thus, the amount of the consent dividend will be treated by the shareholder as a dividend. The shareholder will be entitled to the dividends received credit under section 34 (for dividends received on or before December 31, 1964) and the exclusion under section 116, or to the dividends received deduction under section 243, with respect to such consent dividend. The basis of the shareholder's consent stock in a corporation will be increased by the amount thus treated in his hands as a dividend which he is considered as having contributed to the corporation as paid-in capital. The amount of the consent dividend will also be treated as a dividend received from sources within the United States in the same manner as if the dividend had been paid in money to the shareholders. Among other effects of the consent dividend, the earnings and profits of the corporation will be decreased by the amount of the consent dividends. Moreover, if the shareholder is a corporation, its accumulated earnings and profits will be increased by the amount of the consent dividend with respect to which it makes a consent.

PAR. 11. Section 1.584 is amended by revising section 584(c)(2) and the historical note. The amended provisions read as follows:

**§ 1.584 Statutory provisions; common trust funds.**

Sec. 584. *Common trust funds.* * * *

(c) *Income of participants in fund.* * * *

(2) *Dividends and partially tax exempt interest.* The proportionate share of each participant in the amount of dividends to which section 116 applies, and in the amount of partially tax exempt interest on obligations described in section 35 or section 242, received by the common trust fund shall be considered for purposes of such sections as having been received by such participant. If the common trust fund elects under section 171 (relating to amortizable bond premium) to amortize the premium on such obligations, for purposes of the preceding sentence the proportionate share of the participant of such interest received by the common trust fund shall be his proportionate share of such interest (determined without regard to this sentence) reduced by so much of the deduction under section 171 as is attributable to such share.

* * * * *

[Sec. 584 as amended by sec. 4, Act of Sept. 28, 1962 (Pub. Law 87–772, 76 Stat. 668, 670); sec. 201(d)(5), Rev. Act 1964 (78 Stat. 32)]

PAR. 12. Section 1.584–2 is amended by revising paragraph (b)(1). The amended provision reads as follows:

**§ 1.584–2 Income of participants in common trust fund.**

* * * * *

(b)(1) Each participant's proportionate share in the amount of dividends to which section 34 (for dividends received on or before December 31, 1964) or section 116 applies received by the common trust fund shall be deemed to have been received by such participant as such dividends.

PAR. 13. Section 1.642(a)(3) is amended by adding a historical note to read as follows:

* * * * *

[Sec. 642(a)(3) repealed by sec. 201(d)(6)(A), Rev. Act. 1964 (78 Stat. 32)]

PAR. 14. Section 1.642(a)(3)–1 is amended to read as follows:

**§ 1.642(a)(3)–1 Dividends received by an estate or trust.**

An estate or trust is allowed a credit against the tax for dividends received on or before December 31, 1964 (see section 34), only for so much of the dividends as are not properly allocable to any beneficiary under section 652 or 662. Section 642(a)(3), and this section do not apply to amounts received as dividends after December 31, 1964. For treatment of the credit in the hands of the beneficiary see § 1.652(b)–1.

PAR. 15. Section 1.642(a)(3)–2 is amended to read as follows:

**§ 1.642(a)(3)–2 Time of receipt of dividends by beneficiary.**

In general, dividends are deemed received by a beneficiary in the taxable year in which they are includible in his gross income under section 652 or 662. For example, a simple trust, reporting on the basis of a fiscal year ending October 30, receives quarterly dividends on November 3, 1954, and February 3, May 3, and August 3, 1955. These dividends are all allocable to beneficiary A, reporting on a calendar year basis, under section 652 and are deemed received by A in 1955. See section 652(c). Accordingly, A may take all these dividends into account in determining his credit for dividends received under section 34 and his dividends exclusion under section 116. However, solely for purposes of determining whether dividends deemed received by individuals from trusts or estates qualify under the time limitations of section 34(a) or section 116(a), section 642(a)(3) provides that the time of receipt of the dividends by the trust or estate is also considered the time of receipt by the beneficiary. For example, a simple trust reporting on the basis of a fiscal year ending October 30 receives quarterly dividends on December 3, 1953, and March 3, June 3, and September 3, 1954. These dividends are all allocable to beneficiary A, reporting on the calendar year basis, under section 652 and are includible in his income for 1954. However, for purposes of section 34(a) or section 116(a), these dividends are deemed received by A on the same dates that the trust received them. Accordingly, A may take into account in determining the credit under section 34 only those dividends received by the trust on September 3, 1954, since the dividend received credit is not allowed under section 34 for dividends received before August 1, 1954 (or after December 31, 1964). Section 642(a)(3) and this section do not apply to amounts received by an estate or trust as dividends after December 31, 1964. However, the rules in this section relating to time of receipt of dividends by a beneficiary are applicable to dividends received by an estate or trust prior to January 1, 1965, and accordingly, such dividends are deemed to be received by the beneficiary (even though received after December 31, 1964) on the same dates that the estate or trust received them for purposes of determining the credit under section 34 or the exclusion under section 116.

PAR. 16. Section 1.642(i) is amended by revising section 642(i), and by adding a historical note. The amended and added provisions reads as follows:

**§ 1.642(i) Statutory provisions; estates and trusts; special rules for credits and deductions; cross references.**

Sec. 642. *Special rules for credits and deductions.* * * *

(i) *Cross references.* (1) For disallowance of standard deduction in case of estates and trusts, see section 142(b)(4).

(2) For special rule for determining the time of receipt of dividends by a beneficiary under section 652 or 662, see section 116(c)(3).

[Sec. 642(i) as amended by sec. 201(d)(6)(B), Rev. Act 1964 (78 Stat. 32)]

PAR. 17. Section 1.642(i)–1 is amended to read as follows:

**§ 1.642(i)–1 Cross references.**

(a) The standard deduction is not allowed to estates and trusts (see section 142(b)(4)).

(b) The amount of dividends properly allocable to a beneficiary under section 652 or 662 shall be deemed to have been received by the beneficiary ratably on the same date that the dividends were received by the estate or trust (see section 116(c)(3)).

PAR. 18. Section 1.652(b)–1 is amended to read as follows:

**§ 1.652(b)–1 Character of amounts.**

In determining the gross income of a beneficiary, the amounts includible under § 1.652(a)–1 have the same character in the hands of the beneficiary as in the hands of the trust. For example, to the extent that the amounts specified in § 1.652(a)–1 consist of income exempt from tax under section 103, such amounts are not included in the beneficiary's gross income. Similarly, dividends distributed to a beneficiary retain their original character in the beneficiary's hands for purposes of determining the availability to the beneficiary of the dividends received credit under section 34 (for dividends received on or before December 31, 1964) and the dividend exclusion under section 116. The tax treatment of amounts determined under § 1.652(a)–1 depends upon the beneficiary's status with respect to them, not upon the status of the trust. Thus, if a beneficiary is deemed to have received foreign income of a foreign trust, the includibility of such income in his gross income depends upon his taxable status with respect to that income.

PAR. 19. Section 1.661(c)–1 is amended to read as follows:

**§ 1.661(c)–1 Limitation on deduction.**

An estate or trust is not allowed a deduction under section 661(a) for any amount which is treated under section 661(b) as consisting of any item of distributable net income which is not included in the gross income of the estate or trust. For example, if in 1962, a trust, which reports on the calendar year basis, has distributable net income of $20,000, which is deemed to consist of $10,000 of dividends and $10,000 of tax-exempt interest, and distributes $10,000 to beneficiary A, the deduction allowable under section 661(a) (computed without regard to section 661(c)) would amount to $10,000 consisting of $5,000 of dividends and $5,000 of tax-exempt interest. The deduction actually allowable under section 661(a) as limited by section 661(c) is $4,975, since no deduction is allowable for the $5,000 of tax-exempt interest and the $25 deemed distributed out of the $50 of dividends excluded under section 116, items of distributable net income which are not included in the gross income of the estate or trust.

PAR. 20. Paragraph (b) of § 1.683–2 is amended to read as follows:

**§ 1.683–2 Exceptions.**

* * * * *

(b) For purposes of determining the time of receipt of dividends under sections 34 (for purposes of the credit for dividends received on or before December 31, 1964) and 116, the dividends paid, credited, or to be distributed to a beneficiary are deemed to have been received by the beneficiary ratably on the same dates that the dividends were received by the estate or trust.

* * * * *

PAR. 21. Section 1.702 is amended by revising section 702(a)(5) and by adding a historical note. The amended and added provisions read as follows:

**§ 1.702 Statutory provisions; income and credits of partner.**

Sec. 702. *Income and credits of partner—*(a) *General rule.* In determining his income tax, each partner shall take into account separately his distributive share of the partnership's—

* * * * *

(5) Dividends with respect to which there is provided an exclusion under section 116 or a deduction under part VIII of subchapter B,

* * * * *

[Sec. 702 as amended by sec. 201(d)(7), Rev. Act 1964 (78 Stat. 32)]

PAR. 22. Section 1.702–1 is amended by revising paragraph (a)(5) to read as follows:

**§ 1.702–1 Income and credits of partners.**

(a) *General rule.* * * *

(5) Each partner shall take into account, as part of the dividends received by him from domestic corporations, his distributive share of dividends received by the partnership, with respect to which the partner is entitled to a credit under section 34 (for dividends received on or before December 31, 1964), an exclusion under section 116, or a deduction under part VIII, subchapter B, chapter 1 of the Code.

PAR. 23. Paragraph (a)(2) of § 1.852–4 is amended to read as follows:

**§ 1.852–4 Method of taxation of shareholders of regulated investment companies.**

(a) *Ordinary income.* * * *

(2) See section 853(b)(2) and (c) and paragraph (b) of § 1.853–2 and § 1.853–3 for the treatment by shareholders of dividends received from a regulated investment company which has made an election under section 853(a) with respect to the foreign tax credit. See section 854 and §§ 1.854–1 through 1.854–3 for limitations applicable to dividends received from regulated investment companies for the purpose of the credit under section 34 (for dividends received on or before December 31, 1964), the exclusion from gross income under section 116, and the deduction under section 243. See section 855 (b) and (d) and paragraphs (c) and (f) of § 1.855–1 for treatment by shareholders of dividends paid by a regulated investment company after the close of the taxable year in the case of an election under section 855(a).

* * * * *

PAR. 24. Section 1.857 is amended by revising section 857(c) and the historical note. The amended provisions read as follows:

**§ 1.857 Statutory provisions; taxation of real estate investment trusts and their beneficiaries.**

Sec. 857. *Taxation of real estate investment trusts and their beneficiaries.* * * *

(c) *Restrictions applicable to dividends received from real estate investment trusts.* For purposes of section 116 (relating to an exclusion for dividends received by individuals) and section 243 (relating to deductions for dividends received by corporations), a dividend received from a real estate investment trust which meets the requirements of this part shall not be considered as a dividend.

* * * * *

[Sec. 857 as added by sec. 10(a), Act of Sept. 14, 1960 (Pub. Law 86–779, 74 Stat. 1006); as amended by sec. 201(d)(11), Rev. Act 1964 (78 Stat. 32)]

PAR. 25. Paragraph (d) of § 1.857–4 is amended to read as follows:

**§ 1.857–4 Method of taxation of shareholders of real estate investment trusts.**

* * * * *

(d) *Dividend received credit, exclusion, and deduction not allowed.* Any dividend received from a real estate investment trust which, for the taxable year to which the dividend relates, is a qualified real estate investment trust, shall not be eligible for the dividend received credit (for dividends received on or before December 31, 1964) under section 34(a), the dividend received exclusion under section 116, or the dividend received deduction under section 243.

PAR. 26. Paragraph (c) of § 1.876–1 is amended to read as follows:

**§ 1.876–1 Alien residents of Puerto Rico.**

• • • • • •

(c) *Credits against tax.* The credits allowed by section 31 (relating to tax withheld on wages), section 32 (relating to tax withheld at source on nonresident aliens), section 33 (relating to taxes of foreign countries), section 34 (relating to dividends received by individuals) for dividends received on or before December 31, 1964, and section 35 (relating to partially tax-exempt interest) shall be allowed against the tax computed in accordance with this section. No credit shall be allowed under section 37 in respect of retirement income.

PAR. 27. Paragraph (b) of § 1.1201–1 is amended to read as follows:

**§ 1.1201–1 Alternative tax.**

• • • • • •

(b) *Other taxpayers.* In case the net long-term capital gain of a taxpayer (other than a corporation) exceeds the net short-term capital loss, section 1201(b) imposes an alternative tax in lieu of the tax imposed by sections 1 and 511, if and only if such alternative tax is less than the tax imposed by sections 1 and 511. The alternative tax is not in lieu of any other tax not specifically set forth in section 1201(b). The alternative tax is the sum of—

(1) A partial tax, computed at the rates provided by sections 1 and 511 on the taxable income reduced by an amount equal to 50 percent of the excess of the net long-term capital gain over the net short-term capital loss, plus

(2) 25 percent of the excess of the net long-term capital gain over the net short-term capital loss.

See § 1.1–3 for rule relating to the computation of the limitation on tax under section 1(c) in cases where the alternative tax is imposed. See § 1.34–2(a) for rule relating to the computation of the dividend received credit under section 34 (for dividends received on or before December 31, 1964), and § 1.35–1(a) for rule relating to the computation of credit for partially tax-exempt interest under section 35 in cases where the alternative tax is imposed.

• • • • • •

PAR. 28. Section 1.1375 is amended by revising subsection (b) of section 1375 and the historical note. The amended provisions read as follows:

**§ 1.1375 Statutory provisions; special rules applicable to distributions of electing small business corporations.**

Sec. 1375. *Special rules applicable to distributions of electing small business corporations.* • • •

(b) *Dividends received credit not allowed.* The amount includible in the gross income of a shareholder as dividends from an electing small business corporation during any taxable year of the corporation (including any amount treated as a dividend under section 1373(b)) shall not be considered a dividend for purposes of section 37 or section 116 to the extent that such amount is a distribution of property out of earnings and profits of the taxable year as specified in section 316(a)(2). For purposes of this subsection, the earnings and profits of the taxable year shall be deemed not to exceed the corporation's taxable income (computed as provided in section 1373(d)) for the taxable year.

• • • • • •

[Sec. 1375 as added by sec. 64(a), Technical Amendments Act 1958 (72 Stat. 1654); as amended by sec. 201(d)(13), Rev. Act 1964 (78 Stat. 32)]

PAR. 29. Section 1.1375–2 is amended to read as follows:

**§ 1.1375–2 Dividends received exclusion and credit not allowed.**

(a) *In general.* Under section 1375 (b), the amounts includible in the gross income of a shareholder as dividends from an electing small business corporation (including amounts treated as dividends under section 1373(b)) are not considered dividends for purposes of section 34 (dividends received credit for dividends received on or before December 31, 1964), section 37 (retirement income credit), and section 116 (partial dividend exclusion) to the extent that such amounts are distributions out of the earnings and profits of the taxable year. For purposes of the preceding sentence, the earnings and profits of the taxable year are deemed not to exceed the corporation's taxable income (as defined in section 1373(d)). For rules as to the allocation of earnings and profits of the taxable year to distributions made during the year, see paragraphs (d) and (e) of § 1.1373–1.

(b) *Examples.* The following examples illustrate the application of section 1375(b) and paragraph (a) of this section:

*Example (1).* An electing small business corporation during the taxable year 1962 has taxable income (as defined in section 1378 (d)) and earnings and profits of $10,000 for the taxable year and accumulated earnings and profits of $20,000 at the beginning of the taxable year. During the taxable year, the corporation distributes a dividend of $15,000 in money. Of the amount distributed, $10,000 is not entitled to the dividends received exclusion under section 116 or the credits under section 34 or 37, since it is paid out of the earnings and profits of the corporation's taxable year. The $5,000 paid out of accumulated earnings and profits is considered a dividend for purposes of the exclusion and credits.

• • • • • •

PAR. 30. Paragraph (b)(1) of § 1.1441–3 is amended to read as follows:

**§ 1.1441–3 Exceptions and rules of special application.**

• • • • • •

(b) *Corporate distributions*—(1) *Nontaxable portion.* The tax shall be withheld at the source under § 1.1441–1 on the gross amount of any distribution made by a corporation other than—

(i) A nontaxable distribution payable in stock or stock rights, and

(ii) A distribution which is treated as a distribution in part or full payment in exchange for stock.

This rule shall apply without regard to any claim that all or a portion of the distribution is not taxable under section 871 or 881. The tax shall be withheld on the gross amount of the distribution even though the payee may be entitled to the benefits of section 34, relating to the credit for dividends received by individuals (for dividends received on or before December 31, 1964), or section 116, relating to partial exclusion of dividends received by individuals. Appropriate adjustment, if any, will be made upon the payee's filing of a claim for refund, together with appropriate supporting evidence, in accordance with paragraph (h) of this section.

• • • • • •

PAR. 31. Section 1.6012–1 is amended by revising paragraph (a)(7)(iii)(c) to read as follows:

**§ 1.6012–1 Individuals required to make returns of income.**

(a) *Individual citizen or resident.* • • •

(7) *Use of form 1040A by certain taxpayers with gross income less than $10,000.* • • •

(iii) *Credits not allowable.* • • •

(c) The credit provided by section 34 (for dividends received on or before December 31, 1964);

• • • • • •

PAR. 32. Section 1.6014 is amended by revising subsection (a) of section 6014 and by adding a historical note. The amended and added provisions read as follows:

**§ 1.6014 Statutory provisions; income tax return—tax not computed by taxpayer.**

Sec. 6014. *Income tax return—tax not computed by taxpayer*—(a) *Election by taxpayer.* An individual entitled to elect to pay the tax imposed by section 3 whose gross income is less than $5,000 and includes no income other than remuneration for services performed by him as an employee, dividends or interest, and whose gross income other than wages, as defined in section 3401(a), does not exceed $100, shall at his election not be required to show on the return the tax imposed by section 1. Such election shall be made by using the form prescribed for purposes of this section and shall constitute an election to pay the tax imposed by section 3. In such case the tax shall be computed by the Secretary or his delegate who shall mail to the taxpayer a notice stating the amount determined as payable. In determining the amount payable, the credit against such tax provided for by section 37 shall not be allowed. In the case of a head of household (as defined in section 1(b) or a surviving spouse (as defined in section 2~~(b)~~) electing the benefits of this subsection, the tax shall be computed by the Secretary or his delegate without regard to the taxpayer's status as a head of household or as a surviving spouse.

• • • • • •

[Sec. 6014 as amended by sec. 201(d)(14), Rev. Act 1964 (78 Stat. 32)]

PAR. 33. Section 1.6015(c)–1 is amended to read as follows:

**§ 1.6015(c)–1 Definition of estimated tax.**

In the case of an individual, the term "estimated tax" means the amount which the individual estimates as the amount of the income tax imposed by chapter 1 of the Code for the taxable year, minus the amount which he estimates as the sum of the credits against tax provided by part IV, subchapter A of such chapter. These credits are those provided by section 31 (relating to tax withheld on wages), section 32 (relating to tax withheld at source on nonresident aliens and foreign corporations and on tax-free covenant bonds), section 33 (relating to foreign taxes), section 34 (relating to the credit for dividends received on or before December 31, 1964), section 35 (relating to partially tax-exempt interest), and section 37 (relating to retirement income). An individual who expects to elect to pay the optional tax imposed by section 3, or one who expects to elect to take the standard deduction allowed by section 144, should disregard any credits otherwise allowable under sections 32, 33, and 35 in computing his estimated tax since, if he so elects, these credits are not allowed in computing his tax liability. See section 36.

PAR. 34. Paragraph (b)(2) of § 1.6654–2 is amended to read as follows:

**§ 1.6654–2 Exceptions to imposition of the addition to the tax in the case of individuals.**

• • • • • •

(b) *Meaning of terms.* • • •

(2) The credits against tax allowed by part IV, subchapter A, chapter 1 of the Code, are—

(i) In the case of the exception described in paragraph (a)(1) of this section, the credits shown on the return for the preceding taxable year,

(ii) In the case of the exception described in paragraph (a)(2) of this section, the credits shown on the return for the preceding taxable year, except that if the amount of any such credit would be affected by any change in rates or status with respect to personal exemptions, the credits shall be determined by reference to the rates and status applicable to the current taxable year, and

(iii) In the case of the exceptions described in paragraph (a) (3) and (4) of this section, the credits computed under the law and rates applicable to the current taxable year.

A change in rate may be either a change in the rate of tax, such as a change in the rate of the tax imposed by section 1, or a change in any percentage affecting the computation of the credit, such as a change in the rate of withholding under chapter 3 of the Code or a change in the percentage of dividends received specified in section 34(a) (for dividends received on or before December 31, 1964). The application of the preceding sentence may be illustrated by the following examples:

• • • • • •

(Sec. 7805 of the Internal Revenue Code of 1954; 68 Stat. 917; 26 U.S.C. 7805)

[F.R. Doc. 64–12899; Filed, Dec. 15, 1964; 8:48 a.m.]

# Title 29—LABOR

## Chapter V—Wage and Hour Division, Department of Labor

### SUBCHAPTER A—REGULATIONS

## PART 608—HANDKERCHIEF, SCARF, AND ART LINEN INDUSTRY IN PUERTO RICO

### Wage Rates

Pursuant to section 5 of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 205), and by means of Administrative Order No. 585 (29 F.R. 13117), the Secretary of Labor appointed and convened Industry Committee No. 68–B. Administrative Order No. 585 referred to Industry Committee No. 68–B the question of the minimum wage rate or rates to be paid under section 6(c) of the Act to employees in the handkerchief, scarf, and art linen industry in Puerto Rico and gave due notice of the hearing of the Committee, as provided in 29 CFR 511.2.

Subsequent to an investigation and a hearing conducted pursuant to the notice, the Committee filed with the Administrator a report containing its findings of fact and recommendations with respect to the matters referred to it.

Accordingly, as authorized and required by section 8 of the Fair Labor Standards Act of 1938 (29 U.S.C. 208), Reorganization Plan No. 6 of 1950 (3 CFR 1949–53 Comp., p. 1004), and General Order No. 45–A of the Secretary of Labor (15 F.R. 3290), the recommendations of Industry Committee No. 68–B are hereinafter published in this revision of 29 CFR 608.2.

Effective January 1, 1965, 29 CFR 608.2 is hereby revised to read as follows:

**§ 608.2 Wage rates.**

The handkerchief, scarf, and art linen industry in Puerto Rico is divided into five separate classifications. Wages at rates not less than those prescribed in this section shall be paid under section 6(c) of the Fair Labor Standards Act of 1938 by every employer to each of his employees in each of the classifications in the industry who in any workweek is engaged in commerce or in the production of goods for commerce or is employed in an enterprise engaged in commerce or in the production of goods for commerce as those terms are defined in section 3 of the Act.

(a) *Previously covered classifications.* The classifications in this paragraph (a) apply to all activities of employees in the industry to whom section 6 of the Act applies without reference to the Fair Labor Standards Amendments of 1961.

(1) *Hand-sewing classification.* (i) The minimum wage for this classification is 33 cents an hour.

(ii) This classification is defined as the operations of hand-sewing as well as hand-embroidering, hand-embellishing, ornamental stitching, and similar operations involving decorative effects on all products except oblong scarves: *Provided, however,* That mending, repairing, sewing of labels, tacking, and similar operations on articles which are otherwise wholly machine sewn shall not be included.

(2) *Other operations classification.* (i) The minimum wage for this classification is 59 cents an hour.

(ii) This classification is defined as all operations in the handkerchief, scarf, and art linen industry in Puerto Rico, other than operations described in the other classifications of this industry.

(3) *Hand-sewing on oblong scarves classification.* (i) The minimum wage for this classification is 77 cents an hour.

(ii) This classification is defined as the operations of hand-sewing as well as hand-embroidering, hand-embellishing, ornamental stitching, and similar operations involving decorative effects on oblong scarves: *Provided, however,* That mending, repairing, sewing of labels, tacking, and similar operations on articles which are otherwise wholly machine sewn shall not be included.

(4) *Other operations on oblong scarves classification.* (i) The minimum wage for this classification is 93 cents an hour.

(ii) This classification is defined as all operations on oblong scarves except those included in the hand-sewing on oblong scarves classification.

(b) *New coverage classification.* (1) The minimum wage for this classification is 77 cents an hour between January 1, 1965 and September 2, 1965, and 93 cents an hour thereafter.

(2) This classification is defined as all activities of employees covered by section 6 of the Act, only by reason of the Fair Labor Standards Amendments of 1961.

(Sec. 8, 52 Stat. 1064 as amended; 29 U.S.C. 208)

Signed at Washington, D.C., this 10th day of December 1964.

## PART 609—WOMEN'S AND CHILDREN'S UNDERWEAR AND WOMEN'S BLOUSE INDUSTRY IN PUERTO RICO

### Wage Rates

Pursuant to section 5 of the Fair Labor Standards Act of 1938 (29 U.S.C. 205), and by means of Administrative Order No. 585 (29 F.R. 13117), the Secretary of Labor appointed and convened Industry Committee No. 68–A. Administrative Order No. 585 referred to Industry Committee No. 68–A the question of the minimum wage rate or rates to be paid under section 6(c) of the Act to employees in the women's and children's underwear and women's blouse industry in Puerto Rico and gave due notice of the hearing of the Committee, as provided in 29 CFR 511.2.

Subsequent to an investigation and a

hearing conducted pursuant to the notice, the Committee filed with the Administrator a report containing its findings of fact and recommendations with respect to the matters referred to it.

Accordingly, as authorized and required by section 8 of the Fair Labor Standards Act of 1938 (29 U.S.C. 208), Reorganization Plan No. 6 of 1950 (3 CFR 1949–53 Comp., p. 1004), and General Order No. 45–A of the Secretary of Labor (15 F.R. 3290), the recommendations of Industry Committee No. 68–C are hereinafter published in this revision of 29 CFR 611.2.

Effective January 1, 1965, 29 CFR 611.2 is revised to read as follows:

§ 611.2 Wage rates.

The sweater and knit swimwear industry in Puerto Rico is divided into two classifications. Wages at rates not less than those prescribed in this section shall be paid under section 6(c) of the Fair Labor Standards Act of 1938 by every employer to each of his employees in each of the classifications in the industry who in any workweek is engaged in commerce or in the production of goods for commerce or is employed in an enterprise engaged in commerce or in the production of goods for commerce as those terms are defined in section 3 of the Act.

(a) *General classification.* (1) The minimum wage for this classification is $1.17 an hour.

(2) This classification is defined as all activities in the industry except those covered by section 6 of the Fair Labor Standards Act only by reason of the Fair Labor Standards Amendments of 1961.

(b) *New coverage classification.* (1) The minimum wage for this classification is $1.10 an hour between January 1, 1965, and September 2, 1965, and $1.17 an hour thereafter.

(2) This classification is defined as all activities in the industry covered by section 6 of the Fair Labor Standards Act only by reason of the Fair Labor Standards Amendments of 1961.

(Sec. 8, 52 Stat. 1064 as amended; 29 U.S.C. 208)

Signed at Washington, D.C., this 10th day of December 1964.

## PART 611—SWEATER AND KNIT SWIMWEAR INDUSTRY IN PUERTO RICO

### Wage Rates

Pursuant to section 5 of the Fair Labor Standards Act of 1938 (29 U.S.C. 205), and by means of Administrative Order No. 585 (29 F.R. 13117), the Secretary of Labor appointed and convened Industry Committee No. 68–C. Administrative Order No. 585 referred to Industry Committee No. 68–C the question of the minimum wage rate or rates to be paid under section 6(c) of the Act to employees in the sweater and knit swimwear industry in Puerto Rico and gave due notice of the hearing of the Committee, as provided in 29 CFR 511.2.

Subsequent to an investigation and a hearing conducted pursuant to the notice, the Committee filed with the Administrator a report containing its findings of fact and recommendations with respect to the matters referred to it.

Accordingly, as authorized and required by section 8 of the Fair Labor Standards Act of 1938 (29 U.S.C. 208), Reorganization Plan No. 6 of 1950 (3 CFR 1949–53 Comp., p. 1004), and General Order No. 45–A of the Secretary of Labor (15 F.R. 3290), the recommendations of Industry Committee No. 68–C are hereinafter published in these amendments to 29 CFR Part 609.

Effective January 1, 1965, 29 CFR 609.2(a)(1)(i), (a)(2)(i), and (b)(1) are amended to read as follows:

§ 609.2 Wage rates.

* * * * *

(a) *Previously covered classifications.* * * *

(1) *Hand-sewing classification.* (i) The minimum wage for this classification is 85 cents an hour.

* * * * *

(2) *Other operations classification.* (i) The minimum wage for this classification is $1.00 an hour.

* * * * *

(b) *New coverage classification.* (1) The minimum wage for this classification is 85 cents an hour between January 1, 1965 and September 2, 1965 and $1.00 an hour thereafter.

* * * * *

# Title 32—NATIONAL DEFENSE

## Chapter VI—Department of the Navy

### SUBCHAPTER C—PERSONNEL

## PART 721—STANDARDS OF CONDUCT

*Scope and purpose.* New Part 721 implements Part 137 of this title, as amended (29 F.R. 13803), for the Department of the Navy. Part 721 conforms to Secretary of the Navy Instruction 5370.2C of December 1, 1964, which is being distributed to Navy and Marine Corps commands in due course.

Subchapter C is amended by adding the following new part:

Sec.
721.1 Purpose.
721.2 Definition.
721.3 Policy—general.
721.4 Gratuities.
721.5 Transportation and accommodations on official business.
721.6 Action.

AUTHORITY: The provisions of this Part 721 issued under R.S. 161, sec. 5031, 70A Stat. 278, as amended, sec. 133, 76 Stat. 517; 5 U.S.C. 22, 10 U.S.C. 133, 5031.

§ 721.1 Purpose.

Part 721 implements the standards of conduct set forth in Part 137 of this title and governing all personnel in the Department of the Navy.

§ 721.2 Definition.

The term "Naval personnel," as used in this part, includes all military and civilian personnel of the Department of the Navy, including nonappropriated-fund activities.

§ 721.3 Policy—general.

(a) All persons in the Department of the Navy, military and civilian, are enjoined to adhere strictly to the requirements of Part 137 of this title. In some instances, that part imposes standards which require the exercise of personal judgment. It is imperative that Naval personnel consider each such instance carefully and be prepared to account for the manner in which that judgment is exercised. This is particularly true in situations which involve acceptance of hospitality or favors from persons who do, or seek to do, business with the Department of the Navy.

(b) Persons who represent the Government in business dealings with representatives of industry have positions of trust and grave responsibility which require them to observe the highest ethical standards. Practices which may be accepted in the private business world are not necessarily acceptable for Naval personnel. Acceptance of favors, gratuities, or entertainment (no matter how innocently tendered or received) from those who have or seek business dealings with the Department of the Navy may be a source of embarrassment to the Department and to the Naval personnel involved, may affect the objective judgment of the recipient, and may impair public confidence in the integrity of business relations between the Department and industry.

(c) No person shall allow himself to be placed in a position in which a conflict of interests might arise or might justifiably be suspected. Such a conflict of interests may arise or appear to arise by reason of the acceptance of favors, gratuities, or entertainment of any kind or by any other action which could influence or be reasonably interpreted as influencing the strict impartiality that must prevail in all business relationships in which the public interest is involved. Favors, gratuities, or entertainment bestowed upon the families of Naval personnel shall be considered in the same light as those bestowed upon Naval personnel.

(d) Where there is a reasonable doubt as to the propriety of accepting favors, gratuities, or entertainment or of attending functions or accepting other invitations of a hospitable nature, Naval personnel shall refrain therefrom.

(e) Special treatment shall not be accorded to particular individuals or firms unless equivalent treatment is also accorded to other individuals or firms justifiably entitled thereto.

§ 721.4 Gratuities.

(a) Section 137.5 of this title, relating to gratuities, is applicable to Naval personnel as defined in § 721.2.

(b) Gratuities, as dealt with in § 137.5 of this title, include tangible items, intangible benefits, discounts, tickets, passes, transportation, accommodations, or hospitality, given or extended to or on behalf of the recipient. The following are not considered to be gratuities within the meaning of that section:

(1) Specialty advertising items of trivial intrinsic value.

(2) Customary exchange of social amenities between personal friends and relatives when motivated by such relationship and extended on a personal basis.

(3) Things available impersonally to the general public, such as a free exhibition by a defense contractor at a World's Fair.

(4) Trophies, entertainment, rewards and prizes given to competitors in contests which are open to the public or which are officially approved for participation by Naval personnel.

(5) Transactions between and among relatives which are personal and consistent with the relationship.

(6) Social activities engaged in by officials of the Department and officers in command or their representatives with local civilian leaders as part of community relations programs.

(7) Contractor-provided local transportation while on official business and when alternative arrangements are clearly impractical.

(8) Civic and community relations activities of Naval personnel where the relationship with a defense contractor can reasonably be characterized as remote, for example, participation in a Little League or Community Chest report luncheon which is subsidized by a concern doing business with a Naval activity.

(c) Section 137.5(a)(1) of this title permits the participation of Naval personnel in widely attended lunches, dinners, and similar gatherings sponsored by industrial, technical, and professional associations, the memberships of which may include defense contractors or their representatives, for the discussion of matters of mutual interest to Government and industry where the interests of the Government would be served by such participation, and where the host is the association rather than any contractor. Such associations include defense—oriented associations such as the Navy League, together with service, fraternal and civic clubs and associations, whose membership may also embrace defense contractors or their representatives. Acceptance of entertainment or hospitality from private companies or their representatives in connection with such association activities is prohibited.

(d) Section 137.5(a)(2) of this title permits the participation of Naval personnel in certain activities at the expense of individual defense contractors where the interests of the Government will be served. In addition to the events there enumerated, permission for such participation also includes the dedication or opening of major buildings or facilities, the unveiling of new aircraft, and the like, and the customary related social activities.

(e) When, in the exercise of sound judgment, Naval personnel determines that the Government's interest would be served by participation in activities, other than those within the purview of § 137.5(a)(1) and (2) of this title as implemented by this part, such person may participate in such activity. However, if he accepts any favor, gratuity, or entertainment directly or indirectly from any person, firm, corporation or other entity which is engaged or is endeavoring to engage in business transactions with the Department of Defense, a report of such acceptance shall be made in writing within 48 hours to his commanding officer or the chief or head of his bureau or office, or their designee, for review and disposition. The report will identify the favor, gratuity or entertainment, when and where and from whom received, and will describe the circumstances. Each individual is expected to use sound judgment in determining initially whether his conduct in a given case falls within the contemplation of § 137.5(a)(1), (2), or (3) of this title as implemented by this part and to take personal responsibility for making a report when required.

§ 721.5 Transportation and accommodations on official business.

Naval personnel on official business may not, except as provided in § 721.4(b)(7), accept contractor-provided transportation or overnight accommodations in connection with such official business if Government transportation or quarters, or regular commercial transportation or commercial overnight accommodations, are reasonably available. Where, however, the over-all Government interest would be served by acceptance by Naval personnel of such transportation or accommodations in specific cases, the chief or head of a bureau or office or his principal assistant may authorize it.

§ 721.6 Action.

(a) The Under Secretary of the Navy is assigned responsibility for the coordination of action relating to standards of conduct of Naval personnel.

(b) With respect to the disqualification procedure set forth in § 137.12(a)(4) of this title, the official in the Department of the Navy authorized to make a determination pursuant to Title 18, United States Code, section 208(b), shall be the head of the bureau, office, or activity in which the officer or employee concerned is assigned for duty.

(c) The Comptroller of the Navy shall advise all Regular Navy retired officer personnel of the continuing requirement for submitting a Statement of Employment and provide DD Form 1357 for that purpose. The Commandant of the Marine Corps shall provide similar assistance to Regular Marine Corps retired officer personnel.

(d) The Chief of Naval Personnel or the Commandant of the Marine Corps, as appropriate, shall provide all regular officer personnel retiring hereafter with instructions for filing DD Form 1357 within 30 days after retiring and as their employment status changes.

(e) The Comptroller of the Navy or the Commandant of the Marine Corps, as appropriate, shall review all Statements of Employment filed by retired officers of the Regular Navy and Marine Corps to ensure compliance with applicable laws and regulations.

(f) The Chief of Industrial Relations shall incorporate the provisions of Part 137 of this title concerning advisers and consultants in appropriate Navy Civilian Personnel Instructions. He is also designated the officer to coordinate the classification of employees as "full time" or "part time" as required by paragraph (d) of the President's Memorandum of May 2, 1963, 28 F.R. 4539 at page 4541 (3 CFR, 1959–1963 Comp. p. 834, at p. 837).

(g) The Judge Advocate General and the General Counsel of the Navy shall provide legal advice, within their respective areas of jurisdiction, with regard to any questions which may arise under this part. In addition, the Judge Advocate General and the General Counsel of the Navy are designated as the legal officers who shall review Statements of Employment and Financial Interests filed by advisers and consultants. The General Counsel shall review statements submitted by advisers and consultants employed in matters involving logistics and procurement, property disposition, and other matters under the assigned jurisdiction of the General Counsel. The Judge Advocate General shall review statements submitted by advisers and consultants employed in respect to all other matters.

(h) All Chiefs and heads of bureaus and offices and all commanding officers shall disseminate SECNAV Instruction 5370.2C (incorporated in this part) within their organizations or commands, shall ensure that Naval personnel within their organizations or commands are familiar with its provisions, and shall arrange for informing new personnel of its provisions. Periodically, they shall utilize the opportunity afforded by staff meetings to direct attention to the policies set forth in that Instruction, and they shall bring these policies to the attention of all personnel at least semi-annually. Individuals requiring advice on the application of that Instruction to a particular case should consult the legal office providing legal service to their command or organization.

(i) The Chief of Naval Material is directed to transmit a copy of SECNAV Instruction 5370.2C (incorporated in this part) to the principal officer of each contractor doing significant business with the Navy, together with a request that the policies stated therein be brought to the attention of the appropriate contractor personnel. Chiefs and heads of bureaus and offices, commanding officers, and other senior officials shall periodically utilize the opportunity afforded by conferences with representatives of industry to direct attention to the policies set forth in that Instruction.

(j) Corrective measures, including disciplinary action when appropriate, shall be taken whenever it is determined that there has been a violation of SECNAV

Instruction 5370.2C (incorporated in this part).

By direction of the Secretary of the Navy.

[SEAL] WILFRED HEARN,
*Rear Admiral, U.S. Navy, Judge Advocate General of the Navy.*

DECEMBER 10, 1964.

# Title 50—WILDLIFE AND FISHERIES

## Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

## PART 33—SPORT FISHING

### Rice Lake and Tamarac National Wildlife Refuges, Minnesota

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

**§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.**

MINNESOTA

RICE LAKE NATIONAL WILDLIFE REFUGE

Sport fishing on the Rice Lake National Wildlife Refuge, Minnesota, is permitted only on the areas designated by signs as open to fishing. This posted area comprising 5,000 acres or 100 percent of the refuge water area is delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1006 West Lake Street, Minneapolis, Minn., 55408. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for sport fishing on the refuge extends from date of this publication through February 15, 1965, during daylight hours only.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife areas generally which are set forth in Title 50, Part 33, and are effective through February 15, 1965.

TAMARAC NATIONAL WILDLIFE REFUGE

Sport fishing on the Tamarac National Wildlife Refuge, Minnesota, is permitted only on the areas designated by signs as open to fishing. This posted area comprising 9,300 acres or 60 percent of the total refuge water area is delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1006 West Lake Street, Minneapolis, Minn., 55408. Sport fishing shall be in accordance with all applicable State regulations subject to the following special condition:

(1) The open season for sport fishing on the refuge extends from date of this publication through February 15, 1965, during daylight hours only.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife areas generally which are set forth in Title 50, Part 33, and are effective through February 15, 1965.

R. W. BURWELL,
*Regional Director, Bureau of Sport Fisheries and Wildlife.*

DECEMBER 8, 1964.

[F.R. Doc. 64-12869; Filed, Dec. 15, 1964; 8:46 a.m.]

## PART 33—SPORT FISHING

### Horicon and Necedah National Wildlife Refuges, Wisconsin

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

**§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.**

WISCONSIN

HORICON NATIONAL WILDLIFE REFUGE

Sport fishing on the Horicon National Wildlife Refuge, Wisconsin, or an area comprising 250 acres or 1.2 percent of the total water area of this refuge is permitted only on the areas designated by signs as open to fishing. The open area is delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1006 West Lake Street, Minneapolis, Minn., 55408. Sport fishing shall be in accordance with all applicable State regulations subject to the following condition:

(1) Open season: Daylight hours December 15, 1964, through March 15, 1965.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through March 15, 1965.

NECEDAH NATIONAL WILDLIFE REFUGE

Sport fishing on the Necedah National Wildlife Refuge, Wisconsin, or an area comprising 500 acres or 10 percent of the total water area of this refuge is permitted only on the areas designated by signs as open to fishing. The open area is delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1006 West Lake Street, Minneapolis, Minn., 55408. Sport fishing shall be in accordance with all applicable State regulations subject to the following condition:

(1) Open season: Daylight hours December 15, 1964 through March 15, 1965.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through March 15, 1965.

R. W. BURWELL,
*Regional Director, Bureau of Sport Fisheries and Wildlife.*

DECEMBER 8, 1964.

[F.R. Doc. 64-12870; Filed, Dec. 15, 1964; 8:46 a.m.]

## PART 33—SPORT FISHING

### Union Slough National Wildlife Refuge, Iowa

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

**§ 33.5 Special regulations; sport fishing; for individual wildlife refuge area.**

IOWA

UNION SLOUGH NATIONAL WILDLIFE REFUGE

Sport fishing on the Union Slough National Wildlife Refuge, Iowa, is permitted only on the area designated by signs as open to fishing. This open area comprising 6 acres or one percent of the total water area of the refuge is delineated on a map available at refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1006 West Lake Street, Minneapolis, Minn., 55408. Sport fishing shall be in accordance with all applicable State regulations subject to the following special condition:

(1) The open season for sport fishing on the refuge extends from January 2, 1965 through March 15, 1965 during daylight hours only.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Part 33, and are effective through March 15, 1965.

R. W. BURWELL,
*Regional Director, Bureau of Sport Fisheries and Wildlife.*

DECEMBER 8, 1964.

# Title 7—AGRICULTURE

## Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Tree Nuts), Department of Agriculture

[Navel Orange Reg. 62, Amdt. 1]

## PART 907 — NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

### Limitation of Handling

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907; 27 F.R. 10087), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges as hereinafter provided will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 1001-1011) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of Navel oranges grown in Arizona and designated part of California.

(b) *Order, as amended.* The provisions in paragraph (b) (1) (i) of § 907.362 (Navel Orange Regulation 62, 29 F.R. 16315) are hereby amended to read as follows:

**§ 907.362 Navel Orange Regulation 62.**

* * * * * * *

(b) * * *

(1) * * *

(i) District 1: 1,600,000 cartons.

* * * * * * *

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: December 11, 1964.

PAUL A. NICHOLSON,
*Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

[F.R. Doc. 64-12877; Filed, Dec. 15, 1964; 8:47 a.m.]

## Chapter X—Agricultural Marketing Service (Marketing Agreements and Orders; Milk), Department of Agriculture

[Milk Order No. 136]

## PART 1136—MILK IN GREAT BASIN MARKETING AREA

### Order Suspending Certain Provisions

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Great Basin marketing area (7 CFR Part 1136), it is hereby found and determined that:

a. The following provisions of the order no longer tend to effectuate the declared policy of the Act for the period January 1, 1965, through July 31, 1965.

In § 1136.11(a) the following provisions:

1. "50 percent in the months of August through March and"

2. "in other months"

3. "producer milk diverted therefrom by the plant operator".

The suspension of these provisions will result in § 1136.11(a) reading as follows:

**§ 1136.11 Pool plant.**

* * * * * * *

(a) An approved plant, except the plant of a producer-handler as described in § 1136.8, from which during the month there is disposed of on routes fluid milk products equal to not less than 40 percent of the receipts during the month at such plant of producer milk and receipts at the plant of fluid milk products from plants described pursuant to paragraph (b) of this section, and there are disposed of on routes in the marketing area fluid milk products equal to not less than 15 percent of the total fluid milk product disposition from the plant on routes: *Provided,* That if a handler operates more than one approved plant, the combined receipts and disposition of any of such plants may be used as the basis for qualifying the respective plants pursuant to the preceding computations specified in this paragraph if the handler in writing so requests the market administrator: *And provided further,* That any approved plant from which the total route disposition of fluid milk products is to individuals or institutions for charitable purposes and is without remuneration from such individuals or institutions shall not qualify as a pool plant pursuant to this paragraph.

* * * * * * *

b. Notice of proposed rule making, public procedure thereon, and 30 days notice of the effective date hereof are impractical, unnecessary, and contrary to the public interest in that:

1. This suspension order does not require of persons affected substantial or extensive preparation prior to the effective date.

2. This suspension order is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area.

3. The suspension order will reduce for the months of January through July 1965 requirements for pool plant qualification of distributing plants. The order provides that 50 percent of receipts of producer milk, including milk diverted by the plant operator, but excluding pool milk receipts for which another cooperative association is the handler, must be disposed of on routes during August through March and 40 percent in all other months. This action reduces the percentage requirement to 40 percent for all months and eliminates producer milk diverted to nonpool plants from the computation.

Proponents state that the conditions which necessitated suspension of the same provisions during the calendar year 1964 continue to exist and will continue during the foreseeable future. The merger of two cooperative associations, Weber Central Dairy Association and Federated Milk Producers Association, on January 1, 1964, has made it difficult, if not impossible, for such association to meet the present requirements necessary to maintain pool plant status for all its plants which have been pool plants in the past. This is due to the fact that certain milk for which one of the associations comprising the merger had heretofore been the handler when such milk was delivered to or diverted from a plant operated by the other member of the merger has now become producer milk of the merged association. The present pool plant standards were based on these associations operating as separate units, but with the merger of the associations these provisions no longer achieve the results intended.

4. This suspension action is based on a request by Federated Dairy Farms, Inc., the merged association, and Hi-Land Dairyman's Association. Members of these two cooperative associations supply in excess of 90 percent of the fluid milk requirements of handlers in the Great Basin marketing area. The suspension will permit dairy farmers who have supplied the fluid requirements of the market to continue as producers under the order. These associations have also proposed amendments to the pool plant standards. The period of suspension will provide opportunity for consideration of amendment action based on a public hearing.

Therefore, good cause exists for making this order effective January 1, 1965.

*It is therefore ordered,* That the aforesaid provisions of the order are hereby suspended for the period January 1, 1965, through July 31, 1965.

Effective date: January 1, 1965.

Signed at Washington, D.C., on December 11, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

# Proposed Rule Making

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### [ 7 CFR Part 26 ]

### WHEAT

### Proposed Official Grain Standards

Pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 1003), notice is hereby given that the United States Department of Agriculture has under consideration a proposed amendment of § 26.127(a) of the Official Grain Standards of the United States for Wheat (7 CFR 26.101 et seq.) promulgated under authority of the United States Grain Standards Act, 39 Stat. 482, as amended (7 U.S.C. 71 et seq.).

The United States Grain Standards Act requires that public notice be given of any amendment of the standards not less than 90 days in advance of the effective date of such amendment. If said § 26.127(a) is amended, it is the intent that the amendment will be made effective on or about June 1, 1965.

Public hearings will not be held, but all persons who desire to submit written data, views, or recommendations in connection with this proposal shall file the same in quadruplicate with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C., 20250, not later than January 15, 1965. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

*Statement of considerations.* The wheat standards were last revised to become effective June 1, 1964. Among the changes was the establishment of grade limits for contrasting classes. Shortly after the 1964-wheat harvest began in the Pacific Northwest, complaints on the downgrading of wheat because of contrasting classes were received. At the request of wheat growers and others, the Department conducted a series of meetings in Idaho, Oregon, and Washington during September to discuss the effect of the revised wheat standards. The problem was found to be acute in White Wheat in a few counties in Idaho, Oregon, and Washington, where both White Wheat and Hard Red Winter Wheat are grown on the same or adjacent farms.

Information from inspection records has been analyzed to appraise the effect of the contrasting classes limitation on the grades of White Wheat in the Pacific Northwest. Most of the inspections were on farmers' wheat at time of delivery to country elevators. The results of about 14,000 inspections performed between July 15 and August 27, 1964, were as follows:

GRADE OF WHITE WHEAT BASED ONLY ON CONTRASTING CLASSES

| Grade | Actual grade of 1964 crop | | | Adjusted grade of 1964 crop under proposed revision | | |
|---|---|---|---|---|---|---|
| | Idaho | Oregon | Washington | Idaho | Oregon | Washington |
| | 1 | 2 | 3 | 4 | 5 | 6 |
| | *Percent* | *Percent* | *Percent* | *Percent* | *Percent* | *Percent* |
| No. 1 | 92 | 92 | 93 | 94 | 94 | 95 |
| No. 2 | 1 | 1 | 2 | 3 | 3 | 2 |
| No. 3 or lower | 7 | 7 | 5 | 3 | 3 | 3 |
| Total | 100 | 100 | 100 | 100 | 100 | 100 |

A recent survey of the flour milling industry indicates that the presence of contrasting classes in wheat up to about 1.0 percent cannot usually be detected in the quality of the final product made from the wheat. The experience of the milling industry in regard to contrasting classes is supported by experimental research by some State agricultural experiment stations, and the U.S. Department of Agriculture. The limited research that has been done by these agencies indicates that the quality of the end product from wheat is affected by contrasting classes only when present in quantities above about 1.0 percent.

Because of the above circumstances it was decided to propose that the percentage of contrasting classes in grades No. 1, No. 2, and No. 3 be changed from 0.5, 1.0, and 2.0 percent to 1.0, 2.0, and 3.0 percent, respectively.

The proposed amendment is as follows:

In § 26.127(a) under the factor "contrasting classes" the percentages for grades No. 1, No. 2, and No. 3 would be changed from 0.5, 1.0, and 2.0 to 1.0, 2.0, and 3.0, respectively.

Section 26.127(a) would then read as follows:

**§ 26.127 Numerical grades and sample grade and grade requirements.**

(a) *Numerical grades and sample grade and grade requirements for all classes of wheat except mixed wheat.* (See also § 26.128.)

| Grade | Minimum test weight per bushel | | Maximum limits of— | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | | Defects | | | | | Wheat of other classes[1] | |
| | Hard Red Spring Wheat | All other classes | Heat-damaged kernels | Damaged kernels (total) | Foreign material | Shrunken and broken kernels | Defects (total) | Contrasting classes | Wheat of other classes (total) |
| | *Pounds* | *Pounds* | *Percent* | *Percent* | *Percent* | *Percent* | *Percent* | *Percent* | *Percent* |
| 1 | 58.0 | 60.0 | 0.1 | 2.0 | 0.5 | 3.0 | 3.0 | 1.0 | 3.0 |
| 2 | 57.0 | 58.0 | 0.2 | 4.0 | 1.0 | 5.0 | 5.0 | 2.0 | 5.0 |
| 3 | 55.0 | 56.0 | 0.5 | 7.0 | 2.0 | 8.0 | 8.0 | 3.0 | 10.0 |
| 4 | 53.0 | 54.0 | 1.0 | 10.0 | 3.0 | 12.0 | 12.0 | 10.0 | 10.0 |
| 5 | 50.0 | 51.0 | 3.0 | 15.0 | 5.0 | 20.0 | 20.0 | 10.0 | 10.0 |

[1] Red Durum Wheat of any grade may contain not more than 10.0 percent of wheat of other classes.

Sample grade: Sample grade shall be wheat which does not meet the requirements for any of the grades from No. 1 to No. 5 inclusive; or which contains stones; or which is musty, or sour, or heating; or which has any commercially objectionable foreign odor except of smut or garlic; or which contains a quantity of smut so great that any one or more of the grade requirements cannot be applied accurately; or which is otherwise of distinctly low quality.

Done at Washington, D.C., this 10th day of December 1964.

G. R. GRANGE,
*Deputy Administrator,*
*Marketing Services.*

[Docket Nos. AO-319-A5, AO-33-A30]

## MILK IN INDIANAPOLIS, INDIANA, AND FORT WAYNE, INDIANA, MARKETING AREAS

### Decision on Proposed Amendments to Tentative Marketing Agreements and to Orders

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Indianapolis, Indiana, on September 24, 1964, pursuant to notice thereof issued on September 8, 1964 (29 F.R. 12875).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Regulatory Programs, on November 17, 1964 (29 F.R. 15647; F.R. Doc. 64-11908) filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision (29 F.R. 15647; F.R. Doc. 64-11908) are hereby approved and adopted and are set forth in full herein subject to the following modifications:

Under the subheading 2, *Supply-demand adjustor to Class I prices,* the following changes are made:

1. In the eighth paragraph the schedule is revised and in the sentence immediately preceding the schedule the figure is changed from 73.5 to 73.25.

2. The nineteenth paragraph is deleted and three new paragraphs are added.

3. The twenty-fifth and twenty-sixth paragraphs are deleted and a new paragraph is added.

The material issues on the record of the hearing relate to the pricing of Class I milk in the two markets, as follows:

1. Levels and relationship of Class I price differentials;

2. Adoption of a common supply-demand "adjustor"; and

3. Modification of Class I butterfat differentials.

*Findings and conclusions.* The following findings and conclusions on the material issues are based on evidence presented at the joint hearing and the record thereof:

1. *Levels and relationship of Class I price differentials.* The stated Class I price differentials of the Indianapolis, Indiana, and Fort Wayne, Indiana, milk orders ($1.27 and $1.20 per hundredweight, respectively, over the basic formula price for the preceding month) should be continued at present levels. A common supply-demand "adjustor" to the Class I price differentials of both orders should be provided.

An amendment to the Indianapolis order effective June 1, 1963, based upon a hearing held in Indianapolis, Indiana, January 30–February 1, 1962, provided for the present level of stated Class I differential. In rendering his decision in the matter of the appropriate level of Class I prices, the Assistant Secretary concluded (in part) at that time, as follows:

"In these circumstances it would not be appropriate to provide the Class I price increase proposed by producers. Nor in view of the extensive expansion of the marketing area herein recommended is it appropriate to reduce the present level. A reasonable period of time should be allowed to elapse under the new supply-demand conditions before considering any modification of the present Class I price. Deferring action on the Class I price for a period of 18 months will allow sufficient time to accumulate data on supply-demand conditions in the expanded area on which to establish the Class I price level. Consideration could then be given to the need for automatically adjusting the Class I price as supplies vary in relation to demand as well as to the problem of intermarket price alignment. The Class I price herein recommended will provide appropriate price alignment in portions of the expanded market until appropriate review of the price structure can be considered at a subsequent hearing."

Similarly, in an amendment to the Fort Wayne, Indiana, order effective June 1, 1963, and based upon a hearing held at Fort Wayne, Indiana, March 5, 1963, it was concluded by the Secretary, in part, as follows:

"The present Class I price of $1.20 over the basic formula price should be continued through December 31, 1964. This will insure proper alignment of the Fort Wayne Class I price with that of Indianapolis and other nearby markets until it can be reviewed at a future hearing." It was concluded further that: "The present Fort Wayne Class I price, therefore, should be extended for an additional 21-month period. Such an extension will permit review of the Fort Wayne Class I price at approximately the same time as that of the Indianapolis market in the third or fourth quarter of 1964."[1]

Producer cooperatives, representing a large majority of producers supplying both the Indianapolis, and Fort Wayne, Indiana, markets, join currently in proposing continuance of the present Class I price differentials ($1.27 and $1.20, respectively) under the two orders. The associations also suggest a formula for the supply-demand adjustment of prices under each of the orders based upon the Class I sales and producer receipts of the two markets in combination in the event of a determination that such automatic adjustment of future prices is appropriate.

Proponent producers testified that the respective stated differentials in the Indianapolis and Fort Wayne orders are reasonable minimums (over the basic formula price) both from the point of view of maintaining an adequate supply for the market and in recognition of the close competitive relationships which exist not only between handlers in the two markets but also between such handlers of both markets and handlers in the nearby Louisville-Lexington-Evansville, Dayton-Springfield, and Greater Cincinnati markets. Producers alleged that the 7-cent difference in stated Class I differentials of the two orders has had no disturbing influence in the markets, and that under such relationship of Class I prices producers under both orders had retained their Class I sales outlets. They contended further that the history of both markets justifies continuation of the present differentials since the supply of milk in each market is not excessive.

Handlers also generally supported continuation of the present levels and spread in the Class I stated differentials but generally objected to any increase in such differentials by means of a supply-demand adjustor. Their testimony was offered primarily in support of the proposition that current supplies for these markets are adequate. However, one handler operating a plant located in Howard County, Indiana, one of the northern tier of counties in the Indianapolis marketing area, also proposed that: (1) The pricing structure in the Indianapolis order and Fort Wayne order be the same, and (2) the Class I price be such that it will help dairy farmers in this area maintain their own markets and be "competitive." He contended that several Indianapolis handlers located on the fringe of the Indianapolis marketing area adjacent to the boundary of the Fort Wayne marketing are are disadvantaged in their resale competition with Fort Wayne handlers because of the 7-cent difference in Class I prices under the two orders. He further contended that Chicago milk has started to move into the area and cited, as an example, the case of an operator of a small chain of grocery stores in north central Indiana who recently contracted to purchase packaged milk from a Chicago handler.

The production of milk for the two markets in combination is in reasonable balance with Class I sales. Class I sales and producer receipts both have increased in the Indianapolis and Fort Wayne markets in 1962 and 1963. The percentage of producer milk utilized as Class I milk, however, has remained about the same in the Indianapolis market over this two-year period, averaging on an annual basis, 75.38 percent and 75.53 percent, respectively.[2] With respect to the Fort Wayne market, for which market data are available for the three-year period, 1961–1963, the percentage of producer milk utilized as Class I has varied one year to the next over a wider range (71.4, 78.4 and 74.2 percent in 1961, 1962 and 1963, respectively) and has averaged 74.66 percent for the three-year period.

Both Indianapolis and Fort Wayne have operated, therefore, on an annual average reserve supply of about 25 percent of producer receipts which, as testified by both producers and handlers, does not indicate oversupply under present-day conditions particularly with respect to intraweek bottling and distribution patterns. Current supplies are utilized primarily to cover local needs since there are no substantial bulk fluid milk shipments from these markets to neighboring or more distant markets.

Moreover, there is no evidence on the record that fluid milk from the Chicago or any other market has come into the Indianapolis order market at a price f.o.b. market below the minimum Class I price which handlers under the latter order are required to pay. Several tank loads of milk were received in the Indianapolis market from a Chicago order plant during September this year. The indicated cost of such milk was well in excess of the September minimum Class I price of

[1] Official notice is taken of the respective decisions (28 F.R. 4901, F.R. Doc. 63-5247 and 28 F.R. 4305, F.R. Doc. 63-4603).

[2] The order became fully effective March 1961 which does not permit this comparison over a three-calendar-year period.

$4.42 per hundredweight under the Indianapolis order. In this connection official notice is taken of the September 1964 market administrator's price report for the Indianapolis market.

The present stated Class I differentials of the two orders are presently at an appropriate level and are reasonably aligned one market with the other and with nearby markets. There was no evidence which would show that unstable marketing conditions have resulted from the difference of 7 cents in price which has prevailed. The Class I differentials in the two orders should not be changed, therefore, other than as may be appropriate because of significant future changes in supplies in relation to market requirements. The continuation of these differentials, together with the adoption of a supply-demand factor in the pricing mechanism (discussed later), in conjunction with Class II prices, should result in returns to producers in each market sufficient to maintain an adequate but not excessive supply of milk to meet the fluid requirements of the respective markets, including the necessary market reserve.

2. *Supply-demand adjustor to Class I prices.* A common supply-demand formula based upon the sales-receipts relationship of the two markets in combination should be employed as the method of adjusting Class I prices in both markets to changing conditions of supply and demand.

Producers suggested a type of supply-demand formula for common use in both markets in the event of a determination that such a method of adjusting prices should be adopted. They gave recognition to the validity of providing an automatic adjustor to the Class I price differential to maintain a proper balance between producer receipts and Class I requirements, but expressed concern that a supply-demand adjustment provision, if not carefully constructed, might result in erratic pricing and in an unwarranted disturbance of intermarket price alignment.

A handler witness speaking for seven handlers regulated under the Indianapolis order expressed opposition to the inclusion of a supply-demand factor in the Class I pricing provisions of such order. These handlers jointly proposed a separate supply-demand adjustment provision for consideration, however, in the event of a finding that such an adjustor should be adopted.

The purpose of a supply-demand adjustment provision is to adjust promptly the minimum Class I price upward or downward as the supply of producer milk changes in relation to Class I sales. This purpose is consistent with the criteria of the Agricultural Marketing Agreement Act, as amended, which provides that the prices to be fixed under the authority of such act shall be those which are reasonable in view of market supply and demand conditions and which will assure a sufficient quantity of pure and wholesome milk and be in the public interest. The automatic adjustment of Class I prices in response to changes in the relation between supplies and Class I sales will assist to carry out in these markets the purposes of the act through stabilization of supplies at the levels required. Failure to adjust the Class I price promptly in response to market supply and demand conditions could produce price levels which would encourage either inadequate or excessive supplies of milk in relation to demand. Supply-demand formula provisions have not been employed previously in these markets because of lack of data on which such a pricing mechanism could be constructed. Adequate data regarding production and sales in each of the two markets are now available.

Producers proposed a supply-demand formula which would:

(1) Provide a formula for measuring changes in supply-demand relationships of the two markets which employs the Class I sales and producer receipts of both markets.

(2) Provide for identical Class I price adjustments based upon comparison of the ratio of combined sales to combined receipts for a period covering the second and third (or, alternatively, the second, third and fourth) months preceding the pricing month (current utilization percentage) with a standard utilization percentage (four-point range) or "norm" applicable for the pricing month. The individual monthly ranges of norms would reflect on an annual basis 70–74 percent Class I utilization.

(3) Provide for a price adjustment, upward or downward, at the rate of two cents for each percentage point of deviation of the current utilization percentage above or below the norm.

(4) Limit the maximum amount of adjustment to 20 cents per hundredweight.

In suggesting use of a common formula, producers stressed the importance of Class I price changes taking place at the same time and by the same amount in each market. They stated that this is necessary to avoid erratic pricing and to maintain proper Class I price alignment between the two markets and in relationship to adjacent markets. They contended that small changes in the relative prices of the two market orders could cause unwarranted shifting of milk supplies. In this connection, they pointed out that: (1) Bulk milk handling, together with recent improvements in highway systems, make such movements between the markets relatively easy; (2) The transfer of producers from one market to the other is not impeded by differences in health requirements of the markets; and (3) The procurement areas of handlers regulated under the two orders overlap in several counties.

The supply-demand formula suggested by handlers was generally the same as proposed by producer groups, the principal differences being in the level at which the norms were established and the maximum amount by which the adjustor may affect the Class I price. Although handlers proposed that consideration be given to the use of either a recent two or three-month period for computing the current utilization percentage (mover), they expressed a preference for the three-month mover in that it would minimize any erratic price adjustments which might otherwise be brought about by the action of the adjustor.

The supply-demand formula adopted herein to be applicable under both orders provides for:

(1) The following schedule of standard utilization percentages (norms) which average 73.25 percent (midpoint of range) of producer milk in Class I to producer receipts on an annual basis:

| Month for which pricing is being computed | Preceding months used in computation | Standard utilization percentages | |
|---|---|---|---|
| | | Minimum | Maximum |
| Jan | Sept., Oct., Nov. | 79 | 89 |
| Feb | Oct., Nov., Dec. | 78 | 81 |
| Mar | Nov., Dec., Jan. | 77 | 80 |
| Apr | Dec., Jan., Feb. | 76 | 79 |
| May | Jan., Feb., Mar. | 76 | 79 |
| June | Feb., Mar., Apr. | 73 | 76 |
| July | Mar., Apr., May | 69 | 72 |
| Aug | Apr., May, June | 64 | 67 |
| Sept | May, June, July | 62 | 65 |
| Oct | June, July, Aug. | 64 | 67 |
| Nov | July, Aug., Sept. | 68 | 71 |
| Dec | Aug., Sept., Oct. | 75 | 78 |

(2) "Current utilization percentages" to be based upon aggregate producer receipts in the two markets and producer milk classified as Class I milk therein for a three-month period ending with the second month preceding the pricing month;

(3) Adjustments to the Class I price for each market at the rate of two cents for each full percentage point of deviation of the applicable current utilization percentage for the month from the norm (range) for such month;

(4) A maximum of plus or minus 38 cents on the amount of supply-demand adjustment.

These two markets are in close competition in both milk procurement and milk distribution. The procurement areas of handlers regulated under the two orders overlap in several counties. Transferring producers from one market to the other is not impeded by differences in health requirements of the markets. The high degree of bulk milk handling and good highway conditions make intermarket movements relatively easy. At the present time, however, available milk supplies are reasonably allocated in relation to the sales levels of the two markets.

Also, there is close competition for Class I sales between handlers under the two orders. At present there are five Indianapolis handlers who regularly sell milk on routes in the Fort Wayne marketing area and four Fort Wayne handlers who sell in the Indianapolis marketing area. The shift of a large account, such as a chain of food markets or dairy stores, from a handler in one market to a handler in the other, may cause the handler to be regulated by one order in a given month and by the other order the next month since the regulation applicable to him is determined on the basis of his relative proportion of Class I sales in each marketing area. Such shifts in suppliers can occur readily under today's distribution conditions. When shifts in suppliers are made across individual market lines or retail routes are established in one market by a handler from the other, a significant change in the production-sales relationship of each market can be effected without any basic change in the aggregate supplies or sales associated with such markets.

In view of the foregoing, it is highly important, therefore, to avoid erratic price movements between these two markets. Relatively small changes in the prices of these markets if in opposite directions could cause unwarranted shifting of producer milk supplies or provide price advantage in sales competition. The adoption of a common supply-demand adjustor which will provide for identical monthly Class I price adjustments for the two markets will insure against diverse movements in prices in these markets and maintain an appropriate Class I price alignment between the two and in relationship to adjacent markets.

Under the formula proposed for adoption herein the respective Class I price differentials for the two markets would be adjusted for significant changes in the relationship of current utilization percentage outside the applicable monthly norms as shown in the above schedule. The norms, or individual monthly ranges, are derived from experience in both markets for the period of March 1961 (the fully effective date of the inception of the Indianapolis order) through August 1964. They vary seasonally in recognition of the seasonality in the relationship of milk production to Class I sales in the two markets.

The current utilization percentage would be constructed on the receipts and disposition of the three months preceding the pricing month. For example, the percentage applicable for the month of January would be based on the percentage of Class I utilization for the preceding September, October and November period. These months would be the latest for which data are available to permit announcement of the price adjustment early in the month for which it is effective.

Use of data for a three-month period, rather than for a two-month period will minimize sporadic changes in the Class I price which otherwise might be induced simply by variation in the number of heavy bottling days in the period used to compute the mover. The heaviest purchases of fluid milk by consumers in these markets tend to occur on Thursdays, Fridays and Saturdays. As a consequence, plants have their heaviest needs for raw milk supplies on Tuesday through Friday of each week. One handler regulated under the Indianapolis order, for example, bottles 80 percent of his weekly Class I sales during the four-day period Tuesday-Friday and 20 percent of the remaining weekly sales on Mondays and Saturdays based on March 1964 figures. No milk is bottled on Sundays at the plant of this handler. Using data for a three-month period reduces the effect of variations in the number of heavy bottling days from one month to the next on the utilization percentages in the formula as compared with data based on a two-month period. The three-month mover also will tend to minimize other unwarranted changes in the Class I price resulting from such occurrences as holidays and abnormal weather conditions of a short-run nature.

The producers' formula would include fluid milk products disposed of in the respective marketing areas from all nonpool plants, except plants of producer-handlers. It would include also the pounds of Class I milk in inventory and "overages". The inclusion in the supply-demand formula of sales in these markets from nonpool plants would not contribute, however, to the accuracy with which the supply-demand adjustor reflects meaningful changes in the supply-demand situation at plants which utilize the milk which it is designed to price. Sales of nonpool milk in the market as Class I are not necessarily reflective of the regular demand for, or the regular supply of, producer milk associated with these two markets. Producers stated they had no important objection to the exclusion of "other source receipts" from the current utilization percentages provided the norms likewise were constructed on this basis. The considerable variation, month to month, which occurs in these markets with respect to inventory and overage also warrants the exclusion of these data from use in the formula at this time. The receipts of producer milk and the pounds of producer milk disposed of as Class I by handlers regulated in the two markets will provide a reasonable measure of changes in the supply-demand situation.

The use of a range in the monthly norms tends to act as a "dampener" on random price changes which, at times, might otherwise be possible. The four-point percentage range in the monthly norms suggested by both handlers and producers, together with a provision to compute a current utilization percentage to the nearest full percentage point, would provide a "corridor" of five percentage points within which no price adjustment would be called for.

Although it is desirable to avoid random movements to whatever extent practicable, it is not, however, appropriate in avoiding these movements to minimize the effectiveness of the adjustor in responding to real changes in the supply-demand situation. Provision is made in the schedule of standard utilization percentages for monthly ranges having a width of three percentage points. Price adjustments resulting from deviations of the current utilization percentage outside the monthly range would be computed on the basis of full percentage points of such deviation. The three-point range, therefore, together with provision for rounding the current utilization percentage to the nearest full percentage point, in effect provides a "corridor" of four percentage points by which the current utilization percentage may deviate from the norms without effecting a price adjustment. Such a range will permit adjustment of the Class I price more promptly and accurately in response to significant changes in the combined supply-demand relationship in the two markets.

Although Class I utilization in the two markets on an aggregate sales-receipts basis has averaged approximately 75 percent for the two-year period 1962–1963, the trend in recent months indicates some tendency toward an increase in supplies in relation to sales of fluid milk products. For example, during the first seven months of 1964 (January–July) Class I utilization on a combined market basis averaged 70.1 percent of producer receipts. During the same period in 1963 and 1962 the Class I utilization averaged 72.7 and 73.7, respectively. The importation of milk supplies into the two markets by one of the proponent producer associations during recent months, although not of substantial volume, would indicate, however, that irrespective of the slight increase in market reserves during recent months such markets are not oversupplied.

The formula adopted herein provides a seasonal schedule of norms which average, on an annual basis, 73.25 percent Class I utilization. The seasonality pattern of the norms in the recommended decision were designed to lessen the possibility of contraseasonal price adjustments which might occur as a result of sporadic changes in the relationship of receipts to Class I disposition not significant with respect to any real change in the supply-demand situation of the market.

In their exceptions to the recommended decision, producers alleged, however, that the norms for certain months would not prevent the possibility of unwarranted contraseasonal price adjustments. Producers pointed out, for example, that November, the month of lowest production in relation to Class I sales in the market, averaged approximately 83 percent Class I utilization in 1962 and 1963, representing a situation of relatively short supply not fully reflected in the norms set for such month.

In light of the exceptions filed, further refinements to the norms for certain months have been made to provide additional assurance against contraseasonal price adjustments. The schedule of individual monthly norms should be revised to reflect these further refinements. The resulting effect on the level of standard utilization percentages as set forth in the recommended decision is negligible, being a quarter of one percent lower (annual basis) than the 73.5 percent (at midpoint of range) specified therein.

Adjustments in the Class I price resulting from the formula should be at the rate of two cents for each percentage point that the current utilization percentage deviates from the applicable norm. Thus, the Class I price would be increased two cents for each full percentage point that the current utilization percentage is above the maximum standard percentage range and would be decreased two cents for each full percentage point that the current utilization is below the minimum standard percentage range for the month. The rate of two cents per percentage point upward and downward is reasonable in relation to the general level of the Class I prices in this area and in relation to nearby market prices.

The maximum monthly adjustment should be limited to not more than 38

cents, plus or minus. In this connection producers proposed a maximum limit on any plus or minus adjustment of 20 cents per hundredweight. They suggested that a tie with Class I prices of a neighboring market also might provide a satisfactory basis for establishing such a limit.

Handlers, on the other hand, proposed a limitation on the adjustor which would allow no plus adjustment to the price during any month in which other factors of the Class I price (basic formula and stated differential) would provide for a Class I price of 35 cents or more over the Chicago order Class I price. Handlers cited as their reason for a ceiling of 35 cents over the Chicago Class I price the availability of milk which can move into the Indianapolis and Fort Wayne markets from the Chicago area at an alleged 35 cents per hundredweight transportation cost.

Although, as noted earlier, several shipments of milk were imported into the Indianapolis market from the Chicago market area in months just preceding the hearing because of temporary shortage, there is no evidence that the levels of price in the Indianapolis and Fort Wayne orders have encouraged regular, or significant, movements of milk into the two markets from this alternative source.

Some limit, however, should be placed on the price movements to result from the supply-demand adjustor in order that the basis for any tendency of prices to make unusually wide swings may be given further consideration in hearing. It would not be reasonable to permit the Indianapolis and Fort Wayne prices to decrease below the level of the South Bend-LaPorte-Elkhart market which serves, to some extent, as an alternative outlet for milk associated with the Indianapolis and Fort Wayne markets. A pricing range of 38 cents minus to 38 cents plus will provide for flexibility in pricing under the formula but will tend to maintain Indianapolis and Fort Wayne prices in reasonable alignment with the South Bend-LaPorte-Elkhart and other markets.

The supply-demand adjustor adopted herein would have increased the Class I price in both markets by only three-fourths of a cent per hundredweight, on the average, during the 22-month period of January 1963 through October 1964. This compares with the producers' formula for the comparable period which would have increased such prices by two and one-half cents per hundredweight on the average. The handlers' formula with a three-month mover, on the other hand, would have provided no adjustment to the Class I price for any month of the period November 1963 through October 1964, the period for which they provided data in the record.

It is concluded that the supply-demand adjustor formula herein adopted will provide an appropriate basis for adjustments of the Class I price in the two markets as supply and demand conditions change in such markets.

3. *Class I butterfat differential.* The butterfat differential used in adjusting Class I prices under the Fort Wayne order should be reduced. The Indianapolis Class I butterfat differential should remain unchanged.

At present the Class I price in the Fort Wayne market is adjusted for the butterfat content of Class I milk by a butterfat differential per point (1/10 percent of butterfat) determined by multiplying the monthly Chicago 92-score butter price by 0.125. It was proposed by a cooperative association, representing a substantial number of producers in the Fort Wayne market, that the Class I butterfat differential be reduced to 0.120 times the price of Chicago butter, the same as the Class I butterfat differential under the Indianapolis order. No opposition to this proposal was expressed by handlers or by other producers regulated under the Fort Wayne order.

The average butterfat test of Class I milk in the Fort Wayne market has declined from 3.57 percent in 1961 to 3.49 percent in 1963. The average test of producer milk, on the other hand, has not changed appreciably during the three-year period, averaging 3.75, 3.77 and 3.74 percent, respectively, for these years.

The Class I butterfat differential in the Fort Wayne market averaged $0.073 and $0.072 in 1962 and 1963, respectively. For the Indianapolis market the Class I differential averaged $0.071 and $0.070 for the comparable periods. The proposed reduction in the Class I butterfat differential for Fort Wayne will contribute to the general alignment of Class I prices between the Fort Wayne and Indianapolis markets consistent with the other terms of the Class I pricing provisions of both orders and will tend to place butterfat in fluid milk products in the Fort Wayne market on a more competitive basis with other nearby markets. Indianapolis handlers and producers testified in support of the current butterfat differential under the Indianapolis order stating that it was in reasonable alignment with other nearby markets. In view of this testimony and because there was no testimony to support a revision, it is, therefore, left unchanged.

The Fort Wayne Class I butterfat differential should be placed on the same basis as that in the Indianapolis order. In view of the prevailing butterfat test of Class I milk at close to 3.5 percent, overall returns to producers for Class I milk should be little affected by this change.

*Rulings on proposed findings and conclusions.* Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

*General findings.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreements and the orders, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreements and the orders, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreements and the orders, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in marketing agreements upon which a hearing has been held.

*Rulings on exceptions.* In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

*Marketing agreements and orders.* Annexed hereto and made a part hereof are four documents entitled respectively, "Marketing agreement regulating the handling of milk in the Indianapolis, Indiana, marketing area", and "Order amending the order regulating the handling of milk in the Indianapolis, Indiana, marketing area", "Marketing agreement regulating the handling of milk in the Fort Wayne, Indiana, marketing area", and "Order amending the order regulating the handling of milk in the Fort Wayne, Indiana, marketing area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

*It is hereby ordered,* That all of this decision, except the attached marketing agreements, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreements are identical with those contained in the orders as hereby proposed to be amended by the attached orders which will be published with this decision.

*Determination of representative period.* The month of September 1964 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the attached orders, as amended and as hereby proposed to be amended, regulating the handling of milk in the Indianapolis, Indiana, marketing area and the Fort Wayne, Indiana, marketing area, respectively, are approved or favored by producers, as defined under the terms of the respective order as amended and as hereby proposed to be amended, and who, during such representative period were engaged in the production of milk for sale within the respective aforesaid marketing area.

Signed at Washington, D.C., on December 11, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

*Order[1] Amending the Order Regulating the Handling of Milk in the Indianapolis, Indiana, Marketing Area*

**§ 1049.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Indianapolis, Indiana, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

*Order relative to handling*—It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Indianapolis, Indiana, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended and as hereby amended, as follows:

The provisions of the proposed marketing agreement and order amending the order contained in the recommended decision issued by the Deputy Administrator on November 17, 1964, and published in the FEDERAL REGISTER on November 21, 1964 (29 F.R. 15647; F.R. Doc. 64–11908), shall be and are the terms and provisions of this order, and are set forth in full herein subject to a revision of the schedule of standard utilization percentages in § 1049.51(a)(2).

In § 1049.51, the introductory text and paragraph (a) are revised to read as follows:

**§ 1049.51 Class prices.**

Subject to the provisions of §§ 1049.52 and 1049.53, the minimum class prices per hundredweight of milk for the month shall be as follows:

(a) *Class I milk price.* The price for Class I milk shall be the basic formula price for the preceding month plus $1.27, and plus or minus a "supply-demand adjustment" of not more than 38 cents computed as follows:

(1) Divide the aggregate pounds of producer milk in Class I (excluding inventory and "overage" and adjusted to eliminate duplications due to interhandler and intermarket plant transfers) under this part and under Part 1047 of this chapter (Fort Wayne, Indiana, order) for the second, third and fourth months preceding by the aggregate pounds of producer milk receipts under such parts for the same months, multiplying the result by 100 and round to the nearest whole number. The result shall be known as the "current utilization percentage";

(2) For each full percentage point that the current utilization percentage is above the applicable maximum standard utilization percentage listed below increase the Class I price differential by two cents; and for each full percentage point that the current utilization percentage is below the applicable minimum standard utilization percentage listed below decrease such differential by two cents.

| Month for which pricing is being computed | Preceding months used in computation | Standard utilization percentages | |

*Order[1] Amending the Order Regulating the Handling of Milk in the Fort Wayne, Indiana, Marketing Area*

**§ 1047.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Fort Wayne, Indiana, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

*Order relative to handling*—It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Fort Wayne, Indiana, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended and as hereby amended, as follows:

The provisions of the proposed marketing agreement and order amending the order contained in the recommended decision issued by the Deputy Administrator on November 17, 1964, and published in the FEDERAL REGISTER on November 21, 1964 (29 F.R. 15647; F.R. Doc. 64–11908), shall be and are the terms and provisions of this order, and are set

## MILK IN CENTRAL ILLINOIS MARKETING AREA

### Findings and Determinations on Results of Referendum on Proposed Marketing Order and Termination of Proceedings Therein

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the applicable rules of practice and procedure governing the formulation of marketing agreements and orders (7 CFR Part 900), notice is hereby given that the notice of hearing on proposed amendments to the tentative marketing agreement and to the order, regulating the handling of milk in the Central Arizona marketing area which was issued December 4, 1964, and published in the FEDERAL REGISTER on December 9, 1964 (29 F.R. 16866) is hereby amended by changing the date on which such hearing is to be held from December 17, 1964, to January 7, 1965. The hearing will begin at 9:30 a.m., local time, at the Ramada Inn, 3801 East Van Buren, Phoenix, Ariz.

Signed at Washington, D.C., on December 11, 1964.

CLARENCE H. GIRARD,
*Deputy Administrator.*

# DEPARTMENT OF LABOR

## Wage and Hour Division

**[ 29 CFR Parts 673, 677, 678 ]**

[Administrative Order 588]

## INDUSTRY COMMITTEES FOR VARIOUS INDUSTRIES IN PUERTO RICO

### Appointment To Investigate Conditions and Recommend Minimum Wages; Notice of Hearings

Pursuant to section 5 of the Fair Labor Standards Act of 1938 (29 U.S.C. 205), Reorganization Plan No. 6 of 1950 (3 CFR 1949-53 Comp., p. 1004), and 29 CFR Part 511, I hereby appoint Industry Committee No. 71-A for the food and related products industry in Puerto Rico (as defined in 29 CFR 673.1); Industry Committee No. 71-B for the paper, paper products, printing, and publishing industry in Puerto Rico (as defined in 29 CFR 677.1); and Industry Committee No. 71-C for the stone, clay, glass, cement, and related products industry in Puerto Rico (as defined in 29 CFR 678.1).

Pursuant to section 8 of the Fair Labor Standards Act of 1938 (29 U.S.C. 208), Reorganization Plan No. 6 of 1950 (3 CFR 1949-53 Comp., p. 1004), and 29 CFR Part 511, I hereby:

(a) Convene each of the above-appointed industry committees;

(b) Refer to each of these industry committees the following: (1) The question of the minimum rate or rates of wages to be fixed for the industry with which it is concerned for employees who are engaged in commerce or in the production of goods for commerce (except those industries and parts thereof described in 29 CFR 673.2(a), 677.2(a), 677.2(b), 678.2(a), 678.2(b), and 678.2(c)), and (2) the question of the minimum rate or rates of wages to be fixed for any employees covered by the Act by reason of the Fair Labor Standards Amendments of 1961;

(c) Give notice of the hearing to be held by each of them at the times and places indicated below. Each industry committee shall investigate conditions in its industry, and each industry committee, or any authorized subcommittee thereof, shall hear such witnesses and receive such evidence as may be necessary or appropriate to enable the committee to perform its duties and functions under the aforementioned Act.

Industry Committee No. 71-A shall meet in executive session to commence its investigation at 10:00 a.m. on February 8, 1965, in the office of the Wage and Hour and Public Contracts Divisions, United States Department of Labor, seventh floor, Condominio San Alberto Building, 1200 Ponce de Leon Avenue, Santurce, Puerto Rico, and shall commence its hearing at 1:30 p.m. on the same date at the same place. Following this hearing Industry Committees Nos. 71-B and 71-C shall meet seriatim at the same place at hours designated by the committee chairmen to conduct their investigations and to hold their hearings.

Each industry committee shall recommend to the Administrator of the Wage and Hour and Public Contracts Divisions of this Department the highest minimum wage rates (in the case of question (1) referred to the committee, not exceeding the minimum wage rate of $1.25 per hour, and in the case of question (2) referred to the committee, not exceeding the minimum wage rate of $1.15 per hour for immediate effect and $1.25 per hour for effect on and after September 3, 1965, and in no case less than the currently effective rate) which it determines, having due regard to economic and competitive conditions, will not substantially curtail employment in the industry and will not give any industry in Puerto Rico a competitive advantage over any industry in the United States outside of Puerto Rico, the Virgin Islands and American Samoa.

Whenever any industry committee finds that a higher minimum wage may be determined for employees engaged in certain activities or in the manufacture of certain products in an industry than may be determined for other employees in that industry, the committee shall recommend such reasonable classifications within that industry as it determines to be necessary for the purpose of fixing for each classification the highest minimum wage rate that can be determined for it under the principles set forth herein which will not give a competitive advantage to any group in the industry. No classification shall be made, however, and no minimum wage rate shall be fixed solely on a regional basis or on the basis of age or sex. In determining whether there should be classifications within an industry, in making such classifications, and in determining the minimum wage rates for such classifications, each industry committee shall consider, among other relevant factors, the following: (1) Competitive conditions as affected by transportation, living, and production costs; (2) wages established for work of like or comparable character by collective labor agreements negotiated between employers and employees by representatives of their own choosing; and (3) wages paid for work of like or comparable character by employers who voluntarily maintain minimum wage standards in the industry.

The Administrator shall prepare economic reports for the industry committee containing such data as he is able to assemble pertinent to the matters referred to them. Copies of each such report may be obtained at the Washington, D.C., and Puerto Rican offices of the Wage and Hour and Public Contracts Divisions as soon as they are completed and prior to the hearings. Each industry committee shall take official notice of the facts stated in the economic reports to the extent that they are not refuted at the hearings.

The procedure of industry committees shall be governed by 29 CFR Part 511. As a prerequisite to participation in the hearings, interested persons shall file prehearing statements containing the data specified in 29 CFR 511.8 not later than January 29, 1965.

Signed at Washington, D.C., this 9th day of December 1964.

W. WILLARD WIRTZ,
*Secretary of Labor.*

[F.R. Doc. 64-12911; Filed, Dec. 15, 1964; 8:49 a.m.]

# FEDERAL AVIATION AGENCY

**[ 14 CFR Part 71 [New] ]**

[Airspace Docket No. 64-AL-11]

## CONTROL ZONE

### Proposed Alteration

The Federal Aviation Agency is considering amendments to Part 71 [New] of the Federal Aviation Regulations which would alter the control zone at King Salmon, Alaska.

The King Salmon, Alaska, Control Zone is presently described as that area within a 5-mile radius of the King Salmon Airport (latitude 58°41' N., longitude 156°39' W.); within 2 miles either side of the King Salmon VOR 132° and 312° radials extending from the 5-mile radius zone to 12 miles NW of the VOR and within 2 miles either side of the King Salmon TACAN 301° radial extending from the 5-mile radius zone to 11 miles NW of the TACAN.

The Federal Aviation Agency, having completed a comprehensive review of the terminal airspace structure requirements in the King Salmon, Alaska, terminal area, including studies relevant to the implementation of the provisions of CAR Amendment 60-21/60-29, proposes the following airspace action:

In § 71.171 the King Salmon, Alaska, Control Zone would be redescribed as that area within a 5-mile radius of the King Salmon Airport (latitude 58°41' N., longitude 156°39' W.); within 2 miles each side of the King Salmon VOR 312° radial extending from the 5-mile radius zone to 7 miles NW of the VOR; and within 2 miles each side of the King Salmon TACAN 301° and 141° radials extending from the 5-mile radius zone to 9 miles NW and 7 miles SE of the TACAN.

The King Salmon control zone is required to provide protective airspace for aircraft executing instrument approaches. The extension to the northwest, which is based on the King Salmon VOR 312° radial, is for the VOR approach to runway 11; the additional extensions to the northwest and southeast provide protective airspace for TACAN approaches to runway 11 and 29. These extensions would also encompass the airspace required for the radio range approach and the ILS approaches to runway 11 and 29.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Alaskan Region, Federal Aviation Agency, 632 Sixth Avenue, Anchorage, Alaska, 99501. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Chief, Air Traffic Division. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The public Docket will be available for examination by interested persons at the office of the Regional Counsel, Federal Aviation Agency, 632 Sixth Avenue, Anchorage, Alaska, 99501.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Anchorage, Alaska, on December 4, 1964.

JAMES G. ROGERS,
*Director, Alaskan Region.*

## FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS

### Notice of Proposed Rule Making

In the matter of amendment of Part 2 of the Commission's rules to conform, to the extent practicable, with the Geneva (1959) Radio Regulations, as revised by the Space EARC, Geneva, 1963.

1. Notice of proposed rule making in the above-entitled matter is hereby given.

2. Pursuant to Recommendation No. 36 of the Ordinary Administrative Radio Conference, Geneva, 1959, the International Telecommunication Union (ITU) convened an Extraordinary Administrative Radio Conference (EARC) in Geneva, Switzerland, on October 7, 1963, to allocate frequency bands for space radiocommunication purposes and for the radio astronomy service. The Final Acts of the EARC, signed at Geneva on November 8, 1963, and scheduled to enter into force internationally on January 1, 1965, constitute a partial revision of the international Radio Regulations, Geneva, 1959.

3. The United States Senate gave its advice and consent to ratification without reservation on February 25, 1964, and on March 16, 1964, the President signed the instrument of ratification. That document was deposited with the Secretary-General of the ITU, in Geneva, on April 3, 1964. The purpose of the rule-making proceeding initiated herein is to align, to the extent practicable, Part 2 of the Rules with the Geneva (1959) Radio Regulations, as revised by the Space EARC, Geneva, 1963.

4. The proposals made by the United States for consideration at the Space EARC were those contained in the Commission's Report and Order of June 19, 1963, terminating the proceedings in Docket Nos. 13522 and 14477, published in the FEDERAL REGISTER on July 2, 1963 (28 F.R. 6812). A comparison of the U.S. proposals with the Final Acts of the Space EARC will show that our proposals were well received and were generally adopted.

5. *Definitions.* The Space EARC allocated frequency bands to the following space services: Communication-satellite service, meteorological-satellite service, radionavigation-satellite service, space research service, and space service. These terms, as well as the stations operating in those services and functions to be performed, have been defined as reflected in the proposed changes to § 2.1 of Part 2 contained below. Also modified were the definitions of "aeronautical station" and "aircraft station" to permit the aviation industry to take advantage of space communication techniques within the framework of the existing aeronautical mobile (R) and aeronautical radionavigation services.

6. *Communication-Satellite Service.* The U.S. proposed that a total of 2725 Mc/s of spectrum space be allocated to this service on a co-equal shared basis with presently allocated fixed and mobile services, except for two 50 Mc/s bands at 7250–7300 Mc/s and 7975–8025 Mc/s which were proposed exclusively for the communication-satellite service. The U.S. abandoned its proposal insofar as the band 6425–7125 Mc/s was concerned but was successful in having the remainder of its proposal adopted without change, as shown below and as set forth in greater detail in the Appendix hereto.

| *Satellite-to-earth* | *Earth-to-satellite* |
|---|---|
| 3700–4200 Mc/s | 5925–6425 Mc/s |
| 7250–7750 Mc/s | 7900–8400 Mc/s |

It will be noted in footnote US91 to the Table of Frequency Allocations that a determination has not yet been made as to the division of these bands between Government and non-Government users in the United States, insofar as the communication-satellite service is concerned.

7. Also allocated by the Conference to the communication-satellite service on a world-wide basis were the bands 3400–3700 Mc/s (satellite-to-earth) and 4400–4700 Mc/s (earth-to-satellite) on a shared basis with various other services. Additionally, 5725–5850 Mc/s (earth-to-satellite) was allocated for use in ITU Region 1 (Europe-Africa area) on a shared basis and 5850–5925 Mc/s (earth-to-satellite) was allocated for use in Regions 1 and 3 (world-wide except for the Americas) on a shared basis. All allocations referred to in this paragraph resulted from proposals originating with the Soviet bloc and are not proposed for inclusion in our national Table because sharing would not be feasible with U.S. services now in those bands. These allocations are likewise not excepted to be employed in Western Europe. This exclusion will not preclude satellite communication between bloc countries and the western world inasmuch as there was appreciable overlap between the proposals of the bloc countries and those of the other countries, within the frequency bands referred to in paragraph 6.

8. Since, for the most part, the frequency bands in paragraph 6 will be shared on a co-equal basis by the communication-satellite service, the fixed service, and the mobile service, it is necessary that specific technical criteria be observed by the sharing services to minimize the possibility of mutual interference. These criteria, as set forth in separate proceedings dealing with proposed amendments to Parts 21 and 25 of the Rules, are consistent with sharing criteria adopted by the Space EARC.

9. *Meteorological-Satellite Service.* For this service, the U.S. proposed 137–138 Mc/s for low data-readout, 1660–1670 and 1690–1700 Mc/s for broad-band video transmissions and 7650–7750 Mc/s for high-resolution video data, all to be transmitted from meteorological satellites to earth stations. Additionally, 9900–10,000 Mc/s and 33.4–33.5 Gc/s were proposed for use by weather radars aboard meteorological satellites for precipitation and cloud detection, respectively. All basic objectives were achieved in this regard even though the bands adopted by the Conference do not, in all cases, coincide with our proposals. The bands adopted for the above purposes and herein proposed for inclusion in the national table are shown below and in the Appendix hereto.

| | |
|---|---|
| 137–138 Mc/s | 7300–7750 Mc/s (any 100 Mc/s segment) |
| 1660–1670 Mc/s | 9975–10025 Mc/s |
| 1690–1700 Mc/s | 34.4–34.5 Gc/s |

10. Additional bands proposed by other countries and allocated for the meteorological-satellite service are 400.05–401 Mc/s, 460–470 Mc/s (as a secondary service), 1770–1790 Mc/s (as a secondary service) and 7200–7250 Mc/s. Again, none of these bands is proposed for the meteorological-satellite service in our Table because of the impracticability of general sharing with existing services. However, should there be a requirement for a cooperative joint international effort in the meteorological-satellite service in one or more of these bands it is quite possible that they can be treated on a case-by-case basis and accommodated at specific locations.

11. *Radionavigation-Satellite Service.* Only the U.S. introduced allocation proposals for this service. The Conference adopted the U.S. proposals for exclusive, world-wide allocations in the frequency bands shown below and in the Appendix hereto.

149.9–150.05 Mc/s
399.9–400.05 Mc/s
14.3–14.4 Gc/s

12. *Space Research Service.* The U.S. proposed world-wide exclusive status for this service in the bands 136–137, 1700–1710, 2290–2300 and 8400–8500 Mc/s and 15.25–15.35 and 31.5–31.8 Gc/s. While the Conference adopted all of the bands, it afforded world-wide exclusivity only in the band 15.25–15.35 Gc/s. In the remaining five bands exclusivity was limited to ITU Region 2 (the Americas) and the space research service will be required to share with the fixed and mobile services, generally on a coequal basis, in Regions 1 and 3.

13. While a number of additional bands were allocated to the space research service by the Conference in response to the proposals of other countries, only the following bands are proposed for inclusion in the national table or associated footnotes. The details of their availability are set forth below.

| | |
|---|---|
| 10003–10005 kc/s | 1700–1710 Mc/s. |
| 20000–20010 kc/s | 2110–2120 Mc/s. |
| 30.005–30.015 Mc/s | 2290–2300 Mc/s. |
| 39.986–40.02 Mc/s | 8400–8500 Mc/s. |
| 136–137 Mc/s | 15.25–15.35 Gc/s. |
| 400.05–401 Mc/s | 31.5 –31.8 Gc/s. |

14. *Space Service.* This term is generic, in that frequencies allocated to this service are available to all space radiocommunication services. It is within the context of this service that the functions of telecommand, tracking and some telemetering are accommodated. All U.S. proposals in this area were adopted by the Conference, resulting in the following provisions either by footnote or specific allocations in the Table:

| | |
|---|---|
| 137–138 Mc/s | Telemetering and tracking. |
| 148.25 Mc/s | Telecommand. |
| 154.20 Mc/s | Telecommand. |
| 401–402 Mc/s | Telemetering (315A also permits tracking). |
| 450 Mc/s | Telecommand. |
| 1427–1429 Mc/s | Telecommand. |
| 1525–1540 Mc/s | Telemetering (350A also permits tracking). |

Additionally, in bands allocated to the communication-satellite service, footnote (374A) provides for the transmission of telemetering and tracking signals by earth stations operating in the earth-to-satellite bands. All of the above frequencies or bands of frequencies are set forth in detail in the Appendix hereto. Also adopted by the Conference, but not proposed for inclusion in the national Table, at this time, is footnote (393A) to allow the use of the band 7120–7130 Mc/s for general telecommand purposes.

15. *Radio Astronomy.* Little or no change is necessary in our national Table to align with the international allocations for this service. This results from the fact that the U.S. has had exclusive allocations to the service for a number of years and had proposed to the Conference that exclusivity be expanded internationally. Virtually all U.S. proposals in this area were adopted by the Conference, enhancing greatly the international status of the radio astronomy service in the following bands:

| | |
|---|---|
| 37.75–38.25 Mc/s | 2690–2700 Mc/s |
| 73.0–74.6 Mc/s | 4990–5000 Mc/s |
| 404–406 Mc/s | 10.68–10.7 Gc/s |
| 1400–1427 Mc/s | 19.3–19.4 Gc/s |
| 1664.4–1668.4 Mc/s | 31.3–31.5 Gc/s |

The details of allocation will be found in the Appendix hereto where it should be noted, among other things, that US21 as applied to the band 73.0–74.6 Mc/s would require existing operational fixed stations in that band to protect radio astronomy observatories of other countries from harmful interference. Attention is also invited to footnote US81 which limits radio astronomy in the band 37.75–38.25 Mc/s to that portion between 38.0–38.16 Mc/s.

16. Also proposed by the U.S. and adopted by the Conference was a new numbered paragraph in the Radio Regulations, No. 116A, to clarify the status of the radio astronomy service in the resolution of cases of harmful interference to that service. Harmful interference is defined (No. 93) as

> Any emission, radiation or induction which endangers the functioning of a radionavigation service or of other safety services or seriously degrades, obstructs or repeatedly interrupts a radiocommunication service operating in accordance with these Regulations.

As defined (Nos. 74 and 75) the radio astronomy service is not a radiocommunication service. No. 116A states, in part, "* * * For the purpose of resolving cases of harmful interference, the radio astronomy service shall be treated as a radiocommunication service * * *" Although it is not proposed to incorporate this expression in our rules, it will be given due cognizance in the resolution of interference cases.

17. *Aviation Services.* As mentioned in paragraph 5, by virtue of changes in definitions and the addition of footnotes (352A) and (352B), the use of space techniques can now be exploited by the aeronautical mobile and aeronautical radionavigation services in a number of bands already allocated to those services. Attention is invited to the frequency bands 117.975–136 Mc/s, 1540–1660 Mc/s, 4200–4400 Mc/s, 5000–5250 Mc/s and 15.4–15.7 Gc/s in the Appendix hereto.

18. In addition to the proposed changes mentioned specifically in the preceding paragraphs, the attached Appendix contains a number of changes which are editorial in nature. To conform with the international Table of Frequency Allocations, the term "gigacycles per second" (Gc/s) has been introduced in our national Table for frequencies above 10,500 Mc/s. As a consequence, editorial changes are required in various NG or US footnotes to the Table.

19. As noted earlier, the partial revision of the Radio Regulations by the Final Acts of the Space EARC is scheduled to enter into force internationally on January 1, 1965.

20. This proposal to amend the Commission's rules is issued under the authority of sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

21. Comments in support of or in opposition to the proposed amendments may be filed on or before January 15, 1965. Reply comments may be filed on or before January 25, 1965. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

22. In accordance with the provisions of § 1.215(b) of the Commission's rules, an original and 14 copies of all statements, briefs, or comments filed shall be furnished the Federal Communications Commission.

Adopted: December 2, 1964.

Released: December 4, 1964.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] BEN F. WAPLE,
*Secretary.*

Part 2 is amended as follows:

§ 2.1 [Amended]

1. Section 2.1 is amended as follows:

a. The definition of *"Earth-space service"* is deleted.

b. The following definitions are amended to read as set forth below:

*Aeronautical station.* A land station in the aeronautical mobile service. In certain instances an aeronautical station may be placed on board a ship or an earth satellite.

*Aircraft station.* A mobile station in the aeronautical mobile service on board an aircraft or an air-space vehicle.

*Earth station.* A station in the space service located either on the earth's surface, including on board a ship, or on board an aircraft.

*Space service.* A radiocommunication service:

—between earth stations and space stations,
—or between space stations,
—or between earth stations when the signals are re-transmitted by space stations, or transmitted by reflection from objects in space, excluding reflection or scattering by the ionosphere or within the earth's atmosphere.

*Space station.* A station in the space service located on an object which is beyond, is intended to go beyond, or has been beyond, the major portion of the earth's atmosphere.

c. The following new definitions are added in proper alphabetical sequence:

*Active satellite.* An earth satellite carrying a station intended to transmit or re-transmit radiocommunication signals.

*Communication-satellite earth station.* An earth station in the communication-satellite service.

*Communication-satellite service.* A space service:

—between earth stations, when using active or passive satellites for the exchange of communications of the fixed or mobile service, or
—between an earth station and stations on active satellites for the exchange of communications of the mobile service, with a view to their re-transmission to or from stations in the mobile service.

*Communication-satellite space station.* A space station in the communication-satellite service, on an earth satellite.

[1] Commissioners Lee and Cox absent.

[1] Commissioners Hyde, Bartley and Loevinger absent.

*Deep space.* Space at distances from the earth equal to or greater than the distance between the earth and the moon.

about the polar axis of the earth in the same direction and with the same period as those of the earth's rotation.

*Terrestrial service.* Any radio service

§ 2.104 Radio astronomy station notification.

(a) Pursuant to No. 639AC, Article 9A

*Deep space.* Space at distances from the earth equal to or greater than the distance between the earth and the moon.

*Fixed earth station.* An earth station intended to be used at a specified fixed point.

*Meteorological-satellite earth station.* An earth station in the meteorological-satellite service.

*Meteorological-satellite service.* A space service in which the results of meteorological observations, made by instruments on earth satellites, are transmitted to earth stations by space stations on these satellites.

*Meteorological-satellite space station.* A space station in the meteorological-satellite service, on an earth satellite.

*Mobile earth station.* An earth station intended to be used while in motion or during halts at unspecified points.

*Passive satellite.* An earth satellite intended to transmit radiocommunication signals by reflection.

*Radio astronomy station.* A station in the radio astronomy service.

*Radionavigation-satellite earth station.* An earth station in the radionavigation-satellite service.

*Radionavigation-satellite service.* A service using space stations on earth satellites for the purpose of radionavigation, including, in certain cases, transmission or re-transmission of supplementary information necessary for the operation of the radionavigation system.

*Radionavigation-satellite space station.* A space station in the radionavigation-satellite service, on an earth satellite.

*Spacecraft.* Any type of space vehicle including an earth satellite or a deep-space probe, whether manned or unmanned.

*Space research earth station.* An earth station in the space research service.

*Space research service.* A space service in which spacecraft or other objects in space are used for scientific or technological research purposes.

*Space research space station.* A space station in the space research service.

*Space telecommand.* The use of radiocommunication for the transmission of signals to a space station to initiate, modify or terminate functions of the equipment on a space object, including the space station.

*Space telemetering.* The use of telemetering for the transmission from a space station of results of measurements made in a spacecraft, including those relating to the functioning of the spacecraft.

*Space tracking.* Determination of the orbit, velocity or instantaneous position of an object in space by means of radiodetermination, excluding primary radar, for the purpose of following the movement of the object.

*Stationary satellite.* A satellite, the circular orbit of which lies in the plane of the earth's equator and which turns about the polar axis of the earth in the same direction and with the same period as those of the earth's rotation.

*Terrestrial service.* Any radio service defined in this Part, other than a space service or the radio astronomy service.

*Terrestrial station.* A station in a terrestrial service.

2. Section 2.100 is amended to read as follows:

**§ 2.100 International regulations in force.**

The Radio Regulations (Geneva, 1959), which became effective internationally on May 1, 1961, were incorporated to the extent practicable in Subparts A and B of this part and became effective nationally on December 1, 1961. The Radio Regulations were subsequently revised, in part, by the Extraordinary Administrative Radio Conference (Geneva, 1963) which specified January 1, 1965 as the effective date of the revision. The partial revision has also been incorporated to the extent practicable in Subparts A and B of this Part and is applicable nationally, effective _____, 19__.

3. In § 2.102, paragraphs (a), (b) (4), (5), and (6) are amended to read:

**§ 2.102 Assignment of frequencies.**

(a) Except as otherwise provided in this section, the assignment of frequencies and bands of frequencies to all stations and classes of stations and the licensing and authorizing of the use of all such frequencies between 10 kc/s and 90 Gc/s, and the actual use of such frequencies for radiocommunication or for any other purpose, including the transfer of energy by radio, shall be in accordance with the Table of Frequency Allocations in § 2.106.

(b) • • •

(4) Experimental stations engaged solely in ionospheric sounding by means of the technique of sweeping a band of frequencies may be authorized the use of any band or bands or frequencies not allocated, on an exclusive or shared basis, to the radio astronomy service.

(5) Experimental stations to be operated pursuant to a contractual agreement with the United States Government and intended for the sole and express purpose of developing equipment or a technique to be employed by stations belonging to and operated by the United States may be authorized the use of any frequency which is not in a band allocated, on an exclusive or shared basis, to the radio astronomy service.

(6) Experimental stations intended for the sole and express purpose of developing equipment or a technique to be employed by stations under the jurisdiction of a foreign government may be authorized the use of any frequency which is not in a band allocated to the amateur service or the radio astronomy service.

• • • • • •

4. Section 2.104 is revised to read as follows:

**§ 2.104 Radio astronomy station notification.**

(a) Pursuant to No. 639AC, Article 9A and Section F of Appendix 1A to the International Radio Regulations (as revised, Geneva, 1963), operators of radio astronomy stations desiring international recognition of their use of specific radio astronomy frequencies or bands of frequencies for reception, should file the following information with the Commission for inclusion in the Master International Frequency Register:

(1) The center of the frequency band observed, in kc/s up to 30,000 kc/s inclusive, and in Mc/s above 30,000 kc/s.

(2) Date of putting into use (actual or foreseen, as appropriate).

(3) Name and location of the station, including geographical co-ordinates in degrees and minutes.

(4) Width of frequency band observed by the station.

(5) Antenna type and dimensions, effective area and angular coverage in azimuth and elevation.

(6) Maximum hours of reception (G.M.T.) of the frequency band shown in subparagraph (1) of this paragraph.

(7) Overall receiving system noise temperature (°K).

(8) Class of observations to be taken on the frequency band shown in subparagraph (1) of this paragraph. Class A observations are those in which the sensitivity of the equipment is not a primary factor. Class B observations are those of such a nature that they can be made only with advanced low-noise receivers using the best techniques.

(b) Observations being conducted on frequencies or frequency bands not allocated to the radio astronomy service should be reported as in paragraph (a) of this section for information purposes. Information in this category will not be submitted for entry in the Master International Frequency Register and protection from interference will not be afforded such operations by stations in other services.

5. In § 2.105, paragraph (h)(1) is amended to read as follows:

**§ 2.105 Application and format of the Table of Frequency Allocations.**

• • • • • •

(h) • • •

(1) Any footnote consisting of three digits or three digets and a one or two letter suffix, e.g., (170) or (215A), denotes a paragraph in the Geneva (1959) Radio Regulations as amended by the Space Conference (Geneva, 1963). Where such a footnote is applicable, without modification, to the national Table of Frequency Allocations, the symbol appears in the national table as well as in Column 1, 2, 3 or 4.

• • • • • •

**§ 2.106 [Amended]**

6. Section 2.106 is amended as follows:

a. The table is amended, in part, to read as follows:

| Worldwide | | Region 2 | | United States | | Federal Communications Commission | | | Nature of services (No. of stations) |
|---|---|---|---|---|---|---|---|---|---|
| Band (kc/s) | Service | Band (kc/s) | Service | Band (kc/s) | Allocation | Band (kc/s) | Service | Class of station | Frequency (kc/s) |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 (11) |

b. In the list of footnotes immediately following the Table in § 2.106, Geneva footnote numbers (234), (253), (280), (281), and (405) are deleted.

c. The following Geneva footnotes to the Table in § 2.106 are amended to read:

(215) The band 10003–10005 kc/s is also allocated, on a secondary basis, to the space research service.

(221) The band 19990–20010 kc/s is also allocated, on a secondary basis, to the space research service.

(235) The band 39.986–40.002 Mc/s is also allocated, on a secondary basis, to the space research service.

(294) The band 183.1–184.1 Mc/s is also allocated, on a secondary basis, to the space research service.

(317) The band 404–410 Mc/s in Region 2 and the band 406–410 Mc/s in Regions 1 and 3 are also allocated to the radio astronomy service. An appropriate continuous band within these limits shall be designated on a national or area basis. In making assignments to stations of other services to which these bands are allocated, administrations are urged to take all practicable steps to protect radio astronomy observations from harmful interference.

(341) The band 960–1215 Mc/s is reserved on a world-wide basis for the use and development of airborne electronic aids to air navigation and any directly associated ground-based facilities.

(365) In making assignments to stations in the fixed and mobile services, administrations are urged to take all practicable steps to protect radio astronomy observations from harmful interference.

d. The following new Geneva footnotes are added to the Table in § 2.106 in proper numerical sequence:

(215A) In Bulgaria, Cuba, Hungary, Poland, Roumania, Czechoslovakia and the U.S.S.R., the space research service is a primary service in the bands 15762–15768 kc/s and 18030–18036 kc/s.

(221A) The frequency 20007 kc/s may also be used, in emergency, in the search for, and rescue of, astronauts and space vehicles. Emissions must be confined in a band of ± 3 kc/s about this frequency.

(253A) In Region 2, fixed, mobile and broadcasting service operations previously authorized in the band 73–74.6 Mc/s may continue to operate on a non-interference basis to the radio astronomy service.

(253B) In Cuba, the band 73–74.6 Mc/s is also allocated to the fixed, mobile and broadcasting services.

(273A) In the band 117.975–132 Mc/s and in the band 132–136 Mc/s where the aeronautical mobile (R) service is authorized, the use and development, for this service, of systems using space communication techniques may be authorized but limited initially to satellite relay stations of the aeronautical mobile (R) service. Such use and development shall be subject to co-ordination between administrations concerned and those having services operating in accordance with the Table, which may be affected.

(281A) For the use of the band 136–137 Mc/s, see Recommendation No. 7A.

(281B) In Region 2, the band 136–137 Mc/s is also allocated to the fixed and mobile services until 1 January 1969. Thereafter, in Cuba, Malaysia, Pakistan and the Philippines, the band 137–138 Mc/s will continue to be allocated also to the fixed and mobile services.

(281E) In Regions 2 and 3, the band 137–138 Mc/s is also allocated to the fixed and mobile services until 1 January 1969. Thereafter, in Cuba, Malaysia, Pakistan and the Philippines, the band 137–138 Mc/s will continue to be allocated also to the fixed and mobile services.

(281F) The band 137–138 Mc/s will be used mainly for research concerning the establishment, technical improvement, and maintenance of operational space systems.

(284A) In the band 144–146 Mc/s, artificial satellites may be used by the amateur service.

(285A) The frequencies 148.25±15 kc/s and 154.2±15 kc/s may be used for space telecommand, subject to agreement among the administrations concerned and those

having services operating in accordance with the Table, which may be affected.

(285B) Stations operating in the fixed and mobile services may continue to use this band until 1 January 1969. This cessation date shall not apply in Austria, Bulgaria, Cuba, Hungary, Iran, Kuwait, Morocco, Pakistan, the Netherlands, Poland, the United Arab Republic, Yugoslavia and Roumania where the fixed and mobile services will continue to have equal primary status with the radionavigation-satellite service. (See Recommendation No. 6A.)

(309A) Space stations employing frequencies in the band 267–273 Mc/s for telemetering purposes may also transmit tracking signals in the band.

(309B) In the band 267–272 Mc/s individual administrations may use space telemetering in their countries on a primary basis, subject to the agreement of the administrations concerned and those having services operating in accordance with the Table, which may be affected.

(311A) Stations operating in the fixed and mobile services may continue to use this band until 1 January 1969. This cessation date shall not apply in Bulgaria, Cuba, Greece, Hungary, Iran, Kuwait, Lebanon, Morocco, the United Arab Republic and Yugoslavia where the fixed and mobile services will continue to have equal status with the radionavigation-satellite service. (See Recommendation No. 6A.)

(315A) Space stations employing frequencies between 401–402 Mc/s for telemetering purposes may also transmit tracking signals in this band.

(318A) In Bulgaria, Cuba, Hungary, Poland, Roumania, Czechoslovakia and the U.S.S.R., the band 460–470 Mc/s may be used, on a primary basis, by the meteorological-satellite service subject to agreement among administrations concerned and those having services, or intending to introduce services, operating in accordance with the Table, which may be affected.

(319A) The band 449.75–450.25 Mc/s may be used for space telecommand, subject to agreement among the administrations concerned and those having services operating in accordance with the Table, which may be affected.

(324A) It is intended that meteorological-satellite space stations operating in this band shall transmit to selected earth stations. The location of such earth stations is subject to agreement among administrations concerned and those having services operating in accordance with the Table, which may be affected.

(332) In Region 1, except the African Broadcasting Area, the band 606–614 Mc/s, and in Region 3, the band 610–614 Mc/s may be used by the radio astronomy service. Administrations shall avoid using the band concerned for the broadcasting service as long as possible, and thereafter, as far as practicable, shall avoid the use of such effective radiated powers as will cause harmful interference to radio astronomy observations.

In Region 2, the band 608–614 Mc/s is reserved exclusively for the radio astronomy service until the first Administrative Radio Conference after 1 January 1974 which is competent to review this provision; however, this provision does not apply to Cuba.

(339A) Specific portions of the frequency band 900–960 Mc/s may also be used, on a secondary basis, for experimental purposes in connection with space research.

(350A) Space stations employing frequencies in the band 1525–1540 Mc/s for telemetering purposes may also transmit tracking signals in the band.

(350D) In Cuba, the band 1525–1535 Mc/s is also allocated, on a primary basis, to the mobile service.

(352A) The bands 1540–1660 Mc/s, 4200–4400 Mc/s, 5000–5250 Mc/s and 15.4–15.7 Gc/s are reserved, on a world-wide basis, for the use and development of airborne electronic aids to air navigation and any directly associated ground-based or satellite-borne facilities.

(352B) The bands 1540–1660 Mc/s, 5000–5250 Mc/s and 15.4–15.7 Gc/s are also allocated to the aeronautical mobile (R) service for the use and development of systems using space communication techniques. Such use and development is subject to agreement and co-ordination between administrations concerned and those having services operating in accordance with the Table, which may be affected.

(353A) In view of the successful detection of two spectral lines in the region of 1665 Mc/s and 1667 Mc/s by astronomers, administrations are urged to give all practicable protection in the band 1664.4–1668.4 Mc/s for future research in radio astronomy.

(354A) In Algeria, Bulgaria, Cuba, Hungary, Kuwait, Lebanon, Morocco, Pakistan, Poland, the United Arab Republic, Yugoslavia, Roumania, Czechoslovakia and the U.S.S.R., the bands 1660–1670 Mc/s and 1690–1700 Mc/s are also allocated to the fixed service and the mobile, except aeronautical mobile, service.

(355A) In Cuba, the band 1700–1710 Mc/s is also allocated to the fixed and mobile services.

(356AA) In Bulgaria, Cuba, Hungary, Poland, Roumania, Czechoslovakia, and the U.S.S.R., the meteorological-satellite service, in the band 1770–1790 Mc/s, shall be on a primary basis, subject to co-ordination with the administrations concerned and those having services operating in accordance with the Table, which may be affected by the siting of earth stations.

(356A) The band 2110–2120 Mc/s may be used for telecommand in conjunction with spacecraft engaged in deep space research, subject to agreement between the administrations concerned and those having services operating in accordance with the Table, which may be affected.

(356B) In Cuba, the band 2290–2300 Mc/s is also allocated to the fixed and mobile services.

(364A) In Algeria, Bulgaria, Cuba, Hungary, India, Israel, Kuwait, Lebanon, Morocco, Pakistan, the Philippines, Poland, the United Arab Republic, Yugoslavia, Roumania, Czechoslovakia and the U.S.S.R., the band 2690–2700 Mc/s is also allocated to the fixed and mobile services.

(374A) This band may also be used for the transmission of tracking and telemetering signals associated with communication-satellite space stations operating in the same band.

(383A) In Cuba, the band 4990–5000 Mc/s is also allocated to the fixed and mobile services, and the provisions of No. 365 apply.

(389A) In Bulgaria, Cuba, Hungary, Poland, Roumania, Czechoslovakia and the U.S.S.R., the space research service is a primary service in the band 5670–5725 Mc/s.

(392A) This band may also be used for the transmission of telecommand signals associated with communication-satellite earth stations operating in the same band.

(392C) Stations of the fixed and mobile services, previously authorized in the bands 7250–7300 Mc/s and 7975–8025 Mc/s, may continue to operate until 1 January 1969. This provision does not apply to the countries listed in Nos. 392G and 392H.

(392D) As an exception, passive communication-satellite systems also may be accommodated in the band 7250–7750 Mc/s, subject to:

(a) Agreement between administrations concerned and those whose services, operating in accordance with the Table, may be affected;

(b) The co-ordination procedure laid down in Articles 9 and 9A.

Such systems shall not cause any more interference at active earth station receivers than would be caused by fixed or mobile services. Power-flux density limitations at the earth's surface after reflection from the passive communication-satellites shall not exceed those prescribed in these Regulations for active communication-satellite systems.

The maximum effective power radiated in any direction in the horizontal plane by earth stations of passive satellite systems shall not exceed +55 dbW, not taking the site shielding factor into account. If the distance between a transmitting station of a passive system and the territory of another administration exceeds 400 km, this limitation may be increased in that direction by 2 db for each 100 km in excess of 400 km up to a maximum of 65 dbW.

(392F) In the bands 7200–7250 Mc/s and 7300–7750 Mc/s, the meteorological-satellite service may use a band up to 100 Mc/s in width on a primary basis. These bands may also be used for the transmission of tracking and telemetering signals associated with meteorological-satellite space stations operating in the same band.

(392G) In Algeria, Austria, Bulgaria, Cyprus, Cuba, Ethiopia, Finland, Hungary, Japan, Kuwait, Lebanon, Liberia, Malaysia, Morocco, the Philippines, Poland, the United Arab Republic, Yugoslavia, Roumania, Sweden, Switzerland, Czechoslovakia, and the U.S.S.R., the band 7250–7300 Mc/s is also allocated to the fixed and mobile services.

(329H) In Algeria, Bulgaria, Cuba, Ethiopia, Finland, Hungary, Japan, Kuwait, Lebanon, Morocco, Poland, the United Arab Republic, Yugoslavia, Roumania, Sweden, Switzerland, Czechoslovakia, and the U.S.S.R., the band 7975–8025 Mc/s is also allocated to the fixed and mobile services.

(393A) The band 7120–7130 Mc/s may be used for telecommand in association with space services, subject to agreement between the administrations concerned and those having services operating in accordance with the Table, which may be affected.

(394C) In Cuba, the band 8400–8500 Mc/s is also allocated to the fixed and mobile services.

(401A) The band 9975–10025 Mc/s may be used by weather radar on meteorological-satellites.

(405B) In Algeria, Bulgaria, Cuba, Hungary, Japan, Kuwait, Lebanon, Pakistan, Poland, the United Arab Republic, Yugoslavia, Roumania, Czechoslovakia, and the U.S.S.R., the band 10.68–10.7 Gc/s is also allocated to the fixed and mobile services.

(409A) In Algeria, Bulgaria, Cuba, Hungary, Kuwait, Lebanon, Morocco, Pakistan, Poland, the United Arab Republic, Yugoslavia, Roumania, Czechoslovakia, and the U.S.S.R., the band 15.25–15.35 Gc/s is also allocated to the fixed and mobile services.

(409C) In Algeria, Bulgaria, Cuba, Hungary, Kuwait, Lebanon, Morocco, Pakistan, Poland, the United Arab Republic, Yugoslavia, Roumania, Czechoslovakia, and the U.S.S.R., the band 15.35–15.4 Gc/s is also allocated to the fixed and mobile services.

(409D) In Bulgaria, Cuba, Hungary, Kuwait, Lebanon, Poland, the United Arab Republic, Roumania, Czechoslovakia, and the U.S.S.R., the band 19.3–19.4 Gc/s is also allocated to the fixed and mobile services.

(412A) In Bulgaria, Cuba, Hungary, Poland, the United Arab Republic, Roumania, Czechoslavakia, and the U.S.S.R., the band 31.3–31.5 Gc/s is also allocated to the fixed and mobile services.

(412B) In Bulgaria, Cuba, Hungary, Poland, Yugoslavia, Roumania, Czechoslovakia, and the U.S.S.R., the space research service is a primary service in the band 31.8–32.3 Gc/s.

(412C) In Bulgaria, Cuba, Hungary, Poland, Roumania, Czechoslovakia, and the U.S.S.R., the space research service is a primary service in the band 34.2–35.2 Gc/s.

(412D) The band 34.4–34.5 Gc/s may be used by weather radar devices on meteorological satellites for the detection of cloud.

(412E) In Bulgaria, Cuba, Hungary, Poland, Yugoslavia, Roumania, Czechoslovakia, and the U.S.S.R., the band 36.5–37.5 Gc/s is also allocated to the radio astronomy service.

(412F) In Cuba and India, the band 33–33.4 Gc/s is also allocated to the radio astronomy service.

(412G) In Bulgaria, Cuba, Hungary, Poland, Yugoslavia, Roumania, Czechoslovakia and the U.S.S.R., the band 33.4–34 Gc/s is also allocated to the radio astronomy service.

(412H) In Bulgaria, Cuba, Hungary, Poland, Roumania, Czechoslovakia, and the U.S.S.R., the space research service is a primary service in the band 31–31.3 Gc/s.

e. Footnote NG48 is deleted from the NG footnotes following the Table of Frequency Allocations in § 2.106.

f. Footnote NG41 is amended to read as follows:

NG41 Frequencies in the bands 3700–4200 Mc/s, 5925–6426 Mc/s, and 10.7–11.7 Gc/s may also be assigned to stations in the international fixed public and international control services located in U.S. Possessions in the Caribbean area.

g. Footnotes US22, US63, US64, US73, US75, and US76 are deleted from the US footnotes following the Table of Frequency Allocations in § 2.106.

h. The following US footnotes (introductory text only for US7) to the Table in § 2.106 are amended to read:

US7 In the band 420–450 Mc/s and within the following areas, the DC plate power input to the final stage of a transmitter employed in the amateur service shall not exceed 50 watts, unless expressly authorized by the Commission after mutual agreement, on a case-by-case basis, between the Federal Communications Commission Engineer in Charge at the applicable District Office and the Military Area Frequency Coordinator at the applicable military base:

* * * * *

US21 Existing Government operations and non-Government stations authorized in this band as of December 1, 1961, may continue and shall not be required to afford protection to radio astronomy observatories within the United States and its possessions. However, by international agreement, such stations must afford protection to the observatories of other countries.

US26 The bands 117.975–121.425 Mc/s, 123.575–128.825 Mc/s and 132.025–136 Mc/s are for air traffic control communications.

US35 Except as provided by footnotes US6 and US87, the only non-Government service permitted in the band 420–450 Mc/s is the amateur service. The amateur service shall not cause harmful interference to the radiolocation service.

US53 In view of the fact that the band 13.25–13.4 Gc/s is allocated exclusively to doppler navigation aids, Government and non-Government airborne doppler radars in the aeronautical radio-navigation service are permitted in the band 8750–8850 Mc/s only on the condition that they must accept any interference which may be experienced from stations in the radiolocation service in the band 8500–10000 Mc/s.

US58 In the band 10,000–10,500 Mc/s, pulsed emissions are prohibited, except for weather radars on board meteorological satellites in the band 10,000–10,025 Mc/s. The amateur service and the non-Government radiolocation service, which shall not cause harmful interference to the Government radiolocation service, are the only non-Government services permitted in this band. The non-Government radiolocation service is limited to survey operations using transmitters with a power not to exceed one watt into the antenna.

US60 The use of this band by non-Government services is limited to the space (telecommand) service.

US62 The use of this band by Government services is limited to the space research service.

US69 In the band 31.8–33.4 Gc/s, ground-based radionavigation aids are not permitted except where they operate in co-operation with airborne or shipborne radionavigation devices.

US70 The meteorological aids service allocation in the band 400.05–406 Mc/s does not preclude the operation therein of associated ground transmitters.

US72 In the band 24.25–25.25 Gc/s, Government radiolocation devices (ASDE) are permitted between 24.25–24.47 Gc/s on a shared basis.

US74 The radio astronomy service shall be protected from extra-band radiation only to the extent that such radiation exceeds the level which would be present if the offending station were operating in compliance with the technical standards or criteria applicable to the service in which it operates.

US78 In the band 1435–1525 Mc/s, the frequencies between 1435 and 1485 Mc/s will be assigned primarily for the flight testing of manned aircraft, or major components thereof; the frequencies between 1485 and 1525 Mc/s will be assigned primarily for the flight testing of unmanned aircraft and missiles or major components thereof. Included as permissible usage for aeronautical telemetering stations in the band 1435–1525 Mc/s is telemetry associated with launching and re-entry into the earth's atmosphere, as well as any incidental orbiting prior to re-entry, of manned or unmanned objects undergoing flight tests.

US81 The band 38–38.16 Mc/s may be used by both Government and non-Government radio astronomy observatories. No new assignments are to be made and Government stations in the band 38–38.16 Mc/s will be moved to other bands on a case-by-case basis, as required, to protect radio astronomy observations from harmful interference. As an exception, however, low-powered military transportable and mobile stations used for tactical and training purposes will continue to use the band. To the extent practicable, the latter operations will be adjusted to relieve such interference as may be caused to radio astronomy observations. In the event of harmful interference from such local operations, radio astronomy observatories may contact local military commands directly, with a view to effecting relief. A list of military commands, areas of coordination, and points of contact for purposes of relieving interference may be obtained upon request from the Office of Chief Engineer, Federal Communications Commission, Washington, D.C., 20554.

i. The following new US footnotes are added to the Table in § 2.106 in proper numerical sequence:

US83 Non-Government use of this band is limited to the following: 9995–10003 kc/s, radio astronomy service; 10003–10005 kc/s, radio astronomy and space research services.

US84 The non-Government use of this band is limited to the space research service.

US85 In the bands 117.975–123.075 and 123.575–136 Mc/s, the use and development, for the aeronautical mobile (R) service, of systems using space communication techniques may be authorized but limited initially to satellite relay stations of the aeronautical mobile (R) service.

US86 The frequencies 148.25 Mc/s ±15 kc/s and 154.2±15 kc/s may be used by Government and non-Government stations for space telecommand at specific locations, subject to such conditions as may be imposed on a case-by-case basis. With respect to 154.2 Mc/s, the commands are to be limited to short duration of the order of three seconds ("Address and execute" commands). Further, on a case-by-case basis and solely to avoid harmful interference to non-Government stations in the land mobile service, a comparable replacement frequency assignment will be made available below 150.8 Mc/s, if required.

US87 The frequency 450 Mc/s, with maximum emission bandwidth of 500 kc/s, may be used by Government and non-Government stations for space telecommand at specific locations, subject to such conditions as may be applied on a case-by-case basis.

US88 Stations in the broadcasting service will not be authorized in the band 608–614 Mc/s prior to January 1, 1974. In the interim the band is available for use by the radio astronomy service. The radio astronomy service shall be protected from extra-band radiation only to the extent that such radiation exceeds the level which would be present if the offending station were operating in compliance with the technical standards or criteria applicable to the service in which it operates.

US89 The aeronautical telemetering frequencies in the band 1525–1535 Mc/s will be assigned primarily for the flight testing of unmanned aircraft and missiles or major components thereof. Included as permissible usage for aeronautical telemetering stations in the band 1525–1535 Mc/s is telemetry associated with launching and re-entry into the earth's atmosphere, as well as any incidental orbiting prior to re-entry, of manned or unmanned objects undergoing flight tests.

US90 The band 2110–2120 Mc/s may be used by Government and non-Government stations for space telecommand at specific locations in conjunction with spacecraft engaged in deep space research, subject to such conditions as may be applied on a case-by-case basis.

US91 The ultimate disposition of this band in the communication-satellite service, as between Government and non-Government, is deferred. In the meanwhile the non-Government may exploit the 4 and 6 Gc/s bands and the Government may exploit the 7 and 8 Gc/s bands for communication-satellite service systems intended to become operational. Any modification of this policy will be discussed and agreed in the FCC/DTM(IRAC) mechanism prior to the filing of applications with the IRAC for frequency assignments which are not in accordance with the foregoing.

US92 In the band 7300–7750 Mc/s, the meteorological-satellite service may use a band up to 100 Mc/s in width. This 100 Mc/s band may also be used for the transmission of tracking and telemetering signals associated with meteorological-satellite space stations operating in the same band.

US94 The bands 30.005–30.015 Mc/s and 39.986–40.02 Mc/s are also allocated, on a secondary basis, to the space research service for space station-to-earth station transmissions only.

US100 In the Additional Protocol to the Final Acts of the Space EARC, Geneva, 1963, a declaration on behalf of the USA states that the USA cannot accept any obligation to observe the exceptions claimed by Cuba in those footnotes to the Table of Frequency Allocations which were adopted by the EARC and which specifically name Cuba.

[Docket No. 15723; FCC 64-1110]

## SHARED USE OF CERTAIN FREQUENCY BANDS BY FIXED, MOBILE, AND COMMUNICATION-SATELLITE SERVICES

### Notice of Proposed Rule Making

In the matter of amendment of Parts 21 and 25 of the Commission's rules to provide for the shared use of the frequency bands 3700–4200, 5925–6425, 7250–7750 and 7900–8400 Mc/s by the Fixed, Mobile and Communication-Satellite Services.

1. Notice of proposed rule making in the above-entitled matter is hereby given.

2. Pursuant to Recommendation No. 36 of the Ordinary Administrative Radio Conference, Geneva, 1959, the International Telecommunication Union (ITU) convened an Extraordinary Administrative Radio Conference (EARC) in Geneva, Switzerland, on October 7, 1963, to allocate frequency bands for space radiocommunication purposes and for the radio astronomy service. The Final Acts of the EARC, signed at Geneva on November 8, 1963, and scheduled to enter into force internationally on January 1, 1965, constitute a partial revision of the international Radio Regulations, Geneva, 1959. The United States, having deposited its instrument of ratification of the Final Acts with the Secretary-General of the ITU in Geneva on April 3, 1964, is now a party to the Radio Regulations (Geneva, 1959) as revised by the Final Acts of the Space EARC.

3. By separate action this date, in Docket No. 15722, the Commission adopted a notice of proposed rule making looking toward the alignment of Part 2 of its rules, to the extent practicable, with the frequency allocation changes to the international Table of Frequency Allocations adopted by the Space EARC. Among other things, that proceeding would provide for the accommodation of telecommand, telemetering and tracking functions common to all space services and for the co-equal sharing of certain frequency bands above 3700 Mc/s by the Fixed, Mobile and Communication-Satellite Services.

4. It is the purpose of the instant proceeding to amend Parts 21 and 25 of the rules to set forth the technical criteria to be observed by the sharing services in order to minimize the possibility of mutual interference. These criteria agree with the sharing criteria adopted by the Space EARC for the bands in question, except with respect to the frequency band 5925–6425 Mc/s. Section 25.204 (a) below, proposes that the mean effective radiated power transmitted in any direction in the horizontal plane by a communication-satellite earth station shall not exceed +dbW in any 4 kc/s band, whereas the upper limit adopted by the Space EARC was +55 dbW. Additionally, for the band 5925–6425 Mc/s, the Commission is considering the advisability of specifying in § 25.205(a), a minimum angle of 5° for earth station transmitting antennas as opposed to the 3° minimum specified in criteria adopted by the Space EARC. Technical comments are invited especially on this point to assist the Commission in its determination. In each case these changes would reduce the area within the coordination distance contours drawn about an earth station as well as the possibility of interference to stations in the terrestrial services. It is important to determine the extent to which such changes might affect the ability of earth stations to communicate via satellites. Comparable changes have not been proposed in the band 7900–8400 Mc/s.

5. As mentioned in the notice of proposed rule making referred to in paragraph 3, and in § 25.202(a) of Appendix II to this document, a determination has not yet been made as to the disposition of the frequency bands 3700–4200, 5925–6425, 7250–7750 and 7900–8400 Mc/s as between Government and non-Government services for space radiocommunication purposes. For this reason, the instant proceeding assumes that all may be available to non-Government space users. It is recognized that such assumptions may require amendment in the light of future developments. In any event, it is not contemplated that the frequency bands 3700–4200 and 5925–6425 Mc/s will become available to Government users for fixed and mobile operations, nor that 7250–7750 and 7900–8400 Mc/s will become available to non-Government users for fixed and mobile operations, as a result of this proceeding.

6. The importance of the "coordination distance" concept set forth in detail in Appendix II and referred to in more general terms in Appendix I below, cannot be overemphasized. It is significant from both the national and international standpoints. In essence, it establishes the maximum distance over which an earth station might reasonably be expected to cause or to receive harmful interference and calls for very close coordination between the sharing services to maintain the integrity of the sharing arrangement. In many instances the necessary separation distance between stations of the sharing services may be considerably less than the coordination distance because of terrain shielding, antenna directivity, frequency separation and other mitigating factors.

7. Proposed § 25.251, the procedure for calculating coordination distance between earth stations and terrestrial stations sharing the same frequency band in the range 1–10 Gc/s, follows almost verbatim the identically entitled Annex to Recommendation No. 1A to the Final Acts of the Space EARC. It departs therefrom in its treatment of coordination distances between terrestrial station transmitters and space research earth station receivers and proposes the same criteria as are used for communication-satellite and meteorological-satellite earth station receivers. Traditionally, research stations in general have been authorized on the basis that they shall not cause harmful interference to others and that they shall accept any interference they themselves experience. As a general rule, this approach is not practicable for space research earth station receiving facilities because of their great cost and extreme susceptibility to interference. It has been assumed in this instance, however, that any space research station operating in the bands dealt with here would be doing experimental work in connection with the communication-satellite or meteorological-satellite services. Therefore, since any operational systems growing out of such experimentation would have to live in a shared environment with other services, it is reasonable to protect such space research earth station receivers only to the degree that protection is afforded to receiving earth stations in the communication-satellite and meteorological-satellite services.

8. Specific proposals for rule changes reflecting the above in Part 21 are set forth below; those relating to Part 25 are set forth in Appendix II.

9. These proposals to amend the Commission's Rules are issued under the authority of sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

10. Comments in support of or in opposition to the proposed amendments may be filed on or before January 15, 1965. Reply comments may be filed on or before January 25, 1965. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

11. In accordance with the provisions of § 1.215(b) of the Commission's rules, an original and 14 copies of all statements, briefs, or comments filed shall be furnished the Federal Communications Commission.

Adopted: December 2, 1964.

Released: December 4, 1964.

FEDERAL COMMUNICATIONS COMMISSION,[1]

[SEAL] BEN F. WAPLE, *Secretary.*

Part 21 of the Commission's rules is amended as follows:

1. Section 21.1 is amended by adding the following new definitions in the proper alphabetical sequence:

**§ 21.1 Definitions.**

• • • • •

*Coordination distance.* For the purpose of this Part, the expression "coordination distance" means the distance from an earth station, within which there is a possibility of the use of a given transmitting frequency at this earth station causing harmful interference to stations in the fixed or mobile service, sharing the same band, or of the use of a given frequency for reception at this earth station receiving harmful interference from such stations in the fixed or mobile service.

• • • • •

*Earth station.* A station in the space service located either on the earth's surface, including on board a ship, or on board an aircraft.

• • • • •

[1] Commissioners Hyde, Bartley and Loevinger absent.

*Fixed earth station.* An earth station intended to be used at a specified fixed point.

• • • • •

*Mobile earth station.* An earth station intended to be used while in motion or during halts at unspecified points.

• • • • •

2. Section 21.107(b) is amended to read as follows:

**§ 21.107 Transmitter power.**

• • • • •

(b) The rated power output of a transmitter employed in these radio services shall not exceed the values shown in the following tabulation:

| Frequency range: | *Rated power output* |
|---|---|
| Below 30 Mc/s | 50 watts. |
| 30 to 50 Mc/s | 350 watts. |
| 50 to 76 Mc/s | 50 watts. |
| 76 to 500 Mc/s | 250 watts. |
| 500 to 10,000 Mc/s | 100 watts.[1] |
| Above 10,000 Mc/s | Unlimited. |

[1] As an exception, in the band 5925–6425 Mc/s, the power delivered by a transmitter to the antenna of a station in the fixed service shall not exceed 20 watts. Additionally, in this band, the maximum effective radiated power of the transmitter and associated antenna of a station in the fixed service shall not exceed +55 dbw. These limitations are necessary to minimize the probability of harmful interference to reception in this band on board communication-satellite space stations.

• • • • •

3. In § 21.204, the Note is revised to read as follows:

**§ 21.204 FCC publications required for reference.**

• • • • •

NOTE: It is suggested that the following additional documents be obtained from the Government Printing Office and maintained for reference:

(1) Communications Act of 1934, as amended.

(2) Part 1 of this chapter, Practice and Procedure.

(3) Part 2 of this chapter, Frequency Allocations and Radio Treaty Matters; General Rules and Regulations.

(4) Part 13 of this chapter, Commercial Radio Operators.

(5) Part 17 of this chapter, Construction, Marking, and Lighting of Antenna Structures.

(6) Part 25 of this chapter, Satellite Communications.

(7) Part 42 of this chapter, Preservation of Records of Communication Common Carriers.

(8) Part 61 of this chapter, Tariffs.

(9) Part 63 of this chapter, Extension of Lines and Discontinuance of Service by Carriers.

4. Section 21.701(a) is amended to read as follows:

**§ 21.701 Frequencies.**

(a) (1) The following frequency bands are available for assignment to radio stations in this service on a shared basis with stations in the Communication-Satellite Service and the Local Television Transmission Service:

3700–4200 Mc/s
5925–6425 Mc/s [1]

[1] This band is not available for assignment to mobile earth stations.

(2) The following frequency band is available for assignment to radio stations in this service on a shared basis with the Local Television Transmission Service:

10700–11700 Mc/s

• • • • •

5. Section 21.706(c) is added to read as follows:

**§ 21.706 Supplementary showing required with applications.**

• • • • •

(c) Part 25 of this chapter sets forth the procedure for calculating "coordination distance" in bands shared on an equal basis by this service and the Communication-Satellite Service. This is the distance: (1) Within which an earth station transmitter might cause harmful interference to stations in this service; and (2) within which stations in this service might cause harmful interference to reception at earth stations. By international agreement, if the transmitting or receiving coordination distance contours drawn about a proposed earth station of one country overlap the boundary of another country, the first country is required to provide the second with maps showing the transmitting and receiving contours to determine if harmful interference might be caused by or to the proposed earth station. Once agreement is reached, neither country will alter its station assignment pattern in the area concerned, in a manner capable of degrading the agreed usage of the other country without further consultation with that country. Similarly, pursuant to Part 25, licensees of earth stations in the Communication-Satellite Service are required to file with the Commission, maps showing coordination distance contours for such earth stations for both the earth-to-satellite and satellite-to-earth bands. All such contour maps shall be kept on file for public inspection in the offices of the Commission's Common Carrier Bureau in Washington, D.C. Therefore, each applicant filing pursuant to paragraph (a) of this section shall ascertain in advance of such filing if the location of the proposed station lies within the pertinent coordination distance contour of an earth station on file with the Commission. Since earth stations will be receiving only in the band 3700–4200 Mc/s and transmitting only in the band 5925–6425 Mc/s, applicants will be guided accordingly. If the proposed station is to be operated in the band 3700–4200 Mc/s, and lies within the coordination distance contour of a receiving earth station, the application shall be accompanied by a statement showing that antenna directivity, power, terrain shielding and/or other mitigating factors are such that harmful interference will not be caused to reception at the earth station, on the basis of criteria set forth in Subpart C of Part 25. Conversely, if the proposed station is to be operated in the band 5925–6425 Mc/s, and lies within the coordination distance contour of a transmitting earth station, the application shall be accompanied by a similar statement showing that harmful interference will not be caused to reception at the applicant's station in this service.

6. Section 21.708(a)(7) is added to read as follows:

**§ 21.708 Notification of station operation at temporary fixed locations.**

(a) • • •

(7) A notification of operations to be conducted within the coordination distance contours of a fixed earth station shall include compliance with the provisions of § 21.706(c).

• • • • •

7. Section 21.801(f) is amended to read as follows:

**§ 21.801 Frequencies.**

• • • • •

(f) (1) Frequencies in the following bands are available for assignment to television STL stations in this service on a shared basis with stations in the Communication-Satellite Service and the Point-to-Point Microwave Radio Service:

3700–4200 Mc/s
5925–6425 Mc/s

(2) The following frequency band is available for assignment to television STL stations in this service on a shared basis with stations in the Point-to-Point Microwave Radio Service:

10700–11700 Mc/s

8. Section 21.807(a)(5) is added to read as follows:

**§ 21.807 Stations at temporary fixed locations.**

(a) • • •

(5) Applications for such stations shall comply with the provisions of § 21.706(c).

• • • • •

9. A new § 21.809 is added, to read as follows:

**§ 21.809 Stations affected by coordination distance procedures.**

Each application for initial installation of a radio station in this service, or for installation of additional transmitters, or for authority to communicate with new points, shall comply with the provisions of § 21.706(c).

Part 25 of the Commission's rules is amended by adding new Subpart C, as follows:

**Subpart C—Technical Standards**

Sec.
25.201 Definitions.
25.202 Frequencies.
25.203 Choice of sites and frequencies.
25.204 Power limits.
25.205 Minimum angle of antenna elevation.
25.206 Station identification.
25.207 Cessation of emissions.
25.208 Power flux density limits.
25.251 Procedure for calculating coordination distance.

## Subpart C—Technical Standards

**§ 25.201 Definitions.**

*Active satellite.* An earth satellite carrying a station intended to transmit or re-transmit radiocommunication signals.

*Communication-satellite earth station.* An earth station in the communication-satellite service.

*Communication-satellite service.* A space service:

—between earth stations, when using active or passive satellites for the exchange of communications of the fixed or mobile service, or

—between an earth station and stations on active satellites for the exchange of communications of the mobile service, with a view to their re-transmission to or from stations in the mobile service.

*Communication-satellite space station.* A space station in the communication-satellite service, on an earth satellite.

*Coordination distance.* For the purposes of this Part, the expression "coordination distance" means the distance from an earth station, within which there is a possibility of the use of a given transmitting frequency at this earth station causing harmful interference to stations in the fixed or mobile service, sharing the same band, or of the use of a given frequency for reception at this earth station receiving harmful interference from such stations in the fixed or mobile service.

*Earth station.* A station in the space service located either on the earth's surface, including on board a ship, or on board an aircraft.

*Fixed earth station.* An earth station intended to be used at a specified fixed point.

*Mobile earth station.* An earth station intended to be used while in motion or during halts at unspecified points.

*Passive satellite.* An earth satellite intended to transmit radio communication signals by reflection.

*Space service.* A radiocommunication service:

—between earth stations and space stations,

—or between space stations,

—or between earth stations when the signals are re-transmitted by space stations, or transmitted by reflection from objects in space excluding reflection or scattering by the ionosphere or within the earth's atmosphere.

*Space station.* A station in the space service located on an object which is beyond, is intended to go beyond, or has been beyond, the major portion of the earth's atmosphere.

*Space telecommand.* The use of radiocommunication for the transmission of signals to a space station to initiate, modify or terminate function of the equipment on a space object, including the space station.

*Space telemetering.* The use of telemetering for the transmission from a space station of results of measurements made in a spacecraft, including those relating to the functioning of the spacecraft.

*Space tracking.* Determination of the orbit, velocity or instantaneous position of an object in space by means of radiodetermination, excluding primary radar, for the purpose of following the movement of the object.

*Stationary satellite.* A satellite, the circular orbit of which lies in the plane of the earth's equator and which turns about the polar axis of the Earth in the same direction and with the same period as those of the earth's rotation.

*Terrestrial service.* Any radio service defined in this Chapter, other than a space service or the radio astronomy service.

*Terrestrial station.* A station in a terrestrial service.

**§ 25.202 Frequencies.**

(a) The following frequency bands are available for use by the communication-satellite service on a shared basis with terrestrial radio services. Precise frequencies and bandwidth of emission will be assigned on a case-by-case basis.

| *Satellite-to-earth* | *Earth-to-satellite* |
|---|---|
| 3700–4200 Mc/s [1 2]------ | 5925–6425 Mc/s [2 4] |
| 7250–7750 Mc/s [1 3]------ | 7900–8400 Mc/s [1 3] |

[1] The ultimate disposition of these bands as between Government and non-Government services for space radiocommunication will be the subject of separate rule-making.

[2] This band may also be used for the transmission of tracking and telemetering signals associated with communication-satellite space stations operating in the same band.

[3] This band may also be used for the transmission of telecommand signals associated with communication-satellite earth stations operating in the same band.

[4] This band is not available for assignment to mobile earth stations.

(b) The following frequencies or bands of frequencies are available for space telecommand functions in conjunction with the communication-satellite service:

148.25 Mc/s—maximum bandwidth not to exceed 30 kc/s.
154.2 Mc/s—maximum bandwidth not to exceed 30 kc/s.
450.0 Mc/s—maximum bandwidth not to exceed 0.5 Mc/s.

(c) The following frequency bands are available for telemetering from communication-satellite space stations. Precise frequencies and associated bandwidths of emission will be assigned on a case-by-case basis:

136–137 Mc/s [1]
137–138 Mc/s
400.05–401 Mc/s [1]
401–402 Mc/s

[1] This band is basically a space research band and is not intended for use by operational communication-satellite systems once the desired spacecraft orbit is established.

(d) The following frequency bands are available for transmission from spacecraft for the tracking of communication-satellite space stations. Precise frequencies and associated bandwidths of emission will be assigned on a case-by-case basis.

136–137 Mc/s [1]
137–138 Mc/s
400.05–401 Mc/s [1]

[1] This band is basically a space research band and is not intended for use by operational communication-satellite systems once the desired spacecraft orbit is established.

**§ 25.203 Choice of sites and frequencies.**

(a) Sites and frequencies for earth stations, operating in frequency bands shared with equal rights between terrestrial and space services, shall be selected, to the extent practicable, in areas where the surrounding terrain and existing frequency usage are such as to minimize the possibility of harmful interference between the sharing services.

(b) An applicant for an earth station authorization shall calculate the coordination distance for the proposed station in accordance with the procedures set forth in § 25.251, and submit with his application a map drawn to appropriate scale indicating the location of the earth station and the coordination distances from the earth station, for both transmission and reception by the earth station, as a function of azimuth. The coordination distance for earth station reception shall cover the range 0 to 55 dbW in increments of not more than 10 db.

(c) An applicant for an earth station authorization shall also make a showing, accompanied by supporting data and calculations, that existing stations operating within the frequency band in question, and located within the pertinent calculated coordination distance contours of the proposed earth station, will not be subjected to harmful interference from earth station transmissions and will not cause harmful interference to reception at the earth station.

**§ 25.204 Power limits.**

(a) Within the band 5925–6425 Mc/s the mean effective radiated power transmitted in any direction in the horizontal plane by a communication-satellite earth station shall not exceed +45 dbW in any 4 kc/s band.

(b) Within the band 7900–8400 Mc/s, in order to provide a capability for both active and passive communication-satellite systems, the mean effective radiated power transmitted in any direction in the horizontal plane by a communication-satellite earth station shall not exceed +55 dbW in any 4 kc/s band except upon a showing of need for greater power, in which case a maximum of +65 dbW may be authorized, consistent with the provisions of paragraphs (c) and (d) of this section.

(c) In any direction where the distance from a communication-satellite earth station operating in the band 7900–8400 Mc/s to the boundary of the territory of another administration exceeds 400 km, the limit of +55 dbW in any 4 kc/s band in paragraph (b) of this section may be increased in that direction by 2 db for each 100 km in excess of 400 km up to a maximum of +65 dbW.

(d) If, in any direction from a proposed communication-satellite earth station, the distance to the boundary of the territory of another administration is less than the coordination distance as calculated in § 25.251, the Commission will initiate discussions in the technical aspects of the proposed operation.

NOTE: For the purposes of this part, the effective radiated power transmitted in the horizontal plane shall be taken to mean the ERP actually transmitted toward the horizon, reduced by the site shielding factor that may be applicable. The value of site shielding factor shall be determined as indicated in § 25.251(e).

**§ 25.205 Minimum angle of antenna elevation.**

(a) Within the band 5925–6425 Mc/s, earth station antennas shall not be employed for transmission at elevation angles less than —°, measured from the horizontal plane to the central axis of the main lobe.

NOTE: The choice as to 3° or 5° will be determined in this proceeding.

(b) Within the band 7900–8400 Mc/s, earth station antennas shall not be employed for transmission at elevation angles less than 3°, measured from the horizontal plane to the central axis of the main lobe.

**§ 25.206 Station identification.**

(a) The requirement for transmission of station identification is waived for communication-satellite earth stations and for stations the sole function of which is to transmit telecommand signals to communication-satellite space stations.

(b) The requirement for transmission of station identification is waived for communication-satellite space stations but applicants therefor shall file ephemeris data and descriptions of transmission characteristics to be used in lieu of identifying call signs.

**§ 25.207 Cessation of emissions.**

Space stations shall be made capable of ceasing radio emissions by the use of appropriate devices (battery life, timing devices, ground command, etc.) that will ensure definite cessation of emissions.

**§ 25.208 Power flux density limits.**

(a) The total power flux density at the earth's surface, produced by an emission from a communication-satellite space station, where wide-deviation frequency (or phase) modulation is used, shall in no case exceed —130 dbW/m² for all angles of arrival. In addition, such signals shall if necessary be continuously modulated by a suitable waveform, so that the power flux density shall in no case exceed —149 dbW/m² in any 4 kc/s band for all angles of arrival.

(b) The power flux density at the earth's surface, produced by an emission from a communication-satellite space station, where modulation other than wide-deviation frequency (or phase) modulation is used, shall in no case exceed —152 dbW/m² in any 4 kc/s band for all angles of arrival.

(c) The power flux density limits specified in paragraphs (a) and (b) of this section are applicable to the frequency bands 3700–4200 Mc/s and 7250–7750 Mc/s. Systems brought into use after January 1, 1969, shall not be limited in the frequency band 7250–7300 Mc/s.

(d) Passive communication-satellite systems may be authorized in the frequency band 7250–7750 Mc/s. The power flux density produced at the earth's surface as the result of reflection from a passive communication satellite shall not exceed the limits set forth in paragraphs (a) and (b) of this section for active systems.

**§ 25.251 Procedure for calculating coordination distance.**

(a) *Requirements for coordination.* Coordination is required when earth stations and terrestrial stations operate in shared frequency bands with equal rights. The coordination area around an earth station is determined by ascertaining the coordination distance measured in the various azimuths from that station.

(1) For the calculation of coordination distance, two separate cases must be considered:

(i) Interference from an earth station transmitter to terrestrial station receivers; and

(ii) Interference from terrestrial station transmitters to communication-satellite, meteorological-satellite or space research earth station receivers.

(iii) In the case of subparagraph (1)(i) of this paragraph, it has been assumed for the purpose of calculation, that the terrestrial receiving station is a line-of-sight radio-relay station designed according to C.C.I.R. Recommendations. In the case of subparagraph (1)(ii) of this paragraph, it has been assumed for all applications that the earth station forms a part of a communication-satellite system. Further, in order to ensure that a safe value of coordination distance shall be obtained, it has been assumed that the receiving station antenna in each case is of typically high gain. For the same reason, appropriately low-noise sensitive receivers are assumed in all cases.

(b) *Minimum permissible basic transmission loss ($L_b$).* (1) The general formula for calculating the required minimum permissible basic transmission loss is:

[formula 1]

$$L_b = (P_t + G_t) - F_s - (P_r - G_r)$$

where $P_t$ is the power in dbW supplied by the interfering transmitter to the transmission line input,

$G_t$ is the isotropic gain in db of the transmitting antenna of the interfering station effective in the direction of the receiving station liable to interference, including the effect of all feeder losses, and losses due to any artifical screens,

$F_s$ is the earth station site-shielding factor in db, (see § 25.251(e)).

$P_r$ is the maximum permissible interference level in dbW at the receiver input of the receiving station, and

$G_r$ is the isotropic gain in db of the antenna of the receiving station effective in the direction of the interfering transmitter, less feeder loss and polarization discrimination if applicable.

(2) When considering interference to telephone transmission systems, particularly in the case of systems using frequency modulation, it is convenient to operate in terms of the power densities in any 4 kc/s bandwidth. Therefore, in the case of interference from an earth station transmitter to terrestrial radio-relay systems, $P_t$ is taken as the maximum power density in any 4 kc/s bandwidth supplied by the earth station transmitter to the transmission line input, and similarly $P_r$ is the maximum permissible power density for any 4 kc/s bandwidth at the receiver input.

(3) When considering interference from a terrestrial transmitter to an earth station receiver, it is more convenient to consider $P_t$ and $P_r$ of formula (1) as total powers rather than power densities.

(4) It is assumed in calculating coordination distances for both cases in § 25.251(a) that the communication-satellite system is employing carrier energy dispersal techniques when lightly loaded.

(c) *Calculation of Minimum Permissible Basic Transmission Loss.* In any direction from the transmitting station, the required minimum value of permissible basic transmission loss ($L_b$) is obtained from the following tables 1 and 2.

TABLE 1.—Interference from a Communication-Satellite Earth Station Transmitter to a Terrestrial Line-of-Sight Radio-Relay System

| | Percentage of time | Values to be assumed for coordination |
|---|---|---|
| Permissible total interference in any telephone channel | 0.01 | −40 dbm0 |
| Permissible interference from one earth station to one radio-relay system receiver, assuming four such non-simultaneous interference entries. | 0.0025 | −40 dbm0 |
| Receiver transfer characteristic assuming carrier energy dispersion to distribute interference uniformly over at least 300 kc/s bandwidth. | | 1 db [1] (light loading worst case). |
| Hence, maximum value of unwanted-to-wanted signal ratio at the receiver input. | 0.0025 | −39 db |
| Minimum level of wanted signal at receiver input | | −74 dbW [1] |
| Hence, permissible level of unwanted signal at receiver input, assuming carrier energy dispersion as above. | 0.0025 | −113 dbW |
| Factor for conversion of interference bandwidth to 4 kc/s from 300 kc/s | | −19 db |
| Hence, permissible level of unwanted signal at receiver input in any 4 kc/s bandwidth. | 0.0025 | −132 dbW (per 4 kc/s). |
| Isotropic gain of radio-relay station antenna less feeder losses [2] | | 42 db |
| Isotropic gain of earth station antenna effective in the horizontal plane less feeder and polarization losses. [3] | 2.5 | $G_{earth}$ db |
| Power supplied by earth station transmitter to the transmission line input per 4 kc/s bandwidth. | | $P_{earth}$ dbW |
| Earth station site-shielding factor if applicable | | $F_s$ db |
| Minimum permissible basic transmission loss, $L_b$ (in decibels) | 0.1 | $P_{earth}+G_{earth}-F_s+174$. |

[1] These figures are taken from an example of a 960-channel line-of-sight radio-relay system but the maximum permissible unwanted signal level of −113 dbW is almost independent of the number of channels carried.

[2] The value of 42 db given in table 1 should be used unless it is known that the terrestrial station receiving antenna gain is greater than 42 db, in which case the higher value should be used.

[3] For simplicity, the appropriate value of $G_{earth}$ to be used shall be the maximum value obtained in the horizontal plane in the pertinent azimuthal direction rather than the value exceeded for 2.5 percent of the time. However, when site-shielding is allowed, the value to be used shall be that maximum value obtaining at the angle of elevation of the screening obstacle.

TABLE 2.—Interference from a Terrestrial Line-of-Sight Radio-Relay Transmitter to a Communication-Satellite Earth Station Receiver

| | Percentage of time | Values to be assumed for coordination |
|---|---|---|
| Permissible total interference in any telephone channel | 0.02 | −38 dbmO |
| Permissible interference from one terrestrial station to one earth station, assuming four such nonsimultaneous interference entries. | 0.005 | −38 dbmO |
| Receiver transfer characteristic assuming carrier energy dispersion of the wanted signal. | | 10 db [1] |
| Hence, maximum value of unwanted-to-wanted signal ratio at the receiver input. | 0.005 | −28 db |
| Minimum level of wanted signal at the receiver input | | −117 dbW [1] |
| Hence, permissible level of unwanted signal at the receiver input | 0.005 | −146 dbW |
| Isotropic gain of earth station antenna effective in the horizontal plane [2] | 5 | $G_{earth}$ db |
| Isotropic gain of radio-relay station antenna less feeder loss | | $G_{terr.}$ db |
| Earth station site-shielding factor if applicable | | $F_s$ db |
| Power supplied by terrestrial station transmitter to the transmission line input | | $P_{terr.}$ db W |
| Minimum permissible basic transmission loss, $L_b$ (in decibels) [3] | 0.1 | $P_{terr.}+G_{terr.}+G_{earth}-F_s+145$ |

[1] These figures are taken from an example of a 1200-channel communication-satellite system but the maximum permissible unwanted signal level of −145 db W is almost independent of the numbers of channels carried.
[2] For simplicity, the appropriate value of $G_{earth}$ to be used shall be that maximum value obtained in the horizontal plane in the pertinent azimuthal direction rather than the value exceeded for 5 percent of the time. However, when site-shielding is allowed, the value to be used shall be that maximum value obtaining at the angle of elevation of the screening obstacle.
[3] The application of coordination procedures for frequency sharing of this type involves the preparation, by the entity desiring to set up an earth station, of equal-power contours of coordination distance in the various azimuthal directions for several discrete levels of radiated power from the terrestrial station.

(d) *Summary.* The formulae giving the required basic transmission loss in db ($L_b$) not to be exceeded for 0.1 percent of the time are summarized as follows:

(1) For coordination between an earth transmitting station and terrestrial receiving stations:

$$L_b = P_{earth} + G_{earth} - F_s + 174$$

NOTE: For the value of $G_{earth}$, see footnote 3 to Table 1 in paragraph (c).

(2) For coordination between terrestrial transmitting stations and a communication-satellite, meteorological-satellite or space research earth receiving station:

$$L_b = P_{terr.} + G_{terr.} - F_s + G_{earth} + 145$$

NOTE: For the value of $G_{earth}$, see footnote 2 to Table 2 in paragraph (c).

(e) *Site-Shielding Factor.* (1) In cases where earth stations are sited below the level of surrounding or nearby terrain it is necessary to adopt the following procedure. Thus, if in a given azimuthal direction, an obstacle provides an angle of elevation, $\Theta$, to the earth station then—for that azimuthal direction—it is necessary, in calculating coordination distance, to employ the maximum earth station antenna gain at the angle of elevation, $\Theta$, rather than the maximum gain along the horizontal.

(2) As previously discussed, where site-shielding applies, the value of required basic transmission loss, $L_b$, may be reduced by a site-shielding factor, $F_s$, expressed in decibels. The following values of site-shielding factor shall apply when the obstacle limiting the angle of elevation is situated more than 5 kilometers away from the earth station.

| Minimum angle of elevation, $\Theta$, of obstacle, as seen from earth station | Allowable value of site-shielding factor, $F_s$, in decibels |
|---|---|
| Below 1° | 0 |
| Between 1° and 2° | 5 |
| Between 2° and 3° | 8 |
| Between 3° and 4° | 11 |
| Between 4° and 5° | 13 |
| More than 5° | 15 |

NOTE 1: In the case of nearer obstacles the values of site-shielding factor which apply may be obtained by multiplying the tabulated values by the fraction d/5, where d is the distance from the earth station to the obstacle in kilometers.

NOTE 2: The values of site-shielding factor shall be used with caution where terrestrial stations may be located, within coordination distance, at sites which are substantially above the horizontal plane passing through the earth station.

(f) *Equivalent Basic Transmission Loss at 4 Gc/s ($L_b'$).* The propagation data considered in paragraph (g) of this section relates to the frequency of 4 Gc/s and it is therefore in general necessary to convert the minimum permissible basic transmission loss ($L_b$) into an equivalent loss at 4 Gc/s ($L_b'$) before using these data to find the coordination distance. The equivalent loss in decibels at 4 Gc/s is given by:

$$L_b' = L_b + 13 - 21.6 \log_{10} f$$

where f is the assigned frequency in Gc/s. This relationship is shown in Figure 1 of paragraph (h) of this section.

(g) *World Radio-Climatic Conditions and Propagation Data.* (1) The propagation curves of Figure 2 are labelled Zone A, Zone B, and Zone C, and correspond to the various basic radio-climatic regions of the world as follows:

Zone A: Land
Zone B: Sea, at latitudes greater than 23.5° N. and 23.5° S.
Zone C: Sea, at latitudes between 23.5° N. and 23.5° S. inclusive.

(2) In any direction from the earth station the required coordination distance is found as follows:

(i) If the equivalent basic transmission loss $L_b'$ is such that the coordination distance in the given direction lies wholly within one of the zones, the coordination distance may be obtained directly from Figure 2 using the appropriate curve;

(ii) If the coordination distance lies partly in one zone and partly in another, the curves for mixed paths, Figures 3, 4, and 5 should be used. These curves show the loss $L_b'$ as a function of the path length in each of the two zones separately. Thus, if the path length in one zone and the required loss are known, the path length in the other zone can be determined. The path length in the first zone is the known distance from the earth station to the zone boundary in the direction concerned, hence the further length in the second zone can be found. The total path length, or coordination distance, is the sum of the two path lengths. Figures 3, 4, and 5 cover all cases of mixed paths in two zones as follows:

Figure 3: Zones A and B.
Figure 4: Zones A and C.
Figure 5: Zones B and C.

An example of the coordination distance calculation for a mixed path is worked out in paragraph (h) of this section.

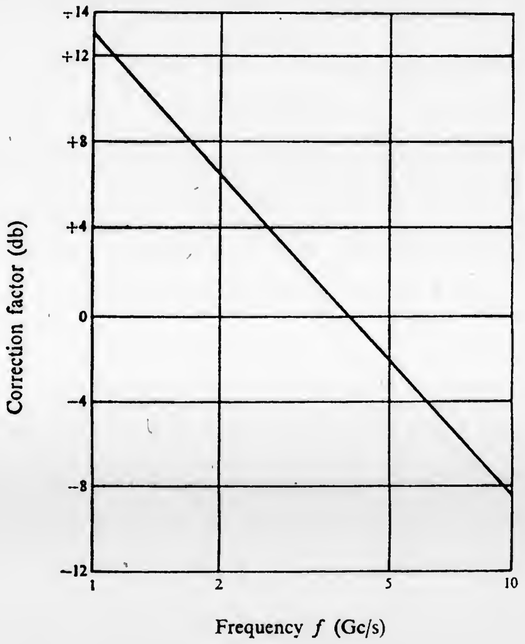
(3) In certain geographical areas where propagation losses are known to be less than the values given by the pertinent zonal propagation curves, coordination distances should be calculated on the basis of the known propagation data.

(h) *Example of Coordination Distance Calculation for a Mixed Path.* (1) The procedure to be followed in the case of a mixed path is illustrated by the following example, in which it is assumed that a basic transmission loss of 190 db is required to avoid interference from an earth station to terrestrial services in a given direction.

(2) As shown in the diagram in Figure 6, the earth station is situated 50 km. from the coast and there is an oversea path of 150 km. before the coastline of neighboring country is reached. It is required to find the coordination distance from the earth station in the given direction using the mixed paths propagation chart in Figure 6. The procedure is as follows:

(i) Starting from the origin, the distance of 50 km. from the earth station to the coastline is set off along the A axis of the chart as indicated by the point $A_1$.

(ii) The oversea path length of 150 km. is then set off parallel to the B axis of the chart as indicated by the point $B_1$.



(iii) The further overland distance required is then measured parallel to the A axis from the point $B_1$ to the point of intersection with the 190 db curve, as indicated by X. This distance is found to be 90 km.

(iv) The coordination distance is the sum of the A and B coordinates of the point X and is equal to 50+150+90=290 km.

[Docket No. 15735; FCC 64-1122]

## SATELLITE COMMUNICATIONS

### Notice of Proposed Rule Making or Formulation of General Policy

In the matter of amendment of Part 25 of the Commission's rules and regulations with respect to ownership and operation of initial earth stations in the United States for use in connection with the proposed global commercial communication-satellite system, Docket No. 15735, RM-644.

1. Notice is hereby given of proposed rule making or formulation of a general policy statement in the above entitled matter.

2. The Commission has before it for consideration a Petition for Rule Making filed on August 13, 1964, by the Communications Satellite Corporation (ComSat). The petition requests the Commission to institute a rule making proceeding looking toward the adoption of a rule which would limit to ComSat ownership and operation of the earth stations initially required to link the United States with the contemplated global commercial satellite system.

3. The text of the rule proposed by ComSat reads as follows:

> The Commission will consider an application pursuant to section 201(c)(7) of the Communications Satellite Act of 1962, for authorization to construct, own, or operate a satellite terminal station [1] only if the applicant is the Corporation authorized by Title III of said Act, except that, under either of the conditions set forth, the Commission will consider an application for such authorization filed by an authorized carrier:
>
> A. If such an application is filed after there has been constructed and placed in operation by the Corporation, pursuant to authorization theretofore granted by the Commission, a satellite terminal station in each of the following areas, namely: the northeastern part of the United States, the northwestern part of the United States, and the State of Hawaii, or
>
> B. If, upon a proper showing by the applicant, the Commission finds that the Corporation has failed within a reasonable time to file application for authorization to construct satellite terminal stations in the above-mentioned areas or has failed to proceed diligently with the construction of satellite terminal stations which have been authorized by the Commission.

[1] Attention is invited to the fact that the term "satellite terminal station" appears in the Communications Satellite Act of 1962 (76 Stat. 419). In the Final Acts of the Extraordinary Administrative Conference (Geneva 1963), ratified by the President on March 16, 1964, these stations are referred to as "earth stations". It is, therefore, proposed that the more recent terminology adopted for international usage be employed here.

4. Statements in opposition to the petition were filed by American Communications Association (ACA), American Telephone and Telegraph Company (AT&T), Hawaiian Telephone Company (Hawaiian), ITT World Communications, Inc. (ITT), Radio Corporation of America (RCA), United States Independent Telephone Association (USITA), and Western Union International, Inc. (WUI). A statement in support of the petition was filed by Western Union (WU). In addition ComSat filed a reply to the statements in opposition.

5. The proposed rule is directed toward the implementation of section 201(c)(7) of the Communications Satellite Act of 1962 (Satellite Act) which provides:

> (c) the Federal Communications Commission, in its administration of the provisions of the Communications Act of 1934, as amended, and as supplemented by this Act, shall—
>
> • • • • •
>
> (7) grant appropriate authorizations for the construction and operation of each satellite terminal station, either to the corporation (ComSat) or to one or more authorized carriers or to the corporation and one or more such carriers jointly, as will best serve the public interest, convenience, and necessity. In determining the public interest, convenience, and necessity the Commission shall authorize the construction and operation of such stations by communications common carriers or the corporation, without preference to either;

6. The petition stresses the need for a prompt resolution of the question of earth station ownership and operation. In this connection, it recites that the research and development program undertaken by ComSat for the establishment of a global communication-satellite system contemplates that initial launches of communication satellites for the basic system are scheduled for mid-1966. It is estimated that it will require between 18 and 24 months to design and construct earth stations suitable for operational use in the system. Hence, ComSat urges that construction should commence promptly if present plans are to be realized.

7. On technological grounds, ComSat contends that the proposed rule would serve the public interest by expeditiously implementing the national communication satellite program consistent with the present state of technology and the purpose and objectives of the Satellite Act. It avers that only a limited number of earth stations can be used effectively during the initial stage of development and operation of the system. It further avers that the limitation is due to the fact that with existing technology, the channel capacity of communication satellites decreases as the number of earth stations simultaneously communicating with it increases. This is what has become known as the "multiple access" problem. It is alleged that until the constraint imposed on multiple access to a communication-satellite system is removed, a proliferation of earth stations in the U.S. would adversely affect the systems' channel capacity and quality of service.

8. The statutory responsibilities of ComSat coupled with its recently acquired international obligations under the International Agreement Establishing Interim Arrangements for a Global Commercial Communications Satellite System are also advanced as reasons in support of initial single entity ownership and operation of United States earth stations. The petition recites that pursuant to statutory directives (section 305(a)(b) of the Satellite Act) interim arrangements have been completed under which an international consortium of communication entities will own and operate the space segment of the global system. Under the terms of the Interim Agreement, ComSat will represent the United States on the Interim Committee of the consortium which will be responsible for the design, development, construction, establishment, and operation of the space segment of the system. ComSat will also act as manager of the space segment. Given this posture, it is contended that single entity ownership of U.S. earth stations will best serve the public interest during the interim period of operation by fostering close and essential coordination in the design, construction and operation of such stations among all participants in the system.

9. Absent earth station ownership, ComSat believes that its statutory mission under the Satellite Act and its role as the U.S. participant in the global system will be rendered relatively ineffective. In this connection, it is pointed out that the communications entities of other nations whose representatives will be the initial members of the Interim Committee, now own, or will own and operate, or will make the determinations with respect to earth stations to be located in their respective countries. Accordingly, it is urged that ComSat should be permitted to own and operate the initial U.S. earth stations in order to maintain parity with other participating nations so as to enable it to meet effectively its multifaceted obligations.

10. In its statement in support of the petition, Western Union alleges that ownership and operation of earth stations by ComSat would achieve more effective coordination between earth stations and satellites and would provide the system with a capability of establishing and maintaining reasonably uniform costs per voice channel.

11. The views expressed in the statements filed in opposition to the petition, fall into four general categories. First, respondents maintain that the petition fails to demonstrate a need for the rule at this time. Secondly, it is argued that adoption of the proposed rule would violate the purpose and intent of section 201(c)(7). It is contended that the language and legislative history of section 201(c)(7) manifests an intent of Congress that each earth station authorization must be determined by the Commission on a case-by-case, station-by-station basis through the exercise of its adjudicatory processes. Thirdly, the proposed rule is challenged as being too broad and general to permit a public interest finding to support it. Finally, it is argued that adoption of the rule would create a monopoly in ComSat, destructive of existing competition in the field of telecommunications and contrary to the policies of the Satellite Act.

12. ComSat's reply reiterates the need for a prompt resolution of the earth station question. While it would prefer to commence its earth station program after the basic system choice has been made it insists that this is not possible because of the lead time required to design and construct earth stations to meet the scheduled basic system launch date of mid-1966.

13. In answer to the legal objections of proceeding by rule making, it maintains that the Commission has broad discretion to determine the earth station question in such manner that meets the test of fairness required by section 201(c)(7) of the Satellite Act and such other applicable requirements of law and is not limited solely to the use of its quasi-adjudicatory processes.

14. As an alternative to rule making, ComSat suggests a "two-stage" licensing procedure in which ownership eligibility could be determined in the first stage and determinations as to the number, location, etc. of earth stations would be left to the second stage. ComSat believes that either through rule making or the so-called "two-stage" licensing procedure, all interested parties could be allowed the opportunity to present their respective views regarding earth station ownership through written proposals and oral argument. Thereafter, on the basis of the record thus developed, the Commission could adopt a rule or policy with respect to eligibility without incurring undue delays inherent in an evidentiary hearing.

15. We have carefully considered the argument that there is no need to proceed promptly in this matter. Such argument overlooks the national policy expressed in the Satellite Act that the satellite system is to be put into operation "as expeditiously as practicable." We feel that we are obligated by law and express policy to take every step we reasonably can to assure that earth stations will be available and ready for use when the satellites for the basic system are ready to be launched. Thus, appropriate action must be taken now.

16. The main thrust of the opposition to the suggestion that we engage in a rule making proceeding is that section 201(c)(7) of the Satellite Act contemplates that earth station applications will be filed with and assessed by the Commission. But the argument among the parties appears to us to ignore the real substance of the important question before the Commission. Congress left no doubt as to its legislative intent in section 201(c)(7):

> It is for this reason that the second sentence that appears in S. 2814, section 201(c)(7), as reported by the Senate Aeronautical and Space Committee, which provides that the Commission should "encourage" establishment of ground stations by the carriers has been changed to provide that there shall be no preference shown either to the corporation or the carriers.
>
> The intention of this change in language is to make clear that there is no legislative prejudgment as to who shall establish a ground terminal station. The Commission is authorized to give full consideration to all relevant technological, economic, and operating factors in determining what meets the public interest, convenience, and necessity (Sen. Rept. No. 1584, 87th Cong., 2d Sess., p. 18).

We are thus called upon to make judgment upon all the public interest considerations and without giving any undue preference, because of a legislative direction, either to ComSat or the carriers. Further, there is no indication that Congress in any way specified a particular procedure to be followed in making that judgment or withdrew any one procedure (i.e., rule making). See Satellite Act, section 201(c)(11); Communications Act of 1934, as amended, sections 303(r) and 4(i); Sen. Rept. No. 1584, at p. 18. What it wanted was simply that the judgment encompass all relevant public interest considerations and be carried out "as expeditiously as practicable".

17. The crucial point is that the Commission should forthwith proceed to consider the relevant public interest considerations. The forum in which this is done is of lesser importance and indeed should be left flexible at this point. We think, therefore, that we should proceed with detailed written presentations. After consideration of such presentations (and any other procedures found to be desirable, e.g., oral argument; possible examination of some witnesses; informal discussions with all the interested parties present), we can decide whether adoption of a rule is appropriate, or whether formulation of a policy may be the best procedure,[2] or, finally, whether our decision should be to pursue individual licensing proceedings, without any prior formulation of policy, either through rule or statement.

18. We have therefore captioned this proceeding a notice of proposed rule making or formulation of general policy. In this way, we shall be in a position to take whatever action is appropriate without delay, consistent with the Congressional mandate for expedition. As to the substance of the rule or policy to be considered, we feel that at this stage we should not confine ourselves to a consideration of only one of the possibilities open to us. If we are to proceed to establish criteria governing the issuance of earth station authorizations, we feel the proposed rule making or general policy should encompass the entire field so that we may be advised with respect to the merits of each possibility. Accordingly, we will not limit our present procedures to a consideration of a rule of the limited scope proposed by ComSat. Instead, as set forth more fully in Paragraph 19, infra, we are seeking suggestions with respect to each of the possibilities available to us.

19. There are thus three possible courses of action open to us:

a. Adoption of rules;

b. Adoption of a general policy; and

c. Invitation to file applications for specific earth stations.

As stated, this proceeding is designed to afford interested parties the opportunity to advance full and detailed arguments concerning the merits of the ownership issue before the Commission and the method best designed to make that public interest determination. Those who favor either the adoption of rules or a general policy statement should, in particular, address themselves to the following basic questions:

(1) Who should be eligible to file applications under such a rule or general policy statement,

(a) ComSat alone;

(b) A communications carrier alone;

(c) ComSat and one or more carriers jointly;

(d) One or more carriers jointly;

(e) Any other alternatives possible under section 201(c)(7) of the Act?

(2) For what period of time should such a rule or general policy statement be effective?

(3) Each entity responding to one of the courses set forth above should show how its recommendations would:

(a) Provide uniform and nondiscriminatory access to the satellite system;

(b) Affect the expeditious establishment of the system;

(c) Affect the cost per voice channel;

(d) Provide for the most efficient use of the available frequencies;

(e) Affect the capability of the system to adapt to technical changes and expansion of the system to meet global needs;

(f) Affect the existing competitive situation in providing service to the public;

(g) Affect the ability of ComSat to discharge its statutory obligations as well as those under the Agreement Establishing Interim Arrangements for a Global Communications Satellite System, signed by the United States on August 20, 1964, and the Special Agreement signed by ComSat as the United States designated signatory on the same date;

(h) Affect the ability of the carriers to discharge their duty to provide worldwide and national service at reasonable charges;

(i) Affect the cost and efficiency in controlling the space segment of the system;

(j) The manner and method of the proposed operation.

(4) Set forth in detail the functions to be performed by the earth station including those necessary for connection to terrestrial services.

20. Those advocating a rule or general policy statement should also suggest the specific terms of the rule or general policy statement. It should be clearly understood that if a rule or general policy is adopted limiting the acceptance of applications, it still will be necessary for those eligible under such rule or policy to file specific applications and demonstrate that, in addition to basic eligibility under such rule or policy, they meet the specific criteria all applicants for licenses must satisfy. It follows that all interested parties would be afforded an opportunity to comment on such applications.

21. Those who advocate proceeding via the individual licensing route only should be prepared to show how such procedure would best serve the public interest, and specifically:

a. How the necessary research and development reasonably may be expected to be instituted and continue under such a course;

[2] Here we note that adoption of such a policy, if it can be appropriately formulated in this docket proceeding, does not mean that a lengthy evidentiary hearing is required as a matter of right in any subsequent licensing action dealing with specific applications. Evidentiary hearings are needed only where it is necessary to the public interest judgment to resolve factual issues. Where there is a valid, overriding policy making resolution of any factual issues unnecessary, no hearing would be called for. Here again this is a question which must await the developments on the merits.

b. How site selection and building of the station(s) can proceed expeditiously;

c. When applications reasonably may

b. How site selection and building of the station(s) can proceed expeditiously;

c. When applications reasonably may be perfected for filing;

d. How processing of application and possible hearings can be completed in time to assure that a completed station will be available when the satellites of the basic system are ready for launch.

22. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules and regulations, interested parties may file comments on or before the 5th of January 1965, and reply comments on or before the 18th of January 1965. All submissions by parties to this proceeding or by persons acting on behalf of such parties, must be made in written comments, reply comments, or other appropriate pleadings.

23. Authority for the amendment herein proposed is contained in sections 201(c)(7) and 201(c)(11) of the Communications Satellite Act of 1962 (47 USC 701 et seq.) and sections 4 (i) and (j) and 303 of the Communications Act of 1934, as amended.

24. In accordance with the provisions of § 1.419 of the Commission rules, an original and 14 copies of all statements, briefs or comments shall be furnished the Commission.

Adopted: December 9, 1964.

Released: December 10, 1964.

FEDERAL COMMUNICATIONS COMMISSION,[2]

## [47 CFR Part 73]

[Docket No. 15737; FCC 64-1141]

## FM BROADCAST STATIONS

### Proposed Table of Assignments for Augusta, Portland, and Sanford, Maine

In the matter of amendment of § 73.202, Table of Assignments, FM Broadcast Stations (Augusta, Portland, and Sanford, Maine), Docket No. 15737, RM-664.

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. The Commission has before it for consideration a petition for rule making (RM-664) filed on September 24, 1964, and amended on October 2, 1964, by Guy Gannett Broadcasting Services, licensee of Stations WGAN(AM) and WGAN-TV, Portland, Maine. Petitioner requests the institution of rule making looking toward the assignment of a Class C FM channel to Portland, with changes in the Table of Assignments as follows:

| City | Channel No. | |
|---|---|---|
| | Present | Proposed |
| Portland, Maine | 243, 280, 270 | 280, 270, 275 |
| Augusta, Maine | 267, 272A | 267, 283 |
| Sanford, Maine | 276A | 244A |

3. Portland is located in Zone I and so the listed assignments are all Class B assignments. Station WLOB-FM operates on Channel 250 and an application is on file for Channel 270. The existing station and the applicant both have facilities much less than the maximum for a Class B station (50 kw and 500 feet a.a.t.). Guy Gannett urges that Portland, a city of over 120,000 people, does not have adequate FM service. It points out that it has attempted since December 1962, to operate an FM station which will fill the void and has concluded that the best way to provide this service is from a transmitter located at its WGAN-TV site, approximately 22 miles northwest of the center of Portland and situated in Zone II. Guy Gannett submits that the proposal conforms to all the domestic separation requirements. It would substitute a Class B assignment for a Class A in Augusta, Maine, thus providing two Class B Channels in that community.

4. Since the communities in question are within 250 miles of the United States-Canadian border, the proposed changes require coordination with the Canadian Government under the terms of the Canadian-United States FM Agreement of 1947 and the Working Arrangement of 1963. The Canadian authorities have indicated that they have no objections to the proposed changes under certain specific conditions: That the proposed station on Channel 275 at Portland be limited to 100 kilowatts ERP and 1,513 feet antenna height above average terrain (the facilities proposed by petitioner) and that the Commission would have no objection to the future operation of Station CHLT-FM on Channel 274C1, Sherbrooke, Quebec, with 100 kilowatts ERP and 1,851 feet antenna height above average terrain.

5. We are of the view that rule making should be instituted on the subject petition and invite comments on the proposal in order that interested parties may submit their views and relevant data.

6. Authority for the adoption of the amendments proposed herein is contained in sections 4(i), 303, and 307(b) of the Communications Act of 1934, as amended.

7. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules, interested parties may file comments on or before January 8, 1965, and reply comments on or before January 18, 1965. All submissions by parties to this proceeding or by persons acting in behalf of such parties must be made in written comments, reply comments or other appropriate pleadings.

8. In accordance with the provisions of § 1.419 of the rules, an original and 14 copies of all written comments, replies, pleadings, briefs, or other documents shall be furnished the Commission.

Adopted: December 9, 1964.

Released: December 10, 1964.

# INTERSTATE COMMERCE COMMISSION

## [49 CFR Part 170]

[Ex Parte No. MC-37 (Sub-No. 10)]

## WARREN, OHIO, COMMERCIAL ZONE

### Proposed Definition

DECEMBER 11, 1964.

Petitioners: General Motors Corporation, Interstate Motor Freight System, Modern Transfer Company, Inc., A.C.E. Freight, Inc., Yellow Transit Freight Lines, Inc., Lyons Transportation Lines, Inc., Norwalk Truck Lines, Inc., The Service Transport Co., C.A.B.Y. Transportation Company, Wilson Freight Forwarding Company, Middle Atlantic Transportation Co., Inc., Federal Express, Inc., Kramer-Consolidated Freight Lines, Inc., Eastern Express, Inc., All States Freight, Inc., Roadway Express, Inc., Great Lakes Express Co., The Mahoning Express Company, The Lake Shore Motor Freight Co., Consolidated Freightways, Inc., Wenham Transportation, Inc.; petitioners' attorneys: Aloysius F. Power and Walter R. Frizzell, 3044 West Grand Boulevard, Detroit, Mich., 48202, Walter N. Bieneman, Suite 1700, One Woodward Avenue, Detroit, Mich., 48226.

By petitions filed November 23, 1964, petitioners request the Commission to institute a proceeding for the purpose of specifically defining the limits of the zone adjacent to and commercially a part of Warren, Ohio, which are now prescribed by the general formula promulgated in *Commercial Zones and Terminal Areas*, 46 M.C.C. 665 (49 CFR 170.16). Such formula provides that a city such as Warren, having a population of 25,000 but less than 100,000, and which has not been accorded individual consideration, shall have a commercial zone which consists of, and includes, the following: (a) The municipality itself; (b) all municipalities in the United States which are contiguous to the base municipality; (c) all unincorporated areas within 4 miles of its corporate limits and all of any other municipality any part of which is within 4 miles of the base municipality; and (d) all municipalities wholly surrounded, or so surrounded except for a water boundary, by the base municipality.

The instant petitions request a specific definition of the Warren commercial zone so as to include all of the area which is included by the application of the above formula and, in addition, Lordstown Township, in Trumbull County, Ohio. A portion of Lordstown Township is within the zone as presently determined.

No oral hearing is contemplated at this time, but anyone wishing to make representations in favor of, or against, the above-proposed specific destination of the limits of the Warren, Ohio, commercial zone, may do so by the submission of written data, views, or arguments. An original and five copies of such data, views, or arguments shall be filed with the Commission on or before January 25, 1965.

Notice to the general public of the matter herein under consideration will be given by depositing a copy of this notice in the office of the Secretary of the Commission for public inspection and by filing a copy thereof with the Director, Office of the Federal Register.

By the Commission.

[SEAL] HAROLD D. MCCOY, *Secretary.*

### Bureau of Land Management

### OREGON

#### Redelegation of Authority to District Managers and Certain Other Officials

DECEMBER 7, 1964.

Bureau Order No. 698, as amended, delegates to the State Director the authority to enter into certain contracts and leases. Section 2 of the cited Bureau Order further authorizes the State Director to redelegate these authorities to designated qualified employees. The contracting authorities redelegated by the State Director under Bureau Order No. 698, together with restrictions and limitations outlined in paragraph 3 below, are as follows:

1. *Redelegation.* The following classes of employees are authorized to enter into contracts for construction, supplies (including the rental of equipment), or services in amounts not to exceed $2,000 as provided in 205 DM 11.1 A & B.

District Managers.
Land Office Managers.
Officer-in-charge at Spokane and Tillamook.
Chief, Division of Administration.
District Administrative Assistants.
Administrative Assistant, Spokane Field Office.

2. *Exceptions.* There is no dollar limitation for the above designated employees if the contract is for supplies or services from prescribed or mandatory sources of supply, such as

a. GSA for stores items.

b. Existing GSA or BLM open-end contracts for tires, equipment repair, etc.

3. *Limitation or restrictions.* Contracts or other procurements entered into under these authorities must conform with applicable regulations and statutory requirements and are subject to the availability of appropriations. The authority so redelegated shall be exercised in accordance with the applicable limitations in the Federal Property and Administrative Services Act of 1949, as amended, and in accordance with applicable policies, procedures and controls prescribed in the General Services Administration.

RUSSELL E. GETTY,
*State Director.*

### Bureau of Reclamation

### CERTAIN GREEN MOUNTAIN RESERVOIR STORAGE, COLORADO-BIG THOMPSON PROJECT

#### Reservation for Silt Project, Colorado River Storage Project

Consistent with, and subject to, the Findings of Fact and Conclusions of Law, the Stipulation and Final Judgment and Final Decree entered in Civil Cases numbered Civil No. 2782, Civil No. 5016, and Civil No. 5017, on October 12, 1955, and the Consent Decree entered April 16, 1964, stored water is to be reserved in Green Mountain Reservoir in accordance with the following understanding:

1. There is reserved annually (with no carry-over right) for use of the Silt Project 5,000 acre-feet of stored water or such lesser amount as may be required to be released on demand for project use.

2. The first use of such allotted water will commence during the year in which construction of the Silt Project is completed, now scheduled in 1966.

3. Power replacement shall be accomplished as follows: The Colorado River Storage Project shall replace any power losses to the Colorado-Big Thompson Project arising from the use of such allotment so that net power revenues to the Colorado-Big Thompson Project will be equal to the revenues that would have accrued to the Colorado-Big Thompson Project without construction of the Silt Project. This replacement shall be accomplished through an interchange of Colorado River Storage Project power generation with Green Mountain power generation.

## FEDERAL POWER COMMISSION

[Docket No. CP65-122]

### ATLANTIC SEABOARD CORP.

#### Notice of Application

DECEMBER 8, 1964.

Take notice that on November 4, 1964, Atlantic Seaboard Corp. (Applicant), 1700 MacCorkle Avenue SE., Charleston, W. Va., filed in Docket No. CP65-122 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to construct and operate approximately 10 miles of 36-inch pipeline partially looping its existing facilities between its Seneca Compressor Station, Pendleton County, W. Va., and its Lost River Compressor Station, Hardy County, W. Va.; and approximately 15.9 miles of 26-inch gas transmission pipeline replacing its existing 20-inch facility between Owings Mills and Manor Road, Baltimore County, Md.

The application states that the proposed construction is for the purpose of providing sufficient transmission capacity to meet increased requirements.

The estimated cost of the proposed facilities is $3,926,700, and will be financed by the sale of Applicant's notes and common stock to the Columbia Gas System, Inc., parent company of Applicant.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before December 28, 1964.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[Docket No. CP65-113]

### EL PASO NATURAL GAS CO.

#### Notice of Application

DECEMBER 8, 1964.

Take notice that on October 27, 1964, El Paso Natural Gas Co. (Applicant), El Paso, Tex., filed in Docket No. CP65-113 an application pursuant to section 7(b) of the natural gas act for permission and approval to abandon certain facilities in Lea County, N. Mex., and Scurry County, Tex., all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks permission and approval to abandon three 500 horsepower compressor units located at Applicant's Townsend Compressor Station, Lea County, N. Mex.; and one 660 horsepower compressor unit located at Applicant's Snyder Compressor Station, Scurry County, Tex.

The application states that due to a decline in oil production in the Townsend-Edison Field, Lea County, N. Mex., the 1,500 compressor horsepower at Townsend Station are no longer required, since it is possible to transport all available casinghead gas without prior compression at the Townsend location. The application further states that the availability of residue gas from the Fuller (Cogdell), North Snyder, and Kelly-Snyder gasoline plants has steadily declined to a point where a portion of the 2,640 horsepower installed at Snyder Station is no longer required for future operations.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that permission and approval for the proposed abandonment is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or

[Docket No. CP65-160]

## NORTH STAR NATURAL GAS COMPANY OF WISCONSIN INC.

### Notice of Application

DECEMBER 8, 1964.

Take notice that on December 1, 1964, North Star Natural Gas Company of Wisconsin Inc. (Applicant), 123 East Elm Street, River Falls, Wis., filed in Docket No. CP65-160 an application pursuant to section 7(a) of the Natural Gas Act for an order of the Commission directing Midwestern Gas Transmission Company (Midwestern) to establish physical connection of its natural gas transmission facilities with the natural gas branch line and distribution system proposed to be constructed by Applicant, and to sell and deliver natural gas to Applicant, for distribution and resale to the city of St. Croix Falls, Wis., and adjacent areas, all as more fully set forth in the application on file with the Commission and open to public inspection.

The estimated initial three year period of annual and peak day requirements are stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf)..... | 34,510 | 56,840 | 66,930 |
| Peak day (Mcf).. | 304 | 386 | 482 |

Applicant was granted a franchise to distribute natural gas in the city of St. Croix Falls, Wis., by Ordinance No. 118 of the City Council, dated October 17, 1963.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that an order is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[Docket No. CP65-123]

## VALLEY GAS TRANSMISSION, INC.

### Notice of Application

DECEMBER 8, 1964.

Take notice that on November 4, 1964, Valley Gas Transmission, Inc. (Applicant), Post Office Box 1188, Houston, Tex., 77001, filed in Docket No. CP65-123 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities and the sale of natural gas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authority to sell an additional 10,000 Mcf of natural gas per day to Iroquois Gas Corporation (Iroquois) on a firm basis commencing on or before January 1, 1965. Applicant seeks further authorization to construct and operate approximately 2.5 miles of 6-inch pipe, 4.0 miles of 4-inch pipe, .4 mile of 2-inch pipe and appropriate metering and appurtenant facilities, for the purpose of effectuating said sale.

The application states that the gas sold by Applicant to Iroquois will then be transported by Tennessee Gas Transmission Company (Tennessee) for the account of Iroquois to Tennessee's delivery point to Iroquois at its East Aurora Sales Meter Station located in Erie County, N.Y.

The estimated cost of the proposed facilities is $170,000, and will be financed with current working funds.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before December 28, 1964.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[Docket No. CP64-89]

## CITIES SERVICE GAS CO. AND NATURAL GAS PIPELINE COMPANY OF AMERICA

### Notice of Application To Amend

DECEMBER 10, 1964.

Take notice that on December 1, 1964, Cities Service Gas Co. (Cities Service), Oklahoma City, Oklahoma and Natural Gas Pipeline Company of America (Natural), Chicago, Ill., filed in Docket No. CP64-89 a joint application to further amend the order of the Commission originally issued January 2, 1964, and amended by order of the Commission dated August 14, 1964, by requesting approval of an extension in time of the parties' Gas Exchange Agreement dated September 30, 1963, and amended April 13, 1964 and September 24, 1964, and also requesting authorization to construct and operate certain facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicants request extension of the period during which natural gas may be exchanged between them, from May 1, 1965 to May 1, 1970.

In addition, Cities Service seeks authorization to construct and operate an additional delivery point for gas delivered on an exchange basis to Natural in Gray County, Tex., consisting of a meter with appurtenant regulator equipment, and approximately .57 mile of 10-inch pipeline. Cities Service will also replace two existing 500# W.P. compressors at its Pampa Compressor Station with two 1000# W.P. compressors.

In addition, Natural seeks authorization to install and operate a side tap connection on its 26-inch pipeline in order to receive volumes of gas from Cities Service at this additional exchange point.

The total estimated cost of the Cities Service proposed facilites is $84,960, and will be financed with treasury cash; the total estimated cost of Natural's proposed facilities is $3,700, and will also be financed with funds on hand.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that an order is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-12885; Filed, Dec. 15, 1964; 8:47 a.m.]

[Docket No. CP65-136]

## CITY OF LAWRENCEVILLE, GEORGIA

### Notice of Application

DECEMBER 9, 1964.

Take notice that on November 12, 1964, the city of Lawrenceville, Ga. (Applicant), filed in Docket No. CP65-136 an application pursuant to section 7(a) of the Natural Gas Act for an order of the Commission directing Transcontinental Gas Pipe Line Corporation (Transco) to abandon the present physical connection of its natural gas transmission facilities, and to establish physical connection with the facilities of Applicant at a new location, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant proposes to construct approximately 3.8 miles of 6-inch pipeline from the proposed relocated delivery point, replacing existing line which the application states is old, corroded, and potentially dangerous.

The application further states that since construction of the present transmission line was completed, the city has tended to grow in areas beyond the limits of the existing line, and that the construction of a new 6-inch transmission line from the proposed relocated point of delivery will enable the city to provide adequate service to its existing and potential consumers.

The estimated cost of the proposed facilities of Applicant is $69,500, which will be financed by means of funds heretofore received for Gas Revenue Anticipation Certificates issued January 1, 1951.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that an order is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,

[Docket No. CP65-102]

## COLUMBIA GULF TRANSMISSION CO.

### Notice of Application

DECEMBER 10, 1964.

Take notice that on October 13, 1964, Columbia Gulf Transmission Co. (Applicant), 3805 West Alabama Avenue, Houston, Tex., filed in Docket No. CP65-102 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas pipeline facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to construct and operate eleven main line loops consisting of approximately 143.6 miles of 30-inch O.D. pipe, and 17.4 miles of 30-inch pipeline loop on Applicant's East Lateral in St. Mary Parish, La.

The application states that the proposed facilities are required in order to transport substantial volumes of natural gas to meet estimated increased requirements of the United Fuel Gas Company (United Fuel) for the twelve month period beginning November 1, 1965.

The application further states that the additional gas to be transported by Applicant will be obtained under long-term purchase agreements entered into by United Fuel on June 28, 1963, with Humble Oil & Refining Company and Isaac Arnold, et al.

The application further states that Applicant's present daily design capacity of 972,500 Mcf will be increased by the proposed construction to 1,077,500 Mcf.

The total estimated cost of the proposed construction is $22,596,100 and will be financed by the sale of Applicant's notes and common stock to the Columbia Gas System, Inc., parent company of Applicant.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-12887; Filed, Dec. 15, 1964; 8:47 a.m.]

[Docket No. CP65-114]

## EL PASO NATURAL GAS CO.

### Notice of Application

DECEMBER 9, 1964.

Take notice that on October 27, 1964, El Paso Natural Gas Co. (Applicant), El Paso, Tex., filed in Docket No. CP65-114 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain facilities and for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant proposes to abandon, by sale to the Navajo Tribe, approximately 7.162 miles of 2⅜-inch O.D. pipeline, a measuring and regulating station, and a tap, all within the Navajo Indian Reservation (Reservation), Apache County, Ariz.

Applicant seeks further authorization to construct and operate a measuring and regulating station, and necessary appurtenances, located at a point adjacent to Applicant's San Juan Mainline at the origin of the pipeline hereinbefore described.

The application states that the proposed abandonment and construction are required by the fact that the Navajo Tribe is succeeding Southern Union Gas Co. (Southern) as purchaser and distributor of natural gas heretofore purchased and distributed by Southern to Ganado Indian School and Mission and Kin Li Chee Boarding School, both located on the Reservation.

The purchase price to be paid by the Navajo Tribe for the facilities of Applicant is $20,908; the estimated cost of the facilities proposed to be constructed by Applicant is $7,260, and will be financed with current working funds.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without

further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-12888; Filed, Dec. 15, 1964; 8:47 a.m.]

[Docket No. RI65-370]

## MRS. ANNA HUBER

### Order Providing for Hearing on and Suspension of Proposed Change in Rate

DECEMBER 9, 1964.

On November 9, 1964, Mrs. Anna Huber (Huber)[1] tendered for filing a proposed change in her presently effective rate schedule for sales of natural gas subject to the jurisdiction of the Commission. The proposed change, which constitutes an increased rate and charge, is contained in the following designated filing:

Description: Notice of Change, dated October 6, 1964.
Purchaser and producing area: Hope Natural Gas Co. (Sardis Field, Harrison County, W. Va.).
Rate schedule designation: Supplement No. 4 to Huber's FPC Gas Rate Schedule No. 1.
Effective date: December 10, 1964.[2]
Amount of annual increase: $487.
Effective rate: 20.0 cent per Mcf.[3]
Proposed rate: 26.0461 cents per Mcf.[4]
Pressure base: 15.325 psia.

Concurrently with the filing of the aforementioned unilateral rate increase, Huber filed a notice of cancellation of its FPC Gas Rate Schedule No. 1. Huber invokes the following contract provision as a basis for cancellation: "This contract and all rights hereunder shall continue for a term of five years from the date hereof[5] and so much longer thereafter as gas is produced in paying and marketable quantities from the land herein described, provided, however, that after the expiration of one year from the date hereof either party to this agreement may terminate and annul the same after giving notice of the intention so to do, in writing, thirty days previous to such termination, * * *" By letter dated October 30, 1964, Huber served notice on Hope Natural Gas Co. (Hope) of the proposed cancellation and unilateral rate increase. Huber further states that she is cancelling the contract because the current 20.0¢ per Mcf rate[3] and the volumes of gas purchased no longer provide an economically feasible or attractive market for the gas. The 26.0461¢ per Mcf proposed herein is the rate established by the Seventh Amendment for sales in West Virginia, applicable to rate schedules from which all price escalations clauses are being eliminated, except for provisions for future changes in tax reimbursement. Huber states that no further price increases would be requested unless permitted by the Commission.

On December 1, 1964, Hope filed a protest with respect to this rate change, requesting that it be rejected. Hope contends that Huber has no right to terminate the contract by unilateral action without obtaining abandonment authorization under section 7(b) of the Natural Gas Act, and therefore does not have the right to make the instant filing. Hope also contends that the price sought by Huber is unjustified since it does not meet the criteria established by the Seventh and Ninth Amendments to the Policy Statement. Hope further claims that the real purpose of Huber's filing is to stay connected to Hope's facilities, but to cancel, selectively, only the price and delivery provisions of the existing contract and to rewrite such provisions with new terms more favorable to Huber.

Since Huber in connection with her unilateral rate filing has purported to terminate her contract with Hope, Huber cannot come within the provisions of the Ninth Amendment to the Policy Statement which require that a contract must have a term of at least five years remaining in order for the provisions of the Seventh Amendment to be applicable. In view of the issues raised by Hope in its protest as to the legality of Huber's rate filing, we shall provide that the hearing provided for herein shall concern itself with the legality of the instant filing as well as the statutory lawfulness of such filing.

The increased rate proposed by Huber is in excess of the applicable area price level for increased rates as set forth in the Commission's Statement of General Policy No. 61-1, as amended (18 CFR Ch. I, Part 2, § 2.56).

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the legality of Huber's filing and the lawfulness of the proposed change, and that Supplement No. 4 to Huber's FPC Gas Rate Schedule No. 1 be suspended and the use thereof deferred as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing shall be held upon a date to be fixed by notice from the Secretary concerning the legality of Huber's filing and the lawfulness of the proposed increased rate and charge contained in Supplement No. 4 to Huber's FPC Gas Rate Schedule No. 1.

(B) Pending such hearing and decision thereon, Supplement No. 4 to Huber's FPC Gas Rate Schedule No. 1 is hereby suspended and the use thereof deferred until May 10, 1965, and thereafter until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(C) Neither the supplement hereby suspended, nor the rate schedule sought to be altered thereby, shall be changed until this proceeding has been disposed of or until the period of suspension has expired, unless otherwise ordered by the Commission.

(D) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37(f)) on or before January 25, 1965.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE,
*Secretary.*

[Docket No. CP65-121]

## NORTHERN NATURAL GAS CO.

### Notice of Application

DECEMBER 9, 1964.

Take notice that on November 4, 1964, Northern Natural Gas Co. (Applicant), 2223 Dodge Street, Omaha, Nebr., filed in Docket No. CP65-121 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant proposes to construct and operate measuring and regulating facilities and appurtenances to establish a new delivery point for Peoples Natural Gas Division of Northern Natural Gas Co. (Peoples). Applicant proposes to deliver peak day volumes of 295 Mcf of firm gas to Peoples, for resale to the Dekalb Agricultural Association (Dekalb) for use in Dekalb's new plant near Dumas, Moore County, Tex., for heating, water heating and grain drying.

The estimated cost of the proposed facilities is $3,570, for which Applicant will be reimbursed by Peoples.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before January 7, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

[Docket No. CP65-159]

## NORTH STAR NATURAL GAS CO.

### Notice of Application

DECEMBER 9, 1964.

Take notice that on December 1, 1964, North Star Natural Gas Co. (Applicant), 123 East Ash Street, Wadena, Minn., filed in Docket No. CP65-159 an application pursuant to section 7(a) of the Natural Gas Act for an order of the Commission directing Midwestern Gas Transmission Co. (Midwestern) to establish physical connection of its natural gas transmission facilities with the natural gas branch line and distribution system proposed to be constructed by Applicant, and to sell and deliver natural gas to Applicant for distribution and resale in the City of Thief River Falls, Minn., all as more fully set forth in the application on file with the Commission and open to public inspection.

The estimated initial three year period of annual and peak day requirements are stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf) | 130,000 | 287,520 | 383,210 |
| Peak day (Mcf) | 872 | 1,840 | 2,421 |

Applicant was granted a franchise to distribute natural gas in the city of Thief River Falls, Minn., and environs by Ordinance No. 300 of the City Council dated September 7, 1964.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that an order is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-12891; Filed, Dec. 15, 1964; 8:47 a.m.]

[Docket No. CP65-24]

## OHIO FUEL GAS CO.

### Notice of Application

DECEMBER 9, 1964.

Take notice that on July 22, 1964, as amended on October 13, 1964, the Ohio Fuel Gas Co. (Applicant), 99 North Front Street, Columbus, Ohio, filed in Docket No. CP65-24 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities in order to provide a total of six additional delivery points to three existing customers, the Dayton Power & Light Co. (Dayton), West Ohio Gas Co. (West Ohio), and Columbia Gas of Ohio, Inc. (Columbia of Ohio), all as more fully set forth in the application, as amended, on file with the Commission and open to public inspection.

Specifically, Applicant proposes to construct and operate the following facilities for (1) Dayton: A tap on Line A-97, regulator and measuring station for delivery of gas for resale and distribution in the unincorporated community of Frederick and environs, Miami County, Ohio; (2) West Ohio: a tap on Line D-322, regulator and measuring station for delivery of gas for resale and distribution in the unincorporated community of Westminster and environs, Allen County, Ohio, and (3) Columbia of Ohio: (a) a tap and measuring station on Line D for delivery of gas for resale and distribution in the incorporated community of Fulton and environs, Morrow County, Ohio, (b) a tap on Line D-35 for delivery of gas for resale and distribution in the unincorporated community of Adrian and environs, Seneca County, Ohio, (c) a tap on Line V-100 for delivery of gas for resale to Snow Bowl, Inc. for use by the latter in its ski lodge and resort presently under construction in Harrison County, Ohio, and (d) a tap on Line Z-8 for delivery of gas for resale to International Harvester Co. at the latter's new factory in Clark County, Ohio; International Harvester will use natural gas for washing, drying, paint drying, space heating and air conditioning at its new truck manufacturing plant, and (e) a tap on Line FE-345 and measuring station for delivery of gas for resale in the unincorporated community of Reedsville and environs, Meigs County, Ohio.

The estimated third year peak day and annual natural gas requirements for the proposed services are:

| Customer | Market | Peak day (Mcf) | Annual (Mcf) |
|---|---|---|---|
| Dayton | Frederick | 84 | 8,530 |
| West Ohio | Westminster | 205 | 28,063 |
| Columbia of Ohio | Fulton | 133 | 15,600 |
| | Adrian | 45 | 5,300 |
| | Snow Bowl, Inc. | 89 | 13,000 |
| | International Harvester | 2,700 | 407,000 |
| | Reedsville | 138 | 17,760 |
| Total | | 3,394 | 496,253 |

The application indicates that Applicant's customers have requested the proposed additional delivery points in order to serve their potential customers in communities and environs contiguous to their respective service areas not presently supplied with natural gas.

The total estimated cost of the proposed facilities is $20,671, which cost will be financed from cash on hand.

Applicant states that the present contractual commitments with the subject customers are considered adequate to provide for the initial service; therefore, no increase in contract demands is contemplated.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that preliminary staff analysis has indicated that there are no problems which would warrant a recommendation that the Commission designate this application for formal hearing before an examiner and that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing may be held without further notice before the Commission on this application provided no protest or petition to intervene is filed within the time required herein. Where a protest or petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before December 31, 1964.

JOSEPH H. GUTRIDE,
*Secretary.*

## PANHANDLE EASTERN PIPE LINE CO.

### Notice of Application

DECEMBER 10, 1964.

Take notice that on October 26, 1964, Panhandle Eastern Pipe Line Co. (Ap-

[1] Address is: Post Office Box 414, Rumson, N.J.
[2] The stated effective date is the first day after expiration of the required statutory notice.
[3] Producer's filing shows current price as being 18.65 cents per Mcf, which is incorrect.
[4] Unilateral rate increase.
[5] The contract is dated Sept. 30, 1926.

plicant), New York, N.Y., and Kansas City, Mo., filed in Docket No. CP65–110 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to construct and operate a new interchange for Michigan Gas Storage Co. (Michigan), which is to be located on Applicant's North line, in Saginaw County, Mich. The application states that the purpose of this interchange is to provide flexibility on Michigan's system.

The estimated cost of Applicant's proposed construction is $6,600, and will be financed with funds on hand.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure 18 CFR 1.8 or 1.10) on or before January 4, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[Docket No. CP64–110]

## SOUTH GEORGIA NATURAL GAS CO.

### Notice of Application To Amend

DECEMBER 10, 1964.

Take notice that on November 25, 1964, South Georgia Natural Gas Co. (Applicant), Thomasville, Ga., filed in Docket No. CP64–110 an application to amend the order of the Commission issued January 16, 1964, which order permitted Applicant to abandon to the city of Dawson, Ga. (Dawson), 1,910 feet of its 3½-inch O.D. Line No. 7. In the subject application, Applicant requests permission and approval to abandon, by sale to Dawson, an additional 1,572 feet of Line No. 7.

The application states that the proposed abandonment is requested pursuant to a request by Dawson that Applicant move its present meter and regulating station in a westerly direction 1,572 feet due to industrial and commercial development in the area.

The application further states that the proposed sale price of the property sought to be abandoned by Applicant is $3,009.54, which represents its fair and reasonable value.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that an order is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

# SECURITIES AND EXCHANGE COMMISSION

## HANNA MINING CO.

### Notice of Filing of Application for Order Granting Application With Respect to Proposed Transactions

[File No. 812–1741]

DECEMBER 10, 1964.

Notice is hereby given that the Hanna Mining Co. ("Hanna Mining"), 100 Erieview Plaza, Cleveland, Ohio, 44114, approximately 46.5 percent of the outstanding voting stock of which is owned by the M. A. Hanna Co. ("Hanna"), a closed-end nondiversified investment company registered under the Investment Company Act of 1940 ("Act"), has filed an application under section 17(d) of the Act and Rule 17d–1 thereunder for an order of the Commission granting said application with respect to the participation by Inland Steel Co. ("Inland"), Wheeling Steel Corp. ("Wheeling") and Hanna Mining in a project for the development of certain magnetic taconite properties in Minnesota owned by Butler Brothers ("Butler"), a Minnesota corporation. Under the act, Hanna Mining is presumptively controlled by Hanna and Inland and Wheeling are affiliated persons of an affiliated person of Hanna. All interested persons are referred to the application on file with the Commission for a complete statement of applicant's representations which are summarized below.

The capital stock of Butler is presently owned 46.471 percent by Hanna Mining, 32.529 percent by Inland and 21 percent by Wheeling. However, Hanna Mining has agreed, subject to obtaining an order of the Commission pursuant to section 17(b) of the act, for which an application is now pending (File No. 812–1727, Investment Company Act Release No. 4088, November 27, 1964), to sell certain of its holdings of the stock of Butler to Inland and Wheeling. Upon consummation of these sales Butler will be owned 37.5 percent by Hanna Mining, 38 percent by Inland and 24.5 percent by Wheeling.

Butler holds mineral rights in various lands located on the Mesabi Range in Minnesota. There are substantial magnetic taconite deposits in some of these lands and Hanna Mining, Inland and Wheeling propose, through a co-ownership arrangement under which Hanna Mining will act as manager for the co-owners, to develop these deposits and, in connection therewith, to construct, at a cost estimated at $50,000,000, the necessary facilities for concentrating and pelletizing the magnetic taconite ore. Inland proposes to supply its 38 percent share of the necessary construction costs from its own funds. Hanna Mining and Wheeling propose to finance most of their respective shares of the cost through use of borrowed funds and propose to participate in the project through a Delaware corporation known as Itasca Pellet Co. ("Itasca") which will be owned 60.484 percent by Hanna Mining and 39.516 percent by Wheeling, reflecting their relative proposed stock interests in Butler of 37.5 percent and 24.5 percent, respectively.

Butler will sublease to Inland a 38 percent undivided interest in the magnetic taconite properties and related surface lands, corresponding to Inland's proposed stock interest in Butler, and will sublease to Itasca the remaining 62 percent undivided interest in such properties, corresponding to the combined proposed stock interests in Butler of Hanna Mining (37.5 percent) and Wheeling (24.5 percent). The two subleases will contain the same terms and provisions, including provisions for the payment of a fair and reasonable royalty comparable to royalties payable under customary subleases of similar mineral rights between strangers.

Inland and Itasca, as co-owners of the magnetic taconite mineral rights and other property interests in the project, will each appoint Hanna Mining as manager to manage and supervise their respective interests in such properties, pursuant to separate but substantially identical management agreements. The management agreements will authorize Hanna Mining to take all action necessary in its judgment to construct a concentrating and pelletizing plant, with a designed capacity initially fixed at two million tons of pellets a year, and to develop and operate the properties. Inland and Itasca will receive 38 percent and 62 percent, respectively, of the annual production of pellets and are required to pay, in the same proportion, the costs incurred in the development and operation of the properties and the construction of the plant. Hanna Mining will be compensated, by Inland and Itasca, respectively, for its services as manager at a rate of 12½ cents per ton of pellets delivered to or for the accounts of Inland and Itasca, subject to certain adjustments to reflect changes in the U.S. Department of Labor consumer price index for commodities. Applicant represents that such proposed management fee will provide adequate compensation for the services involved and is not less than rates being charged under similar arrangements currently being made in the iron ore industry.

Itasca and its two stockholders, Hanna Mining and Wheeling, have entered into an agreement requiring Itasca to deliver to each stockholder, and each stockholder to accept, a percentage of all pellets delivered to Itasca which corresponds to their respective stock interests in Itasca and providing that each stockholder will pay to Itasca from time to time its stockholder's percentage of all costs incurred by Itasca. The agreement further provides that the stockholders will arrange for Itasca to borrow approximately 80 percent (up to a maximum of $30 million) of the funds required to be paid by Itasca for the acquisition, construction and development of the properties subleased to it. Itasca is entering into note agreements with five unaffiliated lending institutions providing for the issuance of $12 million aggregate principal amount of its 4¾ percent secured notes and $18 million aggregate principal amount of its 5⅛ percent secured notes.

It is contemplated that Hanna Mining will enter into pellet sales agreements with Inland and Wheeling under which Inland will be committed to purchase 22.59 percent, and Wheeling will be committed to purchase 14.67 percent, of Hanna Mining's share of the pellets produced by the plant. The price for pellets sold pursuant to such agreements will be the average price quoted at the time of delivery by the principal ore dealers of Cleveland, Ohio for blast furnace iron ore pellets, adjusted for analysis, structure and point of delivery in the manner customary in the trade at the time of delivery.

Hanna Mining and Inland have no common directors; Hanna Mining has one common director with Wheeling, W. A. Marting, who is President and a director of Hanna Mining and is one of the sixteen directors of Wheeling.

Notice is further given that any interested person may, not later than December 29, 1964, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon applicant at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. At any time after said date as provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion.

For the Commission (pursuant to delegated authority).

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

# INTERSTATE COMMERCE COMMISSION

[Notice 332]

### MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

The following letter-notices of proposals to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission, under the Commission's Deviation Rules Revised, 1957 (49 CFR 211.1(c)(8)) and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 211.1(d)(4)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 211.1(e)) at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of publication.

Successively filed letter-notices of the same carrier under the Commission's Deviation Rules Revised, 1957, will be numbered consecutively for convenience in identification and protests if any should refer to such letter-notices by number.

MOTOR CARRIERS OF PROPERTY

No. MC 504 (Sub-No. 1) (Deviation No. 2), HARPER MOTOR LINES, INC., Post Office Box 781, Elberton, Ga., filed November 30, 1964. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: Between Atlanta, Ga., and Lavonia, Ga. (junction Interstate Highway 85 and Georgia Highway 17), over Interstate Highway 85, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over pertinent service routes as follows: (1) From Atlanta over U.S. Highway 23 to

junction U.S. Highway 123, thence over U.S. Highway 123 to Toccoa, Ga., (2) from Atlanta over U.S. Highway 78 to Athens, Ga., (3) from junction U.S. Highway 29 and Georgia Highway 72, over U.S. Highway 29, via junction Georgia Highway 98, to junction Georgia Highway 281, thence over Georgia Highway 281 to Royston, Ga., and (4) from Elberton, Ga., over Georgia Highway 17 to Toccoa, and return over the same routes.

No. MC 6945 (Deviation No. 8), THE NATIONAL TRANSIT CORPORATION, 4401 Stecker Avenue, Dearborn, Mich., 48126, filed November 27, 1964. Carrier proposes to operate as a *common carrier*, by motor vehicle, transporting *general commodities*, with certain exceptions, over a deviation route as follows: From Cincinnati, Ohio, over Interstate Highway 71 to Columbus, Ohio, and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Cincinnati, Ohio, over U.S. Highway 25 to junction Ohio Highway 4 at Dayton, Ohio, thence over Ohio Highway 4 to junction U.S. Highway 40 at Springfield, Ohio, thence over U.S. Highway 40 to Columbus, Ohio, and return over the same route.

No. MC 10761 (Deviation No. 39), TRANSAMERICAN FREIGHT LINES, INC., 1700 North Waterman Avenue, Detroit, Mich., 48209, filed December 3, 1964. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Worcester, Mass., over Massachusetts Highway 146 to the Massachusetts-Rhode Island State line, thence over Rhode Island Highway 146 to Providence, R.I., and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over pertinent service routes as follows: (1) From Boston, Mass., over U.S. Highway 1 to Providence, R.I., and (2) from Boston, over Massachusetts Highway 9 to Worcester, and return over the same routes.

No. MC 10761 (Deviation No. 40), TRANSAMERICAN FREIGHT LINES, INC., 1700 North Waterman Avenue, Detroit, Mich., 48209, filed December 3, 1964. Carrier proposes to operate as a *common carrier*, by motor vehicle, transporting *general commodities*, with certain exceptions, over a deviation route as follows: From Fiskdale, Mass., over Massachusetts Highway 131 to Southbridge, Mass., thence over Massachusetts Highway 169 to the Massachusetts-Connecticut State line, thence over Connecticut Highway 169 to junction Connecticut Highway 171, thence over Connecticut Highway 171 to Putnam, Conn., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Boston, Mass., over Massachusetts Highway 9 to Worcester, Mass., thence over Massachusetts Highway 12 to junction U.S. Highway 20, thence over U.S. Highway 20 to Springfield, Mass., thence over U.S. Highway 5 to Hartford, Conn.; from Hartford over U.S. Highway 44 to junction Alternate U.S. Highway 44 (formerly U.S. Highway 44), thence over Alternate U.S. Highway 44 to junction Connecticut Highway 31 at or near Coventry, Conn., thence over Connecticut Highway 31 via South Coventry, Conn., to junction Connecticut Highway 32, thence over Connecticut Highway 32 to junction U.S. Highway 6 west of Willimantic, Conn., and thence over U.S. Highway 6 to Providence, R.I.; from Hartford over U.S. Highway 44 to junction Alternate U.S. Highway 44 (formerly U.S. Highway 44), thence over Alternate U.S. Highway 44 to junction U.S. Highway 44, thence over U.S. Highway 44 to Providence; and from Boston over U.S. Highway 20 to Springfield, Mass., thence over U.S. Highway 5 to Hartford, and return over the same routes.

No. MC 20207 (Deviation No. 4), CONTINENTAL TRANSPORTATION LINES, INC., Continental Square, Graham Street, McKees Rocks, Pa., 15136, filed December 3, 1964. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: Between Cincinnati, Ohio, and Cleveland, Ohio, over Interstate Highway 71, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Cincinnati, over U.S. Highway 42 to London, Ohio, thence over Ohio Highway 142 to West Jefferson, Ohio, thence over U.S. Highway 40 to Columbus, Ohio, thence over U.S. Highway 23 to Delaware, Ohio, thence over U.S. Highway 42 to Mansfield, Ohio, thence over U.S. Highway 30 to Wooster, Ohio, thence over Ohio Highway 5 to Akron, Ohio, thence over Ohio Highway 8 to Cleveland, and return over the same route.

No. MC 52746 (Deviation No. 7), MISSOURI CONSOLIDATED FREIGHTWAYS CORPORATION, Post Office Box 5138, Chicago, Ill., 60680, filed November 30, 1964. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: Between Kansas City, Kans., and junction Interstate Highway 35 and U.S. Highway 34 at or near Osceola, Iowa, over Interstate Highway 35, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Kansas City, over U.S. Highway 69 via Osceola, to Des Moines, Iowa, and return over the same route.

No. MC 61440 (Deviation No. 10), LEE WAY MOTOR FREIGHT, INC., 3000 West Reno, Oklahoma City, Okla., filed November 27, 1964. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Indianapolis, Ind., over U.S. Highway 40 to junction U.S. Highway 42, thence over U.S. Highway 42 to Delaware, Ohio, thence over U.S. Highway 36 to junction Interstate Highway 71, thence over Interstate Highway 71 to junction U.S. Highway 224, and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over pertinent service routes as follows: (1) From Lima, Ohio, over U.S. Highway 25 to Wapakoneta, Ohio, thence over U.S. Highway 33 to St. Marys, Ohio, thence over Ohio Highway 29 to the Ohio-Indiana State line, thence over Indiana Highway 67 to Indianapolis, Ind., thence over U.S. Highway 40 to St. Louis, Mo., (2) from Beaverdam, Ohio, over U.S. Highway 25 to Lima, (3) from Chicago, Ill., over U.S. Highway 41 to junction U.S. Highway 6, thence over U.S. Highway 6 to junction U.S. Highway 33, thence over U.S. Highway 33 to Fort Wayne, Ind., thence over U.S. Highway 30 to Delphos, Ohio, thence over U.S. Highway 30–N to Mansfield, Ohio (also from Delphos over U.S. Highway 30–S to Mansfield), thence over U.S. Highway 30 via East Liverpool, Ohio, to Pittsburgh, Pa., (4) from Cleveland, Ohio, over U.S. Highway 42 to Mansfield, and (5) from Youngstown, Ohio, over Ohio Highway 18 to Akron, Ohio, thence over U.S. Highway 224 to Lodi, Ohio, and return over the same routes.

No. MC 77404 (Deviation No. 5), MOHAWK MOTOR, INC., 40 Harrison Street, Tiffin, Ohio. Carrier's attorney: Taylor C. Burneson, 3430 Leveque-Lincoln Tower, 50 West Broad Street, Columbus, Ohio, 43215, filed November 27, 1964. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: Between Cincinnati, Ohio, and Cleveland, Ohio, over Interstate Highway 71, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Cincinnati, over U.S. Highway 42 to Lebanon, Ohio, thence over Ohio Highway 48 to Dayton, Ohio, thence over U.S. Highway 25 to Findlay, Ohio, thence over Ohio Highway 12 to Fostoria, Ohio, thence over Ohio Highway 18 to Tiffin, Ohio, thence over Ohio Highway 101 to Clyde, Ohio, thence over U.S. Highway 20 to Cleveland, and return over the same route.

No. MC 107500 (Deviation No. 20) BURLINGTON TRUCK LINES, INC., 796 South Pearl Street, Galesburg, Ill., filed December 4, 1964. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From junction Interstate Highway 35 and U.S. Highway 34, near Osceola, Iowa, over Interstate Highway 35 to Kansas City, Mo., and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Kansas City over U.S. Highway 69 to Des Moines, and return over the same route.

No. MC 108937 (Deviation No. 4), MURPHY MOTOR FREIGHT LINES, INC., 965 Eustis Street, St. Paul, Minn., 55114, filed December 3, 1964. Applicant's representative: R. L. Stevens, same address as applicant. Carrier proposes to operate as a *common carrier*, by motor vehicle, transporting *general commodities*, with certain exceptions, over a deviation route as follows: From Watertown, S. Dak., over South Dakota Highway 22 to junction South Dakota Highway 25, thence over South Dakota Highway 25 to Webster, S. Dak., and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Aberdeen, S. Dak., over U.S. Highway 12 to St. Paul, Minn.; from Aberdeen over U.S. Highway 281 to Redfield, S. Dak., thence over U.S. Highway 212 to St. Paul; from Milbank, S. Dak., over U.S. Highway 77 to junction U.S. Highway 212; and from Watertown over U.S. Highway 81 to junction U.S. Highway 12, and return over the same routes.

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary.*

[Notice 710]

## MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

DECEMBER 11, 1964.

The following publications are governed by the new Special Rule 1.247 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of December 3, 1963, which became effective January 1, 1964.

### APPLICATIONS ASSIGNED FOR ORAL HEARING

No. MC 18088 (Sub-No. 31) (AMENDMENT), filed August 24, 1964, published in FEDERAL REGISTER issue September 16, 1964, amended December 7, 1964, and republished as amended this issue. Applicant: FLOYD & BEASLEY TRANSFER COMPANY, INC., Post Office Drawer 8, Sycamore, Ala. Applicant's attorneys: A. Alvis Layne, Pennsylvania Building, Washington, D.C., 20004, and John W. Cooper, 805 Title Building, Birmingham, Ala. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Textiles, textile products*, and *materials and supplies* used or utilized in the production and shipment of textile products, from Hartford, Clio, Clayton, Fort Payne, and Collinsville, Ala., to Chattanooga, Tenn.

NOTE: The purpose of this republication is to add Fort Payne and Collinsville, Ala., as origin points.

*HEARING:* January 19, 1965, at the Dinkler-Andrew Jackson Hotel, Nashville, Tenn., before Joint Board No. 239.

No. MC 115826 (Sub-No. 21), filed July 29, 1963. Applicant: W. J. DIGBY, INC., 1960 31st Street, Denver, Colo. Applicant's attorney: Michael T. Corcoran, 1360 Locust Street, Denver, Colo., 80220. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Foodstuffs, food preparations, food ingredients, food materials, food supplements, dairy products, meats, meat products, meat by-products, canned foods, frozen foods, and commodities requiring temperature protection or control, and exempt commodities*, between points in Arizona, California, Colorado, Idaho, Kansas, Nebraska, Nevada, New Mexico, Oregon, Texas, Utah, Washington, and Wyoming, and (2) *fish, including shell fish, and agricultural, including horticultural, commodities, or any of these commodities*, in the same vehicle with any commodity described in (1) above, and *exempt commodities*, between points in Arizona, California, Colorado, Idaho, Kansas, Nebraska, Nevada, New Mexico, Oregon, Texas, Utah, Washington, and Wyoming.

*HEARING:* February 15, 1965, at the Argonaut Hotel, 233 East Colfax Street, Denver, Colo., before Examiner William J. O'Brien.

No. MC 125741 (REPUBLICATION), filed October 9, 1963, published FEDERAL REGISTER, issue of March 11, 1964, and republished this issue. Applicant: M. H. BRYAN AND C. W. EADS, a copartnership, doing business as RIVERTON-BIG HORN FREIGHT LINES, Post Office Box 2050, Casper, Wyo. Applicant's attorney: Robert S. Stauffer, 1510 East 20th Street, Cheyenne, Wyo. By application filed October 9, 1964, applicants seeks to operate as a common carrier, by motor vehicle, over regular routes, transporting: General commodities, between Casper, Wyo., and Riverton, Wyo., from Casper over U.S. Highways 20 and 26 to Shoshoni, thence over U.S. Highway 26 and Wyoming Highway 789 to Riverton, serving all intermediate points, (2) between Shoshoni, Wyo., and Cody, Wyo., from Shoshoni over U.S. Highway 20 and Wyoming Highway 789 to Greybull; thence over U.S. Highways 20 and 14 to Cody, serving all intermediate points, and the off-route points of Otto and Burlington, Wyo., (3) between Cody, Wyo., and Greybull, Wyo., from Cody over Wyoming Highway 14 to Lovell, thence over Wyoming Highway 789 to junction U.S. Highway 20, and thence over U.S. Highway 20 to Greybull, serving all intermediate points, and the off-route points of Deaver and Cowley, Wyo., and empty containers or other such incidental facilities used in transporting the above commodities, on return. A report of the Commission, decided November 19, 1964, served November 30, 1964, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle of general commodities, except those of unusual value, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, (1) between Casper and Cody, Wyo., over U.S. Highway 20, through Shoshoni, Thermopolis, Worland, and Greybull, Wyo., serving all intermediate points and the off-route points of Otto and Burlington, Wyo., (2) between Cody, Wyo., and junction U.S. Highways 310 and 20, from Cody over Wyoming Highway 14 to Lovell, Wyo., and thence over U.S. Highway 310 to junction U.S. Highways 310 and 20, and return over the same route, serving all intermediate points and the off-route points of Deaver and Cowley, Wyo., and (3) between Shoshoni and Lander, Wyo., from Shoshoni over U.S. Highway 26 to Riverton, Wyo., and thence over Wyoming Highway 789 to Lander, Wyo., and return over the same route, serving all intermediate points and the off-route points of the Pan American Petroleum Beaver Creek Plant, The Lucky Mac Mine, the Hidden Splendor Mine, the Federal Uranium Mill, the Vitro Minerals Installation, the International Mining Installation, and the Uranium Processing Mill of Globe Mining Co., subject to the condition that the authority, to the extent it authorizes the transportation of dangerous explosives, shall be limited in point of time to a period expiring 5 years from the effective date thereof. In order to protect any existing carriers who may have an interest in the matter, a proper notice of the complete scope of the authority to be granted herein will be republished in the FEDERAL REGISTER, and prior to the issuance of a certificate, a 30-day period will be allowed from the date of such republication, during which any interested party, who may be affected by the broadened scope of such grant, may file an appropriate pleading.

No. MC 125986 (Sub-No. 1) (REPUBLICATION), filed August 9, 1964, published FEDERAL REGISTER, issue of August 26, 1964, and republished this issue. Applicant: MAYNARD C. POWERS, Crystal Lake, Iowa. Applicant's attorney: Clayton L. Wornson, 206 Brick and Tile Building, Mason City, Iowa. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Animal and poultry feed and fertilizer, from Mankato and Albert Lea, Minn., to Crystal Lake, Iowa, and points within 5 miles thereof. An Order of Operating Rights Board No. 1, dated November 24, 1964, served December 3, 1964, finds, among other things, that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, (1) of *animal and poultry feed*, from Mankato, Minn., to points in Hancock and Winnebago Counties, Iowa, and (2) of *fertilizer*, from Albert Lea, Minn., to points in Hancock and Winnebago Counties, Iowa and that because it is possible that other parties, who have relied upon the notice of the application as published, may have an interest in, and would be prejudiced by the lack of proper notice of the authority described above, a corrected notice of the authority actually granted will be published in the FEDERAL REGISTER and issuance of a certificate herein will be withheld for a period of 30 days from the date of such publication, during which period any proper party in interest may file an appropriate protest or other pleading.

No. MC 126157 (REPUBLICATION), filed March 30, 1964, published FEDERAL REGISTER, issue of April 22, and August 5,

1964, and republished this issue. Applicant: JOHN SCHOCK TRUCKING, 388 Portage Road, Niagara Falls, Ontario, Canada. Applicant's attorney: William

application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority as granted a corrected notice of the

household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) (1) between

### MOTOR CARRIERS OF PROPERTY

No. MC–F–8772 (SCOVERA CARTAGE CO.—PURCHASE—A. F. POSNIK

(except Detroit), to points in Illinois, Indiana, and Ohio; *gypsum*, and *asphalt building materials*, from Port Clinton,

chusetts, Michigan, Nebraska, New York (with exceptions), Ohio (with exceptions), and Wisconsin, to Bay City, Lud-

1964, and republished this issue. Applicant: JOHN SCHOCK TRUCKING, 388 Portage Road, Niagara Falls, Ontario, Canada. Applicant's attorney: William J. Hirsch, 43 Niagara Street, Buffalo, N.Y. By application filed March 30, 1964 applicant seeks authority to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Sand, gravel, asphalt, rough lumber, rock, stone, fill, turf, earth, and rubble*, in bulk, in dump vehicles, between ports of entry on the international boundary line between the United States and Canada at or near Buffalo, Niagara Falls, and Lewiston, N.Y., and Lackawanna, Batavia, Youngstown, N.Y., and points on Grand Island, N.Y., restricted to loads not exceeding 32,000 pounds. An order, dated November 30, 1964, served December 8, 1964, Operating Rights Board No. 1, finds that the present and future public convenience and necessity require operation by applicant in foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, of *sand, gravel, asphalt, rock, stone, fill, turf, earth*, and *rubble*, in bulk, in dump vehicles, from the ports of entry on the international boundary between the United States and Canada at or near Buffalo, Niagara Falls and Lewiston, N.Y., to Buffalo, Niagara Falls, Lewiston, Batavia, Youngstown, and Grand Island, N.Y.; and that because it is possible that other parties, who have relied upon the notice of the application as published in the FEDERAL REGISTER, may have an interest in, and would be prejudiced by the lack of proper notice of the authority described in the findings herein, a corrected notice of the authority actually granted will be published in the FEDERAL REGISTER, and issuance of a certificate herein will be withheld for a period of 30 days from the date of such publication, during which time any proper party may file a protest or other pleading.

No. MC 126360 (Sub-No. 1) (REPUBLICATION), filed August 7, 1964, published FEDERAL REGISTER, issue of August 26, 1964, and republished this issue. Applicant: HARVEY MEARS, Pension Street, Chincoteague, Va. By application filed August 7, 1964, applicant seeks a certificate of public convenience and necessity authorizing operation, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, of passengers and their baggage, and express in the same vehicle with passengers, in special operations, beginning and ending at Wallops Island, Va., and extending to points in Delaware, Maryland, New Jersey, New York, Pennsylvania, Virginia, and the District of Columbia, restricted to service at air terminals, railroad stations, and steamship terminals. An order, by Operating Rights Board No. 1, dated November 24, 1964, served December 4, 1964, finds that as the proposed restriction to service "at air terminals, railroad stations, and steamship terminals" is not ordinarily imposed by this Commission and is administratively undesirable, such restriction will not be imposed, and that because it is possible that other parties, who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority as granted, a corrected notice of the authority actually granted will be published in the FEDERAL REGISTER and issuance of a certificate will be withheld for a period of 30 days from the date of such publication, during which period any proper party in interest may file an appropriate protest or other pleading. Such order finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, of *passengers and their baggage, and express* in the same vehicle with passengers, in special operations, in nine-passenger vehicles, between Wallops Islands, Va., on the one hand, and, on the other, the District of Columbia and points in Delaware, Maryland, New Jersey, New York, Pennsylvania, and Virginia.

NOTICE OF FILING OF PETITIONS

No. MC 124242 (CORRECTION) (PETITION FOR MODIFICATION OF PERMIT), filed November 18, 1964, published FEDERAL REGISTER, issue of December 2, 1964, and republished this issue. Petitioner: TWIN CITIES NEWSPAPER SERVICE, INC., 1161 Selby Avenue, St. Paul, Minn. Petitioner's attorney: James L. Nelson, 544 Minnesota Building, St. Paul, Minn., 55101. The purpose of this republication is to show petitioners correct street address and also to add its attorney, as shown above.

Applications for certificates or permits which are to be processed concurrently with applications under section 5 governed by special rule 1.240 to the extent applicable.

No. 84212 (Sub-No. 27), filed December 4, 1964. Applicant: DORN'S TRANSPORTATION, INC., Railroad Avenue Extension, Albany, N.Y. Applicant's attorney: Irving Klein, 280 Broadway, New York, N.Y., 10007. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), serving points in Connecticut as off-route points in connection with applicant's presently authorized regular-route authority in No. MC 84212.

NOTE: This application is directly related to MC–F–8957, published in FEDERAL REGISTER, this issue.

No. MC 108473 (Sub-No. 22), filed December 7, 1964. Applicant: ST. JOHNSBURY TRUCKING COMPANY, INC., 38 Main Street, St. Johnsbury, Vt. Applicant's attorney: Francis E. Barrett, 25 Bryant Avenue, East Milton (Boston), Mass., 02186. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) (1) between Springfield and Pittsfield, Mass., from Springfield over U.S. Highway 20 to Pittsfield and return over the same route, serving all intermediate points and the off-route points of Blandford, Becket, Great Barrington, and Stockbridge, (2)(a) between Springfield and Clarksburg, Mass., from Springfield over U.S. Highway 20 to junction Massachusetts Highway 8, thence over Massachusetts Highway 8 to Clarksburg, and return over the same routes, serving all intermediate points and the off-route point of Lanesborough (b) from Springfield over U.S. Highway 5 to junction Massachusetts Highway 9 at Northampton, thence over Massachusetts Highway 9 to junction Massachusetts Highway 112, thence over Massachusetts Highway 112 to junction Massachusetts Highway 116, thence over Massachusetts Highway 116 to Adams, thence over Massachusetts Highway 8 to Clarksburg, and return over the same routes, serving all intermediate points between Northampton and Clarksburg, (3) between Northampton and Clarksburg, Mass., from Northampton over U.S. Highway 5 (Massachusetts Highway 10) to Greenfield, thence over Massachusetts Highway 2 to junction Massachusetts Highway 8, thence over Massachusetts Highway 8 to Clarksburg, and return over the same routes, serving all intermediate points between Greenfield and Clarksburg, and the off-route point of Buckland and (4) between Pittsfield and Hinsdale, Mass., from Pittsfield over Massachusetts Highway 9 to junction Massachusetts Highway 8, thence over Massachusetts Highway to Hinsdale, and return over the same routes, serving the intermediate point of Dalton.

NOTE: This is a matter directly related to MC–F8959 to be published December 16, 1964.

MOTOR CARRIERS OF PASSENGERS

No. MC 109736 (Sub-No. 21), filed November 25, 1964. Applicant: CAPITOL BUS COMPANY, a corporation, Fourth and Chestnut Streets, Harrisburg, Pa. Applicant's attorney: James E. Wilson, 1111 E Street NW., Washington 4, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage* and *express and newspapers* in the same vehicle with passengers, between Tamaqua and South Tamaqua, Pa. over U.S. Highway 309, serving all intermediate points.

NOTE: This is a matter directly related to MC–F–8745 published May 13, 1964.

APPLICATIONS UNDER SECTION 5 AND 210a(b)

The following applications are governed by the Interstate Commerce Commission's special rules governing notice of filing of applications by motor carriers of property or passengers under sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto (49 CFR 1.240).

MOTOR CARRIERS OF PROPERTY

No. MC–F–8772 (SCOVERA CARTAGE CO.—PURCHASE—A. F. POSNIK & CO.), published in the June 17, 1964 issue of the FEDERAL REGISTER on page 7738. SCOVERA CARTAGE COMPANY has been renamed POSNIK, INC., per IM order dated June 26, 1964. By supplemental application, A. F. POSNIK, R. A. POSNIK, D. S. DASHER, C. F. PETTELLE and J. C. PETTELLE sought authority to continue to control MICHIGAN TRANSPORTATION COMPANY in a common interest with POSNIK, INC., and A. F. POSNIK AND COMPANY, which authority was granted November 30, 1964, by the Commission, Finance Board No. 1, with a deferred effective date 35 days from the date this notice is published in the FEDERAL REGISTER, to afford any proper party an opportunity to present objections as provided in § 1.240 of the general rules of practice. Operating rights sought to be controlled: (MICHIGAN TRANSPORTATION COMPANY) *Fly ash*, in containers, as a *common carrier*, over irregular routes, from Trenton, Mich., to points in Illinois, Indiana, Wisconsin, Ohio, Pennsylvania, Kentucky, Missouri, Alabama, Mississippi, and Tennessee; *fly ash*, in bulk, in tank vehicles, from Marysville, St. Clair, and Detroit, Mich., to points in Illinois, Indiana, Wisconsin, Ohio, Pennsylvania, Kentucky, Missouri, Alabama, Mississippi, and Tennessee; *calcium chloride*, in bags, and in bulk, from Midland and Ludington, Mich., to the port of entry on the United States-Canada Boundary line at Port Huron, Mich.; *calcium chloride*, in bulk, in dump truck vehicles, from Midland, Mich., to points in Illinois, Indiana, Iowa, Kentucky, Ohio, Pennsylvania, and Wisconsin; *clay products, tile, cement, plaster*, and *mortar*, from certain points in Ohio, to certain points in Michigan, from certain points in Michigan to certain points in Ohio; *beans*, from points in the lower peninsula of Michigan, to points in Ohio; *paper*, used in the manufacture of building materials, from Monroe, Mich., to Port Clinton, Ohio; *lime*, from Luckey, Ohio, to points in Wayne, Oakland, and Macomb Counties, Mich.; *plastic sheets, wallboard, metal lath, metal pipe for sewer and water systems, building insulation material*, and *millwork*, between Lansing, Mich., and points in Wayne County, Mich., on the one hand, and, on the other, certain points in Ohio; *machinery and supplies*, used in the manufacture of plaster, and *building materials and building contractors' supplies*, between Detroit, Mich., and points within eight miles thereof, on the one hand, and, on the other, Port Clinton, Ohio.

*Soda ash*, in bulk, in tank vehicles, from points in Wayne County, Mich., to points in Illinois, Indiana, and Ohio (with specified exceptions), from Wyandotte, Mich., to Winchester, Ind., and points in Ohio; *delivered defective shipments of soda ash*, in bulk, in tank vehicles, from Winchester, Ind., and points in Ohio, to Wyandotte, Mich.; *chemicals in liquid form*, in bulk, in tank vehicles, from points in Wayne County, Mich. (except Detroit), to points in Illinois, Indiana, and Ohio; *gypsum*, and *asphalt building materials*, from Port Clinton, Ohio, to points in the lower peninsula of Michigan; *cement*, between points in Wayne County, Mich., on the one hand, and, on the other, to certain points in Ohio; *cement*, in bags, and in bulk, from Detroit, Mich., to points in Indiana; *salt*, from the port of entry of the United States-Canada Boundary line, at or near Detroit, Mich., to points in Michigan (with specified exceptions) with restriction; *cement*, in bulk, and in bags, from points in Monroe County, Mich., to points in Indiana and Ohio; *gypsum products* and *building materials*, in flat bed equipment only, from Port Clinton, Ohio, to certain points in Pennsylvania; *building materials*, as described in Appendix VI to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 (but not including prefabricated buildings, complete, knocked down, or in section), in flat bed equipment only, from L'Anse, Mich., to points in Indiana, New York, Ohio, and Pennsylvania, from Port Clinton, Ohio, to points in the upper peninsula of Michigan, and points in Crawford, Erie, and Mercer Counties, Pa., from Harding, Pa., to points in Michigan and Ohio; *materials and supplies* used or useful in the manufacture or processing of building materials or in the maintenance of the plant, from points in Indiana, New York, Ohio, and Pennsylvania, to L'Anse, Mich., from points in the upper peninsula of Michigan and points in Crawford, Erie, and Mercer Counties, Pa., to Port Clinton, Ohio, from points in Michigan and Ohio, to Harding, Pa.; *roofing materials*, in flat bed equipment only, from Cleveland, Ohio, to points in that part of Michigan on and north of Michigan Highway 21; *materials and supplies*, used or useful in the manufacture or processing of roofing materials, or in the maintenance of the plant, from points in that part of Michigan, on and north of Michigan Highway 21, to Cleveland, Ohio; *scrap paper*, in flat bed equipment only, from points in Michigan (with exceptions) to Avery, Ohio.

*Calcium chloride*, other than in bulk, from Barberton, Ohio, to points in Michigan; *cement*, from Schoolcraft, Mich., to points in Indiana; *returned shipments* of cement, from points in Indiana to Schoolcraft, Mich.; *polystyrene, polyvinyl chloride*, and *polyethylene*, in bulk, in dump or hopper type vehicles, from Bay City and Midland, Mich., to points in Ohio, Indiana, Kentucky, Illinois, Pennsylvania, and Wisconsin; *dry sodium phosphate*, in bulk, from the plant site of Monsanto, Chemical Co., at Trenton, Mich., to points in Indiana, Iowa, Minnesota, Kentucky, Kansas, Nebraska, Wisconsin, and those in Illinois and Missouri (with exceptions); *dry chemicals* (except fertilizer), in bulk, from Bay City, Ludington, and Midland, Mich., to points in Illinois, Indiana, Iowa, Kansas, Kentucky, Nebraska, Pennsylvania (with exceptions), Wisconsin, and points in Queens, Nassau, and Suffolk Counties, N.Y., with restriction; from points in Connecticut, Illinois, Indiana, Iowa, Kansas, Massachusetts, Michigan, Nebraska, New York (with exceptions), Ohio (with exceptions), and Wisconsin, to Bay City, Ludington, and Midland, Mich.; *dry calcium chloride*, in bulk, from Detroit, Mich., to points in Illinois, Indiana, and Ohio; *dry chemicals* (except fertilizer and plastic materials), in bulk, from Bay City, Ludington, and Midland, Mich., to points in Connecticut, Massachusetts, New York (with exceptions), and certain points in Pennsylvania; *salt*, in bulk, in hopper and dump type vehicles, from Midland, Mich., to points in Illinois, that part of Indiana south of U.S. Highway 40, and Ohio (with exceptions); *dry cement*, in bulk, between points in Michigan, with restriction; and *coal tar pitch*, in dump vehicles, from Detroit, Mich., to points in Ohio (with exceptions).

No. MC–F–8798 (STRICKLAND TRANSPORTATION CO., INC.—PURCHASE (PORTION) — ENGLAND TRANSPORTATION CO., INC.), published in the July 8, 1964, issue of the FEDERAL REGISTER on page 9348. By amendment filed December 7, 1964, applicants seek to amend the operating rights sought to be transferred by including the following portion of the base territory which was inadvertently omitted from the purchase agreement: between New Orleans, Louisiana and *points and places within ten miles of the corporate limits of New Orleans*.

No. MC–F–8911 (STANDARD TRANSFER & STORAGE, INC.—PURCHASE (PORTION) — HENRY C. BUNGIE), published in the October 28, 1964 issue of the FEDERAL REGISTER on page 14688. By petition filed December 4, 1964, applicants seek to amend the application by including the following operating rights sought to be transferred: *General commodities*, except livestock, and Class A and B explosives, as a *common carrier*, over irregular routes, from Washington, D.C., to points in St. Marys and Charles Counties, Md. If the Interstate Commerce Commission finds it necessary to impose a restriction on the operating rights sought to be transferred, applicants propose that the following restriction be added: The foregoing authorities are restricted so as to preclude the transportation by STANDARD in interstate or foreign commerce of *livestock, lime* and *hay*, over irregular routes, between points in Montgomery County, Md., within the Washington, D.C. commercial zone, on the one hand, and, on the other, points in St. Marys County, Md.

No. MC–F–8936 (MOTOR FREIGHT CORP. — MERGER — HAECKL'S EXPRESS, INC.), published in the November 18, 1964, issue of the FEDERAL REGISTER on page 15467. Application filed December 8, 1964, for temporary authority under section 210a(b).

No. MC–F–8957. Authority sought for purchase by DORN'S TRANSPORTATION, INC., Railroad Avenue Extension, Albany, N.Y., of the operating rights of GEORGE ZAFFIS, doing business as PARK CITY EXPRESS (ERNEST CAPOZZI, TRUSTEE IN BANKRUPTCY), 1115 Main Street, Bridgeport, Conn., and for acquisition by FRED DORN, also of Albany, N.Y., of control of such rights

through the purchase. Applicants' attorney: Irving Klein, 280 Broadway, New York, N.Y., 10007. Operating rights sought to be transferred: Under a certificate of registration, in Docket No. MC-57378 Sub-1, covering the transportation of property, as a common carrier, in intrastate commerce, within the State of Connecticut. Vendee is authorized to operate as a *common carrier* in Virginia, New York, Connecticut, Massachusetts, New Jersey, Pennsylvania, Rhode Island, Vermont, Maryland, Delaware, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

NOTE: No. MC-84212 Sub-27 is a matter directly related.

No. MC-F-8958. Authority sought for purchase by HOUSTON LINES, INC., 8802 Liberty Road, Houston, Tex., of the operating rights of H. C. BUCKNER AND H. W. BUCKNER, a partnership, doing business as BUCKNER BROTHERS, 8802 Liberty Road, Houston, Tex., and for acquisition by N. D. PATTERSON, also of Houston, Tex., of control of such rights through the purchase. This application also proposes that H. C. BUCKNER and H. W. BUCKNER will acquire 350 shares of common capital stock of HOUSTON LINES, INC. Applicants' attorney: H. H. Prewett, 2159 Tennessee Building, Houston, Tex. Operating rights sought to be transferred: Under a certificate of registration, in Docket No. MC-120482 Sub-2, covering the transportation of property, as a common carrier, in intrastate commerce, within the State of Texas. Vendee is authorized to operate as a *common carrier* pursuant to authority granted May 26, 1964, and consummated July 9, 1964, in Texas, Louisiana, Oklahoma, Kansas, and Arkansas. Application has not been filed for temporary authority under section 210a(b).

NOTE: No. MC-99776 Sub-3 is a matter directly related.

No. MC-F-8959. Authority sought for purchase by ST. JOHNSBURY TRUCKING COMPANY, INC., 38 Main Street, St. Johnsbury, Vt., of a portion of the operating rights of FRANK J. COLE, INC., 197 Norfolk Avenue, Boston 19, Mass., and for acquisition by HARRY D. ZABARSKY, 38 Main Street, St. Johnsbury, Vt., MILTON J. ZABARSKY and MAURICE ZABARSKY, both of 40 Erie Street, Cambridge, Mass., of control of such rights through the purchase. Applicants' attorneys and representative: Francis E. Barrett and Francis P. Barrett, both of 25 Bryant Avenue, East Milton, Mass., 02186 and James G. Fay, 10 Post Office Square, Boston, Mass. Operating rights sought to be transferred: *General commodities*, excepting, among others, household goods and commodities in bulk, as a *common carrier*, over regular routes, between Springfield, Mass., and Pittsfield, Mass., serving certain intermediate and off-route points, between Northampton, Mass., and Pittsfield, Mass., serving certain intermediate points and between Pittsfield, Mass., and Greenfield, Mass., serving certain intermediate and off-route points; and a portion of the operating rights in pending docket No. MC-52841 Sub 2, seeking a certificate of registration, covering the transportation of general commodities, as a common carrier, in intrastate commerce, within the State of Massachusetts. Vendee is authorized to operate as a *common carrier* in Vermont, New Hampshire, Maine, Massachusetts, Connecticut, Rhode Island, New Jersey, New York, Pennsylvania, Maryland, Delaware, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

NOTE: No. MC-108473 Sub 22 is a matter directly related.

No. MC-F-8960. Authority sought for purchase by LOPEZ TRUCKING, INC., 131 Linden Street, Waltham, Mass., of the operating rights and property of THOMAS COOK & SONS, INC., 16 Jordan Place, Cambridge, Mass., and for acquisition by FELIX A. LOPEZ and VINCENT A. LOPEZ, both of 131 Linden Street, Waltham, Mass., of control of such rights and property through the purchase. Applicants' attorney and representative: Kenneth B. Williams, 111 State Street, Boston, Mass., and John J. Campbell, 101 Treamont Street, Boston, Mass. Operating rights sought to be transferred: *Structural steel*, as a *common carrier*, over irregular routes, between Boston, Mass., and Manchester, N.H., from Boston, Mass., to Dover, Exeter, Rochester, Nashua, and Salem, N.H., West Warwick and Saylesville, R.I.; *finishing material, flooring*, and *shingles*, from Boston, Mass., to points in Bristol, Kent, Newport, and Providence Counties, R.I., that part of Massachusetts on and east of U.S. Highway 5, and those in New Hampshire, on and south of U.S. Highway 302; *lumber*, between Boston, Mass., and points in Massachusetts within 35 miles of Boston, on the one hand, and, on the other, points in Massachusetts, Connecticut, New Hampshire, and Rhode Island. Vendee is authorized to operate as a *common carrier* in all States in the United States (except Alaska and Hawaii) and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

No. MC-F-8961. Authority sought for control by EASTERN MOTOR DISPATCH, INC., 1215 West Mound Street, Columbus 23, Ohio, of D. G. & U. TRUCK LINES, INC., 701 Hiddeson Avenue, Greenville, Ohio, and for acquisition by L. MARGUERITE BUEL, 2550 Canterbury Road, Columbus 21, Ohio and ELIZABETH M. STONE, 1165 Highland Drive, Columbus 21, Ohio, of control of D. G. & U. TRUCK LINES, INC., through the acquisition by EASTERN MOTOR DISPATCH, INC. Applicants' attorney: William E. Rance, 1200 West Fifth Avenue, Columbus 12, Ohio.

Operating rights sought to be controlled: *General commodities*, excepting among others, household goods and commodities in bulk, as a *common carrier*, over regular routes, between Dayton, Ohio, and Muncie, Ind., serving all intermediate and certain off-route points, between Cincinnati, Ohio, and Oxford, Ohio, serving certain intermediate points, with certain restrictions, between Oxford, Ohio, and West Manchester, Ohio, serving no intermediate points; *general commodities*, except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, uncrated commodities in bulk, and those requiring special equipment, between Dayton, Ohio, and Arcanum, Ohio, between the junction of Ohio Highway 49 and unnumbered highway (approximately one mile northwest of Fort McKinley, Ohio), and Trotwood, Ohio, between Phillipsburg, Ohio, and Ithaca, Ohio, serving certain intermediate and off-route points; *general commodities*, excepting among others, household goods but not excepting commodities in bulk, between Anderson, Ind., and Muncie, Ind., serving all intermediate points; *general commodities*, excepting among others, household goods and commodities in bulk, over irregular routes, between points in Montgomery, Preble, Miami, and Darke Counties, Ohio, and Randolph, Wayne, Henry, Delaware, and Madison Counties Ind., on the one hand, and, on the other, Cox Municipal Airport, Montgomery County, Ohio (municipal airport of Dayton, Ohio), with restriction; and *household goods*, between points in Ohio, on the one hand, and, on the other, points in Indiana and Michigan. EASTERN MOTOR DISPATCH, INC. is authorized to operate as a *common carrier* in Ohio, Pennsylvania, Massachusetts, New York, and the District of Columbia. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-8963. Authority sought for purchase by AERO TRUCKING, INC., Box 278, Rural Delivery No. 1, Oakdale, Pa., of the operating rights and property of CLARENCE PAUL LARRABEE (EVELYN B. LARRABEE, ADMINISTRATRIX), 64 Winthrop Street, Framingham, Mass., and for acquisition by EDWARD J. CONTO, also of Oakdale, Pa., of control of such rights and property through the purchase. Applicants' attorneys: Carl A. Sheridan, 129 Concord Street, Framingham, Mass., Paul F. Beery, 44 East Broad Street, Columbus, Ohio, 43215, and Francis E. Barrett, 182 Forbes Building, Forbes Road (at South Shore Plaza), Braintree 84, Mass. Operating rights sought to be transferred: *Such commodities*, as machinery and machine parts, and heavy or bulky articles requiring specialized handling or rigging, because of size or weight, as a *common carrier*, over irregular routes, between points in Massachusetts, on and east of U.S. Highway 5, on the one hand, and, on the other, points in Connecticut, Rhode Island, and New Hampshire. Vendee is authorized to operate as a *common carrier* in Ohio, Pennsylvania, West Virginia, Kentucky, Illinois, Michigan, New York, Indiana, Wisconsin, Delaware, Connecticut, Maryland, Massachusetts, New Jersey, Rhode Island, Virginia, Tennessee, Alabama, Mississippi, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

No. MC-F-8964. Authority sought for purchase by HOWARD SOBER, INC., 2400 West St. Joseph Street, Lansing, Mich., 48904, of the operating rights of F. W. MYERS DRIVE-AWAY SYSTEM, INC., 20300 Ireland Road, South Bend, Ind., and for acquisition by HOWARD W. SOBER, LETHA E. SOBER and WILLIAM H. SOBER, JR., all also of Lansing, Mich., of control of such rights through the purchase. Applicants' attorney and representative: Albert F. Beasley, Investment Building, 15th & K Streets NW., Washington 5, D.C., and Joseph Gracia, 2460 West St. Joseph Street, Lansing, Mich., 48904. Operating rights sought to be transferred: *New motor vehicles*, except trailers, by truckaway and driveaway methods, in initial movements; as a *common carrier*, over irregular routes, from points in Madison County, Ala., to points in Tennessee, Florida, Delaware, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, South Carolina, Ohio, Pennsylvania, Rhode Island, Texas, Virginia, Vermont, West Virginia, Wisconsin, and the District of Columbia; *new automobiles, new trucks*, and *new chassis*, in initial movements, in truckaway service, from South Bend, Ind., to points in Connecticut, Indiana, New Jersey, New York, Ohio, and West Virginia; *new automobiles, new trucks* and *new chassis*, in initial movements, in drive-away service, from South Bend, Ind., to points in Indiana; *new chassis*, in initial movements, in drive-away service, from South Bend, Ind., to points in Connecticut, Kentucky, New Jersey, New York, Ohio, and West Virginia; and *new automobiles and trucks*, in drive-away service, from South Bend, Ind., to points in Connecticut, Kentucky, New Jersey, New York, Ohio, and West Virginia. Vendee is authorized to operate as a *common carrier* in all States in the United States (except Hawaii) and the District of Columbia. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-8965. Authority sought for purchase by MAWSON & MAWSON, INC., Old Lincoln Highway, Post Office Box 125, Langhorne, Pa., 19047, of a portion of the operating rights of HEAVY HAULING AND RIGGING CORPORATION OF AMERICA, 414 Union Avenue, Westbury, L.I., N.Y., and for acquisition by ROBERT J. DURBIN, 801 Pebble Hill Road, Doylestown, Pa., of control of such rights through the purchase. Applicants' attorney: Wilmer B. Hill, 529 Transportation Building, Washington, D.C., 20006. Operating rights sought to be transferred: *Construction and building machinery and equipment*, as a *common carrier*, over irregular routes, between New York, N.Y., and points on Long Island, N.Y., on the one hand, and, on the other, points in New York, those in Hudson, Bergen, Passaic, Essex, and Union Counties, N.J., and those in Fairfield County, Conn.; *such commodities*, as contractors' equipment, heavy and bulk articles, machinery and machine parts, and articles requiring specialized handling and rigging because of size or weight, between points in New York and New Jersey, between points in New York and New Jersey, on the one hand, and, on the other, points in Massachusetts and Connecticut. RESTRICTION: This authority is restricted against the transportation of *granite*, between Chester, Mass., and points in Massachusetts within 15 miles of Chester, on the one hand, and, on the other, points in Connecticut, New York, and New Jersey, and *structural steel and iron*, between points in Massachusetts and Connecticut. Vendee is authorized to operate as a *common carrier*, in Pennsylvania, New York, New Jersey, Delaware, Maryland, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

No. MC-F-8966. Authority sought for purchase by CAMPBELL SIXTY-SIX EXPRESS, INC., 2333 East Mill Street Road, Post Office Box 807, Springfield, Mo., of the operating rights and property of W. O. Hughey, doing business as HUGHEY TRANSPORTATION COMPANY, Post Office Box 907, Macomb, Miss., and for acquisition by F. G. CAMPBELL, Post Office Box 807, Springfield, Mo., of control of such rights and property through the purchase. Applicants' attorney: Phineas Stevens, 700 Petroleum Building, Post Office Box 1250, Jackson, Miss. Operating rights sought to be transferred: *General commodities*, excepting, among others, household goods and commodities in bulk, as a *common carrier*, over regular routes, between Natchez, Miss., and Baton Rouge, La., between Centreville, Miss., and Scotlandville, La., between Beechwood, Miss., and Baton Rouge, La., between Clinton, La., and St. Francisville, La., between McComb, Miss., and Woodville, Miss., serving all intermediate points, between McComb, Miss., and Natchez, Miss., serving no intermediate points, between Centreville, Miss., and Crosby, Miss., between Liberty, Miss., and Gloster, Miss., between Crosby, Miss., and junction Mississippi Highway 554 and U.S. Highway 61, between Wilkinson, Miss., and junction Mississippi Highway 563 and U.S. Highway 61, serving all intermediate points, between Crosby, Miss., and Roxie, Miss., serving no intermediate points, and serving Roxie, Miss., as point of joinder, RESTRICTION: The service authorized herein is subject to the following conditions: Service is restricted against the transportation of all traffic moving between Natchez, Miss., and the commercial zone thereof, on the one hand, and, on the other, Baton Rouge, La., and the commercial zone thereof, The authority granted herein, to the extent that it authorizes the transportation of Classes A and B explosives, shall be limited in point of time to a period expiring five years after August 16, 1963; and in pending Docket No. MC-57899 Sub 5, covering the transportation of general commodities, excepting among others household goods and commodities in bulk, between McComb, Miss., and Ponchatoula, La., over U.S. Highway 51, serving all intermediate points. Vendee is authorized to operate as a *common carrier* in Missouri, Kansas, Illinois, Oklahoma, Arkansas, Iowa, Texas, Tennessee, Mississippi, Alabama, and Louisiana. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-8967. Authority sought for purchase by U.S.A.C. TRANSPORT, INC., 457 West Fort Street, Detroit, Mich., 48226, of a portion of the operating rights of TOLEDO CARTAGE COMPANY (KENNETH V. NICOLA, TRUSTEE IN BANKRUPTCY), 1277 East 40th Street, Cleveland 14, Ohio, and for acquisition by TRAILHOLD, INC., 2208 Penobscot Building, Detroit, Mich., and, in turn, by TRAILMAR CORPORATION, and, in turn, by MARCO AND MARCO (a law partnership), composed of PAUL MARCO, PHILLIP MARCO, PAUL EAGAN and WILLIAM E. KENNEDY, all also of Detroit, Mich., of control of such rights through the purchase. Applicants' attorney: Walter N. Bieneman, Suite 1700, One Woodward Avenue, Detroit, Mich., 48226. Operating rights sought to be transferred: *Cement*, as a *common carrier* over irregular routes, from Port Huron and Detroit, Mich., to points in Indiana and Ohio (except Middlebranch and Ironton, Ohio), from points in Lucas County, Ohio, to points in the lower peninsula of Michigan; *empty containers for cement*, from the above-specified destination points to the respective described origin points, *heavy machinery* and *articles* which require specialized handling or rigging because of their size or weight, between points in Lucas County, Ohio, on the one hand, and, on the other, points in the lower peninsula of Michigan. Vendee is authorized to operate as a *common carrier* in all States in the United States (except Hawaii), and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

MOTOR CARRIERS OF PASSENGERS

No. MC-F-8962. Authority sought for purchase by CAPITAL MOTOR LINES, 520 North Court Street, Montgomery, Ala., 36104, of a portion of the operating rights of COASTAL STAGES, INC., Post Office Box 346, Florala, Ala. Applicants' attorney: Robert C. Black, Post Office Box 116, Montgomery, Ala. Operating rights sought to be transferred: Passengers and their baggage, and express, newspapers, and mail in the same vehicle with passengers, as a *common carrier*, over a regular route, between Florala, Ala., and Fort Walton, Fla., serving all intermediate points. Vendee is authorized to operate as a *common carrier* in Florida, Mississippi, Alabama, and Georgia. Application has been filed for temporary authority under section 210a(b).

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary*.

## APPLICATIONS FOR MOTOR CARRIER "GRANDFATHER" CERTIFICATE OF REGISTRATION

DECEMBER 11, 1964.

The following applications are filed under section 206(a)(7) of the Inter-

state Commerce Act, as amended October 15, 1962. These applications are governed by Special Rule 1.244, of the Commission's rules of practice published in the FEDERAL REGISTER, issue of December 8, 1962, page 12188, which provides, among other things, that protests to the granting of an application may be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. Protests shall set forth specifically the grounds upon which they are made and contain a concise statement of the interest of the protestant in the proceeding. Protests containing general allegations may be rejected. A protest filed under these special rules shall be served upon applicant's representative (or applicant, if no practitioner representing him is named). The original and six copies of the protests shall be filed with the Commission.

The Special Rules do not provide for publication of the operating authority, but the applications are available at the Commission's office in Washington, D.C., and the field offices.

Applications not included in this publication will be published at a later date.

No. MC 121046 (Sub-No. 2) (REPUBLICATION), filed February 1, 1963, published in FEDERAL REGISTER issue of June 12, 1963, and republished this issue. Applicant: BURDETTE A. MILLER, 800 Cherry Street, Liberty Center, Ohio; and B. A. MILLER & SONS TRUCKING, INC., 800 Cherry Street, Liberty Center, Ohio, joint applicants. Applicant's attorney: James M. Burtch, 44 East Broad Street, Columbus 15, Ohio.

NOTE: The purpose of this republication is to show B. A. Miller & Sons Trucking, Inc., as joint applicant.

By the Commission.

[SEAL] HAROLD D. MCCOY, *Secretary.*

## MOTOR CARRIER, BROKER, WATER CARRIER, AND FREIGHT FORWARDER APPLICATIONS

DECEMBER 11, 1964.

The following applications are governed by Special Rule 1.247[1] of the Commission's general rules of practice (49 CFR 1.247), published in the FEDERAL REGISTER, issue of December 3, 1963, effective January 1, 1964. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with § 1.40 of the general rules of practice which requires that it set forth specifically the grounds upon which it is made and specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and six (6) copies of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of § 1.247(d)(4) of the special rule. Subsequent assignment of these proceedings for oral hearing, if any, will be by Commission order which will be served on each party of record.

[1] Copies of Special Rule 1.247 can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C., 20423.

No. MC 1778 (Sub-No. 7), filed November 27, 1964. Applicant: MOTOR EXPRESS, INC., 727 South Jefferson Street, Chicago, Ill. Applicant's attorney: Themis N. Anastos, Suite 614–616, 120 West Madison Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Articles of iron and steel*, from Burns Harbor, Porter County, Ind., to points in Illinois within forty (40) miles of Chicago, Ill., and *empty containers or other such incidental facilities* (not specified) used in transporting the above-specified commodities, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 7523 (Sub-No. 12), filed December 1, 1964. Applicant: VENTURA TRANSFER COMPANY, a corporation, 3440 E. South Street, Long Beach, Calif. Applicant's attorney: Phil Jacobson, 510 West 6th Street, Suite 723, Los Angeles 14, Calif. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Barite*, in bulk, in pneumatic hopper type vehicles from Battle Mountain, Nev., to points in Los Angeles and Ventura Counties, Calif.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Los Angeles, Calif.

No. MC 11146 (Sub-No. 1), filed November 27, 1964. Applicant: E. P. McNEIL, doing business as GEO. McNEIL TEAMING CO., 540 North Franklin Street, Chicago, Ill. Applicant's attorney: Themis N. Anastos, Suite 614–616, 120 West Madison Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Articles of iron and steel*, from Burns Harbor, Porter County, Ind., to points in the Illinois portion of the Chicago, Ill., commercial zone, as defined by the Commission in 1 M.C.C. 673, and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified above, on return.

NOTE: Applicant has contract carrier authority under MC 11147, therefore, dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 13569 (Sub-No. 8), filed November 25, 1964. Applicant: THE LAKE SHORE MOTOR FREIGHT COMPANY, a corporation, 1200 South State Street, Girard, Ohio. Applicant's attorney: James R. Stiverson, 50 West Broad Street, Columbus 15, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except articles of size or weight that makes handling by motor vehicle impractical, bank bills, coins, currency, drafts, notes, or articles manufactured therefrom, dangerous explosives, liquid bulk commodities, and household goods), serving the site of the plants of the General Motors Corporation located in Lordstown Township, Trumbull County, Ohio, as off-route points in connection with applicant's regular route authority.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Detroit, Mich.

No. MC 14101 (Sub-No. 1), filed November 27, 1964. Applicant: GABLE EXPRESS CO., a corporation, 4711 West 16th Street, Cicero 50, Ill. Applicant's attorney: Themis N. Anastos, Suite 614–616, 120 West Madison Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Articles of iron and steel*, from Burns Harbor, Porter County, Ind., to points in the Illinois portion of the Chicago, Ill., commercial zone, as defined by the Commission in 1 M.C.C. 673, and *empty containers or other such incidental facilities* (not specified), used in transporting the commodities specified above, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 16567 (Sub-No. 7), filed November 27, 1964. Applicant: J. L. SCHEFFLER TRANSPORT, INC., 1801 West Fulton Street, Chicago, Ill. Applicant's attorney: Themis N. Anastos, Suite 614–616, 120 West Madison Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Articles of iron and steel*, from Burns Harbor, Porter County, Ind., to points in the Illinois portion of the Chicago, Ill. commercial zone, as defined by the Commission in 1 M.C.C. 673, and *empty containers or other such incidental facilities* (not specified) used in transporting the above-specified commodities, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 18738 (Sub-No. 31), filed November 30, 1964. Applicant: SIMS MOTOR TRANSPORT LINES, INC., 610 West 138th Street, Chicago 27, Ill. Applicant's attorney: Ferdinand Born, 1017–19 Chamber of Commerce Building, Indianapolis 4, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, and except Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment and those injurious or contaminating to other lading), between the plant site of the Bethlehem Steel Company, Burns Harbor, Indiana plant located in Porter County, Ind., on the one hand, and, on the other, points in Illinois, Indiana, Ohio, Michigan and Kentucky.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 19227 (Sub-No. 90), filed November 30, 1964. Applicant: LEONARD BROS. TRANSFER, INC., 2595 Northwest 20th Street, Miami, Fla. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Communications and transmission towers and related parts*, from points in Texas to points in Alabama, Arkansas, California, Florida, Georgia, Kentucky, Louisiana, Maryland, Michigan, Mississippi, New Mexico, New Jersey, Nevada, North Carolina, Ohio, South Carolina, Tennessee, Virginia, and West Virginia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Dallas, Tex.

No. MC 19945 (Sub-No. 14), filed November 27, 1964. Applicant: BEHNKEN TRUCK SERVICE, INC., Illinois Route 13, New Athens, Ill. Applicant's attorney: Ernest A. Brooks II, 1301–02 Ambassador Building, St. Louis, Mo., 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities, in bulk*, having prior movement by water or rail between points in Arkansas, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Oklahoma, Tennessee, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo.

No. MC 19945 (Sub-No. 15), filed December 2, 1964. Applicant: BEHNKEN TRUCK SERVICE, INC., Illinois Route 13, New Athens, Ill. Applicant's attorney: Ernest A. Brooks II, 1301–02 Ambassador Building, St. Louis, Mo., 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry fertilizer*, in bulk, between points in Illinois on and south of U.S. Highway 136, on the one hand, and, on the other, points in Missouri.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo.

No. MC 20157 (Sub-No. 1), filed November 27, 1964. Applicant: CHICAGO CARTAGE COMPANY, a corporation, 2100 South Throop Street, Chicago, Ill. Applicant's attorney: Themis N. Anastos, Suite 614–616, 120 West Madison Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Articles of iron and steel*, from Burns Harbor, Porter County, Ind., to points in the Illinois portion of the Chicago, Ill., commercial zone, as defined by the Commission, in 1 M.C.C. 673, and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified above, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 28573 (Sub-No. 25), filed November 27, 1964. Applicant: GREAT NORTHERN RAILWAY COMPANY, a corporation, 175 East 4th Street, St. Paul 1, Minn. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) (1) between Lewistown and Malta, Mont. from Lewistown over U.S. Highway 191 to Malta, and return over the same route serving no intermediate points, and (2) between Grassrange and Malta, Mont. from Grassrange over Montana Highway 19 to junction U.S. Highway 191 east of Roy, thence over U.S. Highway 191 to Malta, and return over the same route serving no intermediate points. Restriction: Service restricted to that which is auxiliary to or supplemental of the rail service of the Great Northern Railway Co.

NOTE: Applicant is also authorized to conduct operations as a common carrier of passengers in MC 28572 Sub 2 and other subs. If a hearing is deemed necessary, applicant requests it be held at Billings, Mont.

No. MC 30844 (Sub-No. 164), filed November 27, 1964. Applicant: KROBLIN REFRIGERATED XPRESS, INC., Post Office Box 218, Sumner, Iowa. Applicant's attorney: Truman A. Stockton, Jr., The 1650 Grant Street Building, Denver 3, Colo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods and prepared foods*, and *essence of fruits and berries*, (1) from points in New York on and west of U.S. Highway 11 to points in Texas, Oklahoma, Colorado, Louisiana, Mississippi, Arkansas, Tennessee, Kansas, Missouri, Iowa, Minnesota, Wisconsin, North Dakota, South Dakota, and Nebraska; (2) from points in Texas to points in Michigan, New York, Pennsylvania, and Ohio.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 31262 (Sub-No. 2), filed November 25, 1964. Applicant: JAMES M. BRUNO, doing business as KELLEY & HAWES EXPRESS, 786 Main Street, Winchester, Mass. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except Classes A and B explosives), between points in Massachusetts.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Boston, Mass.

No. MC 32601 (Sub-No. 1), filed November 27, 1964. Applicant: BELMONT VAN & STORAGE COMPANY, a corporation, 3407 East Broadway, Long Beach, Calif. Applicant's attorney: G. Alfred Roensch, 21st Floor, 100 Bush Street, San Francisco, Calif. If a hearing is deemed necessary, applicant requests it be held at Newark, N.J., or New York, N.Y.

No. MC 68078 (Sub-No. 20), filed November 18, 1964. Applicant: CENTRAL MOTOR EXPRESS, INC., 2909 South Hickory Street, Chattanooga, Tenn. Applicant's attorney: Blaine Buchanan, 1024 James Building, Chattanooga, Tenn., 37402. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), moving in a circuitous manner, from Athens, Tenn., over Tennessee Highway 30 to Etowah, Tenn., thence over U.S. Highway 411 to Englewood, Tenn., thence over Tennessee Highway 39 to junction Tennessee Highway 30, and thence over Tennessee Highway 30

to Athens, serving all intermediate points.

NOTE: Applicant states said extension is to be tacked to and unified with all other certificates of applicant in MC 69078 and Subs. If a hearing is deemed necessary, applicant requests it be held at Chattanooga or Knoxville, Tenn.

No. MC 69364 (Sub-No. 1), filed November 27, 1964. Applicant: ENTERPRISE TRANSFER CO., a corporation, 1419–57 West Willow Street, Chicago, Ill. Applicant's attorney: Themis N. Anastos, Suite 614–616, 120 West Madison Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Articles of iron and steel*, from Burns Harbor, Porter County, Ind., to points in the Illinois portion of the Chicago, Ill., commercial zone, as defined by the Commission in 1 M.C.C. 673, and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified above, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 78118 (Sub-No. 13), filed December 2, 1964. Applicant: W. H. JOHNS, INC., 35 Witmer Road, Lancaster, Pa. Applicant's attorney: Christian V. Graf, 407 North Front Street, Harrisburg, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Prepared foods products, and materials, equipment, and supplies* used in, or incidental to, the preparation, packing and sale thereof, serving the warehouse site of the Atlantic and Pacific Tea Co., Inc., in Florence Township, Burlington County, N.J., as an off-route point in connection with applicant's authorized regular-route operations between Salem, N.J., and Pittsburgh, Pa.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa.

No. MC 78643 (Sub-No. 53), filed November 30, 1964. Applicant: HART MOTOR EXPRESS, INC., 2417 North Cleveland, St. Paul 13, Minn. Applicant's attorney: Donald A. Morken, 1000 First National Bank Building, Minneapolis, Minn., 55402. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between Grand Forks, N. Dak., and Pembina, N. Dak.; (a) from Grand Forks, N. Dak., over U.S. Highway 81 to Pembina, N. Dak., and return over the same route, serving no intermediate points, and (b) from Grand Forks, N. Dak., over U.S. Highway 81 to junction North Dakota Highway 44, thence over North Dakota Highway 44 to junction Interstate Highway 29, thence over Interstate Highway 29 to Pembina, N. Dak., and return over the same route, serving no intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 82072 (Sub-No. 4), filed December 2, 1964. Applicant: EDWARD KELLER AND ROLAND KELLER, a partnership, doing business as C. KELLER & SONS, 2811 Emaus Avenue, Allentown, Pa. Applicant's representative: Charles H. Trayford, 220 East 42d Street, New York 17, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, from Pennsburg, East Greenville and Allentown, Pa., to points in New York, Massachusetts, Maryland, West Virginia, Illinois, Vermont, North Carolina, Tennessee, Mississippi, Kentucky, New Jersey, New Hampshire, Ohio, Michigan, Indiana, Georgia, South Carolina, Maine, Louisiana, Minnesota, Connecticut, Delaware, Virginia, Missouri, Rhode Island, Texas, Florida, Alabama, Arkansas, Wisconsin, and the District of Columbia.

NOTE: Applicant states the purpose of this application is to include Allentown, Pa., as an origin, and to provide for the transportation of new furniture without the present uncrated restriction. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 83539 (Sub-No. 128), filed November 30, 1964. Applicant: C & H TRANSPORTATION CO., INC., 1935 West Commerce Street, Post Office Box 5976, Dallas, Tex., 75222. Applicant's attorney: W. T. Brunson, 419 Northwest 6th Street, Oklahoma City, Okla. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wallboard*, from Diboll, Tex., and points within 5 miles thereof, to points in Arkansas, Louisiana, New Mexico, and Oklahoma.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Dallas, Tex.

No. MC 83539 (Sub-No. 129), filed November 30, 1964. Applicant: C & H TRANSPORTATION CO., INC., 1935 West Commerce Street, Post Office Box 5976, Dallas, Tex., 75222. Applicant's attorney: W. T. Brunson, 419 Northwest 6th Street, Oklahoma City, Okla. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pipe and pipe fittings, cast iron meter boxes, manhole frames* and *manhole covers* (except those which because of size or weight require the use of special equipment, and except pipe and pipe fittings as described by the Commission in 74 M.C.C. 459, 543), from the plant site of Western Foundry at or near Tyler, Tex., to points in Indiana, Massachusetts, Michigan, New Jersey, New York, Ohio, Pennsylvania, and Tennessee.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Dallas, Tex.

No. MC 92983 (Sub-No. 455), filed November 27, 1964. Applicant: ELDON MILLER, INC., Post Office Drawer 617, Kansas City, Mo., 64141. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products* in bulk, in tank vehicles from points in Kansas to points in Michigan, Ohio, and Pennsylvania.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo.

No. MC 99117 (Sub-No. 2), filed November 27, 1964. Applicant: T. H. RYAN CARTAGE CO., a corporation, 1433 West Harrison Street, Chicago, Ill. Applicant's attorney: Themis N. Anastos, Suite 614–616, 120 West Madison Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Articles of iron and steel* from Burns Harbor, Porter County, Ind., to points in the Illinois portion of the Chicago, Ill., commercial zone as defined by the Commission in 1 M.C.C. 673 and *empty containers or other such incidental facilities* used in transporting the above commodities on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 103051 (Sub-No. 183) (Amendment), filed November 27, 1964, published FEDERAL REGISTER issue December 9, 1964, and republished as amended this issue. Applicant: FLEET TRANSPORT CO., INC., 340 Armour Drive NE., Atlanta, Ga., 30324. Applicant's attorney: R. J. Reynolds, Jr., Suite 403–11 Healey Building, Atlanta, Ga., 30303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Vegetable oils and animal fats, and blends thereof*, in bulk, in tank vehicles, from points in Mecklenburg County, N.C. to points in West Virginia.

NOTE: The purpose of this amendment is to show broadened scope of the above commodities. If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 103378 (Sub-No. 309), filed November 27, 1964. Applicant: PETROLEUM CARRIER CORP., 369 Margaret Street, Jacksonville, Fla. Applicant's attorney: Martin Sack, 710 Atlantic National Bank Building, Jacksonville 2, Fla. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid alum*, in bulk, in tank vehicles, from Fernandina Beach, Fla., to points in Georgia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Jacksonville, Fla.

No. MC 105413 (Sub-No. 17), filed November 27, 1964. Applicant: PETROLEUM TRANSPORT SERVICE, INC., R.R. 1, Council Bluffs, Iowa. Applicant's attorney: C. J. Burrill, 904 City National Bank Building, Omaha, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia and fertilizer solutions*, in bulk, in tank vehicles, and *dry fertilizer*, in bulk and in bags, from the plant site of Cominco Products, Inc., located at or near Hoag, Nebr., to points in Iowa, Kansas, South Dakota, Minnesota, Missouri, and Illinois.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 105461 (Sub-No. 61), filed December 1, 1964. Applicant: HERR'S MOTOR EXPRESS, INC., Quarryville, Pa. Applicant's representative: Bernard N. Gingerich, Quarryville, Pa., 17566. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Boat pumps, sheet metal building materials*, and *accessories, fittings, supplies and tools used in the installation thereof*, from the site of Berger Brothers Company located at Lower Southampton Township, Bucks County, Pa. to points in New Jersey (except Atlantic, Burlington, Cape May, Monmouth, and Ocean Counties), New York, Connecticut, Rhode Island, Massachusetts, Maine, New Hampshire, and Vermont.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 105461 (Sub-No. 62), filed December 1, 1964. Applicant: HERR'S MOTOR EXPRESS, INC., Quarryville, Pa. Applicant's representative: Bernard N. Gingerich, Quarryville, Pa., 17566. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities as are used in conducting or operating retail gasoline service stations*, from Chester and Marcus Hook, Pa., to Baltimore, Md., Akron, Boardman, and Cleveland, Ohio, Providence, R.I., Richmond, Va., Wheeling, W. Va., and points in Connecticut, Massachusetts, New Jersey, and New York.

NOTE: Applicant states that the above described commodities will be limited to transportation in mixed shipments with petroleum products in containers. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 105813 (Sub-No. 118), filed November 30, 1964. Applicant: BELFORD TRUCKING CO., INC., 1299 Northwest 23d Street, Miami, Fla. Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods, frozen citrus products, citrus products* not canned and not frozen, and *canned citrus products*, from points in Florida to points in Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 106373 (Sub-No. 28), filed November 25, 1964. Applicant: THE SERVICE TRANSPORT CO., a corporation, 11910 Harvard Avenue, Cleveland, Ohio. Applicant's attorneys: James R. Stiverson and Herbert Baker, 50 West Broad Street, Columbus 15, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except articles of size or weight that makes handling by motor vehicle impractical, bank bills, coins, currency, drafts, notes, or other valuable papers, precious metals or articles manufactured therefrom, dangerous explosives, liquid bulk commodities, and household goods), serving the site of the plants of the General Motors Corp. located in Lordstown Township, Trumbull County, Ohio, as off-route points in connection with applicant's regular-route authority.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Detroit, Mich.

No. MC 107002 (Sub-No. 236), filed November 30, 1964. Applicant: HEARIN-MILLER TRANSPORTERS, INC., Post Office Box 1123, Highway 80 West, Jackson, Miss., 39205. Applicant's attorney: E. Stephen Heisley, Transportation Building, Washington, D.C., 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities, in bulk* (except cement), from Decatur, Ala., and points within 15 miles thereof, to points in Tennessee (except paving tar, and, except chemicals to Kingsport, Tenn.), Georgia, and Alabama.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Birmingham, or Montgomery, Ala.

No. MC 107010 (Sub-No. 14), filed October 19, 1964, published FEDERAL REGISTER issue November 4, 1964, amended November 27, 1964, and republished as amended this issue. Applicant: D & R BULK CARRIERS, INC., 1020 J Street, Auburn, Nebr. Applicant's attorney: R. E. Powell, 1005–06 Terminal Building, Lincoln, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia and fertilizer solutions*, in bulk, in tank vehicles, *and dry fertilizer*, in bulk and in bags (not restricted as to kind or type of equipment), from the plant site of Cominco Products, Inc., located at or near Hoag, Nebr., to points in Illinois, Iowa, Kansas, Minnesota, Missouri, and South Dakota, and *damaged and rejected shipments* of the commodities specified, on return.

NOTE: The purpose of this republication is to (1) add dry fertilizer, in bulk and in bags, to the commodity description, (2) include Illinois as a destination state, and (3) reflect applicant's attorney. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 107403 (Sub-No. 590), filed November 27, 1964. Applicant: MATLACK, INC., 10 West Baltimore Avenue, Lansdowne, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, dry, in bulk, in tank and hopper type vehicles, from Cincinnati, Ohio, to points in Delaware, Maryland, New Jersey, New York, North Carolina, Pennsylvania, South Carolina, Virginia, and West Virginia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 107417 (Sub-No. 2), filed December 1, 1964. Applicant: JERSEY COAST FREIGHT LINES, INC., 830 Old Corlies Avenue, Neptune, N.J. Applicant's attorney: Charles J. Williams, 1060 Broad Street, Newark, N.J., 07102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, and commodities requiring special equipment), between points in Atlantic and Cumberland Counties, N.J.

NOTE: Applicant states that it intends to tack this authority with the authority it holds in Certificate No. MC 107417 and that which its affiliate, Bilkays Express Co., holds in Certificate No. MC 73616, and which the latter acquired in MC–F 8801, all of which authorize the transportation of general commodities, with exceptions, between specified points or areas in New Jersey and New York. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 107417 (Sub-No. 3), filed December 1, 1964. Applicant: JERSEY COAST FREIGHT LINES, INC., 830 Old Corlies Avenue, Neptune, N.J. Applicant's attorney: Charles J. Williams, 1060 Broad Street, Newark, N.J., 07102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, and commodities requiring special equipment), between points in Atlantic and Cape May Counties, N.J.

NOTE: Applicant states it intends to tack this authority with the authority it holds in Certificate No. MC 107417 and that which its affiliate, Bilkays Express Co., holds in Certificate No. MC 73616, and which the latter acquired in MC–F 8801, all of which authorize the transportation of general commodities, with exceptions, between specified points or areas in New Jersey and New York. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 107417 (Sub-No. 4), filed December 1, 1964. Applicant: JERSEY COAST FREIGHT LINES, INC., 830 Old Corlies Avenue, Neptune, N.J. Applicant's attorney: Charles J. Williams, 1060 Broad Street, Newark, N.J., 07102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, and commodities requiring special equipment), between points in Atlantic and Cape May Counties, N.J.

NOTE: Applicant states it intends to tack this authority with the authority it holds in Certificate No. MC 107417 and that which its affiliate, Bilkays Express Co., holds in Certificate No. MC 73616, and which the latter acquired in MC–F 8801, all of which authorize the transportation of general commodities, with exceptions, between specified points or areas in New Jersey and New York. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 109132 (Sub-No. 16), filed November 27, 1964. Applicant: FREIGHT WAYS, INC., 1309 North Mosley, Wichita, Kans. Applicant's attorney: Themis N. Anastos, Suite 614–616, 120 West Madison Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value,

Classes A and B explosives, livestock, household goods as defined in *Practices of Motor Common Carriers of Household*

NOTE: Applicant states (a) purpose of application is to permit applicant to perform operations from its new terminal in Bayonne, N.J., which was previously located at

transporting: *Anhydrous ammonia and fertilizer solutions*, in bulk, in tank vehicles, and *dry fertilizer* in bulk, from

Classes A and B explosives, livestock, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, and those injurious or contaminating to other lading), serving Burns Harbor, Porter County, Ind., as an off-route point in connection with applicant's authorized regular-route operations to and from points in Oklahoma, Illinois, Kansas, and Missouri.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 109136 (Sub-No. 26) (AMENDMENT), filed October 28, 1964, published FEDERAL REGISTER issue November 11, 1964, amended December 9, 1964, and republished as amended this issue. Applicant: ORIOLE CHEMICAL CARRIERS, INC., 9722 Pulaski Highway, Baltimore, Md., 21220. Applicant's attorney: Maxwell A. Howell, 1511 K Street NW., Washington, D.C., 20005. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Liquid caustic soda*, in bulk, in tank vehicles, from: Diamond Alkali Company, Delaware City, Del., to points in Pennsylvania on and east of U.S. Highway 220; to points in New Jersey; to points in Delaware; to points in Maryland; to points in New York on and east of New York Highway 17 from the New York-Pennsylvania State line to and including Binghamton, on and east or south of New York Highway 7 from Binghamton to and including Troy, on and west of U.S. Highway 4 from Troy to junction of U.S. Highways 4 and 9, and on and west of U.S. Highway 9 from said junction through and including Yonkers, and thence south to the New York, N.Y., corporate boundary; to points in Virginia on and east of U.S. Highway 220 from the Virginia-North Carolina State line to and including Roanoke, and on and east of U.S. Highway 11 from Roanoke to the Virginia-West Virginia State line; to points in West Virginia on and east of U.S. Highway 11; and to the District of Columbia; and (2) *liquefied chlorine gas*, in containers, and in bulk, in tank vehicles, from: Diamond Alkali Company, Delaware City, Del., to points in Pennsylvania on and east of U.S. Highway 11 to Harrisburg and points on and south of U.S. Highway 22; to points in New Jersey; to points in Maryland; to points in Delaware; to the District of Columbia, and to Occoquan, Va.

NOTE: The purpose of this republication is to add in bulk, in tank vehicles in item (2). If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 109263 (Sub-No. 15), filed November 25, 1964. Applicant: TRIO MOTOR LINES, INC., 92 East 19th Street, Bayonne, N.J. Applicant's attorney: Edward M. Alfano, 2 West 45th Street, New York 36, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, between carrier's terminal facilities in Bayonne, N.J., on the one hand, and, on the other, points in New Jersey.

NOTE: Applicant states (a) purpose of application is to permit applicant to perform operations from its new terminal in Bayonne, N.J., which was previously located at New York, N.Y., and (b) proposed authority to be tacked to and combined with carrier's existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 109818 (Sub-No. 15), filed November 30, 1964. Applicant: WENGER TRUCK LINE, INC., Beaver, Iowa. Applicant's representative: William A. Landau, 1307 East Walnut, Des Moines, Iowa, 50316. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from the Burns Harbor plant site of Bethlehem Steel Co. located at or near Baileytown, Ind., to points in Nebraska and points in Iowa on and west of U.S. Highway 63.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 110420 (Sub-No. 398), filed December 2, 1964. Applicant: QUALITY CARRIERS, INC., Post Office Box 339, 100 South Calumet Street, Burlington, Wis. Applicant's representative: Fred H. Figge, Post Office Box 339, Burlington, Wis. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sugar, starch and products of corn*, in bulk, in tank or hopper type vehicles, from Kansas City, Mo., to points in Alabama, Georgia, Illinois, Indiana, Kentucky, Maryland, Michigan, Minnesota, Mississippi, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, West Virginia, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 110525 (Sub-No. 691), filed December 2, 1964. Applicant: CHEMICAL LEAMAN TANK LINES, INC., 520 East Lancaster Avenue, Downingtown, Pa. Applicant's attorneys: Edwin H. van Deusen, 520 East Lancaster Avenue, Downingtown, Pa., and Leonard A. Jaskiewicz, 1155 15th Street, NW., Madison Building, Washington, D.C., 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cement*, in bulk from Creighton, Pa., to points in Monongalia County, W. Va.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 110698 (Sub-No. 291), filed November 30, 1964. Applicant: RYDER TANK LINE, INC., Winston-Salem Road, Post Office Box 8418, Greensboro, N.C. Applicant's attorney: Reagan Sayers, Century Life Building, Fort Worth, Tex., 76102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sulphuric acid and ammonium phosphate sulfate solution*, in bulk, in tank vehicles, from Plainview, Tex., and points within 5 miles thereof, to points in Arizona, Colorado, Kansas, New Mexico, and Oklahoma.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Dallas, Tex.

No. MC 110948 (Sub-No. 2), filed November 30, 1964. Applicant: SOO-SECURITY MOTORWAYS LTD., 725 Portage Avenue, Winnipeg 2, Manitoba, Canada. Applicant's attorney: Donald A. Morken, 1000 First National Bank Building, Minneapolis, Minn., 55402. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Pembina, N. Dak., and Grand Forks, N. Dak.; (a) from Pembina, N. Dak., over U.S. Highway 81 to Grand Forks, N. Dak., and return over the same route, serving no intermediate points, and (b) from Pembina, N. Dak., over Interstate Highway 29 to junction North Dakota Highway 44, thence over North Dakota Highway 44 to junction U.S. Highway 81, thence over U.S. Highway 81 to Grand Forks, N. Dak., and return over the same route, serving no intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 110988 (Sub-No. 95) (AMENDMENT), filed October 14, 1964, published in FEDERAL REGISTER issue of October 28, 1964, amended November 2, 1964, republished as amended November 11, 1964, and further amended December 3, 1964, and republished as further amended this issue. Applicant: KAMPO TRANSIT, INC., 200 West Cecil Street, Neenah, Wis. Applicant's attorneys: E. Stephen Heisley, Transportation Building, Washington, D.C., 20006, and Harry C. Ames, Jr. (same address). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk from South Beloit, Ill., to points in Iowa, Kansas, Michigan, Minnesota, New Jersey, New York, Oklahoma, and Wisconsin.

NOTE: The purpose of this republication is to broaden the commodity description. If a hearing is deemed necessary, applicant requests it be held at Madison, Wis.

No. MC 112098 (Sub-No. 11), filed November 25, 1964. Applicant: JACK FARNELL, doing business as LOS ANGELES TURF EXPRESS, 1611 Easterly Terrace, Los Angeles, Calif., 90026. Applicant's attorney: R. Y. Schureman, 1010 Wilshire Boulevard, Los Angeles, Calif., 90017. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Horses, other than ordinary*, and in connection therewith, *personal effects of attendants, equipment, supplies, and mascots* used in the care and exhibition of such animals between points in New Mexico and Texas.

NOTE: No duplicating authority is sought. If a hearing is deemed necessary, applicant requests it be held at El Paso, Tex.

No. MC 112520 (Sub-No. 114), filed November 25, 1964. Applicant: McKENZIE TANK LINES, INC., New Quincy Road, Tallahassee, Fla. Applicant's attorney: Sol H. Proctor, 1730 American Heritage Life Building, Jacksonville, Fla.,

32202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Ammoniating solutions, anhydrous ammonia and aqua ammonia*, in bulk, in tank vehicles, from points in Decatur County, Ga. to points in Alabama.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Jacksonville, Fla.

No. MC 112750 (Sub-No. 207), filed November 30, 1964. Applicant: ARMORED CARRIER CORPORATION, 222-17 Northern Boulevard, Bayside, N.Y. Applicant's attorney: Alan Foss, First National Bank Building, Fargo, N. Dak. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Commercial papers, documents, and written instruments including originals and copies of checks, drafts, notes, money orders, travelers' checks and cancelled bonds, and accounting papers relating thereto, including originals and copies of cash letters, letters of transmittal, summary sheets, adding machine tapes, deposit records, withdrawal slips, and debit and credit records* (except coin, currency, bullion, and negotiable securities) under continuing contracts with banks and banking institutions only, namely, national banks, State banks, Federal Reserve Banks, savings and loan associations and savings banks (1) between Fargo and Grand Forks, N. Dak., on the one hand, and, on the other, points in North Dakota and Minnesota and (2) between Minneapolis, Minn., on the one hand, and, on the other, points in North Dakota and Minnesota.

NOTE: Applicant also holds temporary authority to conduct operations as a common carrier in No. MC 111729 (Sub-No. 9) and subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 112801 (Sub-No. 15), filed November 30, 1964. Applicant: TRANSPORT SERVICE CO., a corporation, Post Office Box 272, Cicero Station, 5100 West 41st, Chicago 50, Ill. Applicant's attorneys: Leonard A. Jaskiewicz and J. William Cain, Madison Building, 1155 15th Street NW., Washington, D.C., 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank or hopper-type vehicles, from Tri City Regional Port Complex located in Madison County, Ill., to points in the United States (except Alaska and Hawaii).

NOTE: If a hearing is deemed necessary, applicant does not specify place of hearing.

No. MC 113622 (Sub-No. 6), filed November 27, 1964. Applicant: SAMPSON HAULING CORP., Pavilion, N.Y. Applicant's attorney: Kenneth T. Johnson, Bank of Jamestown Building, Jamestown, N.Y., 14701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes transporting: *Sand and sand products*, from Erie, Pa., to points in Chautauqua County, N.Y.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 113908 (Sub-No. 148) (Amendment), filed September 28, 1964, published FEDERAL REGISTER issue October 14, 1964, amended and republished this issue. Applicant: ERICKSON TRANSPORT CORPORATION, Post Office Box 3180, 706 West Tampa, Springfield, Mo. Applicant's attorney: Turner White, III, 805 Woodruff Building, Springfield, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid animal and poultry feed supplements*, in bulk, and in tank vehicles, from Springfield, and Verona, Mo., to points in Alabama, Delaware, Georgia, Illinois, Iowa, Kentucky, Louisiana, Maryland, Kansas, Arkansas, Virginia, Michigan, Mississippi, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Tennessee, South Carolina, and Indiana.

NOTE: The purpose of this republication is to include Verona Mo., as an additional point in the origin territory. If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo.

No. MC 114194 (Sub-No. 81), filed November 30, 1964. Applicant: KREIDER TRUCK SERVICE, INC., 8003 Collinsville Road, East St. Louis, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, dry, in bulk, from Chicago, Ill. to Cincinnati, Ohio, St. Louis and Kansas City, Mo., Detroit, Mich., and Milwaukee, Wis., and *rejected shipments* on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 114194 (Sub-No. 82), filed December 2, 1964. Applicant: KREIDER TRUCK SERVICE, INC., 8003 Collinsville Road, East St. Louis, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities, in bulk*, having prior movement by rail and *rejected shipments*, between points in Arkansas, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Oklahoma, Tennessee, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 114301 (Sub-No. 30), filed November 30, 1964. Applicant: DELAWARE EXPRESS CO., a corporation, Post Office Box 141, Elkton, Md. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry fertilizer* and *fertilizer materials*, in bulk, in tank vehicles, from Baltimore, Md., to points in Delaware, Maryland, New Jersey, Pennsylvania, Virginia, and West Virginia.

NOTE: Applicant states that it is presently authorized to transport the above commodities from Baltimore, Md. to points in Delaware and points in Chester, Delaware, Lancaster, and Montgomery Counties, Pa. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 114725 (Sub-No. 18), filed November 27, 1964. Applicant: WYNNE TRANSPORT SERVICE, INC., 1528 North 11th Street, Omaha, Nebr. Applicant's attorney: J. Max Harding, Box 2028, Lincoln, Nebr., 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia and fertilizer solutions*, in bulk, in tank vehicles, and *dry fertilizer* in bulk, from the plant site of Cominco Products, Inc., located at or near Hoag, Nebr., to points in Iowa, Kansas, South Dakota, Minnesota, Missouri, and Illinois, and *damaged and rejected shipments of the above commodities*, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 114939 (Sub-No. 29), filed December 1, 1964. Applicant: BULK CARRIERS LIMITED, Box 10, Cooksville, Ontario, Canada. Applicant's attorney: Walter N. Bieneman, Suite 1700, 1 Woodward Avenue, Detroit, Mich., 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Liquid chemicals*, in bulk, in tank vehicles, restricted to traffic originating in or destined to points in Canada, between ports of entry on the International Boundary line between the United States and Canada located on the Niagara River, on the one hand, and, on the other, points in Niagara and Erie Counties, N.Y., (2) *ethylene*, in bulk, in tank vehicles, restricted to traffic originating in Canada, from ports of entry on the International Boundary line between the United States and Canada located at or near Port Huron and Detroit, Mich., to Charleston, W. Va., and (3) *anhydrous hydrogen chloride*, in tank vehicles, restricted to traffic originating in Canada, from the port of entry on the International Boundary line between the United States and Canada located at or near Port Huron, Mich., to Union Beach, N.J., and Baltimore, Md.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 115162 (Sub-No. 104), filed November 27, 1964. Applicant: WALTER POOLE, doing business as POOLE TRUCK LINE, Post Office Box 346, Evergreen, Ala. Applicant's representative: Robert E. Tate, 2031 Ninth Avenue South, Birmingham, Ala. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Flour*, from Mount Vernon, Ind., to points in Jackson County, Miss.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Mobile, Ala.

No. MC 115162 (Sub-No. 105), filed November 27, 1964. Applicant: WALTER POOLE, doing business as POOLE TRUCK LINE, Post Office Box 346, Evergreen, Ala. Applicant's representative: Robert E. Tate, 2031 Ninth Avenue South, Birmingham, Ala. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Tractors*, regardless of how they are equipped (except tractors used in pulling commercial highway trailers [equipped with 5th wheels] and those which because of size or weight require the use of special equipment), (2) *parts, implements, attachments, accessories, and supplies* for commodities described above in (1) and (3) *agricultural machinery* and *implements*, other than hand, as described in sections 1(b)

and 1(c) of appendix XII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, from Waterloo,

Peru, Ill., to points in Indiana, Ohio, Michigan, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Arkansas, Tennessee,

LONIAL REFRIGERATED TRANSPORTATION, INC., Post Office Box 2169, 1215 Bankhead Highway West, Birmingham,

& COMPANY TRANSPORTS, INC., Post Office Box 613, Highway 71 North, Carthage, Mo. Authority sought to operate

and *refused or rejected shipments*, on return.

NOTE: Applicant states that it proposes to

*empty pallets and refused, damaged, and rejected shipments*, on return.

NOTE: Applicant states the proposed serv-

and 1(c) of appendix XII to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, from Waterloo, Dubuque, and Des Moines, Iowa; Hori-con, Wis.; and Moline, Ill. to points in Alabama and points in Georgia on and south of U.S. Highway 280.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Montogmery, Ala.

No. MC 115331 (Sub-No. 91), filed November 27, 1964. Applicant: TRUCK TRANSPORT, INCORPORATED, 707 Market Street, St. Louis, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk and in bags from El Paso, Ill., and points within five (5) miles thereof, to points in Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Missouri, Nebraska, Ohio, Pennsylvania, West Virginia, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Chicago, Ill.

No. MC 115331 (Sub-No. 92), filed November 27, 1964. Applicant: TRUCK TRANSPORT, INCORPORATED, 707 Market Street, St. Louis, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer and fertilizer materials*, from Perry, Iowa, and points within five (5) miles thereof, to points in Illinois and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Chicago, Ill.

No. MC 115331 (Sub-No. 93), filed November 27, 1964. Applicant: TRUCK TRANSPORT, INCORPORTED, 707 Market Street, St. Louis, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals and fertilizers*, from Erie, Ill., and points within five (5) miles thereof, to points in Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Chicago, Ill.

No. MC 115331 (Sub-No. 94), filed November 27, 1964. Applicant: TRUCK TRANSPORT, INCORPORATED, 707 Market Street, St. Louis, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia and nitrogen fertilizer solution*, in bulk, in tank vehicles, from Peru, Ill., to points in Indiana, Iowa, Kansas, Kentucky, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Chicago, Ill.

No. MC 115331 (Sub-No. 95), filed November 27, 1964. Applicant: TRUCK TRANSPORT, INCORPORATED, 707 Market Street, St. Louis, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals* and *plastics* (except liquid fertilizer solutions), in bulk, in tank and hopper vehicles, from Peru, Ill., to points in Indiana, Ohio, Michigan, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Arkansas, Tennessee, Kentucky, Pennsylvania, and Nebraska.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., or Chicago, Ill.

No. MC 115821 (Sub-No. 5), filed November 27, 1964. Applicant: FRANK BEELMAN, JR., St. Libory, Ill. Applicant's attorney: Ernest A. Brooks II, 1301–02 Ambassador Building, St. Louis, Mo., 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities, in bulk*, having prior movement by water or rail, between points in Arkansas, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Oklahoma, Tennessee, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo.

No. MC 115821 (Sub-No. 6), filed December 2, 1964. Applicant: FRANK BEELMAN, JR., St. Libory, Ill. Applicant's attorney: Ernest A. Brooks II, 1301–02 Ambassador Building, St. Louis, Mo., 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry fertilizer*, in bulk, between points in Illinois on and south of U.S. Highway 136, on the one hand, and, on the other, points in Missouri.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo.

No. MC 115826 (Sub-No. 32), filed December 2, 1964. Applicant: W. J. DIGBY, INC., 1960 31st Street, Denver, Colo. Applicant's attorney: Michael T. Corcoran, 1360 Locust Street, Denver, Colo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat byproducts, dairy products, and articles distributed by meat packinghouses*, as defined in sections A, B, and C of appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 (272) and 766 (except commodities in bulk, in tank vehicles), from Mason City, Iowa, to points in Virginia, North Carolina, and South Carolina.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa, or Washington, D.C.

No. MC 115831 (Sub-No. 6), filed November 27, 1964. Applicant: TIDEWATER TRANSIT CO., INC., 114 North Queen Street, Kinston, N.C. Applicant's attorney: J. Ruffin Bailey, 3d Floor, First Federal Building, Post Office Box 2246, Raleigh, N.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wet and dry phosphate rock* in bulk in covered dump, tank, or hopper-type vehicles from the Texas Gulf Sulfur Company's plant site in Beaufort County, N.C., and points within 5 miles thereof, to points in Virginia and South Carolina.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Raleigh, N.C.

No. MC 115841 (Sub-No. 216), filed November 27, 1964. Applicant: COLONIAL REFRIGERATED TRANSPORTATION, INC., Post Office Box 2169, 1215 Bankhead Highway West, Birmingham, Ala. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen fruits, frozen berries*, and *frozen vegetables*, when moving in mixed loads with frozen foods, from points in Tennessee west of that portion of the Tennessee River extending from a point on the Tennessee-Kentucky State line (south of Paducah, Ky.), to a point on the Tennessee-Alabama State line (north of Florence, Ala.), to points in Alabama, Arkansas, Delaware, Florida, Georgia, Iowa, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Texas, Virginia, West Virginia, those points in both Kansas and Nebraska on and east of U.S. Highway 81, and the District of Columbia.

NOTE: Applicant states it already holds authority on frozen foods (except frozen fruits, vegetables, and berries). If a hearing is deemed necessary, applicant requests it be held at Nashville, Tenn.

No. MC 116273 (Sub-No. 37), filed November 30, 1964. Applicant: D & L TRANSPORT, INC., 3800 South Laramie Avenue, Cicero, Ill. Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products and chemicals*, in bulk, in tank vehicles, from the plant site of American Oil Co., located at or near Whiting, Ind., to points in Iowa.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 117119 (Sub-No. 180), filed November 27, 1964. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., Elm Springs, Ark. Applicant's attorney: John H. Joyce, 26 North College, Fayetteville, Ark. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products*, from Springfield, Mo. to points in New York, New Jersey, Pennsylvania, Delaware, Maryland, Massachusetts, West Virginia, Virginia, Rhode Island, Connecticut, and the District of Columbia.

NOTE: Applicant states it does not propose to tack the requested authority to presently held authority. If a hearing is deemed necessary, applicant requests it be held at Jefferson City, Mo.

No. MC 117344 (Sub-No. 141), filed November 30, 1964. Applicant: THE MAXWELL CO., 10380 Evendale Drive, Cincinnati 15, Ohio. Applicant's attorney: James R. Stiverson, 50 West Broad Street, Columbus 15, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry chemicals*, in bulk, from Cincinnati, Ohio to points in Delaware, Maryland, New Jersey, New York, North Carolina, Pennsylvania, South Carolina, Virginia, and West Virginia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 118196 (Sub-No. 25), filed November 27, 1964. Applicant: RAYE & COMPANY TRANSPORTS, INC., Post Office Box 613, Highway 71 North, Carthage, Mo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen fruits, frozen berries, frozen vegetables, frozen potato products* and *potato products* other than frozen, moving in straight or mixed shipments, from points in Idaho to points in Nebraska, Iowa, Kansas, Missouri, Texas, Oklahoma, Arkansas, Louisiana, South Dakota, Mississippi, Tennessee, North Dakota, Minnesota, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Boise, Idaho.

No. MC 118400 (Sub-No. 1), filed November 30, 1964. Applicant: WANDO PRODUCE CO., a corporation, 60 Romney Street, Charleston, S.C. Applicant's representative: Robert E. Tate, 2031 Ninth Avenue South, Birmingham, Ala. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bananas, and bananas in mixed shipments with pineapples and coconuts*, from Charleston, S.C. to points in South Carolina (except Columbia), North Carolina (except Raleigh), Virginia (except Richmond), and Atlanta, Ga.

NOTE: Applicant states it proposes to ship exempt commodities, on return. If a hearing is deemed necessary, applicant requests it be held at Columbia, S.C.

No. MC 119767 (Sub-No. 42), filed December 2, 1964. Applicant: BEAVER TRANSPORT CO., a corporation, 100 South Calumet Street, Post Office Box 339, Burlington, Wis. Applicant's representative: Fred H. Figge, Post Office Box 339, Burlington, Wis. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Metal cans and metal can ends*, from Milwaukee, Wis., to points in Minnesota.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 119778 (Sub-No. 79), filed November 18, 1964. Applicant: REDWING CARRIERS, INC., Post Office Box 34, Powderly Station, Birmingham, Ala. Applicant's attorney: J. Douglas Harris, 410–411 Bell Building, Montgomery, Ala. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizers*, in bulk, from points in Georgia to points in Alabama.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Montgomery, Ala.

No. MC 123905 (Sub-No. 2), filed November 27, 1964. Applicant: OLEN BURRAGE, Route 9, Box 22A, Philadelphia, Miss. Applicant's attorney: Donald B. Morrison, Post Office Box 961, Jackson, Miss. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Rough and dressed lumber, plywood, dimension stock*, and *preservatively treated lumber, poles*, and *timbers*, from Philadelphia, Miss., to points in Georgia, Iowa, Michigan, Minnesota, Missouri, North Carolina, Pennsylvania, and South Carolina, and *refused or rejected shipments*, on return.

NOTE: Applicant states that it proposes to transport exempt commodities on return trips. Applicant states that the above transportation is to be performed under continuing contracts with A. DeWeese Lumber Co., Inc., and Molphus Lumber Co., both of Philadelphia, Miss. If a hearing is deemed necessary, applicant requests it be held at Jackson, Miss.

No. MC 124160 (Sub-No. 1), filed November 25, 1964. Applicant: CLYDE REAVELEY, doing business as REAVELEY TRUCKING CO., 1330 Beck Street, Salt Lake City, Utah. Applicant's attorney: Lon Rodney Kump, 716 Newhouse Building, Salt Lake City, Utah, 84111. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Prestressed concrete, sand, gravel, and diatomaceous earth*, between points in Utah, on the one hand, and, on the other, points in Colorado, Arizona, Nevada, Idaho, and Wyoming.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Salt Lake City, Utah.

No. MC 124211 (Sub-No. 22), filed November 27, 1964. Applicant: HILT TRUCK LINE, INC., 1813 Yolande, Post Office Box 824, Lincoln, Nebr. Applicant's J. Max Harding, Post Office Box 2028, Lincoln, Nebr., 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Nails, wire, and metal posts*, from Peoria, Ill., to Lincoln, Nebr., and *rejected shipments*, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 124669 (Sub-No. 9), filed November 27, 1964. Applicant: TRANSPORT, INC., OF SOUTH DAKOTA, 1012 West 41st Street, Post Office Box 502, Sioux Falls, S. Dak. Applicant's attorney: Ronald B. Pitsenbarger, Post Office Box 396, Moorhead, Minn. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, and *fertilizer solutions*, in bulk, in tank vehicles, and *dry fertilizer*, in bulk and in bags, from the plantsite of Cominco Products, Inc., located at or near Hoag, Nebr., to points in Iowa, Kansas, South Dakota, North Dakota, Minnesota, Missouri, and Illinois and *damaged and rejected shipments* of the commodities specified above, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 125129 (Sub-No. 1), filed November 23, 1964. Applicant: R. B. GREENE TRANSPORTATION, INC., Maple Street, Danielson, Conn. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Glassware* (bottles, demijohns, and jars), from the plantsite of Knox Glass, Inc., located at Dayville (Killingly), Conn., to Cranston, R.I., and Willimansett, Mass., and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified, and *empty pallets and refused, damaged, and rejected shipments*, on return.

NOTE: Applicant states the proposed service will be performed under a continuing contract, or contracts with Feldman Glass Co., of New Haven, Conn. If a hearing is deemed necessary, applicant requests it be held at Hartford, Conn.

No. MC 125417 (Sub-No. 3), filed December 2, 1964. Applicant: BULK FREIGHTWAYS, a corporation, 8332 Wilcox Avenue, South Gate, Calif. Applicant's attorney: Wyman C. Knapp, 740 Roosevelt Building, 727 West Seventh Street, Los Angeles 17, Calif. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lime*, in bulk, in pneumatic hopper equipment, from (a) Sloan, Nev., a point located approximately fifteen (15) miles south of Las Vegas, Nev., on or closely adjacent to U.S. Highway 91, (b) Henderson, Nev., and (c) Apex (Arrolime), Nev., to points in that portion of California located south of the northerly boundaries of San Luis Obispo, Kern, and San Bernardino Counties, Calif.

NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Los Angeles or San Francisco, Calif.

No. MC 125722 (Sub-No. 9), filed November 25, 1964. Applicant: GREAT WESTERN PACKERS EXPRESS, INC., Post Office Box 16886, Denver, Colo. Applicant's attorney: Charles W. Singer, 33 North La Salle Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, packinghouse products, and commodities used by packinghouses* as defined by the Commission, from Lexington, Nebr., to points in Arizona, California, Oregon, and Washington.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Denver, Colo.

No. MC 126450 (Sub-No. 2), filed November 27, 1964. Applicant: W. C. WINTER, INC., 833 Warner Street SW., Atlanta 10, Ga. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Scrap metal*, in bales, barrels, and in bulk and in ingot form for further processing, and *animal hides and casings*, not further processed than salted or preserved, between points in Georgia, on the one hand, and, on the other, points in Alabama, Kentucky, Ohio, Tennessee, North Carolina, South Carolina, Pennsylvania, Missouri, Indiana, Illinois, Virginia, Michigan, Connecticut, Massachsetts, New York, New Jersey, Maryland, Wisconsin, and Texas.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 126470 (Sub-No. 1), filed November 27, 1964. Applicant: WAYNE W. LANGE, doing business as ABC TRUCK LINES, Pipestone, Minn., 56164. Applicant's attorney: Val M. Higgins, 1000 First National Bank Building, Minneapolis, Minn., 55402. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Bakery products*, from Pipestone, Minn., to points in

South Dakota, Iowa, Nebraska, and Minnesota, and (2) *flour* from points in South Dakota to Pipestone, Minn.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 126718, filed November 2, 1964. Applicant: IRONWOOD MOBILE HOMES, INC., Route 11, Box 749, Highway 78 East, Irondale, Ala. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Mobile homes*, between points in Alabama, Georgia, Florida, and Mississippi.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Birmingham, Ala.

No. MC 126731 (Sub-No. 1), filed November 25, 1964. Applicant: WILLIAM V. LOCKWOOD, doing business as LOCKWOOD'S BOAT WORKS, Highway 35, Morgan, South Amboy, N.J. Applicant's attorney: LeRoy Danziger, 334 King Road, North Brunswick, N.J. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Boats*, between points in New Jersey, on the one hand, and, on the other, points in Connecticut, Delaware, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, and the District of Columbia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Newark, N.J.

No. MC 126740 (Sub-No. 1), filed November 27, 1964. Applicant: JORAY, TRUCKING CORP., 2375 Woodbridge Avenue, Edison, N.J. Applicant's attorney: LeRoy Danziger, 334 King Road, North Brunswick, N.J. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Stone, dirt, bank run gravel, and wash gravel*, from points in Chester and Delaware Counties and other points in Pennsylvania on and east of U.S. Highway 309 to points in New Jersey.

NOTE: Applicant is also authorized to conduct operations as a contract carrier in Permit No. MC 125383 and Sub thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 126759, filed November 27, 1964. Applicant: BRODERICK TEAMING COMPANY, a corporation, 3226 South Shields Avenue, Chicago, Ill. Applicant's attorney: Themis N. Anastos, Suite 614–616, 120 West Madison Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Articles of iron and steel*, from Burns Harbor, Porter County, Ind., to points in the Illinois portion of the Chicago, Ill., Commercial Zone, as defined by the Commission in 1 M.C.C. 673, and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 126763, filed November 27, 1964. Applicant: JOSEPH J. LASCHOBER, doing business as LASCHOBER & SONS CARTAGE CO., 6700 South LeClaire Avenue, Chicago, Ill. Applicant's attorney: Themis N. Anastos, Suite 614–616, 120 West Madison Street, Chicago, Ill., 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Meat, meat products, and meat byproducts* as described in Appendix I of 61 M.C.C. 209 (except commodities in bulk in tank vehicles), from Greenfield, Ohio, to points in Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Massachusetts, Mississippi, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Virginia, West Virginia, and the District of Columbia, and (2) *equipment, materials, and supplies* (except commodities in bulk in tank vehicles) used in the slaughtering, preparation, packaging, and sale of meat, meat products and meat byproducts, from the above destination states to Greenfield, Ohio.

NOTE: Applicant states it now holds contract carrier authority in No. MC 125647 which authorizes part of the transportation service sought in this application, and accordingly dual operations may be involved. Applicant further states it will surrender same in the event a certificate or permit issued to it as a result of this application duplicates the permit authority applicant now holds. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 126767 EX, filed November 20, 1964. Applicant: KNICKERBOCKER WAREHOUSING CORPORATION, 99 Lafayette Drive, Syosset, N.Y. Applicant's attorney: Milton B. Seasonwein, 1290 Avenue of the Americas, New York 19, N.Y. A certificate of exemption sought under section 204(a)(4a), Part II, in the conduct of operations as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Alcoholic beverages* (other than malt beverages), wholly within the State of New York, (1) from the piers or railroad terminals within the City of New York to its warehouse premises at Syosset, N.Y. Said merchandise would be consigned to Knickerbocker Liquors Corporation or Affiliated Distillers Brands Corp. on through bills of lading on shipment originating in countries foreign to the United States of America, Scotland, France, Portugal, Spain, the Commonwealth of Puerto Rico or in possessions of the United States, and (2) from the warehouse premises of applicant to piers in the City of New York for export from the United States of America, or for use by steamship companies as ship stores, as well as to the terminal facilities of international airlines at John F. Kennedy Airport for use as ship stores.

NOTE: If a hearing is deemed necessary, applicant does not specify place of hearing.

No. MC 126769, filed December 2, 1964. Applicant: STASZUK'S ABLE VAN LINES, a corporation, 238 Mill Street, Lansing, Mich. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, restricted to shipments having a prior or subsequent movement beyond the destination counties, and further restricted to pickup, delivery, and warehousing service incidental to and in connection with packing, crating, and containerization or unpacking, uncrating and decontainerization of such shipments, and *empty containers and equipment that is used in the transportation of household goods such as hand trucks, pads and cartons*, between points in Barry, Branch, Calhoun, Clinton, Eaton, Gratiot, Hillsdale, Ingham, Ionia, Jackson, Kalamazoo, Kent, Lenawee, Livingston, Montcalm, St. Joseph, Shiawassee, and Washtenaw Counties, Mich.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Lansing, Mich.

MOTOR CARRIERS OF PASSENGERS

No. MC 13028 (Sub-No. 8), filed November 30, 1964. Applicant: THE SHORT LINE, INC., 400 Fountain Street, Providence, R.I. Applicant's attorney: Frank Daniels, 11 Beacon Street, Boston, Mass. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage, express, mail and newspapers* in the same vehicle with passengers, and *baggage of passengers* in a separate vehicle, between Wyoming, R.I., and New London, Conn.; from Wyoming, R.I. (junction Rhode Island Highway 138 and Interstate Highway 95 at Wyoming), over Interstate Highway 95 to New London, Conn., and return over the same route, serving no intermediate points.

NOTE: Applicant states that it proposes to tack the above authority to its existing authority. Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Providence, R.I.

(No. MC 94742 (Sub-No. 25), filed November 9, 1964. Applicant: MICHAUD BUS LINES, INC., 250 Jefferson Avenue, Salem, Mass. Applicant's attorney: Frank Daniels, 11 Beacon Street, Boston, Mass. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, between Rochester, N.H., and the General Dynamics Electric Boat Works (Quincy Shipyard), Quincy, Mass.; from Rochester, N.H., over New Hampshire Highway 16 to junction New Hampshire Highway 16A, thence over New Hampshire Highway 16A to Somersworth, N.H., thence over New Hampshire Highway 9 to Dover, N.H., thence over New Hampshire Highway 16 to Portsmouth, N.H., thence over U.S. Highway 1 to junction Massachusetts Highway 110 (also from Portsmouth, N.H., over U.S. Highway 1 to Kittery, Maine, and return over the same route), thence over Massachusetts Highway 110 to junction Interstate Highway 95 (also from junction U.S. Highway 1 and Massachusetts Highway 110, over Massachusetts Highway 110 to junction Massachusetts Highway 150, thence over Massachusetts Highway 150 to Amesbury, Mass., and return over the same route), (also from Rochester, N.H., over the Spaulding Turnpike to junction Interstate Highway 95 (New Hampshire Turnpike), thence over Interstate Highway 95 to junction Massachusetts Highway 110, and return over the same route), thence over Interstate Highway 95 to the John F. Fitzgerald Expressway in Boston, Mass., thence over the John F. Fitzgerald Expressway to the Southeast Expressway, thence over the Southeast Expressway to junction Massachusetts Highway 3, thence over Massachusetts Highway 3 to Quincy, Mass., thence over city streets to the General Dynamics Electric Boat Works (Quincy Shipyard), and return over the same route, serving all intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Boston, Mass.

No. MC 109736 (Sub-No. 20), filed November 25, 1964. Applicant: CAPITOL BUS COMPANY, a corporation, Fourth and Chestnut Streets, Harrisburg, Pa. Applicant's attorney: James E. Wilson, 1111 E Street NW., Washington 4, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage and express and newspapers* in the same vehicle with passengers, (1) between Harrisburg, Pa., and Washington, D.C., from Harrisburg over Interstate Highway 83 to junction Interstate Highway 695, thence over Interstate Highway 695 to junction Baltimore-Washington Expressway, thence over Baltimore-Washington Expressway to Washington, D.C., and return over the same route serving no intermediate points and (2) between Harrisburg, Pa., and Baltimore, Md., from Harrisburg over Interstate Highway 83 to Baltimore and return over the same route serving no intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 109736 (Sub-No. 22), filed November 25, 1964. Applicant: CAPITOL BUS COMPANY, a corporation, Fourth and Chestnut Streets, Harrisburg, Pa. Applicant's attorney: James E. Wilson, 1111 E Street NW., Washington 4, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage and express and newspapers*, in the same vehicle with passengers, between South Tamaqua and Molino, Pa., from South Tamaqua over Pennsylvania Highway 443 to junction Pennsylvania Highway 895, thence over Pennsylvania Highway 895 to Molino and return over the same route serving all intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Harrisburg, Pa.

No. MC 126765, filed November 30, 1964. Applicant: PAUL SULGER, doing business as SULGER BUS LINE, 200 Canyon Drive, Sierra Vista, Ariz. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, and *express and newspapers*, in the same vehicle with passengers, (1) between Tucson, Ariz., and Fort Huachuca, Ariz., from Tucson over city streets to Tucson Municipal Airport, thence over city streets to junction U.S. Highway 80, thence over U.S. Highway 80 to junction Arizona Highway 90, thence over Arizona Highway 90 to Fort Huachuca, and return over the same route, serving the Tucson Municipal Airport and all intermediate points between junction U.S. Highway 80 and Arizona Highway 90 and Fort Huachuca, Ariz.; and (2) between Benson, Ariz., and junction U.S. Highway 80 and Arizona Highway 90,* over U.S. Highway 80, serving no intermediate points, and serving the junction of U.S. Highway 80 and Arizona Highway 90 for purpose of joinder with (1) above.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Phoenix, Ariz.

No. MC 126770, filed December 2, 1964. Applicant: MILWAUKEE LIMOUSINE SERVICE, INC., 2100 Marine Plaza, Milwaukee, Wis. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers beginning and ending at Whitefish Bay, Milwaukee, Racine and Kenosha, Wis. and extending to O'Hare Field (Chicago International Airport), Cook County, Ill. and Midway Airport, Chicago, Ill.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Milwaukee, Wis.

APPLICATION FOR BROKERAGE LICENSES

MOTOR CARRIERS OF PASSENGERS

No. MC-12424 (Sub-No. 1), filed November 30, 1964. Applicant: BROWNELL TRAVEL BUREAU, INC., 1001 South 22d Street, Birmingham, Ala. For a license (BMC 5) to engage in operations as a *broker* at Birmingham, Ala., in arranging for transportation by motor vehicle in interstate or foreign commerce of *Passengers and their baggage*, in special or charter operations, in groups and as individuals, beginning and ending at Birmingham, Ala., and points within 150 miles thereof, and extending to points in the United States.

*Approximately three (3) miles west of Benson.

APPLICATIONS IN WHICH HANDLING WITHOUT ORAL HEARING HAS BEEN REQUESTED

MOTOR CARRIERS OF PROPERTY

No. MC 59117 (Sub-No. 22), filed November 16, 1964. Applicant: ELLIOTT TRUCK LINE, INC., Box 1, Vinita, Okla. Applicant's attorney: James F. Miller, 7501 Mission Road, Shawnee Mission, Kans. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Roofing materials*, and *feeds*, from Kansas City, Mo., to Vinita, Okla., and *empty containers or other such incidental facilities* (not specified), used in transporting the commodities specified above, on return.

NOTE: Applicant states it presently holds Certificate No. MC 59117, which authorizes, among other things, the transportation of these identical commodities between the same points, over a regular route. Irregular-route authority is requested to conform to the balance of its authority. (II) (a) *Fertilizer solutions* (except anhydrous ammonia and fertilizer solutions manufactured from petroleum or its by-products), in bulk, in tank vehicles, from the plant site of the John Deere Chemical Co., located near Pryor, Okla., to points in Louisiana, Texas, Arkansas, Missouri, Kansas, and Mississippi, (b) *Fertilizer solutions*, in bulk, in tank vehicles, from Sterlington, La., to the plant site of the John Deere Chemical Co., located near Pryor, Okla., and (c) *Liquid feed ingredients and fertilizer solutions*, from the plant site of the John Deere Chemical Co., located near Pryor, Okla., to points in Nebraska, Iowa, Illinois, and Indiana.

NOTE: Applicant states that no new authority is requested by this portion of the application, but merely a change in name of present origin to show "plant site of John Deere Chemical Co., near Pryor, Okla.: in lieu of "Grand River Chemical Division Plant of Deere & Company", and "Grand River Chemical Company plant", as show in present Certificate MC 59117 issued September 12, 1960.

No. MC 103993 (Sub-No. 192), filed November 25, 1964. Applicant: MORGAN DRIVE-AWAY, INC., 2800 Lexington Avenue, Elkhart, Ind. Applicant's attorney: John E. Lesow, 3737 North Meridian Street, Indianapolis 8, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers*, designed to be drawn by passenger automobiles, in initial movements, in truckaway service, and *component parts thereof when shipped therewith* from Washington Court House (Fayette County), Ohio to points in the United States (except Alaska and Hawaii).

No. MC 106119 (Sub-No. 18), (CORRECTION), filed November 20, 1964, published in FEDERAL REGISTER issue of December 9, 1964, and republished this

issue. Applicant: ASSOCIATED PETROLEUM CARRIERS, a corporation, Union Road, Spartanburg, S.C. Applicant's attorney: Harry J. Jordan, 1000 16th Street NW., Washington, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, in tank vehicles, from Spartanburg, S.C., to points in Georgia, North Carolina, and Tennessee.

NOTE: Applicant states it presently holds Certificate No. MC 59117, which authorizes, among other things, the transportation of these identical commodities between the same points, over a regular route. Irregular-route authority is requested to conform to the balance of its authority. (II) (a) *Fertilizer solutions* (except anhydrous ammonia and fertilizer solutions manufactured from petroleum or its by-products), in bulk, in tank vehicles, from the plant site of the John Deere Chemical Co., located near Pryor, Okla., to points in Louisiana, Texas, Arkansas, Missouri, Kansas, and Mississippi, (b) *Fertilizer solutions*, in bulk, in tank vehicles, from Sterlington, La., to the plant site of the John Deere Chemical Co., located near Pryor, Okla., and (c) *Liquid feed ingredients and fertilizer solutions*, from the plant site of the John Deere Chemical Co., located near Pryor, Okla., to points in Nebraska, Iowa, Illinois, and Indiana.

NOTE: Applicant states that no new authority is requested by this portion of the application, but merely a change in name of present origin to show "plant site of John Deere Chemical Co., near Pryor, Okla.: in lieu of "Grand River Chemical Division Plant of Deere & Company", and "Grand River Chemical Company plant", as show in present Certificate MC 59117 issued September 12, 1960.

No. MC 103993 (Sub-No. 192), filed November 25, 1964. Applicant: MORGAN DRIVE-AWAY, INC., 2800 Lexington Avenue, Elkhart, Ind. Applicant's attorney: John E. Lesow, 3737 North Meridian Street, Indianapolis 8, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers*, designed to be drawn by passenger automobiles, in initial movements, in truckaway service, and *component parts thereof when shipped therewith* from Washington Court House (Fayette County), Ohio to points in the United States (except Alaska and Hawaii).

## MOTOR CARRIER TRANSFER PROCEEDINGS

DECEMBER 11, 1964.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC 67139. By order of December 8, 1964, The Transfer Board approved the transfer to Eastern Carrier Corp., a corporation, Philadelphia, Pa., of Permit in No. MC 83744, issued October 9, 1947, to Harold H. Senger, Smyrna, Del., authorizing the transportation of: Milk and milk products, and empty containers for such commodities, between points in Maryland, Delaware, New Jersey, the District of Columbia, and those as specified in Virginia and Pennsylvania; between Franklinville, N.Y., Millerstown, Pa., and Ridgely, Md., on the one hand, and, on the other, Philadelphia, Pa., Garfield and Newark, N.J., and New York; and between Franklinville, N.Y., Millerstown, Pa., and Ridgely, Md. Paul A. Levy, 1420 Walnut Street, Philadelphia 2, Pa., attorney for applicants.

No. MC–FC 67192. By order of December 8, 1964, The Transfer Board approved the transfer to Bi-State Express, Inc., Mt. Vernon, Ill., of the Certificate in No. MC 117585 and MC 117585 Sub 2, issued February 9, 1959 and April 12, 1961, respectively, to Ferrill Fast Freight, Inc., Salem, Ill., authorizing the transportation of: General commodities, excluding household goods, commodities in bulk, and other specified commodities, between Salem, Ill., and St. Louis, Mo., serving intermediate points and specified off-route points specified; and petroleum products and automobile parts and accessories, from points in the St. Louis, Mo.-East St. Louis, Ill., Commercial Zone, to Centralia, Ill. Delmar Koebel, 107 West St. Louis, Lebanon, Ill., attorney for applicants.

No. MC–FC 67302. By order of December 10, 1964, The Transfer Board approved the transfer to Twombly Grain Co., Inc., Troy, Kansas, of the operating rights issued by the Commission May 11, 1950, October 6, 1950 and January 13, 1956, under Certificates Nos. MC 275, MC 275 Sub 1 and MC 275 Sub 2, respectively, to R. C. Twombly, doing business as Twombly Truck Line, Troy, Kansas, authorizing the transportation, over regular routes, of livestock and fruit between Troy, Kans., and St. Joseph, Mo., general commodities, excluding household goods, and other specified commodities, from St. Joseph, Mo., to Troy, Kans.; livestock, between Highland, Kans., and St. Joseph and Kansas City, Mo.; livestock, feed, and farm implements, from St. Joseph over U.S. Highway 36 to Highland; livestock, from Highland, Kans., to St. Joseph, Mo., serving all intermediate and off-route points within 10 miles of Highland, Kans,. restricted to pickup only, and feed, furniture, ice, oil, and livestock, from St. Joseph, Mo., to Highland, Kans., serving all intermediate and off-route points within 10 miles of Highland, Kans,. restricted to delivery only.

No. MC–FC 67334. By order of December 10, 1964, The Transfer Board approved the transfer to Titan Moving & Storage Corp., Brooklyn, N.Y., of the operating rights in Certificate No. MC 102432, issued October 11, 1956, to Dan Sommo and Vito Sommo, a partnership, doing business as Sommo Brothers, Brooklyn, N.Y., authorizing the transportation, over irregular routes, of household goods as defined, office furniture, store fixtures and equipment, and new and uncrated hospital equipment, between points in New York, N.Y. Morris Honig, 150 Broadway, New York 38, N.Y., attorney for transferee.

No. MC–FC 67338. By order of December 9, 1964, The Transfer Board approved the transfer to Johnson County Suburban Lines, Inc., North Little Rock, Ark., of a portion of Certificates in Nos. MC 61616, No. MC 61616 Sub 36, and the entire authority in Certificate No. MC 61616 Sub 60, issued September 28, 1960, October 31, 1957, and September 29, 1958, respectively, to Midwest Buslines, Inc., North Little Rock, Ark., authorizing the transportation over regular routes of passengers and their baggage, and express and newspapers in the same vehicle with passengers, between Kansas City, Mo., and Olathe, Kans., between Kansas City, Mo., and junction U.S. Highway 69 and 75th Street, Johnson County, Kans.; between Olathe, Kans., and U.S. Naval Base (located approximately five miles south of Olathe); between junction U.S. Highway 50 and Kansas Highway 58, and junction U.S. Highways 50 and 69; between junction Johnson Drive and Roe Avenue and junction 69th Street and U.S. Highway 69, in Johnson County, Kans.; between junction Roe Avenue and 67th Street and junction Roe Avenue and 75th Street, in Johnson County, Kans.; between junction 75th Street and Nall Avenue and junction Prairie Lane and Tomahawk Road, in Johnson County, Kans.; between junction Nall Avenue and Johnson Drive, in Mission, Kans., south over Nall Avenue to junction 69th Street; between junction Belinder Road and Tomahawk Road and junction Tomahawk Road and Wenonga Road, in Johnson County, Kans.; between junction 80th Street and Kansas Highway 58 and junction 76th Street and U.S. Highway 69, in Johnson County, Kans.; between junction Kansas Highway 58 and 81st Street and junction Hardy Street and Kansas Highway 58, in Johnson County, Kans.; between junction Kansas Highway 58 and 80th Street and junction 80th Street and Kansas Highway 58 (Loop Route), in Johnson County, Kans.; newspapers, in the same vehicle with passengers, between Kansas City, Mo., and junction Kansas Highway 58 and Antioch Road, near Overland Park, Kans.; between junction U.S. Highway 69 and 81st Street, in Overland Park, Johnson County, Kans., and junction 83d Street and U.S. Highway 69 in Overland Park; between points in Johnson County, Kans.; between points in Mission Township, Johnson County, Kans.; between junction Nieman Road and 67th Street Terrace and junction Nieman Road and 69th Street Terrace, in Shawnee Village, Johnson County, Kans.; between junction 75th Street and Nall Avenue and junction 79th Street and Tomahawk Road, in Johnson County, Kans.; between junction U.S. Highway 50 and Antioch Road, and junction 75th Street and U.S. Highway 50, in Johnson County, Kans.; and between junction Kansas Highway 58 (Santa Fe Trail) and 80th Street in Overland Park, Kans., and junction Mission Road and U.S. Highway 50 in Johnson County, Kans., in all routes above, serving all intermediate points. Messrs. Warren A. Goff and D. Paul Stafford, 315 Continental Avenue, Dallas, Tex., 75207, attorneys for applicants.

No. MC–FC 67364. By order of December 10, 1964, The Transfer Board approved the transfer to Warners Motor Express, Inc., Red Lion, Pa., of the Certificate in No. MC 20906, issued June 15, 1942, to Columbia Storage Co., Inc., Philadelphia, Pa., authorizing the transportation of: Household goods, between Philadelphia, Pa., and points within 25 miles thereof, on the one hand, and, on the other, points in Connecticut, Delaware, Virginia, West Virginia, Rhode Island, and the District of Columbia; and between points in Pennsylvania, Maryland, New Jersey, Massachusetts, and New York. Morris J. Winokur, Two Penn Center Plaza, Philadelphia, Pa., 19102, attorney for applicants.

No. MC–FC 67365. By order of December 10, 1964, The Transfer Board approved the transfer to Allfreight Lines, Inc., North Reading, Mass., of the Certificate of Registration in No. MC 120818 Sub 1, issued November 24, 1964, to Capeway Freight Lines, Inc., Whitman, Mass., authorizing the transportation in interstate and foreign commerce corresponding to the grant of authority in State certificate No. 3283, issued September 26, 1963 by the Massachusetts Department of Public Utilities. Mary E. Kelley, 10 Tremont Street, Boston 8, Mass., attorney for transferee and George C. O'Brien, 33 Broad Street, Boston 9, Mass., attorney for transferor.

No. MC–FC 67371. By order of December 10, 1964, The Transfer Board approved the transfer to Spokane Suburban Lines, Inc., Spokane, Wash., of Certificate No. MC 124325, issued February 14, 1963, to Empire Lines, Inc., Spokane, Wash., authorizing the transportation of passengers and their baggage, and express and newspapers in the same vehicle with passengers, over regular routes, between Spokane, Wash., and Wallace, Idaho, serving all intermediate points. Lawrence W. Thayer, 902 Paulsen Building, Spokane 1, Wash., attorney for applicants.

## FOURTH SECTION APPLICATIONS FOR RELIEF

DECEMBER 11, 1964.

Protests to the granting of an application must be prepared in accordance with Rule 1.40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

### LONG-AND-SHORT HAUL

FSA 39449: *Joint motor-rail rates—Niagara Frontier.* Filed by Niagara Frontier Tariff Bureau, Inc., agent (No. 34), for interested carriers. Rates on various commodities moving on class and commodity rates over joint routes of applicant rail and motor carriers, between points in central states territory, on the one hand, and points in Provinces of Ontario and Quebec, Canada, on the other.

Grounds for relief: Motor-truck competition.

Tariff: Supplement 29 to Niagara Frontier Tariff Bureau, Inc., agent, tariff MF–I.C.C. 59.

FSA 39450: *Liquefied Chlorine Gas to Calvert, Ky.* Filed by O. W. South, Jr., agent (No. A4605), for interested rail carriers. Rates on liquefied chlorine gas, in tank carloads, subject to minimum shipment of five cars per day, from Saltville, Va., to Calvert, Ky.

Grounds for relief: Market competition.

Tariff: Supplement 100 to Southern Freight Association, agent, tariff I.C.C. S–207.

FSA 39451: *Cement and related articles from Oklahoma City, Okla.* Filed by Southwestern Freight Bureau, agent (No. B–8649), for interested rail carriers. Rates on cement and related articles, in carloads, from Oklahoma City, Okla., to points in southern territory.

Grounds for relief: Market competition.

Tariff: Supplement 6 to Southwestern Freight Bureau, agent, tariff I.C.C. 4582.

FSA 39452: *Substituted service—WP for Ashworth Transfer, Inc., et al.* Filed by Ashworth Transfer, Inc. (No. 5), for itself and interested carriers. Rates on property loaded in trailers and transported on railroad flatcars, between Salt Lake City, Utah, on the one hand, and Reno, Nev., and Oakland, Calif., on the other, on traffic originating at or destined to such points or points beyond as described in the application.

Grounds for relief: Motor-truck competition.

FSA 39453: *Iron and steel articles to Memphis, Tenn.* Filed by Southwestern Freight Bureau, agent (No. B–8650), for interested rail carriers. Rates on iron and steel articles, as described in the application, in carloads, from Brownsville, Eagle Pass, El Paso, Laredo, and Presidio, Tex. (applicable only on shipments imported from Mexico), to Memphis, Tenn.

Grounds for relief: Market competition.

Tariff: Supplement 100 to Southwestern Freight Bureau, agent, tariff I.C.C. 4503.

FSA 39454: *Soda ash to South Addison, Ill.* Filed by Western Trunk Line Committee, agent (No. A–2381), for interested rail carriers. Rates on soda ash (other than modified soda ash), in carloads, from Stauffer and Westvaco, Wyo., to South Addison, Ill.

Grounds for relief: Market competition.

Tariff: Supplement 108 to Western Trunk Line Committee, agent, tariff I.C.C. A–4411.

FSA 39455: *Iron or steel pipe to points in WTL territory.* Filed by Western Trunk Line Committee, agent (No. A–2382), for interested rail carriers. Rates on iron or steel pipe, in carloads, from Geneva and Pipemill, Utah, to points in western trunkline territory.

Grounds for relief: Modified short-line distance formula and grouping.

Tariff: Supplement 108 to Western Trunk Line Committee, agent, tariff I.C.C. A–4411.

FSA 39456: *Vermiculite to Kenbridge, Va.* Filed by O. W. South, Jr., agent (No. A4606), for interested rail carriers. Rates on vermiculite, broken, crushed, or ground, dried or not dried, not expanded, in carloads, from Kearney and Travelers Rest, S.C., to Kenbridge, Va.

Grounds for relief: Market competition.

Tariff: Supplement 128 to Southern Freight Association, agent, tariff I.C.C. S–126.

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary.*

THE UNIVERSITY OF MICHIGAN

*Latest Edition in the series of . . .*

**PUBLIC PAPERS OF THE PRESIDENTS OF THE UNITED STATES**

## *John F. Kennedy, 1963*

Contains verbatim transcripts of the President's news conferences and speeches and full texts of messages to Congress and other materials released by the White House during the period January 1–November 22, 1963.

Among the 478 items in the book are: special messages to the Congress on education, youth conservation, needs of the Nation's senior citizens, and on improving the Nation's health; radio and television addresses to the American people on civil rights and on the nuclear test ban treaty and the tax reduction bill; joint statements with leaders of foreign governments; and the President's final remarks at the breakfast of the Fort Worth Chamber of Commerce. Also included is the text of two addresses which the President had planned to deliver on the day of his assassination; President Johnson's proclamation designating November 25 a national day of mourning; and remarks at the White House ceremony in which President Kennedy was posthumously awarded the Presidential Medal of Freedom.

A valuable reference source for scholars, reporters of current affairs and the events of history, historians, librarians, and Government officials.

*1007 Pages Price: $9.00*

VOLUMES *of* PUBLIC PAPERS *of the* PRESIDENTS
*currently available:*

HARRY S. TRUMAN

## Title 32—NATIONAL DEFENSE

### Chapter I—Office of the Secretary of Defense

SUBCHAPTER B—PERSONNEL; MILITARY AND CIVILIAN

### PART 132—RESERVE FORCES ACTIVE DUTY FOR TRAINING FOR BASIC TRAINING

The Deputy Secretary of Defense approved the following revision of Part 132 on November 18, 1964:

Sec.
132.1 Purpose.
132.2 Applicability and scope.
132.3 Policy.
132.4 Implementation.

AUTHORITY: The provisions of this Part 132 issued under 10 U.S.C. 511, 32 U.S.C. 302, 50 app. U.S.C. 456(c)(2)(A).

**§ 132.1 Purpose.**

This part prescribes uniform policy governing active duty and active-duty-for-training programs established to provide basic training for persons enlisting directly into the Reserve Forces.

**§ 132.2 Applicability and scope.**

(a) The provisions of this part apply to the Military Departments conducting reserve enlistment programs under the provisions of Title 10, U.S.C. and Title 32, U.S.C. for personnel without prior military service.

(b) Initial active duty or active-duty-for-training programs may include, in addition to recruit or basic individual training, basic unit training and various types of specialist training.

**§ 132.3 Policy.**

(a) *General.* The reserve enlistment programs were established to provide the Reserve Forces with trained personnel. No enlistment shall be accepted under Title 10, U.S.C. and Title 32, U.S.C. if such enlistment would cause the authorized strength of the Ready Reserve component concerned to be exceeded.

(b) *Periods of enlistment.* (1) Persons without prior military service who are under 26 years of age who enlist under section 511 (a) or (d) of Title 10, U.S.C. or section 302 of Title 32, U.S.C., and all persons regardless of age who enlist under section 511(b) of Title 10, U.S.C. will be enlisted for a period of six years.

(2) Persons without prior military service who are 26 years or over who enlist under section 511(a) of Title 10, U.S.C. will be enlisted for such period as is prescribed by the Secretary of the Military Department concerned.

(c) *Periods of training.* (1) Personnel without prior military service who enlist in the Reserve Forces under section 511 (a) or (d) of Title 10, U.S.C., or section 302 of Title 32, U.S.C. will perform an initial tour of active-duty-for-training of not less than four (4) consecutive months' duration regardless of age at time of enlistment. The maximum period of active-duty-for-training will be determined within each Military Service on the basis of the period of training considered necessary to qualify the individual for the military specialty for which he enlisted. Unless otherwise provided by law, personnel shall participate in reserve training in the Ready Reserve for the total period of enlistment except for the period of delay in reporting for active-duty-for-training which is discretionary with the Secretary concerned in accordance with Paragraph (d) of this section. Deferment from induction of draft-liable enlistees based on satisfactory service in the reserves is governed by the Universal Military Training and Service Act, as amended, as supplemented by Selective Service Regulations.

(2) Personnel without prior military service who enlist in the Reserve Forces under section 511(b) of Title 10, U.S.C. will perform such active-duty-for-training and inactive duty training as required to qualify them as combat ready by not later than six months following enlistment.

(d) *Delay in reporting.* (1) Individuals entering the reserve components under section 511 (a) or (d) of Title 10, U.S.C. or section 302 of Title 32, U.S.C. shall enter initial active-duty-for-training as prescribed in paragraph (c)(1) of this section, with minimum practicable delay after enlistment. The delay shall not exceed one hundred twenty (120) days except as follows:

(i) Individuals enlisting for positions requiring security clearance for access to or work with classified military information or equipment may be delayed to the extent necessary to accomplish the required clearances.

(ii) Individuals with special qualifications enlisted to fill positions requiring highly specialized skills for which appropriate formal training courses are offered only infrequently may be delayed to the extent necessary to insure that the enlistee pursues the proper course commensurate with his qualifications and the requirements of the position for which enlisted.

(iii) Delay for personnel under subdivisions (i) or (ii) of this subparagraph shall not exceed a period of one year and shall not be employed for the purpose of stockpiling personnel.

Whether or not an individual shall participate in reserve training during the delay period will be determined by the Secretary concerned.

(2) Individuals entering the reserve components under section 511(b) of Title 10, U.S.C. shall enter on active duty or enter Class A school training no later than one year following enlistment. The only exception to this requirement is the Naval Air Reserve 85-day accelerated training program. Personnel in this program will enter the initial 85-day active-duty-for-training phase of the program within the first year after enlistment.

(e) *Officer training programs.* Persons enlisting directly in the reserve components to participate in officer training programs requiring enlisted status for eligibility therefor may be exempt from the training and delay requirements set forth in paragraphs (c) and (d) of this section.

(f) *Reserve Officers' Training Corps.* Personnel enrolled in the financial assistance program of the senior division, ROTC, or the advanced course of the nonscholarship program of the senior division will not participate in a paid training status (DoD Directive 1215.6, "Uniform Training Categories and Pay Groups Within the Reserve Forces", January 30, 1964) in any training program of a reserve component.

(g) *Army and Air National Guard.* In order to assure uniformity of training and discipline, members of the Army National Guard of the United States and the Air National Guard of the United States ordered to active-duty-for-training for the purpose of basic training will be ordered to that duty as Reserves of the Army or of the Air Force, as appropriate.

**§ 132.4 Implementation.**

In the interest of maintaining some degree of uniformity and equity among the reserve enlistment programs of the Military Departments, proposed changes to existing reserve enlistment programs established in conformance with this part and programs proposed for establishment under its provisions will be submitted to the Assistant Secretary of Defense (Manpower) for approval.

MAURICE W. ROCHE,
*Director, Correspondence and Publications, OASD (Administration).*

## Title 14—AERONAUTICS AND SPACE

### Chapter I—Federal Aviation Agency

[Regulatory Docket No. 5074]

### PART 27—AIRWORTHINESS STANDARDS: NORMAL CATEGORY ROTORCRAFT [NEW]

*Correction*

In Federal Register Document 64-12026, published at page 15694 in the issue of November 24, 1964, the word "restricted", appearing in the second line of § 27.479(c), should read "resisted".

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES [NEW]

[Reg. Docket No. 6319; Amdt. 404]

# PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES [NEW]

## Miscellaneous Amendments

The amendments to the standard instrument approach procedures contained herein are adopted to become effective when indicated in order to promote safety. The amended procedures supersede the existing procedures of the same classification now in effect for the airports specified therein. For the convenience of the users, the complete procedure is republished in this amendment indicating the changes to the existing procedures.

As a situation exists which demands immediate action in the interests of safety in air commerce, I find that compliance with the notice and procedure provisions of the Administrative Procedure Act is impracticable and that good cause exists for making this amendment effective within less than 30 days from publication.

In view of the foregoing and pursuant to the authority delegated to me by the Administrator (24 F.R. 5662), Part 97 [New] (14 CFR Part 97 [New]) is amended as follows:

1. By amending the following low or medium frequency range procedures prescribed in § 97.11(a) to read:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

| Transition | | | | Ceiling and visibility minimums | | | |
|---|---|---|---|---|---|---|---|
| From— | To— | Course and distance | Minimum altitude (feet) | Condition | 2-engine or less | | More than 2-engine, more than 65 knots |
| | | | | | 65 knots or less | More than 65 knots | |
| PROCEDURE CANCELLED, EFFECTIVE 5 MAY 1959. | | | | | | | |
| City, Bethel; State, Alaska; Airport Name, Bethel; Elev., 9'; Fac. Class., SBRAZ; Ident., BET; Procedure No. 1, Amdt. 3; Eff. Date, 2 Apr. 55; Sup. Amdt. No. 2; Dated, 31 Mar. 54 | | | | | | | |
| Windsor VOR | QG LFR (final) | Direct | 1700 | T-dn* | 500–1 | 500–1 | 500–1 |

| | | | | C-n | 800–2 | 800–2 | 800–2 |
| | | | | A-dn | 800–2 | 800–2 | 800–2 |
| | | | | Following minimum applies when aircraft equipped with LFR or ADF and VOR receivers and Peach Int received: | | | |
| | | | | C-dn | 700–1 | 700–1 | 700–1½ |

Procedure turn E side of crs, 142° Outbnd, 322° Inbnd, 2000' within 10 miles.
Minimum altitude over facility on final approach crs, 1700'.
Crs and distance, QG LFR to airport, 327°—7.9 miles; Peach Int to airport, 327°—4.4 miles.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 7.9 miles after passing QG LFR or 4.4 miles after passing Peach Int, climb to 2700' and proceed direct to MDS RBn or, when directed by ATC, (1) make right-climbing turn to 2000' and return to QG LFR or (2) make right-climbing turn to 2000' and proceed direct to QG VOR.
AIR CARRIER NOTE: Sliding scale not authorized.
Other changes: Deletes transitions from Wood and Maidstone Intersections.
*300–1 takeoff authorized on Runway 33L only.
MSA within 25 miles of facility: N—2000'; E—1600'; S—2400'; W—2800'.

City, Detroit; State, Mich.; Airport Name, Detroit City; Elev., 626'; Fac. Class., SBRAZ (Windsor LFR); Ident., QG; Procedure No. 1, Amdt. 10; Eff. Date, 19 Dec. 64; Sup. Amdt. No. 9; Dated, 1 Feb. 64

PROCEDURE CANCELLED, EFFECTIVE 1 OCT. 1960, DUE TO DEACTIVATION OF LADD AFB FACILITY.

City, Fairbanks; State, Alaska; Airport Name, Ladd Air Force Base; Elev., 450'; Fac. Class., SBRAZ; Ident., FAI; Procedure No. 1, Amdt. 3; Eff. Date, 18 Feb. 56; Sup. Amdt. No. M-2; Dated, 31 Mar. 54

2. By amending the following automatic direction finding procedures prescribed in § 97.11(b) to read:

ADF STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

| Transition | | | | Ceiling and visibility minimums | | | |
|---|---|---|---|---|---|---|---|
| From— | To— | Course and distance | Minimum altitude (feet) | Condition | 2-engine or less | | More than 2-engine, more than 65 knots |
| | | | | | 65 knots or less | More than 65 knots | |
| BZN VOR | RBn | Direct | 6500 | T-dn %* | 1000–1 | 1000–1 | 1000–1 |
| | | | | C-dn | 1000–1 | 1000–1 | 1000–1½ |
| | | | | A-dn | 1500–2 | 1500–2 | 1500–2 |

Procedure turn N side of crs, 259° Outbnd, 079° Inbnd, 6500' within 10 miles. (Nonstandard due to terrain.)
Minimum altitude over facility on final approach crs, 5500'.
Crs and distance, facility to airport, 318°—1.0 mile.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished, turn left, climb to 6500' on 259° bearing from RBn within 10 miles of BZN RBn.
NOTES: (1) Sliding scale not authorized; (2) final approach from holding pattern at the RBn not authorized—procedure turn required; (3) night takeoff and landings not authorized Runways 3-21.
MSA within 25 miles of the facility: 045°–135°, 10,500'; 135°–225°, 11,600'; 225°–315°, 7,500; 315°–045°, 10,700'.
*Takeoff all runways: Aircraft departing southeastbound climb in a left, 1-minute pattern on the 259° radial of the VOR or the 259° magnetic bearing from the BZN RBn to depart the facility on crs at 9300' or above.

City, Bozeman; State, Mont.; Airport Name, Gallatin Field; Elev., 4461'; Fac. Class., H-SAB; Ident., BZN; Procedure No. 1, Amdt. 1; Eff. Date, 19 Dec. 64; Sup. Amdt. No. Orig.; Dated, 4 Aug. 62

ADF STANDARD INSTRUMENT APPROACH PROCEDURE—Continued

| Transition | | | | Ceiling and visibility minimums | | | |
|---|---|---|---|---|---|---|---|
| From— | To— | Course and distance | Minimum altitude (feet) | Condition | 2-engine or less | | More than 2-engine, more than 65 knots |
| | | | | | 65 knots or less | More than 65 knots | |
| QG LFR | MDS RBn | Direct | 2700 | T-dn* | 500–1 | 500–1 | 500–1 |
| QG VOR | MDS RBn | Direct | 2700 | C-dn | 700–1 | 700–1 | 700–1½ |

Radar vectoring authorized in accordance with approved patterns.
Procedure turn E side of crs, 212° Outbnd, 032° Inbnd, 2200' within 10 miles.
Minimum altitude over facility on final approach crs, 1900'.
Crs and distance, facility to Runway 3L, 032°—4.2 miles; to Runway 3R, 039°—5.0 miles.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 4.2 miles after passing LOM, left turn climb to 2700' and proceed to Ford Rbn or, when directed by ATC, (1) make right turn, climb to 2300' and proceed to Park Int via QG-VOR R-258, or (2) make right turn, climb to 2300' and proceed to Rockwood Int via SVM VOR R-143.
Aircraft executing missed approach may, after being reidentified, be radar controlled.
MSA within 25 miles of the facility: 000°–090°—2900'; 090°–180°—2300'; 180°–270°—2300'; 270°–360°—2300'.

City, Detroit; State, Mich.; Airport Name, Metropolitan Wayne County; Elev., 639'; Fac. Class., LOM; Ident., DT; Procedure No. 1, Amdt. 11; Eff. Date, 19 Dec. 64; Sup. Amdt. No. 10; Dated, 5 Sept. 64

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Salem VOR | FRD RBn or Ford Int | Direct | 2700 | T-dn | 300–1 | 300–1 | 200–½ |
| Bridgewater Int | FRD RBn | Direct | 2700 | C-dn | 500–1 | 500–1 | 500–1½ |
| Rouge Int | FRD RBn or Ford Int (final) | Direct | 1700 | S-dn-23 R and L. | 400–1 | 400–1 | 400–1 |
| Redford Int | Rouge Int | Direct | 2700 | A-dn | 800–2 | 800–2 | 800–2 |
| Dundee Int | FRD RBn | Direct | 2700 | | | | |

Radar vectoring authorized in accordance with approved radar patterns.
Procedure turn, N side of crs, 050° Outbnd, 230° Inbnd, 2700' within 10 miles. Final approach from holding pattern not authorized. Procedure turn required.
Minimum altitude over facility on final approach crs, 1700'.
Crs and distance, facility to Runway 23L, 230°—3.9 miles; to Runway 23R, 231°—4.1 miles.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 3.9 miles after passing Ford RBn, climb to 2400', proceed to YIP LOM or, when directed by ATC, make left turn, climbing to 2400', proceed to CRL VOR.
Aircraft executing missed approach may, after being reidentified, be radar controlled.
CAUTION: Tower 1749' 15 miles NE Ford RBn.
Other changes: Deletes transitions from Dix Int and Belle Int.
MSA within 25 miles of facility: 000°–090°—2800'; 090°–180°—2400'; 180°–270°—2300'; 270°–360°—2600'.

City, Detroit; State, Mich.; Airport Name, Willow Run; Elev., 716'; Fac. Class., MHW; Ident., FRD; Procedure No. 2, Amdt. 13; Eff. Date, 19 Dec. 64; Sup. Amdt. No. 12; Dated, 23 Nov. 63

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| DLN VOR | DLN RBn | Direct | 8600 | T-dn%* | 1000–1 | 1000–1 | NA |
| | | | | C-dn | 1000–1 | 1000–1 | NA |
| | | | | A-dn | 1500–2 | 1500–2 | NA |

Procedure turn W side of crs, 006° Outbnd, 186° Inbnd, 8600' within 12 miles.
Minimum altitude over facility on final approach crs 6300'.
Crs and distance, facility to airport, 171°—1.8 miles.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 1.8 miles after passing DLN RBn, turn right, climb to 8600' in a 1-minute, right-hand pattern on the 006° bearing from the DLN RBn.
NOTES: (1) Final approach from holding pattern at the RBn not authorized—procedure turn required; (2) night takeoffs and landings authorized on Runways 16–34 only.
MSA within 25 miles of the facility: 000°–090°—11,000'; 090°–180°—10,800'; 180°–270°—11,600'; 270°–360°—12,200'.
*Takeoff all runways: Climb to 9500' in a 1-minute, right-hand pattern on the 006° magnetic bearing from the DLN RBn or R-007 DLN VOR prior to departing on crs.

City, Dillon; State, Mont.; Airport Name, Dillon; Elev., 5238'; Fac. Class., BH; Ident., DLN; Procedure No. 1, Amdt. 1; Eff. Date, 19 Dec 64; Sup Amdt. No. Orig.; Dated, 13 July 63

3. By amending the following very high frequency omnirange (VOR) procedures prescribed in § 97.11(c) to read:

VOR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

| Transition | | | | Ceiling and visibility minimums | | | |
|---|---|---|---|---|---|---|---|
| | | | | | 2-engine or less | | |
| From— | To— | Course and distance | Minimum altitude (feet) | Condition | 65 knots or less | More than 65 knots | More than 2-engine, more than 65 knots |

PROCEDURE CANCELLED, EFFECTIVE 19 DEC. 1964, OR UPON RELOCATION OF QG VOR.

City, Detroit; State, Mich.; Airport Name, Detroit City; Elev., 626'; Fac. Class., BVOR; Ident., QG; Procedure No. 1, Amdt. 3; Eff. Date, 1 Feb. 64; Sup. Amdt. No. 2; Dated, 25 Aug. 62

| | | | | A–dn | 800–2 | 800–2 | 800–2 |

Procedure turn N side of crs, 026° Outbnd, 206° Inbnd, 2900′ within 10 miles of Renner Int.
No glide slope. Minimum altitude over Renner Int, 2600′. No outer marker. No middle marker.
Crs and distance, Renner Int to airport, 206°—4.2 miles.
If visual contact not established upon descent to authorized landing minimums or if landing not accomplished within 4.2 miles after passing Renner Int, climb to 2700′ on SW crs ILS, within 10 miles of LOM. Return to LOM and hold on 206° bearing.
NOTE: Procedure authorized only for those aircraft equipped to receive VOR and ILS simultaneously. When authorized by ATC, FSD DME may be used to position aircraft for straight-in approach at 3000′ between R–295 clockwise to R–350 via 9-mile DME arc with the elimination of procedure turn.
#300–1 required for takeoff Runway 15.

City, Sioux Falls; State, S. Dak.; Airport Name, Joe Foss Field; Elev., 1428′; Fac. Class., ILS; Ident., I–FSD; Procedure No. ILS–21 (Back Course), Amdt. 5; Eff. Date, 19 Dec. 64; Sup. Amdt. No. 4; Dated, 15 June 63

6. By amending the following radar procedures prescribed in § 97.19 to read:

RADAR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses and radials are magnetic. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the Federal Aviation Agency. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach, except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

| Transition | | | | Ceiling and visibility minimums | | | |
|---|---|---|---|---|---|---|---|
| From— | To— | Course and distance | Minimum altitude (feet) | Condition | 2-engine or less | | More than 2-engine, more than 65 knots |
| | | | | | 65 knots or less | More than 65 knots | |
| 000°----------- | 360°----------- | 20 miles---------- | 2000 | Surveillance approach | | | |
| | | | | T-dn**---------- | 300-1 | 300-1 | 200-½ |
| | | | | C-dn---------- | 400-1 | 500-1 | 500-1¼ |
| | | | | S-dn-13, %$ 18, 31# $---------- | 400-1 | 400-1 | 400-1 |
| | | | | A-dn---------- | 800-2 | 800-2 | 800-2 |
| | | | | Precision approach | | | |
| | | | | T-dn**---------- | 300-1 | 300-1 | 200-½ |
| | | | | S-dn-13##------ | 200-½ | 200-½ | 200-½ |
| | | | | A-dn---------- | 600-2 | 600-2 | 600-2 |

If visual contact not established upon descent to authorized landing minimums or if landing not accomplished—Runways 13, 31, and 18: Climb to 2000' on runway heading within 10 miles or, when directed by ATC, Runway 13 and 18: Turn left, climb to 2000' and proceed to DAL VOR. Runway 31: Turn right, climb to 2000' and proceed to DAL VOR.

CAUTION: 695' tank 1.7 miles SE of Runway 31. 1044' building 3.9 miles SE of Runway 31 on centerline.

*Radar control will provide 1000' vertical clearance within a 3-mile radius from radio TV towers 1108' 20 miles N, 2349' 16 miles SSW, 1230' 10 miles NNW of airport, buildings 1095' 4.2 miles SSE.

$Maintain at least 1400' until 3.5 miles from the approach end of Runway 31 and 1000' until 1.4 miles from the approach end of Runway 31.

#Runway visual range 2600' also authorized for landing on Runway 13; provided that all components of the PAR, high-intensity runway lights, approach lights, condenser-discharge flashers, outer compass locator and all related airborne equipment are in satisfactory operating condition. Descent below 685' shall not be made unless visual contact with approach lights has been established or the aircraft is clear of clouds.

**Runway visual range 2600' also authorized for takeoff on Runway 13 in lieu of 200-½ when 200-½ is authorized; providing high-intensity runway lights are operational.

%400-½ authorized, except for turbojet aircraft, with operative ALS and high-intensity runway lights.

$400-½ authorized, except for turbojet aircraft, with operative high-intensity runway lights.

City, Dallas; State, Tex.; Airport Name, Dallas Love Field; Elev., 485'; Fac. Class. and Ident., Dallas Radar; Procedure No. 1, Amdt. 10; Eff. Date, 19 Dec. 64; Sup. Amdt. No. 9; Dated, 30 May 64

These procedures shall become effective on the dates specified therein.

(Secs. 307(c), 313(a), and 601 of the Federal Aviation Act of 1958; 49 U.S.C. 1348(c), 1354(a), 1421; 72 Stat. 749, 752, 775)

Issued in Washington, D.C., on November 13, 1964.

G. S. MOORE,
*Director, Flight Standards Service.*

## Chapter V—National Aeronautics and Space Administration

### PART 1204—ADMINISTRATIVE AUTHORITY AND POLICY

### Subpart 5—Delegations and Designations

DETERMINATION AND DELEGATION OF AUTHORITY CONCERNING GRANTING OF EASEMENTS

**§ 1204.503 Determination and delegation of authority concerning the granting of easements.**

(a) *Determination.* I hereby determine that an easement will not be adverse to the interests of the United States if and to the extent that the interest in real property conveyed thereunder is not required for a NASA program and the grantee's exercise of rights under such easement will not interfere with NASA operations.

(b) *Delegation of authority.* The Deputy Associate Administrator for Programming and the Institutional Directors at NASA Headquarters, as defined in the publication, NASA Basic Administrative Processes (NPC 107), and the Directors of field installations with respect to real property under their supervision and management may, subject to the restrictions in paragraph (c) of this section, exercise all of the authority of the National Aeronautics and Space Administration under the Act of Congress approved October 23, 1962 (40 U.S.C. 319 to 319c), including the authority to authorize or grant on behalf of the United States, to a State or political subdivision or agency thereof or to any person applying therefor, such easements in, over, or upon real property of the United States controlled by NASA as will not be adverse to the interests of the United States.

(c) *Restrictions.* Except as otherwise specifically provided, no such easement shall be authorized or granted under the authority stated in paragraph (b) of this section unless:

(1) The NASA official authorizing or granting such easement determines that the interest in real property to be conveyed thereunder is not required for a NASA program and that the grantee's exercise of rights under such easement will not interfere with NASA operations; and

(2) Monetary or other benefit, including any interest in real property, is received by the Government as consideration for the granting of such easement; and

(3) The instrument granting such easement provides—

(i) For the termination of the easement, in whole or in part, if there has been:

(*a*) A failure to comply with any term or condition of the grant; or

(*b*) A non-use of the easement for a consecutive two-year period for the purpose for which granted; or

(*c*) An abandonment of the easement; or

(*d*) A determination by a NASA official authorized to grant easements that the interests of the national space program, the national defense, or the public welfare require the termination of such easement; and a 30-day notice, in writing, to the grantee that such determination has been made; and

(ii) That written notice of such termination shall be given to the grantee, or its successors or assigns, by a NASA official authorized to grant easements or his designee, and that termination shall be effective as of the date of such notice; and

(iii) For any other reservations, exceptions, limitations, benefits, burdens, terms, or conditions which either the authorizing or granting official or both deem necessary to protect the interests of the United States.

(d) *Deviations.* If, in connection with a proposed granting of an easement, the Deputy Associate Administrator for Programming or the cognizant Institutional Director at NASA Headquarters, or a Director of a field installation determines that a deviation from the restrictions in paragraph (c) of this section is appropriate, he may request authority for such deviation from the Administrator, NASA.

(e) *Services of the Corps of Engineers.* In exercising the authority herein granted, the Deputy Associate Administrator for Programming and the Institutional Directors at NASA Headquarters and the Directors of field installations, pursuant to the applicable provisions of any cooperative agreement between NASA and the Corps of Engineers (in effect at that time) may:

(1) Utilize the services of the Corps of Engineers, U.S. Army, and

(2) Authorize the Corps of Engineers to execute, on behalf of NASA, grants of easements in real property, as provided for in paragraph H6 of the Corps of Engineers-NASA agreement contained in NASA Management Instruction 2-3-26.

(42 U.S.C. 2473(b)(1), (14))

JAMES E. WEBB,
*Administrator.*

# Title 21—FOOD AND DRUGS

## Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

### PART 121—FOOD ADDITIVES

### Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

LUBRICANTS WITH INCIDENTAL FOOD CONTACT

*Correction*

In F.R. Doc. 64-12834, appearing at page 17090 of the issue for Tuesday, Dec. 15, 1964, the first entry in the "Substances" column of the tabular material under § 121.2553(a)(3) should read as follows: "Phenyl-α- and/or phenyl-β-naphthylamine".

# Title 24—HOUSING AND HOUSING CREDIT

## Chapter II—Federal Housing Administration, Housing and Home Finance Agency

SUBCHAPTER B—PROPERTY IMPROVEMENT LOANS

### PART 201—CLASS 1 AND CLASS 2 PROPERTY IMPROVEMENT LOANS

### Miscellaneous Amendments

In § 201.6 paragraph (c) is amended to read as follows:

**§ 201.6 Eligible loans.**

* * * * *

(c) *Use of proceeds—technical services and direct costs.* The proceeds of a loan may be used to pay:

(1) The costs of credit investigation, not to exceed $3.

(2) The costs of architectural and engineering services and the costs of obtaining building permits where such services or permits are directly connected with eligible alterations, repairs or improvements financed in accordance with the regulations in this part.

* * * * *

In § 201.8 paragraph (a)(2) is amended to read as follows:

**§ 201.8 Dealer investigation, approval and control.**

(a) *Procedure before disbursement.*

* * *

(2) *Completion certificate.* Obtain a completion certificate on a form approved by the Commissioner, signed by the borrower and by the person approved by the insured as dealer. An insured shall not disburse the proceeds of a loan if, as an inducement for the consummation of the transaction, the borrower has been given or promised a cash payment or rebate, or it has been represented to the borrower that he will receive a cash bonus or commission on future sales. In the absence of information to the contrary, the insured may rely upon the dealer's statement in his completion certificate that there has been no such cash payment, rebate, bonus or commission. If there are two or more eligible borrowers involved in a transaction, the signature of only one borrower is required on the borrower's certificate.

* * * * * *

### MISCELLANEOUS AMENDMENTS TO CHAPTER

The following miscellaneous amendments have been made to this chapter:

SUBCHAPTER C—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS

### PART 203—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS

### Subpart B—Contract Rights and Obligations

In § 203.342 paragraph (c) is amended to read as follows:

**§ 203.342 Recasting of mortgage.**

* * * * *

(c) *Effect of modification.* Where a mortgage is modified, the principal amount of the mortgage, as modified:

(1) Shall not include any amounts assessed against the mortgagor as a late charge; and

(2) Shall be considered to be the "original principal of the mortgage" as the term is used in § 203.401.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 203, 52 Stat. 10, as amended; 12 U.S.C. 1709)

SUBCHAPTER D—RENTAL HOUSING INSURANCE

### PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE

### Subpart A—Eligibility Requirements

In § 207.26 paragraph (c) is amended and a new paragraph (d) is added to read as follows:

**§ 207.26 Form of Contract.**

* * * * *

(c) Where a cost plus form of contract is used, the mortgagor shall submit along with its certification of actual cost a certification of the general contractor, in a form prescribed by the Commissioner, as to all actual costs paid for labor, materials and subcontract work under the general contract exclusive of the builder's fee and any kickbacks, rebates, trade discounts, or other similar payments to the general contractor, the mortgagor, or

# Title 5—ADMINISTRATIVE PERSONNEL

## Chapter I—Civil Service Commission

### PART 213—EXCEPTED SERVICE

### National Aeronautics and Space Administration

Section 213.3348 is amended to show the exception under Schedule C of the position of Confidential Assistant to the Executive Secretary. Effective upon publication in the FEDERAL REGISTER, paragraph (f) is added to § 213.3348 as set out below.

**§ 213.3348 National Aeronautics and Space Administration.**

* * * * *

(f) One Confidential Assistant to the Executive Secretary.

(R.S. 1753, sec. 2, 22 Stat. 403, as amended; 5 U.S.C. 631, 633; E.O. 10577, 19 F.R. 7521, 3 CFR, 1954-1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] MARY V. WENZEL,
*Executive Assistant to the Commissioners.*

[F.R. Doc. 64-12947; Filed, Dec. 16, 1964; 8:48 a.m.]

any of its officers, directors, stockholders or partners.

(d) Where it is determined by the Commissioner that an identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners and any subcontractor, material supplier, or equipment lessor, the mortgagor may be required by the Commissioner to submit a certification of actual cost by such subcontractor, material supplier, or equipment lessor, in a form prescribed by the Commissioner, as to all actual costs paid for labor, materials, subcontracts and overhead exclusive of any kickbacks, rebates, trade discounts, or other similar payments to the general contractor, the mortgagor, or any of its officers, directors, stockholders or partners. Where the use of a cost plus form of contract is required by the Commissioner, and it is determined by the Commissioner that an identity of interest exists between the general contractor and any subcontractor, material supplier, or equipment lessor, the mortgagor may be required by the Commissioner to submit a certification of actual cost by such subcontractor, material supplier, or equipment lessor.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 207, 52 Stat. 16, as amended; 12 U.S.C. 1713)

SUBCHAPTER E—COOPERATIVE HOUSING INSURANCE

## PART 213—COOPERATIVE HOUSING MORTGAGE INSURANCE

### Subpart A—Eligibility Requirements—Projects

In § 213.35 paragraph (b) is revised to read as follows:

**§ 213.35 Certificates of actual cost.**

* * * * *

(b) (1) Where a cost plus form of contract is used, the mortgagor shall submit along with its certification of actual cost a certification of the general contractor, in a form prescribed by the Commissioner, as to all actual costs paid for labor, materials and subcontract work under the general contract exclusive of the builder's fee and any kickbacks, rebates, trade discounts, or other similar payments to the general contractor, the mortgagor, or any of its officers, directors, stockholders or partners.

(2) Where it is determined by the Commissioner that an identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners and any subcontractor, material supplier, or equipment lessor, the mortgagor may be required by the Commissioner to submit a certification of actual cost by such subcontractor, material supplier, or equipment lessor, in a form prescribed by the Commissioner, as to all actual costs paid for labor, materials, subcontracts and overhead exclusive of any kickbacks, rebates, trade discounts, or other similar payments to the general contractor, the mortgagor, or any of its officers, directors, stockholders or partners. Where the use of a cost plus form of contract is required by the Commissioner, and it is determined by the Commissioner that an identity of interest exists between the general contractor and any subcontractor, material supplier, or equipment lessor, the mortgagor may be required by the Commissioner to submit a certification of actual cost by such subcontractor, material supplier, or equipment lessor.

* * * * *

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 213, 64 Stat. 54, as amended; 12 U.S.C. 1715e)

---

SUBCHAPTER F—URBAN RENEWAL HOUSING INSURANCE AND INSURED IMPROVEMENT LOANS

## PART 220—URBAN RENEWAL MORTGAGE INSURANCE AND INSURED IMPROVEMENT LOANS

In Part 220 in the table of contents a new § 220.512 is added to read as follows:

Sec.
220.512 Certificates of actual cost.

### Subpart A—Eligibility Requirements—Homes

**§ 220.100 [Amended]**

In the listed provisions in § 220.100 *Incorporation by reference* the title to § 203.73 is changed to "Maximum loan amounts" and the reference "§ 203.94 Economic soundness" is deleted.

### Subpart C—Eligibility Requirements—Projects

In § 220.501 there is added to the listed provisions the following:

**§ 220.501 Incorporation by reference.**

(a) * * *

Sec.
207.27 Certificates of actual cost.

In Part 220 a new § 220.512 is added to read as follows:

**§ 220.512 Certificates of actual cost.**

(a) *Mortgagor's certificate*—(1) *Submission of certificate.* The mortgagor's certificate of actual cost, in a form prescribed by the Commissioner, shall be submitted prior to final endorsement and upon completion of the improvements to the satisfaction of the Commissioner.

(2) *Items to be included.* The certificate shall show the actual cost to the mortgagor of:

(i) The cost plus construction contract, including the builder's fee actually paid and approved by the Commissioner; or the lump sum construction contract; or the cost of the construction of the project, where the mortgagor also acts as the general contractor and no construction contract is executed.

(ii) The architect's fee.

(iii) The offsite public utilities and streets not included in subdivision (i) of this subparagraph.

(iv) The organization and legal expenses.

(v) The other items of expense approved by the Commissioner.

(3) *Items not to be included.* The certificate shall not include as actual cost any kickbacks, rebates, trade discounts, or other similar payments to the mortgagor or to any of its officers, directors, stockholders or partners. Any such payments shall be deducted from the costs determined under subparagraph (2) of this paragraph.

(b) *Records.* The mortgagor shall keep and maintain adequate records of all cost of any construction or other cost items not representing work under the general contract and, in the case of a cost plus contract, shall require the builder to keep similar records and, upon request by the Commissioner, shall make available for examination such records including any collateral agreements.

(c) *Certificate of public accountant.* The certificate of actual cost shall be verified by an independent Certified Public Accountant or independent public accountant in a manner acceptable to the Commissioner.

Section 220.513 is amended to read as follows:

**§ 220.513 Builder's and sponsor's profit and risk allowance.**

(a) *In general.* The mortgagor's certificate of actual cost shall include an allowance for builder's and sponsor's profit and risk, the amount of which shall be dependent upon a determination by the Commissioner as to whether or not there exists an identity of interest between the mortgagor or any of its officers, directors, stockholders or partners and the general contractor.

(b) *Identity of interest cases.* Where an identity of interest exists, a builder's and sponsor's profit and risk allowance shall be included in lieu of the builder's fee provided in § 220.512(a)(2)(i). This allowance shall be 10 percent of the actual cost computed in accordance with § 220.512(a) excluding the following items:

(1) Any builder's fee actually paid and approved by the Commissioner. (This fee shall be paid out of the builder's and sponsor's profit and risk allowance.)

(2) The cost of the land or any amount paid for a leasehold.

(3) The value of the land and improvements prior to repair or rehabilitation plus the amount of the mortgage proceeds used to refinance any outstanding indebtedness on the property where the mortgage involves the financing of repair or rehabilitation.

(c) *Nonidentity of interest cases.* Where no identity of interest exists, a sponsor's profit and risk allowance shall be included. This allowance shall be 10 percent of the actual cost computed in accordance with § 220.512(a) excluding the following items:

(1) The amounts paid by the mortgagor under the construction contract.

(2) The cost of the land or any amount paid for a leasehold.

(3) The value of the land and improvements prior to repair or rehabilitation plus the amount of the mortgage proceeds used to refinance any outstanding indebtedness on the property where the mortgage involves the financing of repair or rehabilitation.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interpret or apply sec. 220, 68 Stat. 596, as amended; 12 U.S.C. 1715k)

SUBCHAPTER G—HOUSING FOR MODERATE INCOME AND DISPLACED FAMILIES

## PART 221—LOW COST AND MODERATE INCOME MORTGAGE INSURANCE

In Part 221 in the table of contents the headings of the pertinent sections are amended and a new § 221.550a is added as follows:

Sec.
221.532 Supervision applicable to limited distribution mortgagors.
221.550 Certificate of actual cost—contents in general.
221.550a Certificate of actual cost—builder's and sponsor's profit and risk allowance.
221.551 Contractor's certification.

### Subpart C—Eligibility Requirements—Moderate Income Projects

In § 221.510 the introductory text and subdivisions (ii) and (iii) of paragraph (a)(2), the heading of paragraph (c), and the introductory text and subdivision (iii) of paragraph (d)(2) are amended to read as follows:

**§ 221.510 Eligible mortgagors.**

* * * * *

(a) *Nonprofit and builder-seller mortgagor.* * * *

(2) The builder-seller mortgagor shall be a special type of limited distribution mortgagor, meeting the qualifications of paragraph (c) of this section, which is organized:

* * * * *

(ii) To operate the project until the conveyance to the nonprofit mortgagor, subject to special controls and requirements of the Commissioner as to rents, charges, rates of return and method of operation.

(iii) To operate the project, in the event of failure to convey to a nonprofit mortgagor at final endorsement, or within such additional period as may be agreed to in writing by the Commissioner, as a limited distribution mortgagor subject to the supervision, controls and requirements prescribed by the Commissioner for such mortgagor.

* * * * *

(c) *Limited distribution mortgagor.* * * *

(d) *Cooperative and investor sponsor mortgagors.* * * *

(2) The investor sponsor mortgagor shall be a special type of limited distribution mortgagor approved by the Commissioner which is organized to:

* * * * *

(iii) Operate the project, in the event of failure to convey to a cooperative mortgagor within the two-year period as a limited distribution mortgagor subject to the controls and requirements of the Commissioner.

* * * * *

In § 221.514 paragraphs (a)(2) and (3) are amended to read as follows:

**§ 221.514 Maximum mortgage amounts.**

(a) *Principal obligation.* * * *

(2) *New construction.* (i) In the case of new construction where the mortgagor is other than a general or limited distribution mortgagor, the Commissioner's estimate of replacement cost of the property or project when the improvements are completed (the replacement cost may include the land, the proposed physical improvements, utilities within the boundaries of the land, architect's fees, taxes, interest during construction, and other miscellaneous charges incident to construction and approved by the Commissioner).

(ii) In the case of new construction where the mortgagor is a general or a limited distribution mortgagor, 90 percent of the Commissioner's estimate of the replacement cost of the property or project when the proposed improvements are completed. The replacement cost may include the land, the proposed physical improvements, utilities within the boundaries of the land, architect's fees, taxes, interest during construction, and other miscellaneous charges incident to construction and approved by the Commissioner and shall include an allowance for builder's and sponsor's profit and risk of 10 percent of the foregoing items exclusive of land unless the Commissioner, after determining such allowance is unreasonable, prescribes a lessor percentage.

(3) *Repair or rehabilitation.* (i) In the case of a project which is to be repaired or rehabilitated where the mortgagor is other than a general or limited distribution mortgagor, the sum of the estimated cost of the repairs and rehabilitation of the project and the Commissioner's estimate of the value of the property before repair and rehabilitation.

(ii) In the case of a project which is to be repaired or rehabilitated where the mortgagor is a general or a limited distribution mortgagor, 90 percent of the sum of the estimated cost of the repairs and rehabilitation of the project and the Commissioner's estimate of the value of the property before repair and rehabilitation.

* * * * *

In § 221.515 paragraph (b)(2) and the introductory text to paragraph (c)(2) are amended to read as follows:

**§ 221.515 Adjusted mortgage amount—rehabilitation projects.**

* * * * *

(b) *Property subject to existing mortgage.* * * *

(2) *General or limited distribution mortgagor.* If the mortgagor is a general or limited distribution mortgagor, the Commissioner's estimate of the cost of repair or rehabilitation plus such portion of the outstanding indebtedness as does not exceed 90 percent of the Commissioner's estimate of the fair market value of such land and improvements prior to the repair or rehabilitation.

(c) *Property to be acquired.* * * *

(2) *General or limited distribution mortgagor.* If the mortgagor is a general or limited distribution mortgagor:

* * * * *

In § 221.524 paragraph (a) is amended to read as follows:

**§ 221.524 Prepayment privileges.**

(a) *Prepayment in full.* The mortgage indebtedness may be prepaid in full and the Commissioner's controls terminated only upon the condition that the Commissioner's prior consent is obtained and upon such terms and conditions as the Commissioner may prescribe, except that, in the case of a limited distribution mortgagor, the mortgage indebtedness may be prepaid in full at any time after the expiration of 20 years from the date of final endorsement of the mortgage.

* * * * *

Section 221.532 is amended to read as follows:

**§ 221.532 Supervision applicable to limited distribution mortgagors.**

The provisions of § 221.531(b) (rate of return) shall apply to limited distribution mortgagors except that the amount of any allowable distribution or disbursement from surplus cash shall not exceed in any one fiscal year more than six percent of the product of 11.11 percent times the finally endorsed amount of the insured mortgage. The right to any allowable distribution or disbursement from surplus cash shall be cumulative.

In § 221.535 paragraph (a) is amended to read as follows:

**§ 221.535 Supervision applicable to investor sponsor mortgagors.**

(a) *Investor sponsor equity.* The builder's and sponsor's profit and risk allowance or builder's fee and such further amount as the Commissioner may determine, shall be held by the mortgagee in an escrow and shall not be paid to the investor sponsor unless the project is transferred to a cooperative mortgagor within two years from the date of completion. In the event of default or failure to transfer the project to a cooperative mortgagor within the two-year period, the escrow shall be applied against the mortgage or in such other manner as the Commissioner may direct. The amount of the escrow, together with any other equity of the investor sponsor mortgagor approved by the Commissioner, shall be deemed to be the equity of the investor sponsor mortgagor for purposes of determining its operations as a limited distribution mortgagor.

* * * * *

In § 221.538 the introductory text is amended to read as follows:

**§ 221.538 Applicability of prevailing wage requirements.**

The following prevailing wage requirements shall be applicable to all mortgages executed by a general, limited distribution, cooperative, investor-sponsor, and builder-seller mortgagor, and the compliance with such requirements shall be evidenced at such time and in such manner as the Commissioner may prescribe:

* * * * *

In § 221.540 the introductory text of paragraph (a) is amended to read as follows:

**§ 221.540 Financial requirements.**

• • • • • •

(a) A mortgagor, other than a nonprofit mortgagor, shall deposit with the mortgagee, or in a depository satisfactory to the mortgagee and under the control of the mortgagee, for the purpose of meeting the cost of equipping and renting the project subsequent to completion of construction of the entire project or units thereof and, during the course of construction, for allocation by the mortgagee to accruals for taxes, ground rents, mortgage insurance premiums, property insurance premiums, and assessments required by the terms of the mortgage:

• • • • • •

In § 221.547 paragraphs (a)(1) and (3)(i) are amended to read as follows:

**§ 221.547 Certification of cost requirements.**

(a) • • •

(1) To enter into a construction contract in a form meeting the requirements of § 221.548.

• • • • • •

(3) • • •

(i) In the case of a general or limited distribution mortgagor, 90 percent of actual cost; or

• • • • • •

Section 221.548 is amended to read as follows:

**§ 221.548 Form of contract.**

(a) *In general.* The contract between the mortgagor and the general contractor shall be in the form of either a lump sum contract or a cost plus contract. The lump sum contract shall provide for the payment of a specified amount. The cost plus contract shall provide for the payment of the actual cost of construction, not to exceed an upset price, and may include a provision for an additional payment to the builder of a fee in an amount allowed by the Commissioner.

(b) *Lump sum contract.* A lump sum contract may be used where it is established to the satisfaction of the Commissioner that no identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners and the general contractor, and where the mortgage is executed by a public, limited distribution, investor sponsor or general mortgagor. A lump sum contract may also be used where the mortgage is executed by a cooperative mortgagor if the Commissioner makes the foregoing determination as to nonidentity of interest and it is established to the Commissioner's satisfaction that a cost plus form of contract is not required to protect his interests.

(c) *Cost plus contract.* A cost plus contract shall be used in each of the following instances:

(1) Where it is determined by the Commissioner that an identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners and the general contractor.

(2) Where the mortgage is executed by a cooperative mortgagor and it is determined by the Commissioner that a cost plus form of contract is required to protect his interests.

(3) Where the mortgage is executed by a nonprofit or builder-seller mortgagor, unless it is established to the Commissioner's satisfaction that a cost plus form of contract is not required to protect his interests and the interests of the mortgagor, in which case a lump sum form of contract may be used.

Section 221.550 is amended to read as follows:

**§ 221.550 Certificate of actual cost—contents in general.**

(a) *Submission of certificate.* The mortgagor's certificate of actual cost, in a form prescribed by the Commissioner, shall be submitted prior to final endorsement and upon completion of the improvements to the satisfaction of the Commissioner.

(b) *Items to be included.* The certificate shall show the actual cost to the mortgagor of:

(1) The cost plus construction contract, including the builder's fee actually paid and approved by the Commissioner; or the lump sum construction contract; or the cost of the construction of the project, where the mortgagor also acts as the general contractor and no construction contract is executed.

(2) The architect's fee.

(3) The offsite public utilities and streets not included in subparagraph (1) of this paragraph.

(4) The organizational and legal expenses.

(5) The other items of expense approved by the Commissioner.

(c) *Items not to be included.* The certificate shall not include as actual cost any kickbacks, rebates, trade discounts, or other similar payments to the mortgagor or to any of its officers, directors, stockholders, or partners. Any such payments shall be deducted from the costs determined under paragraph (b) of this section.

In Part 221 a new § 221.550a is added to read as follows:

**§ 221.550a Certificate of actual cost—builder's and sponsor's profit and risk allowance.**

(a) *In general.* The mortgagor's certificate of actual cost shall include an allowance for builder's and sponsor's profit and risk, the amounts of which shall be dependent upon a determination by the Commissioner as to whether or not there exists an identity of interest between the mortgagor or any of its officers, directors, stockholders or partners and the general contractor.

(b) *Identity of interest cases.* Where an identity of interest exists, a builder's and sponsor's profit and risk allowance shall be included in lieu of the builder's fee provided for in § 221.550(b)(1). This allowance shall be 10 percent of the actual cost computed in accordance with § 221.550 excluding the following items:

(1) Any builder's fee actually paid and approved by the Commissioner. (This fee shall be paid out of the builder's and sponsor's profit and risk allowance.)

(2) The cost of the land or any amount paid for a leasehold.

(3) The value of the land and improvements prior to repair or rehabilitation plus the amount of the mortgage proceeds used to refinance any outstanding indebtedness on the property where the property involves the financing of repair or rehabilitation.

(c) *Nonidentity of interest cases.* Where no identity of interest exists, a sponsor's profit and risk allowance shall be included. This allowance shall be 10 percent of the actual cost computed in accordance with § 221.550 excluding the following items:

(1) The amounts paid by the mortgagor under the construction contract.

(2) The cost of the land or any amount paid for a leasehold.

(3) The value of the land and improvements prior to repair or rehabilitation plus the amount of the mortgage proceeds used to refinance any outstanding indebtedness on the property where the mortgage involves the financing of repair or rehabilitation.

Section 221.551 is amended to read as follows:

**§ 221.551 Contractor's certification.**

(a) *Certification by general contractor.* Where a cost plus form of contract is used by a cooperative mortgagor or where any other type of mortgagor is required by the Commissioner to use such contract, the mortgagor shall submit along with its certificate of actual cost a certification of the general contractor, in a form prescribed by the Commissioner, as to all actual costs paid for labor, materials and subcontract work under the general contract exclusive of the builder's fee and any kickbacks, rebates, trade discounts, or other similar payments to the general contractor, the mortgagor, or any of its officers, directors, stockholders or partners.

(b) *Certification by subcontractor.* Where it is determined by the Commissioner that an identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners and any subcontractor, material supplier, or equipment lessor, the mortgagor may be required by the Commissioner to submit a certification of actual cost by such subcontractor, material supplier, or equipment lessor, in a form prescribed by the Commissioner, as to all actual costs paid for labor, materials, subcontracts and overhead exclusive of any kickbacks, rebates, trade discounts, or other similar payments to the general contractor, the mortgagor or any of its officers, directors, stockholders or partners. Where the use of a cost plus form of contract is required by the Commissioner, and it is determined by the Commissioner that an identity of interest exists between the general contractor and any subcontractor, material supplier, or equipment lessor, the mortgagor may be required by the Commissioner to submit a certification of actual cost by such subcontractor, material supplier, or equipment lessor.

Section 221.555 is amended to read as follows:

**§ 221.555 Reduction in mortgage amount—new construction.**

If the principal obligation of the mortgage exceeds (a) in the case of a general or limited distribution mortgagor, 90 percent, or (b) in the case of other mortgagors, 100 percent, of the total amount as shown by the certificate of actual cost plus the value of land, the mortgage shall be reduced by the amount of such excess prior to final endorsement for insurance.

In § 221.556 paragraphs (b) and (c) are amended to read as follows:

**§ 221.556 Reduction in mortgage amount—rehabilitation.**

• • • • • •

(b) *Property subject to existing mortgage.* If the insured mortgage is to include the cost of refinancing an existing mortgage acceptable to the Commissioner, the amount of the existing mortgage or (1) in the case of a general or limited distribution mortgagor, 90 percent, or (2) in the case of all other mortgagors, 100 percent of the Commissioner's estimate of the fair market value of the land and existing improvements prior to repair or rehabilitation, whichever is the lesser, shall be added to the actual cost of the repair or rehabilitation. If the principal obligation of the insured mortgage exceeds the total amount thus obtained, the mortgage shall be reduced by the amount of such excess prior to final endorsement for insurance.

(c) *Property to be acquired.* If the mortgage is to include the cost of land and improvements, and the purchase price thereof is to be financed with part of the mortgage proceeds, the purchase price, or the Commissioner's estimate of the fair market value of the land and existing improvements prior to repair or rehabilitation, whichever is the lesser, shall be added to the actual cost of the repair or rehabilitation. If the principal obligation of the insured mortgage exceeds (1) in the case of a general or limited distribution mortgagor, 90 percent, or (2) in the case of all other mortgagors, 100 percent, of the total amount thus obtained, the mortgage shall be reduced by the amount of such excess prior to final endorsement for insurance.

In § 221.560 paragraph (a)(1)(iii) is amended to read as follows:

**§ 221.560 Eligibility of refinanced mortgages.**

(a) • • •

(1) • • •

(iii) The Commissioner's estimate of the value of the property after completion of the repairs, improvements or additions to the property, except for general or limited distribution mortgagors when the amount shall not exceed 90 percent of the Commissioner's estimate of the value of the property after completion of the repairs, improvements or additions to the property.

• • • • • •

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interpret or apply sec. 221, 68 Stat. 599, as amended; 12 U.S.C. 1715l)

SUBCHAPTER I—HOUSING FOR ELDERLY PERSONS

## PART 231—HOUSING MORTGAGE INSURANCE FOR THE ELDERLY

In Part 231 in the table of contents new §§ 231.10a, 231.10b, 231.11a and 231.11b are added and the pertinent section heading is amended as follows:

Sec.
231.10a Certificate of cost requirements.
231.10b Form of contract.
231.11 Certificates of actual cost.
231.11a Builder's and sponsor's profit and risk allowance.
231.11b Contractor's certification.

### Subpart A—Eligibility Requirements

In § 231.1 there is added to the listed provisions the following:

**§ 231.1 Incorporation by reference.**

(a) • • •

Sec.
207.25 Certificate of cost requirements.
207.26 Form of contract.
207.27 Certificates of actual cost.

• • • • • •

In § 231.8 paragraph (b)(1) is amended to read as follows:

**§ 231.8 Supervision of mortgagors.**

• • • • • •

(b) *Private mortgagor—nonprofit.* • • •

(1) A private mortgagor—nonprofit shall not be subject to the provisions of § 207.19(b) of this chapter (rate of return); § 207.19(c)(1) of this chapter (the requirement of a deposit, in cases involving the insurance of advances, to meet the cost of equipping and renting the project subsequent to construction and to provide for accruals to meet payment of taxes, ground rents, mortgage insurance premiums, property insurance premiums and assessments); § 207.19(e) of this chapter (rents and charges); § 207.19(g) of this chapter (mortgagor's equity investment); and § 207.19(h) of this chapter (advance amortization).

In Part 231 new §§ 231.10a and 231.10b are added to read as follows:

**§ 231.10a Certificate of cost requirements.**

(a) Prior to intial endorsement of the mortgage for insurance, the mortgagor, the mortgagee and the Commissioner shall enter into an agreement approved by the Commissioner for the purpose of precluding any excess of mortgage proceeds over statutory limitations. Under this agreement, the mortgagor shall disclose its relationship with the builder, including any collateral agreement, and with subcontractors and suppliers. It shall also agree:

(1) To enter into a construction contract in a form meeting the requirements of § 231.10b.

(2) To execute a certificate of actual cost upon completion of all physical improvements on the mortgaged property.

(3) To apply in reduction of the outstanding balance of the principal of the mortgage any excess of mortgage proceeds over:

(i) In the case of a private mortgagor—profit, 90 percent of actual cost.

(ii) In the case of a public mortgagor and private mortgagor—nonprofit, 100 percent of actual cost.

(b) The provisions of paragraph (a) of this section relating to disclosure and the requirement for a construction contract shall not apply where the mortgagor is the general contractor.

**§ 231.10b Form of contract.**

(a) *In general.* The contract between the mortgagor and the general contractor shall be in the form of either a lump sum contract or a cost plus contract. The lump sum contract shall provide for the payment of a specified amount. The cost plus contract shall provide for the payment of the actual cost of construction, not to exceed an upset price, and may include a provision for an additional payment to the builder of a fee in an amount allowed by the Commissioner.

(b) *Lump sum contract.* A lump sum contract may be used where it is established to the satisfaction of the Commissioner that no identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners and the general contractor, and where the mortgage is executed by a private mortgagor—profit or a public mortgagor.

(c) *Cost plus contract.* A cost plus contract shall be used in each of the following instances:

(1) Where it is determined by the Commissioner that an identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners and the general contractor.

(2) Where the mortgage is executed by a private mortgagor—nonprofit, unless it is established to the Commissioner's satisfaction that a cost plus form of contract is not required to protect his interests and the interests of the mortgagor, in which case a lump sum form of contract may be used.

Section 231.11 is amended to read as follows:

**§ 231.11 Certificates of actual cost.**

(a) *Mortgagor's certificate.*—(1) *Submission of certificate.* The mortgagor's certificate of actual cost, in a form prescribed by the Commissioner, shall be submitted prior to final endorsement and upon completion of the improvements to the satisfaction of the Commissioner.

(2) *Items to be included.* The certificate shall show the actual cost to the mortgagor of:

(i) The cost plus construction contract, including the builder's fee actually paid and approved by the Commissioner; or the lump sum construction contract; or the cost of the construction of the project, where the mortgagor also acts as the general contractor and no construction contract is executed.

(ii) The architect's fee.

(iii) The offsite public utilities and streets not included in subdivision (i) of this subparagraph.

(iv) The organizational and legal expenses.

(v) The other items of expense approved by the Commissioner.

(3) *Items not to be included.* The certificate shall not include as actual cost any kickbacks, rebates, trade discounts, or other similar payments to the mortgagor or to any of its officers, directors, stockholders or partners. Any such payments shall be deducted from the costs determined under subparagraph (2) of this paragraph.

(b) *Records.* The mortgagor shall keep and maintain adequate records of all cost of any construction or other cost items not representing work under the general contract and, in the case of a cost plus contract, shall require the builder to keep similar records and, upon request by the Commissioner, shall make available for examination such records including any collateral agreements.

(c) *Certificate of public accountant.* The certificate of actual cost shall be verified by an independent Certified Public Accountant or independent public accountant in a manner acceptable to the Commissioner.

In Part 231 new §§ 231.11a and 231.11b are added to read as follows:

**§ 231.11a Builder's and sponsor's profit and risk allowance.**

(a) *In general.* The mortgagor's certificate of actual cost shall include an allowance for builder's and sponsor's profit and risk, the amounts of which shall be dependent upon a determination by the Commissioner as to whether or not there exists an identity of interest between the mortgagor or any of its officers, directors, stockholders or partners and the general contractor.

(b) *Identity of interest cases.* Where an identity of interest exists, a builder's and sponsor's profit and risk allowance shall be included in lieu of the builder's fee provided for in § 231.11(a)(2)(i). This allowance shall be 10 percent of the actual cost computed in accordance with § 231.11(a) excluding the following items:

(1) Any builder's fee actually paid and approved by the Commissioner. (This fee shall be paid out of the builder's and sponsor's profit and risk allowance.)

(2) The cost of the land or any amount paid for a leasehold.

(3) The value of the land and improvements prior to repair or rehabilitation plus the amount of the mortgage proceeds used to refinance any outstanding indebtedness on the property where the mortgage involves the financing of repair or rehabilitation.

(c) *Nonidentity of interest cases.* Where no identity of interest exists, a sponsor's profit and risk allowance shall be included. This allowance shall be 10 percent of the actual cost computed in accordance with § 231.11(a) excluding the following items:

(1) The amounts paid by the mortgagor under the construction contract.

(2) The cost of the land or any amount paid for a leasehold.

(3) The value of the land and improvements prior to repair or rehabilitation plus the amount of the mortgage proceeds used to refinance any outstanding indebtedness on the property where the mortgage involves the financing of repair or rehabilitation.

**§ 231.11b Contractor's certification.**

(a) *Certification by general contractor.* Where a cost plus form of contract is used by a cooperative mortgagor or where any other type of mortgagor is required by the Commissioner to use such contract, the mortgagor shall submit along with its certificate of actual cost a certification of the general contractor, in a form prescribed by the Commissioner, as to all actual costs paid for labor, materials and subcontract work under the general contract exclusive of the builder's fee and any kickbacks, rebates, trade discounts, or other similar payments to the general contractor, the mortgagor, or any of its officers, directors, stockholders or partners.

(b) *Certification by subcontractor.* Where it is determined by the Commissioner that an identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners and any subcontractor, material supplier, or equipment lessor, the mortgagor may be required by the Commissioner to submit a certification of actual cost by such subcontractor, material supplier, or equipment lessor, in a form prescribed by the Commissioner, as to all actual costs paid for labor, materials, subcontracts and overhead exclusive of any kickbacks, rebates, trade discounts, or other similar payments to the general contractor, the mortgagor, or any of its officers, directors, stockholders or partners. Where the use of a cost plus form of contract is required by the Commissioner, and it is determined by the Commissioner that an identity of interest exists between the general contractor and any subcontractor, material supplier, or equipment lessor, the mortgagor may be required by the Commissioner to submit a certification of actual cost by such subcontractor, material supplier, or equipment lessor.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interpret or apply sec. 231, 73 Stat. 665; 12 U.S.C. 1715v)

SUBCHAPTER J—MORTGAGE INSURANCE FOR NURSING HOMES

## PART 232—NURSING HOMES MORTGAGE INSURANCE

In Part 232 in the table of contents the pertinent section heading is amended as follows:

Sec.
232.85 Contractor's certification.

### Subpart A—Eligibility Requirements

In § 232.61 paragraph (b)(1) is amended to read as follows:

**§ 232.61 Equity requirements.**

* * * * * *

(b) *Funds and finances—insured advances.* * * *

(1) Where the mortgagor is other than a private nonprofit corporation or association, it shall deposit with the mortgagee prior to initial endorsement, an amount determined by the Commissioner to be sufficient to meet, during the course of construction, the payments to accruals required by the terms of the mortgage, for taxes, mortgage insurance premiums, hazard insurance premiums and assessments required by the terms of the mortgage.

* * * * * *

In § 232.80 paragraph (b) is amended to read as follows:

**§ 232.80 Certification of cost requirements.**

* * * * * *

(b) Enter into a construction contract in a form meeting the requirements of § 232.81;

* * * * * *

Section 232.81 is amended to read as follows:

**§ 232.81 Form of contract.**

(a) *In general.* The contract between the mortgagor and the general contractor shall be in the form of either a lump sum contract or a cost plus contract. The lump sum contract shall provide for the payment of a specified amount. The cost plus contract shall provide for the payment of the actual cost of construction, not to exceed an upset price, and may include a provision for an additional payment to the builder of a fee in an amount allowed by the Commissioner.

(b) *Lump sum contract.* A lump sum contract may be used where it is established to the satisfaction of the Commissioner that no identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners and the general contractor, and where the mortgage is executed by a mortgagor established to operate a proprietary nursing home.

(c) *Cost plus contract.* A cost plus contract shall be used in each of the following instances:

(1) Where it is determined by the Commissioner that an identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners and the general contractor.

(2) Where the mortgage is executed by a mortgagor established to operate a private nonprofit nursing home, unless it is established to the Commissioner's satisfaction that a cost plus form of contract is not required to protect his interests and the interests of the mortgagor, in which case a lump sum form of contract may be used.

Section 232.85 is amended to read as follows:

**§ 232.85 Contractor's certification.**

(a) *Certification by general contractor.* Where a cost plus form of contract is used, the mortgagor shall submit along with its certification of actual cost a certification of the general contractor, in a form prescribed by the Commissioner, as to all actual costs paid for labor, materials and subcontract work under the general contract exclusive of the builder's fee and any kickbacks, rebates, trade discounts, or other similar

payments to the general contractor, the mortgagor, or any of its officers, directors, stockholders or partners.

(b) *Certification by subcontractor.* Where it is determined by the Commissioner that an identity of interest exists between the mortgagor or any of its officers, directors, stockholders or partners, and any subcontractor, material supplier, or equipment lessor, the mortgagor may be required by the Commissioner to submit a certification of actual cost by such subcontractor, material supplier, or equipment lessor, in a form prescribed by the Commissioner, as to all actual costs paid for labor, materials, subcontracts and overhead exclusive of any kickbacks, rebates, trade discounts, or other similar payments to the general contractor, the mortgagor, or any of its officers, directors, stockholders or partners. Where the use of a cost plus form of contract is required by the Commissioner, and it is determined by the Commissioner that an identity of interest exists between the general contractor and any subcontractor, material supplier, or equipment lessor, the mortgagor may be required by the Commissioner to submit a certification of actual cost by such subcontractor, material supplier, or equipment lessor.

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interpret or apply sec. 232, 73 Stat. 663; 12 U.S.C. 1715w)

---

SUBCHAPTER L—CONDOMINIUM HOUSING INSURANCE

## PART 234—CONDOMINIUM OWNERSHIP MORTGAGE INSURANCE

### Subpart C—Eligibility Requirements—Projects—Conversion Individual Sales Units

**§ 234.530 [Amended]**

In § 234.530 *Increased mortgage amounts*, in paragraphs (a) and (b) the reference to "§ 234.560(c)" is corrected to read "§ 234.525(c)".

In § 234.535 the introductory text is amended to read as follows:

**§ 234.535 Adjusted mortgage amount—rehabilitation projects.**

In addition to the maximum mortgage amount limitations of §§ 234.525 and 234.530, a mortgage having a principal amount computed in compliance with the applicable provisions of this subpart, and which involves a project to be repaired or rehabilitated, shall be subject to the following additional limitations:

* * * * * *

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interpret or apply sec. 234, 75 Stat. 160; 12 U.S.C. 1715y)

---

SUBCHAPTER R—WAR HOUSING INSURANCE

## PART 603—INDIVIDUAL HOMES; WAR HOUSING MORTGAGE INSURANCE

### Subpart B—Contract Rights and Obligations

In § 603.253 paragraph (c)(3) is amended to read as follows:

**§ 603.253 Forbearance of foreclosure.**

* * * * * *

(c) *Recasting of mortgage.* * * *

(3) *Effect of modification.* Where a mortgage is modified, the principal amount of the mortgage, as modified:

(i) Shall not include any amounts assessed against the mortgagor as a late charge; and

(ii) Shall be considered to be the "original principal of the mortgage" as the term is used in § 603.259.

(Sec. 607, 55 Stat. 61; 12 U.S.C. 1742. Interprets or applies sec. 603, 55 Stat. 56, as amended; 12 U.S.C. 1738)

---

SUBCHAPTER T—MILITARY AND ARMED SERVICES HOUSING MORTGAGE INSURANCE

## PART 809—ARMED SERVICES HOUSING—CIVILIAN EMPLOYEES

### Subpart A—Eligibility Requirements

In § 809.4 paragraphs (a) through (d) are amended to read as follows:

**§ 809.4 Maximum mortgage amount; dollar limitation.**

* * * * * *

(a) $30,000 in the case of a dwelling designed principally for a one-family residence; or

(b) $32,500 in the case of a two-family residence; or

(c) $32,500 in the case of a three-family residence; or

(d) $37,500 in the case of a four-family residence.

* * * * * *

# Title 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

SUBCHAPTER A—INCOME TAX

[T.D. 6778]

## PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

### Expenses for Care of Certain Dependents

On October 16, 1964, notice of proposed rule making with respect to the amendment of the Income Tax Regulations (26 CFR Part 1) under section 214 of the Internal Revenue Code of 1954 (relating to expenses for care of certain dependents) to conform the regulations to section 212 of the Revenue Act of 1964 (78 Stat. 49) and to make certain other changes therein was published in the FEDERAL REGISTER (29 F.R. 14226). No objection to the rules proposed having been received during the 30-day period prescribed in the notice, the regulations as proposed are hereby adopted.

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

Approved: December 14, 1964.

STANLEY S. SURREY,
*Assistant Secretary of the Treasury.*

In order to conform the Income Tax Regulations (26 CFR Part 1) under section 214 of the Internal Revenue Code of 1954 to section 212 of the Revenue Act of 1964 (78 Stat. 49) and to make certain other changes therein, such regulations are amended as follows:

PARAGRAPH 1. Section 1.214 is amended to read as follows:

**§ 1.214 Statutory provisions; expenses for care of certain dependents.**

Sec. 214. *Expenses for care of certain dependents*—(a) *General rule.* There shall be allowed as a deduction expenses paid during the taxable year by a taxpayer who is a woman or widower, or is a husband whose wife is incapacitated or is institutionalized, for the care of one or more dependents (as defined in subsection (d)(1)), but only if such care is for the purpose of enabling the taxpayer to be gainfully employed.

(b) *Limitations*—(1) *Dollar limit.* (A) Except as provided in subparagraph (B), the deduction under subsection (a) shall not exceed $600 for any taxable year.

(B) The $600 limit of subparagraph (A) shall be increased (to an amount not above $900) by the amount of expenses incurred by the taxpayer for any period during which the taxpayer had 2 or more dependents.

(2) *Working wives and husbands with incapacitated wives.* In the case of a woman who is married and in the case of a husband whose wife is incapacitated, the deduction under subsection (a)—

(A) Shall not be allowed unless the taxpayer and his spouse file a joint return for the taxable year, and

(B) Shall be reduced by the amount (if any) by which the adjusted gross income of the taxpayer and his spouse exceeds $6,000. This paragraph shall not apply, in the case of a woman who is married, to expenses incurred while her husband is incapable of

self-support because mentally or physically defective, or, in the case of a husband whose wife is incapacitated, to expenses incurred while his wife is institutionalized if such institutionalization is for a period of at least 90 consecutive days (whether or not within one taxable year) or a shorter period if terminated by her death.

(3) *Certain payments not taken into account.* Subsection (a) shall not apply to any amount paid to an individual with respect to whom the taxpayer is allowed for his taxable year a deduction under section 151 (relating to deductions for personal exemptions).

(c) *Special rule where wife is incapacitated or institutionalized.* In the case of a husband whose wife is incapacitated or is institutionalized, the deduction under subsection (a) shall be allowed only for expenses incurred while the wife was incapacitated or institutionalized (as the case may be) for a period of at least 90 consecutive days (whether or not within one taxable year) or a shorter period if terminated by her death.

(d) *Definitions.* For purposes of this section—

(1) *Dependent.* The term "dependent" means a person with respect to whom the taxpayer is entitled to an exemption under section 151(e)(1)—

(A) Who has not attained the age of 13 years and who (within the meaning of section 152) is a son, stepson, daughter, or stepdaughter of the taxpayer; or

(B) Who is mentally or physically incapable of caring for himself.

(2) *Widower.* The term "widower" includes an unmarried individual who is legally separated from his spouse under a decree of divorce or of separate maintenance.

(3) *Incapacitated wife.* A wife shall be considered incapacitated only (A) while she is incapable of caring for herself because mentally or physically defective, or (B) while she is institutionalized.

(4) *Institutionalized wife.* A wife shall be considered institutionalized only while she is, for the purpose of receiving medical care or treatment, an inpatient, resident, or inmate of a public or private hospital, sanitarium, or other similar institution.

(5) *Determination of status.* A woman shall not be considered as married if—

(A) She is legally separated from her spouse under a decree of divorce or of separate maintenance at the close of the taxable year, or

(B) She has been deserted by her spouse, does not know his whereabouts (and has not known his whereabouts at any time during the taxable year), and has applied to a court of competent jurisdiction for appropriate process to compel him to pay support or otherwise to comply with the law or a judicial order, as determined under regulations prescribed by the Secretary or his delegate.

[Sec. 214 as amended by sec. 1, Act of April 2, 1963 (Pub. Law 88-4, 77 Stat. 4); sec. 212, Rev. Act 1964 (78 Stat. 49)]

PAR. 2. Section 1.214-1 is amended by revising paragraphs (a) and (b), by revising that portion of paragraph (c) preceding the examples and by adding a subparagraph (3)(ii) immediately following example (9) of such paragraph (c), and by revising paragraphs (d) and (f). The revised and added provisions read as follows:

**§ 1.214-1 Expenses for the care of certain dependents.**

(a) *General rule.* Section 214 allows, subject to certain limitations, a deduction from gross income of expenses paid for the care of certain dependents where the care is for the purpose of enabling the taxpayer to be gainfully employed. Such expenses are referred to in this section as "child care" expenses. The deduction is allowed only for expenses incurred while the taxpayer is gainfully employed or in active search of gainful employment. The employment which is the cause of the incurring of the expenses may, however, consist of service either within or without the home of the taxpayer. Self-employment constitutes employment for purposes of section 214.

(b) *Taxpayers who may qualify for the deduction.* The deduction provided in section 214 is allowed only to a taxpayer who is a woman, a widower, or, for taxable years beginning after December 31, 1963, a husband whose wife is incapacitated or institutionalized. For purposes of this paragraph, the following rules apply:

* * * * * *

(2) *A married woman whose husband is capable of self-support.* If the expenses are paid by a woman (i) who is married at the time the expenses are incurred, (ii) whose husband at that time is not incapable of self-support because he is mentally defective or physically disabled, (iii) who is not divorced or legally separated at the end of the taxable year, and (iv) in the case of a woman who has been deserted by her husband and who does not meet all of the conditions set forth in subparagraph (4)(ii) of this paragraph, the deduction is allowed, but only if she files a joint income tax return with her husband for the taxable year in which the expenses are paid. Further, the amount otherwise deductible shall be reduced by the amount, if any, by which the combined adjusted gross income of the taxpayer and her spouse for the taxable year in which the expenses are paid exceeds $4,500 (for taxable years beginning before January 1, 1964) or $6,000 (for taxable years beginning after December 31, 1963). The amount otherwise deductible is the amount expended for child care or the maximum deduction allowable for any taxable year (see paragraph (c) of this section), whichever is the lesser. The determination of whether the taxpayer's husband is incapable of self-support because of a mental defect or physical disability shall be made without regard to his income from sources other than his own earnings. For purposes of this subparagraph, the term "earnings" means wages, salaries, commissions, professional fees, and other amounts received as compensation for personal services actually rendered. It does not include income such as pensions, annuities, sick pay, interest, dividends, or rents.

(3) *A married woman whose husband is incapable of self-support.* * * *

(ii) A married woman claiming a deduction under this subparagraph shall submit with her income tax return in which the deduction is claimed information disclosing (*a*) the nature of her husband's disability, (*b*) the period of the disability, (*c*) the amount of her husband's earnings (if any) during the period he was incapable of self-support, and (*d*) such other information as is required by the return or instructions relating to the return. Where the husband is capable of self-support for part of a taxable year the child care expenses incurred for such part shall be treated under subparagraph (2) of this paragraph. See example (8) of paragraph (c)(3)(i) or example (8) of paragraph (c)(3)(ii) (whichever is applicable) of this section.

* * * * * *

(5) *A husband whose wife is incapacitated or institutionalized*—(i) *In general.* Subject to certain limitations, the deduction is allowed for expenses paid in a taxable year beginning after December 31, 1963, by a husband if the expenses are incurred during a period in which his wife is incapacitated. However, the deduction is allowed only if the wife is incapacitated for a period of at least 90 consecutive days or a shorter period if the period of incapacitation is terminated by her death. The period of incapacitation need not occur entirely within one taxable year.

(ii) *Limitation on deduction.* Except as otherwise provided in this subdivision, the deduction is allowed only if the husband files a joint income tax return with his wife for the taxable year in which the expenses are paid. Further, the amount otherwise deductible shall be reduced by the amount, if any, by which the combined adjusted gross income of the husband and his spouse exceeds $6,000 for the taxable year in which the expenses are paid. The amount otherwise deductible is the amount expended for child care (and incurred during the period the wife was incapacitated) or the maximum deduction allowable for any taxable year beginning after December 31, 1963 (see paragraph (c)(2) of this section), whichever is the lesser. The limitations set forth in this subdivision do not apply to any expenses incurred in any period during which the taxpayer's wife is institutionalized if (*a*) the institutionalization is for a period of at least 90 consecutive days, or (*b*) the period of institutionalization (regardless of its length) is terminated by her death. The period of institutionalization referred to in subdivision (*a*) or (*b*) of this subdivision need not occur entirely within one taxable year.

(iii) *Incapacitated wife.* A wife is considered to be incapacitated during any period of time during which she is incapable of caring for herself because of a mental or physical defect. A wife is not considered to be incapacitated solely by reason of the fact that she has a mental or physical defect. A wife is incapacitated only if she is mentally or physically defective and as a result of the mental or physical defect is incapable of caring for herself. The fact that a wife, by reason of a mental or physical defect, is incapable of self-support, is unable to engage in any substantial gainful activity, or is unable to perform the normal household functions of a housewife or to care for her minor children, does not, of itself, establish that the wife is incapable of caring for herself. A wife who is mentally or physically defective to the extent that she cannot dress herself or cannot provide for her personal hygienical or nutritional needs will, ordinarily, be considered as incapable of caring for herself. Thus, a wife who because of an injury (whether temporary or permanent) is confined to a bed or to a wheel chair, even though otherwise enjoying good health, is incapable of caring for herself. In addition, a wife who is physically handicapped, or a wife who is mentally defective and has suicidal or other dangerous tendencies, and for such reason requires constant attention of another person is considered to be incapable of caring for herself. A wife is also considered to be incapacitated during any period of time (whether or not for 90 consecutive days) during which she is institutionalized.

(iv) *Institutionalized wife.* A wife is considered to be institutionalized only while she is, for purposes of receiving medical care or treatment, an inpatient, resident, or inmate of a public or private hospital, or other similar institution. A wife who resides at a hospital, sanitarium, or other similar institution other than for purposes of receiving medical care or treatment, as, for example, by reason of her employment, is not institutionalized. Generally, a wife is not considered institutionalized while residing at a health or beauty ranch or similar establishment even though some medical care or treatment is provided.

(v) *Information to be submitted with return.* A married man claiming a deduction under this subparagraph shall submit with his income tax return in which the deduction is claimed information disclosing, if his wife is institutionalized, the period of institutionalization and the name and address of the institution where the wife received medical care or treatment, or, if his wife is incapacitated (but not institutionalized), the nature and period of her incapacitation. There shall also be submitted such other information as is required by the return or instructions relating to the return. In addition, there should be submitted, wherever possible, a certificate of the attending physician indicating the nature and duration of the wife's mental or physical defect.

(vi) *Computation of 90-day period*—(*a*) *Incapacitation.* For the purpose of determining whether a wife is incapacitated for a period of at least 90 consecutive days, different periods of incapacitation which are separated by a period of time during which the wife is not incapacitated cannot be added together. Thus, if a wife is incapacitated during the months of March and April (61 days) and is incapacitated during the entire month of October (31 days), she is not incapacitated for a period of at least 90 consecutive days. Since a wife who is institutionalized is considered to be incapacitated, the period during which a wife is institutionalized is added to a consecutive period during which she is incapacitated (but not institutionalized) for the purpose of determining whether the wife is incapacitated for a period of at least 90 consecutive days. Thus, the 90-consecutive-day requirement is met where a wife remains at home unable to care for herself because of a mental or physical defect for 60 consecutive days and immediately thereafter enters an institution where she continuously remains for an additional 30 days receiving medical care or treatment, whether or not she is able to care for herself during such 30 days.

(*b*) *Institutionalization.* For the purpose of determining whether a wife is institutionalized for a period of at least 90 consecutive days, different periods of institutionalization which are separated by a period of time during which the wife was not institutionalized cannot be added together. Thus, if a wife is institutionalized during the months of March and April (61 days), spends the months of May and June at home, and is institutionalized during the entire month of July (31 days), she is not institutionalized for a period of at least 90 consecutive days. However, if the wife is incapacitated during all of May and June, the entire period (March through July) constitutes a continuous period of incapacitation, see subdivision (*a*) of this subdivision. The running of a period of institutionalization is not discontinued because of, but rather such period includes, brief absences from the institution such as on weekends or holidays, and transfers from one institution to another.

(vii) *Rule where period of incapacitation does not occur in one taxable year.* The 90-consecutive-day period of incapacitation or of institutionalization need not occur entirely within one taxable year. If part of a period of at least 90 days of incapacitation, or part of a period of incapacitation of less than 90-days which is terminated by reason of the death of the wife, occurs in one taxable year and the remainder occurs in the succeeding taxable year, a deduction is allowed for the child care expenses incurred during the part of the period occurring in each such year, subject, however, to all other conditions and limitations. However, no deduction is allowed for expenses paid in any taxable year which begins before January 1, 1964 (see subdivision (i) of this subparagraph).

(6) *Determination of status.* If child care expenses are incurred in one taxable year and paid in another, the status of a taxpayer described in subparagraphs (1) to (5) of this paragraph, inclusive, shall be determined as of the time at which the expenses are incurred and not when such expenses are paid.

(c) *Computation of deduction*—(1) *In general.* The deduction for child care expenses is allowable only with respect to such expenses actually paid during the taxable year regardless of when the event which occasioned the expenses occurred and regardless of the method of accounting employed by the taxpayer in making his income tax return. If child care expenses are incurred but not paid during the taxable year, no deduction can be taken for such year. Thus, if an expenditure was incurred in December of a particular year, but not paid until January of the following calendar year, no deduction may be taken for the earlier calendar year.

(2) *Dollar limitation on amount of deduction*—(i) *Taxable years beginning before January 1, 1964.* For any taxable year beginning before January 1, 1964, the deduction for child care expenses may not exceed $600 regardless of the number of dependents for whose care the expenses are incurred.

(ii) *Taxable years beginning after December 31, 1963.* Except as otherwise provided in this subdivision, the deduction for child care expenses, for any taxable year beginning after December 31, 1963, may not exceed $600. If the taxpayer has two or more dependents at any time during the taxable year, the $600 limit is increased by the amount of child care expenses incurred by the taxpayer for the period or periods during which the taxpayer has two or more dependents. The $600 limit may not be increased to an amount in excess of $900. For a further limitation on the amount of the allowable deduction, see subparagraphs (2) and (5) of paragraph (b) of this section.

(3) *Examples.* The following examples illustrate the computation of the deduction allowed by section 214 in the case of a taxpayer making his return on the basis of the calendar year. In each example it is assumed that the expenses are of the type which would qualify for the deduction.

(i) The following examples apply to taxable years beginning before January 1, 1964:

* * * * * *

(ii) The following examples apply to taxable years beginning after December 31, 1963:

*Example (1).* B was a widower during 1964, until August 1, when he remarried. He had two dependent children aged 7 and 10. He paid $90 each month in 1964 for child care expenses. His wife was not incapacitated or institutionalized at any time during 1964. He may take into account, for purposes of the deduction allowed by section 214, only those expenses paid during the taxable year which were incurred while he was unmarried. Therefore, the amount of the deduction allowable is $630 ($90 per month from January to July, inclusive). If B had only one dependent during the period he was unmarried, the amount of the deduction allowable would be limited to $600.

*Example (2).* H and W were married during the entire year 1964. They have one dependent child age 11. W, the wife, paid $800 for child care expenses incurred during the year. The combined adjusted gross income of H and W was $6,400. The allowable deduction under section 214 is $200, computed as follows: $600, the maximum deduction allowable for one dependent, is reduced by $400, the excess of adjusted gross income ($6,400) over $6,000. The deduction of $200 is allowable only if H and W made a joint return for 1964.

*Example (3).* The facts are the same as in example (2), except that the child care expenses paid during the year were $400. No deduction is allowable under section 214, since the amount of expenses paid, $400, does not exceed the excess of the adjusted gross income ($6,400) over $6,000.

*Example (4).* During 1964, W, a woman paid $60 each month for child care expenses for her dependent child age 11. She was a widow from January 1, through March 31, and was married for the remainder of the year. H, her husband, was capable of self-support, and the combined adjusted gross income of H and W for 1964 was $6,200. H and W made a joint return for 1964. The total deduction allowable to W under section

214 is $520, computed as follows: $180, as expenses incurred while W was a single woman, plus $340, as expenses incurred while W was married. The $340 is arrived at by reducing the amount expended while H and W were married, $540, by $200 (the excess of adjusted gross income ($6,200) over $6,000).

*Example* (5). The facts are the same as in example (4), except that the amounts paid for child care expenses are $75 per month ($225 being paid for expenses incurred while W was single and $675 while she was married). The total allowable deduction in this case is $600. $225 is deductible as expenses incurred while W was a single woman. $400 of the expenses incurred during the period of marriage is also deductible. However, the maximum deduction allowable to W is $600. The allowable amount for expenses incurred during the period of marriage is determined as follows: $675 (the amount expended during such period) is reduced to $600 (the maximum deduction allowable for one dependent) and $600 is then reduced by $200 (the excess of adjusted gross income ($6,200) over $6,000) to $400.

*Example* (6). H and W were married during 1964 prior to July 1, when they received a decree of divorce. W did not remarry during 1964. She had two dependent children age 6 and 8. W paid $100 per month for child care expenses during 1964. The allowable deduction is $900. Since W is considered to have been a single woman during all of 1964, the limitations with respect to the deduction allowed to a married woman are not applicable, and only the maximum dollar limitation applies ($900 for two dependents for the entire year). If W had only one dependent during the entire year, the allowable deduction would be limited to $600.

*Example* (7). H and W were married on July 1, 1964. At all times in 1964, until July 1, H was a widower and W was a widow. H and W each paid $600 for child care expenses in 1964, prior to their marriage. W had a dependent child age 6, and H had a dependent child age 8. Their combined adjusted gross income for 1964 was $6,400, and they made a joint return. From July 1, to the end of 1964, W paid $100 per month for child care expenses for both children. If a joint return is not made, H and W are each allowed a deduction of $600, regardless of their adjusted gross income, but no additional deduction would be allowed for child care expenses paid after their marriage. If a joint return is made, H is allowed a deduction of $600 for the expenses paid by him as a widower, and W is allowed a deduction of $800, computed as follows: $600 for expenses paid by her as a widow, and $200 for expenses incurred and paid by her after her marriage. The $200 is arrived at by reducing the amount expended by W from July 1, to the remainder of 1964 (when she had two dependents), $600, by $400, the excess of the adjusted gross income ($6,400) over $6,000. If after her marriage W had incurred and paid child care expenses in the amount of $1,000, W would be allowed a deduction of $900, computed as follows: $600 for expenses paid by her as a widow, and $300 for expenses incurred and paid by her after her marriage. The $300 is arrived at by reducing the $1,000 to $900 (the maximum deduction allowed for two dependents) and the $900 is reduced by $400 (the excess of adjusted gross income, $6,400, over $6,000); and the remainder, $500, is then reduced to $300, which represents the difference between the maximum dollar limitation for two dependents ($900) and the amount paid by W as a widow, $600.

*Example* (8). H and W were married at all times during 1964. As a result of an accident, H incurred injuries which rendered him incapable of self-support during 1964 until September 1. They had one dependent child age 10. The adjusted gross income of H and W for 1964 was $6,200. W paid $60 each month in 1964 for child care expenses. The deduction allowable to W under section 214 is $520. This amount is composed of $480, the amounts paid during H's period of disability and $40, the expenses paid from September to December, inclusive ($240) reduced by $200, the excess of the adjusted gross income ($6,200) over $6,000.

*Example* (9). H and W were married from January 1, 1964, until October 1, 1964, when H died. H and W had one child age 10. The combined adjusted gross income of H and W was $6,300. W paid $50 per month for child care expenses throughout the entire year. The deduction allowed to W if she filed a separate return is $150, the amount paid while she was a widow. If a joint return is filed on behalf of the widow and her deceased husband, the deduction allowable is $300, computed as follows: $150 for expenses incurred while W was a widow, and $150 for expenses incurred while W was married (the amount expended during marriage, $450, is reduced by $300, the excess of the adjusted gross income ($6,300) over $6,000).

*Example* (10). H and W were married at all times during 1964 and have two children. On March 1, 1964, the older child attained age 13 and during the remainder of the year was not a dependent as defined in section 214(d)(1). W incurred and paid $90 each month for child care expenses. H and W's adjusted gross income for 1964 was $6,100, and they made a joint return. The deduction allowable to W under section 214 is $680, computed as follows: $900 (the amount expended from March 1, to the end of 1964) is reduced to $600 (the maximum amount allowable for one dependent) to which is added $180 (the amount expended while H and W had two dependent children under age 13); a total of $780, which amount is reduced by $100 (the excess of the adjusted gross income ($6,100) over $6,000).

*Example* (11). H and W were married during the entire year 1964 and have two dependents. On March 1, 1964, W became incapacitated and remained unable to care for herself until April 1, 1964, at which time she was admitted to a hospital for medical treatment. W remained in the hospital continuously until June 1, 1964, at which time she returned home. On June 1, 1964, and for the remainder of 1964, W was capable of caring for herself. H incurred and paid $90 a month for child care expenses during 1964. H and W's adjusted gross income for 1964 was $6,100, and they made a joint return for 1964. For purposes of section 214, W is considered to be incapacitated from March 1, 1964 to May 31, 1964, inclusive (a period of at least 90 consecutive days). The allowable deduction is $170, computed as follows: $270, the amount incurred while W was incapacitated, is reduced by $100, the excess of adjusted gross income ($6,100) over $6,000.

*Example* (12). The facts are the same as in example (11), except that W was in the hospital until August 1, 1964. On August 1, 1964, and for the remainder of 1964, W was capable of caring for herself. The allowable deduction is $360 (the amount incurred while W was institutionalized). No deduction is allowed for the $90 of expenses incurred during March, 1964, because such amount is less than $100 (the excess of the adjusted gross income ($6,100) over $6,000).

(d) *Dependents*—(1) *In general.* The deduction provided by section 214 is allowed only for expenses paid for the care of an individual who (for the taxable year of the taxpayer in which the expenses are incurred) is a dependent of the taxpayer for whom an exemption is allowed under section 151(e)(1). Furthermore, the dependent must, at the time the expenses are incurred, be—

(i) For taxable years beginning before January 1, 1964, under the age of 12 years,

(ii) For taxable years beginning after December 31, 1963, under the age of 13 years, or

(iii) Mentally or physically unable to care for himself.

(2) *Special rules.* (i) It is not necessary that the dependent be permanently disabled in order for the amount expended for his care to be deductible. However, the mere fact that the disability, whether temporary or permanent, renders him incapable of self-support does not necessarily mean that he is incapable of self-care within the meaning of subparagraph (1) (iii) of this paragraph.

(ii) A dependent who has not attained the age of 13 years (for taxable years beginning before January 1, 1964, who has not attained the age of 12 years) is deemed mentally or physically unable to care for himself. Thus, the deduction for expenses paid for the care of a dependent under the age of 13 years (for taxable years beginning before January 1, 1964, under the age of 12 years) is allowable even though the dependent is not a child or stepchild of the taxpayer.

(iii) The rules provided in sections 151 and 152, with respect to the definition and qualification of an individual as a dependent, govern for the purpose of section 214. Thus, expenses for the care of a child or stepchild under the age of 13 years (for taxable years beginning before January 1, 1964, under the age of 12 years) whom the taxpayer supports are deductible even though the child or stepchild has gross income of $600 or more. On the other hand, expenses for the care of an aged parent would not be deductible if the gross income condition of section 151(e)(1)(A) is not met.

(iv) The term "dependent" does not include the spouse of a taxpayer.

* * *

(2) *Definition of care of a dependent.*

* * *

(iii) Where a portion of an expenditure is for the care of a dependent and a portion is for other unrelated purposes, a reasonable allocation shall be made and only the portion of the amount paid which is attributable to the care shall be considered an amount to which section 214 is applicable. This rule is applicable if, for example, a servant performs household duties and also cares for the children of the taxpayer. In this case, however, where one of the children is under 13 (for taxable years beginning before January 1, 1964, under 12), and the other (or others) is over such age, there need be no further allocation between the children under such age and those over such age.

* * * * *

(5) *Examples.* * * *

*Example* (2). The taxpayer, a single woman, in order to be gainfully employed employs a housekeeper who cares for the taxpayer's two children, aged 9 and 13 years, respectively, in addition to performing regular household duties of cleaning and cooking. If it is assumed that the compensation paid to the housekeeper is $1,200 during the year, and that $500 is allocated to the care of the children, a deduction of $500 is allowed under section 214. No allocation is required for purposes of determining which part of the $500 is for the care of the 9 year old child. If the expenses allocable to the care of the children were $700, the amount of the deduction would be $600, the maximum amount allowable for one dependent.

(Sec. 7805, Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805))

# Title 35—PANAMA CANAL

## Chapter I—Canal Zone Regulations

[Canal Zone Order 71]

## PART 4—OPERATION AND NAVIGATION OF PANAMA CANAL AND ADJACENT WATERS

### Miscellaneous Amendments

Effective on the day after publication in the FEDERAL REGISTER, Subpart B of Part 4 of Title 35, Code of Federal Regulations, is amended as follows:

**§ 4.19 [Amended]**

1. The last sentence of § 4.19 *Papers required by boarding officer*, is amended to read as follows: "If a vessel fails to present any one of the prescribed papers upon arrival it shall be subject to denial of entry or denial of the use of Canal Zone port and other facilities in whole or in part in accordance with § 4.21, but it shall not be subject to fine."

2. Section 4.20 is amended by adding thereto new paragraphs (q) and (r), as follows:

**§ 4.20 Papers required by boarding officer, list of.**

* * * * *

| | | |
|---|---|---|
| (q) Declaration by all vessels except ships of war of all arms and munitions aboard other than explosives declared separately | 2 | 2 |
| (r) Declaration as to vessel's port(s) of departure, destination, and ports of call, within the last three months, with the corresponding actual or approximate dates | 1 | 1 |

* * * * *

3. Section 4.21 is amended to read as follows:

**§ 4.21 Entry and clearance of vessels.**

(a) An arriving vessel shall be entered either at the port of Balboa or the port of Cristobal, depending upon the vessel's port of arrival. A vessel is entered by the Canal authorities upon the report of the boarding officer, and it is not necessary for the Master to come ashore for that purpose. In the discretion of the Port Captain at the port of entry, or such other official as may be designated by the Governor, a vessel may be denied entry, or may be denied the use, in whole or in part, of Canal Zone port facilities, for failure to have:

(1) A valid National Register;

(2) A proper clearance from its last port of call; or

(3) The cargo documents required by § 4.20.

Except in bona fide cases of distress, a vessel that is denied authorization to enter shall be denied authorization to transit the Canal and shall be required immediately to depart from Canal Zone waters. A vessel whose use of Canal Zone port facilities has been restricted pursuant to the provisions of this section shall be deemed to have been provisionally entered and its use of Canal Zone port facilities shall be contingent upon its strict adherence to the limitations imposed. For any failure to comply strictly with such limitations, such a vessel may be required, in the discretion of the cognizant Port Captain or other official designated by the Governor, to depart immediately from Canal Zone waters.

(b) Any vessel that has entered or provisionally entered the Canal Zone shall, prior to its departure therefrom, obtain clearance from the Port Captain at the port of departure or such other official as may be designated by the Governor. Clearance shall be issued only after the cognizant Port Captain or other designated official has satisfied himself that:

(1) All documents and statistical data required for entry or provisional entry by the Canal authorities respecting the vessel and its cargo and passengers have been furnished;

(2) Tolls and all other charges for services or supplies furnished by the Canal Zone Government or the Panama Canal Company have been paid or the payment secured;

(3) The vessel has complied with the quarantine, customs and exclusion laws, rules and regulations of the Canal Zone Government, and the laws, rules and regulations governing the shipping, discharging and protection of seamen.

In the case of a vessel provisionally entered, the fact of such provisional entry, and the reason therefor, shall be noted on its clearance. No clearance shall be given to a vessel to which entry has been denied.

(2 C.Z.C. section 1331, 76A Stat. 46; E.O. 9746, 11 F.R. 7329, 8 CFR 1943–1948 Comp., as amended by E.O. 10595, 20 F.R. 819, 3 CFR 242, 1954–1958 Comp)

STEPHEN AILES,

# Title 41—PUBLIC CONTRACTS

## Chapter 8—Veterans Administration

## PART 8–1—GENERAL

### Military and Departmental Specifications

In § 8–1.305–6, that portion of paragraph (a) preceding subparagraph (1) is amended to read as follows:

**§ 8–1.305–6 Military and departmental specifications.**

(a) Where Veterans Administration specifications have been promulgated, they will be used in all applicable procurement transactions. Contracting Officers will not deviate from such specifications without the prior approval of the Chief Medical Director.

* * * * *

(Sec. 205(c), 63 Stat. 390, as amended, 40 U.S.C. 486(c); sec. 210(c), 72 Stat. 1114, 38 U.S.C. 210(c))

This regulation is effective January 4, 1965, but may be observed earlier.

Approved: December 10, 1964.

By direction of the Administrator.

# Title 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

## Chapter I—Veterans Administration

## PART 12—DISPOSITION OF VETERAN'S PERSONAL FUNDS AND EFFECTS

### Miscellaneous Amendments

1. In § 12.3, paragraphs (a) (1) and (4) and (b) are amended to read as follows:

**§ 12.3 Deceased veteran's cases.**

(a) * * *

(1) If the death or absence without leave occurred during hospitalization, a complete inventory (VA Form 10–2687, Inventory of Funds and Effects) will be made of all personal effects (including those in the custody of the hospital, jewelry being worn by the deceased person, or jewelry and other effects in pockets of clothing he may have been wearing) and all funds found and moneys on deposit in Personal Funds of Patients. In the case of death of incompetent veterans after November 30, 1959, the inventory will be completed to show separately those funds deposited by the Veterans Administration in Personal Funds of Patients which were derived from gratuitous benefits under laws administered by the Veterans Administration. For purpose of determining the source of funds, expenditures from the account will be considered as having been made from gratuitous benefits, not to exceed the extent of deposits of such benefits. In the event death occurred during other than official working hours, the officer of the day and/or a representative of Nursing Service will collect and inventory all funds and personal effects on the person of the deceased beneficiary and on the ward, will carefully safeguard such property and, upon completion of the tour of duty, will turn the funds and effects over to the properly designated employees.

* * * * *

(4) Personally owned clothing or other effects (such as tooth brushes, false teeth not containing gold, etc.), which are unserviceable by reason of wear or tear or insanitary condition, and clothing in writing his or her right to the funds in favor of another heir or next of kin.

* * * * *

4. In § 12.6(a), subparagraph (3) is

In any case in which the station head does not deliver the funds and effects, because of the provisions of subparagraphs (3), (4), and (5) of this para-

graph, unless such person waives right to possession, in which event delivery will be to the person, if any, in whose favor such prior entitled person waives

limited purposes until such time as the United States mining laws have been complied with and patents issued, and subject to the condition that the United

Sec. 25, S½;
Sec. 26, N½NW¼ and SE¼;
Sec. 27, E½NW¼ and S½;
Sec. 28, SW¼;
Sec. 29, lots 1, 2, 4, E½, and E½NW¼;

(4) Personally owned clothing or other effects (such as tooth brushes, false teeth not containing gold, etc.), which are unserviceable by reason of wear or tear or insanitary condition, and clothing that had been supplied by the Government, will not be included in this inventory; instead, the unserviceable personally owned articles will be listed on a separate list, with their condition briefly described, and their disposition recommended in a separate report to the station head. The station head, if approving this recommendation, will order destruction or utilization in occupational therapy, or as wipe rags, etc., of such unserviceable articles and, when they are so destroyed or utilized, will have entered on the papers the date and nature of the disposition. The completed papers will then be placed in the correspondence file of the beneficiary. Clothing that had been supplied by the Government will be reconditioned if possible and returned to stock for issue to other eligible beneficiaries. When Government-owned clothing cannot be reconditioned it will be disposed of.

* * * * *

(b) Upon completion of the survey and inventory, the effects will be turned over to the designated employee for safekeeping. Any funds found in excess of $10 which apparently were the property of the deceased will be turned over to the details clerk and delivered immediately to the agent cashier, who shall deposit same in the account "Personal Funds of Patients." Unendorsed checks other than Treasury checks and funds not in excess of $10 will be considered personal effects and not funds and will be handled accordingly.

2. In § 12.4(a), that portion preceding subparagraph (1) is amended to read as follows:

**§ 12.4 Disposition of effects and funds to designee; exceptions.**

(a) Upon authorization by the station head or his designated representative, all funds, as defined in § 12.0 (except funds on deposit in Personal Funds of Patients derived from gratuitous benefits under laws administered by the Veterans Administration and deposited by the Veterans Administration where the veteran was incompetent at time of death), and effects will be delivered or sent to the designee of the deceased veteran if request therefor be made after death and within 90 days following the mailing of notice to such designee (see § 12.9(a)), unless:

* * * * *

3. In § 12.5, paragraph (b) is amended to read as follows:

**§ 12.5 Nondesignee cases.**

* * * * *

(b) Except where delivery is made to a designee, executor, or administrator, funds of veterans who were competent at time of death will be released to the person or persons who would ultimately be entitled to distribution under the laws of the State of the decendent's domicile. The person or persons entitled may waive in writing his or her right to the funds in favor of another heir or next of kin.

* * * * *

4. In § 12.6(a), subparagraph (3) is amended to read as follows:

**§ 12.6 Cases of living veterans.**

(a) * * *

(3) To the incompetent owner if he has no guardian; delivery, however, to the incompetent owner may be withheld and may be made to the person who is caring for such incompetent if, in the judgment of the station head or his designated representative, such delivery is to the incompetent's best interest.

* * * * *

(72 Stat. 1114; 38 U.S.C. 210)

These VA Regulations are effective the date of approval.

Approved: December 10, 1964.

By direction of the Administrator.

[SEAL] W. J. DRIVER,
*Deputy Administrator.*

## PART 12—DISPOSITION OF VETERAN'S PERSONAL FUNDS AND EFFECTS

### Miscellaneous Amendments

1. In § 12.4(a), subparagraphs (1), (3), and (6) and that portion following subparagraph (6), and paragraphs (b) and (d) are amended to read as follows:

**§ 12.4 Disposition of effects and funds to designee; exceptions.**

(a) * * *

(1) The executor or administrator of the estate of the deceased veteran shall have notified the station head or his designated representative of his desire and readiness to receive such funds or effects, in which event the station head or his designated representative will authorize delivery of all funds and effects to such executor or administrator upon receipt of appropriate documentary evidence of his qualifications and in exchange for appropriate receipts, or

* * * * *

(3) Subsequent to the naming of a designee the veteran became incompetent and his guardian revoked such designation, in which event the station head or his designated representative will deliver all funds and effects to his guardian in exchange for appropriate receipts subject to the limitation contained in paragraph (d) of this section, or

* * * * *

(6) The station head or his designated representative determines that there is reasonable ground to believe that the transfer of such possession to the designee probably would be contrary to the interests of the person legally entitled to the personal property, or there are any other special circumstances raising a serious doubt as to the propriety of such delivery to the designee.

In any case in which the station head does not deliver the funds and effects, because of the provisions of subparagraphs (3), (4), and (5) of this paragraph, he will develop all facts and refer the matter to the Chief Attorney of the regional office having jurisdiction over the area where the hospital is located, for advice as to the disposition which legally should be made of such funds and effects.

(b) When authorized by the station head or his designated representative, the effects will be delivered or shipped to the designee. If shipped at Government expense, the shipment shall be made in the most economical manner but in no case at a cost in excess of $25. If such expenses will exceed $25, the excess amount shall be paid by the consignee to the station head in advance. There will be no obligation on the Government, initially or otherwise, to pay such expenses in excess of $25.

* * * * *

(d) Upon receipt from the proper Chief Attorney of an appropriate certification that the guardianship was in full force and effect at the time of the veteran's death and that the guardian's bond is adequate, funds (other than funds deposited by the Veterans Administration in Personal Funds of Patients derived from gratuitous benefits under laws administered by the Veterans Administration) and effects of an incompetent veteran may be immediately delivered or sent to such guardian, inasmuch as the guardian had a right to possession, and he will be accountable therefor to the party entitled to receive the decedent's estate. If, however, it appears probable that decedent died without a valid will and left no person surviving entitled to inherit, the funds will not be paid to the former guardian but will be disposed of as provided in § 12.19(a). The effects will be sold, used, or destroyed, at the discretion of the station head or his designated representative.

2. Section 12.5(a) is amended to read as follows:

**§ 12.5 Nondesignee cases.**

(a) If there exists no designee at the time of death at a hospital, domiciliary, or regional office of a veteran admitted as competent, or the designee fails or refuses to claim the funds and effects as defined in § 12.0(a) within 90 days following the mailing of notice to such designee, the station head will take appropriate action to dispose of the effects to the person or persons legally entitled thereto, i.e., the executor or administrator of the decedent, or, if no notice of such an appointment has been received, to the decedent's widow, child, grandchild, mother, father, grandmother, grandfather, brother, or sister, in the order named. Subject to the applicable provisions of §§ 12.3 and 12.4, such delivery may be made at any time before the sale contemplated by § 12.9 to the designee or other person entitled under the facts of the case. Delivery will be made to the person entitled to priority as prescribed in this paragraph, unless such person waives right to possession, in which event delivery will be to the person, if any, in whose favor such prior entitled person waives right to possession. If the waiver is not in favor of a particular person or class, delivery will be to the person or persons next in order of priority under this paragraph. If in any case there be more than one person in the class entitled to priority, initially or by reason of waiver, delivery will be made only to their joint designated agent (who may, but need not, be one of the class), or to one of such class in his own behalf upon written waiver of all others of the class entitled thereto. The guardian of a minor or incompetent may waive his ward's prior right to possession.

# Title 43—PUBLIC LANDS: INTERIOR

## Chapter II—Bureau of Land Management, Department of the Interior

### APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 3513]

[Montana 058539]

### MONTANA

### Restoration of Lands to Mineral Entry

By virtue of the authority contained in section 24 of the Act of June 10, 1920 (41 Stat. 1075; 16 U.S.C. 818), as amended, and pursuant to determination DA–181–Montana of the Federal Power Commission issued February 3, 1964, it is ordered as follows:

1. Effective at 10 a.m. January 16, 1965, the following described lands within the Gallatin National Forest shall be open to appropriation under the United States mining laws (Chap. 2, Title 30, U.S.C.):

MONTANA PRINCIPAL MERIDIAN

T. 5 S., R. 4 E.,
Sec. 36, SE¼SE¼, S½SW¼SE¼ and NW¼SW¼SE¼.
Containing 70 acres.

2. Any rights claimed under the provisions of this order shall be, as prescribed in DA–181–Montana, subject to the provisions of section 24 of the Federal Power Act, supra, and further subject to the prior rights of the licensee for Federal Power Project No. 273, and its successors and assigns, to use the lands for proper purposes as contemplated in the license; subject to the condition that the locator or his successors shall use and occupy the land for mining purposes only, and no facility or activity shall be erected or conducted thereon for such limited purposes until such time as the United States mining laws have been complied with and patents issued, and subject to the condition that the United States, its permittees and licensees shall not be held liable for any damage to the improvements placed thereon resulting from the construction, operation, and maintenance of any power project works thereon.

### IDAHO

### Partly Revoking Reclamation Withdrawal, Boise Project

By virtue of the authority contained in section 3 of the Act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 416), it is ordered as follows:

1. The Departmental orders of December 5, 1902, and February 28, 1903, which withdrew lands for reclamation purposes in connection with the Boise Project, are hereby revoked so far as they affect the following-described lands;

BOISE MERIDIAN

T. 1 N., R. 7 E.,
Sec. 14, W½NW¼;
Sec. 15, NE¼NE¼.

The areas described aggregate approximately 120 acres.

2. The lands are part of the Boise National Forest. At 10:00 a.m. on January 16, 1965, they shall be open to such forms of disposition as may by law be made of national forest lands.

JOHN A. CARVER, Jr.,

[Public Land Order 3515]

[Wyoming 0309074]

### WYOMING

### Partly Revoking Reclamation Withdrawal (Lyman Project)

By virtue of the authority contained in section 3 of the Act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 416), it is ordered as follows:

1. The departmental orders of February 23, 1940, and January 6, 1940, withdrawing lands for reclamation purposes, are hereby revoked so far as they affect the following-described lands:

SIXTH PRINCIPAL MERIDIAN

T. 13 N., R. 116 W.,
Sec. 14;
Sec. 15, N½SW¼, N½SE¼, and SW¼SE¼;
Sec. 17, lots 1 to 4, inclusive E½, and E½W½;
Sec. 20;
Sec. 21, N½NE¼, SW¼NE¼, and NW¼;
Sec. 22, E½, SE¼NW¼, and E½SW¼;
Sec. 23, N½ and S½S½;
Sec. 25, S½;
Sec. 26, N½NW¼ and SE¼;
Sec. 27, E½NW¼ and S½;
Sec. 28, SW¼;
Sec. 29, lots 1, 2, 4, E½, and E½NW¼;
Sec. 32, NE¼NE¼;
Sec. 33, E½NW¼, and N½ SW¼;
Sec. 34, N½, SW¼SW¼, and NW¼SE¼.

The areas described aggregate 6,268.03 acres.

2. The lands are within the oil shale withdrawal of April 15, 1930, made by Executive Order No. 5327. At 10:00 a.m. on January 16, 1965, they shall be open to location under the United States Mining laws for metalliferous minerals.

# Title 50—WILDLIFE AND FISHERIES

## Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

### MISCELLANEOUS AMENDMENTS

Pursuant to the authority vested in the Secretary of Interior by R.S. 161 (5 U.S.C. 22), Title 50 of the Code of Federal Regulations is amended as set forth below. The features of these amendments are to conform the regulations with a change in internal organization of the Bureau of Sport Fisheries and Wildlife that abolished the Alaska Regional Office; to add ZIP Codes to mailing addresses listed in Title 50; to effect certain name changes made necessary by the issuance of Public Land Order 2951 (28 F.R. 1871); and Amendment No. 1 to Secretarial Order 2843 (29 F.R. 2654); and to delete the Snake River National Wildlife Refuge from the regulations. This latter Refuge was abolished by Public Land Order 3110 (28 F.R. 6874).

Inasmuch as these amendments involve minor editorial changes in Title 50, notice and public procedure thereon have been deemed unnecessary and the amendments shall become effective upon publication in the FEDERAL REGISTER.

### PART 2—FIELD ORGANIZATION

### PART 11—PROTECTION OF BALD EAGLES AND GOLDEN EAGLES

### PART 16—MIGRATORY BIRD PERMITS

**§§ 2.2, 11.9, 16.10 [Amended]**

1. The text following the section headings in §§ 2.2, 11.9, and 16.10 is amended to read as follows:

The geographic jurisdictions and addresses of the Bureau of Sport Fisheries and Wildlife regional offices are as follows:

(a) Pacific Region (Region 1—comprising the States of Alaska, California, Hawaii, Idaho, Montana, Nevada, Oregon, and Washington) Post Office Box 3737, Portland, Oreg., 97208.

(b) Southwest Region (Region 2—comprising the States of Arizona, Colorado, Kansas, New Mexico, Oklahoma, Texas, Utah,

**§ 16.25 Authority to issue depredation orders to permit the killing of migratory game birds.**

### PART 33—SPORT FISHING

### Chautauqua and Crab Orchard Na-

CRAB ORCHARD NATIONAL WILDLIFE REFUGE

Sport fishing on the Crab Orchard Na-

and Missouri, is permitted only on the areas designated by signs as open to

(b) Southwest Region (Region 2—comprising the States of Arizona, Colorado, Kansas, New Mexico, Oklahoma, Texas, Utah, and Wyoming) Post Office Box 1306, Albuquerque, N. Mex. 87103.

(c) North Central Region (Region 3—comprising the States of Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin) 1006 West Lake Street, Minneapolis, Minn., 55408.

(d) Southeast Region (Region 4—comprising: (1) The States of Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia; and (2) the District of Columbia, Puerto Rico, and the Virgin Islands). Peachtree-Seventh Building, Atlanta, Ga., 30323.

(e) Northeast Region (Region 5—comprising the States of Connecticut, Delaware, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and West Virginia) 59 Temple Place Boston, Mass., 02111.

## PART 14—IMPORTATION OF FEATHERS OF WILD BIRDS

2. The introductory paragraph of § 14.1(b) is amended to read as follows:

**§ 14.1 Fees and applications for importation permits.**

* * * * *

(b) All persons desiring to share in the allocation of annual import quotas of skins bearing feathers of the grey jungle fowl (Gallus sonneratii), the mandarin duck (Dendronessa galericulata), and the following species of pheasant: Lady Amherst pheasant (Chrysolophus amherstiae), golden pheasant (Chrysolophus pictus), silver pheasant (Lophura nycthemera), Reeves pheasant (Syrmaticus reevesii), blue-eared pheasant (Crossoptilon auritum), and brown-eared pheasant (Crossoptilon mantchuricum), must apply during the periods specified in § 14.2 by letter addressed to the Director, Bureau of Sport Fisheries and Wildlife, Washington, D.C., 20240. The letter must contain the following information:

* * * * *

3. The introductory paragraph of § 16.9 is amended to read as follows:

**§ 16.9 Import and export permits.**

Applications for permits to import or export wild migratory birds or their parts, nests, or eggs for purposes provided in this part shall be made by letter addressed to the Director, Bureau of Sport Fisheries and Wildlife, Washington, D.C., 20240, and shall contain the following information:

* * * * *

4. Paragraph (a) of § 16.14 is amended to read as follows:

**§ 16.14 Banding permits.**

* * * * *

(a) Applications for banding permits shall be made by letter addressed to the Director, Migratory Bird Populations Station, Laurel, Md., 20810.

* * * * *

5. The introductory paragraph of § 16.25 is amended to read as follows:

**§ 16.25 Authority to issue depredation orders to permit the killing of migratory game birds.**

Upon the receipt of evidence clearly showing that migratory game birds have accumulated in such numbers in a particular area as to cause or about to cause serious damage to agricultural, horticultural, and fish cultural interests, the Director, Bureau of Sport Fisheries and Wildlife, Washington, D.C., 20240, is authorized to issue by publication in the FEDERAL REGISTER a depredation order to permit the killing of such birds under the following conditions:

* * * * *

## PART 32—HUNTING

**§§ 32.11, 32.21 [Amended]**

6. Sections 32.11 and 32.21 are amended to change the name of the "Fort Peck Game Range," under Montana, to the "Charles M. Russell National Wildlife Range," and to delete the name "Snake River National Wildlife Refuge," under Idaho.

**§ 32.31 [Amended]**

7. Section 32.31 is amended to change the name of the "Fort Peck Game Range," under Montana, to the "Charles M. Russell National Wildlife Range."

## PART 33—SPORT FISHING

**§ 33.4 [Amended]**

8. Section 33.4 is amended to change the name of the "Fort Peck Game Range," under Montana, to the "Charles M. Russell National Wildlife Range," and to change the name "Buffalo Lakes National Wildlife Refuge," under Texas, to the "Buffalo Lake National Wildlife Refuge."

STEWART L. UDALL,
*Secretary of the Interior.*

DECEMBER 11, 1964.

[F.R. Doc. 64-12931; Filed, Dec. 16, 1964; 8:46 a.m.]

## PART 32—HUNTING

### Parker River National Wildlife Refuge, Massachusetts; Correction

In F.R. Doc. 64-10082, appearing on page 13642 of the issue for Tuesday, October 6, 1964, subparagraph (2) under special conditions should read as follows to conform with the extension of the open season for hunting geese and brant in Massachusetts.

(2) The open season for hunting geese (except snow geese) on the Canada Goose Hunting Area is from December 1, 1964 through December 5, 1964, inclusive, and from December 15, 1964 through January 9, 1965, inclusive.

THOMAS A. SCHRADER,
*Acting Regional Director,*
*Boston, Massachusetts.*

DECEMBER 10, 1964.

[F.R. Doc. 64-12930; Filed, Dec. 16, 1964; 8:46 a.m.]

## PART 33—SPORT FISHING

### Chautauqua and Crab Orchard National Wildlife Refuges, Illinois

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

**§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.**

ILLINOIS

CHAUTAUQUA NATIONAL WILDLIFE REFUGE

Sport fishing on the Chautauqua National Wildlife Refuge, Illinois, is permitted only on the areas designated by signs as open to fishing. These open areas comprising 3,700 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1006 West Lake Street, Minneapolis, Minn., 55408. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions.

(1) The open season for sport fishing on the refuge extends from 4:00 a.m. to 9:00 p.m., local time, each day during the periods: from January 1, 1965, through March 14, 1965, in designated waters of Lake Chautauqua; from January 1, 1965, through September 30, 1965, in the open area of Liverpool Lake; from March 15, 1965, through September 30, 1965, in all waters of Lake Chautauqua; and from October 1, 1965, through December 31, 1965, in designated waters of Lake Chautauqua.

(2) The use of boats, including boats powered by motors not to exceed six (6) horsepower, is permitted in the waters of Lake Chautauqua. The use of boats and motors without horsepower restriction is permitted in the waters of Liverpool Lake and the refuge borrow ditch adjacent to the main dike outside of Lake Chautauqua. Illinois boat registration and Safety Act regulations apply.

(3) The use of seines or other devices for taking minnows or other bait is prohibited.

(4) The use of live boxes is prohibited, except that owners of cottages on Lake Chautauqua may utilize them.

(5) Boats, equipment and other fishing gear may be hauled or taken across dikes only at pull-overs designated by appropriate posting.

(6) No person shall enter upon, cross over, or fish from any dike, water control structure or shoreline within the refuge except as follows: Sport fishing shall be permitted from that part of the main dike that extends for approximately 700 feet easterly from the inlet gate to the main shoreline at Boatyard No. 3, and outward from the shoreline a distance of 660 feet at each of the established boatyards on Chautauqua Lake; these areas are delineated by appropriate posting.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Part 33, and are effective through December 31, 1965.

CRAB ORCHARD NATIONAL WILDLIFE REFUGE

Sport fishing on the Crab Orchard National Wildlife Refuge, Illinois, is permitted only on the areas designated by signs as open to fishing. These open areas comprising 8,800 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1006 West Lake Street, Minneapolis, Minn., 55408. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for sport fishing on the refuge extends from January 1, 1965, through December 31, 1965, in areas designated on map as I and III; and from March 15, 1965, through September 30, 1965, daylight hours only, in area designated on map as II.

(2) The use of boats is permitted, except that no boat with motor larger than six (6) horsepower is permitted on Devils Kitchen Lake and on Little Grassy Lake.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Part 33, and are effective through December 31, 1965.

W. P. SCHAEFER,
*Acting Regional Director, Bureau of Sport Fisheries and Wildlife.*

DECEMBER 11, 1964.

## PART 33—SPORT FISHING

### Mark Twain National Wildlife Refuge, Illinois, Iowa and Missouri

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

**§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.**

ILLINOIS, IOWA AND MISSOURI

MARK TWAIN NATIONAL WILDLIFE REFUGE

Sport fishing on the Mark Twain National Wildlife Refuge, Illinois, Iowa, and Missouri, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 5,310 acres, are delineated on maps available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1006 West Lake Street, Minneapolis, Minn., 55408. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

ILLINOIS

(1) The open season for sport fishing in the Calhoun and Batchtown Units of the Mark Twain National Wildlife Refuge extends from January 1, 1965, through October 20, 1965.

(2) The open season for sport fishing in the Gardner and Keithsburg Units of the Mark Twain National Wildlife Refuge extends from April 1, 1965, through September 30, 1965.

IOWA

(1) The open season for sport fishing on the Louisa Unit of the Mark Twain National Wildlife Refuge extends from January 1, 1965, through September 30, 1965.

MISSOURI

(1) The open season for sport fishing on the Clarence Cannon National Wildlife Refuge, a unit of the Mark Twain National Wildlife Refuge, extends from January 1, 1965, through October 15, 1965. Fishing on the Clarence Cannon National Wildlife Refuge is permitted only on Bryants Creek.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Part 33, and are effective through October 20, 1965.

W. P. SCHAEFER,
*Acting Regional Director, Bureau of Sport Fisheries and Wildlife.*

DECEMBER 11, 1964.

# Proposed Rule Making

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### [ 7 CFR Part 1046 ]

[Docket No. AO–123–A28]

### MILK IN LOUISVILLE-LEXINGTON-EVANSVILLE MARKETING AREA

### Decision on Proposed Amendments to Tentative Marketing Agreement and to Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Louisville, Kentucky, on July 14–16, 1964, pursuant to notice thereof issued on June 22, 1964 (29 F.R. 8146).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Regulatory Programs, on November 16, 1964 (29 F.R. 15526; F.R. Doc. 64–11828) filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues on the record of the hearing relate to:

1. Expansion of the marketing area to include several additional counties and deletion of Montgomery County, Kentucky from the marketing area.
2. Diversion of producer milk from one pool plant to another;
3. Revision of definition of "route";
4. Provision for two accounting periods per month.
5. Classification of "waste" milk, and butterfat in dumped milk, as Class II milk;
6. Modification of shrinkage allowance with respect to interplant transfers of cream in bulk;
7. Classification of skim milk used by handler in "pancake mix" as Class II milk; and
8. Differential pricing of Class I milk and producer milk receipts at plants located in certain western Indiana counties of the marketing area and at Madisonville, Kentucky, (or, as an alternative, reduction of the Class I price differential at all regulated plants).

The notice of hearing included a proposal (No. 10) to revise the minimum marketing area route delivery performance requirements for a city plant to be fully regulated under Order No. 46. No evidence was offered on this proposal and therefore no further reference is made to the proposal and it is denied.

*Findings and conclusions.* The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Revision of the Marketing Area.* The marketing area should be expanded to include 16 additional Kentucky counties. Counties which should be added to the marketing area are Logan, Butler, Edmonson, Hart, Green, Washington, Marion, Taylor, Adair, Cumberland, Casey, Russell, Clinton, Lincoln, Pulaski, and Wayne. Montgomery County, Kentucky, should be deleted from the marketing area. The handling of milk in the proposed expanded marketing area is in the current of interstate commerce and directly burdens, obstructs or affects interstate commerce in milk and its products.

Kyana Milk Producers Association proposed adding the new territory referred to above plus Trimble County, Kentucky and the counties of Scott, Jennings and Jefferson in Indiana. Proponent contended that enlargement of the marketing area as they recommended would more nearly encompass the current sales territories of handlers in the market and is needed to insure uniform pricing on milk distributed throughout such area in the interests of both producers and handlers.

The expansion should include those areas which constitute primary distribution areas for handlers covered by the order. Distribution by Louisville-Lexington-Evansville handlers in relation to that of unregulated distributors and handlers under other Federal orders, and reasonable correspondence in quality and sanitation requirements, assist in defining the area which should be included in the marketing area.

The counties which should be added are located in central and southern Kentucky, generally between the present marketing area and the Nashville, Tennessee marketing area under Federal Order No. 98. Milk is distributed throughout this entire area by Louisville-Lexington-Evansville (Order 46) regulated handlers. In Butler, Edmonson, Marion, Washington, Lincoln and Pulaski Counties, Kentucky they supply a substantial majority of the milk sold through stores. Over 70 percent of the milk sold through such outlets (the most important distribution outlets for milk in the area) in each of these six counties is supplied by Order 46 regulated handlers. In four other counties (Russell, Casey, Green and Logan) their sales accounted for approximately 50 percent of the milk sold through stores. Remaining sales in the above counties are made by Nashville regulated handlers, partially regulated handlers under Order No. 46, or local unregulated handlers.

Such 10-county area in Kentucky thus is a major sales area for Louisville-Lexington-Evansville regulated handlers. The marketing area should be extended to cover these counties in order to assure such handlers that as to their primary areas of distribution currently unregulated competitors will not be afforded significant price advantage on milk for fluid distribution there. It is expected that including the 10 counties in the marketing area would bring under full regulation as a pool handler a now partially regulated handler from Campbellsville, Kentucky (Taylor County) and a Monticello, Kentucky distributor (Wayne County) currently unregulated. There is also an unregulated distributor at Lebanon, Kentucky (Marion County) who sells milk in this 10-county area. The record evidence is not clear, however, whether this operator is a producer-distributor making no purchases from other producers.

At present no supervised classified pricing plan prevails in the 10-county area. Unregulated and partially regulated handlers have opportunity to buy milk for sale there in fluid form at prices considerably below the Class I prices paid by regulated handlers. One instance of price advantage involves the partially regulated handler from Campbellsville, Kentucky. For example, for the first five months of 1964 (the months for which price information was submitted at the hearing), this handler purchased milk, without regard to utilization, at a price approximating the Louisville-Lexington-Evansville blended price. Dairy farmers selling milk to this handler have not consistently supplied his full plant needs and supplemental milk has been bought regularly from the Louisville-Lexington-Evansville market. A high utilization of his regular dairy farmer supply is maintained at the plant, exceeding that of the average handler in the Louisville-Lexington-Evansville market. Payment on the basis of the Order 46 blended price (which reflected an average Class I use of 73 percent of producer receipts for the first 5 months of 1964) in this circumstance on milk sold in these counties provides a significant price advantage for this distributor over Louisville-Lexington-Evansville regulated handlers.

Supplemental milk for both the Campbellsville partially regulated handler and the unregulated Monticello, Kentucky distributor has been supplied by the Kyana Milk Producers Association of Louisville. The availability of such supplies enables such distributors to avoid surplus disposal problems which are inevitable when a full year-round dairy farmer supply is maintained to fill all bottling needs and to provide an adequate reserve to meet daily and seasonal fluctuations in demand. Regulation of these distributors will enable producers who have provided a portion of the reserve supplies for them to share regularly in their Class I sales at the minimum Class I price. This is appropriate since they bear the burden of the lower prices associated with the surplus disposition

of the milk when such distributors do not require it for fluid use.

Hart, Adair, Cumberland, Clinton, Wayne and Taylor Counties also should be added to the marketing area. These counties are primary sales areas of presently regulated handlers and of handlers who will become fully regulated by their sales in the other 10 counties to be added to the marketing area. Store sales of presently regulated Louisville-Lexington-Evansville handlers plus those of the Campbellsville partially regulated handler and the Monticello distributor, both of whom would become fully regulated, are not less than 57 percent of the total in any of these counties. In two of the counties their proportions of such sales amount to over 90 percent of the total. A presently unregulated Taylor County distributor sells milk in this area also. This unregulated distributor's plant, like that of the previously mentioned partially regulated handler, is located in Campbellsville. It is expected that such distributor would become fully regulated with the inclusion of his home county in the marketing area.

Order 46 handlers, or handlers who will become fully regulated by their sales in other counties to be added to the marketing area, therefore are the dominant sellers in the six-county area. Expansion of the marketing area to cover these counties is necessary to assure such handlers that unregulated distributors will not have a price advantage in purchasing milk for distribution in their primary sales area. Orderly marketing will be promoted by inclusion of these counties since all competing distributors selling milk in such areas will be placed on a uniform minimum price basis in milk procurement, and the producers supplying milk for such counties will have opportunity to share proportionately in the proceeds from Class I sales.

The enlarged marketing area described above would more nearly encompass the primary sales areas of regulated handlers. All sales of such regulated handlers would not be covered on an in-area basis, of course, since some of their routes extend even beyond this expanded marketing area. All producer milk at such regulated plants should be subject to classification pricing under the order, however, regardless of whether it is disposed of within or outside the marketing area. Otherwise, the effect of the order would be nullified and the orderly marketing process would be jeopardized.

If only a pool handler's "in area" milk is classified, priced and pooled, a handler with sales outside the marketing area could assign any value he chose to such sales and thereby reduce the average cost of his Class I milk below that of other regulated handlers having all, or substantially all, of their Class I sales within the marketing area. In short, unless all milk of such a handler is subject to classification pricing under the order he would not, in fact, be subject to effective price regulation at all. The absence of effective classification, pricing and pooling of such milk would disrupt orderly marketing conditions within the marketing area and lead to a complete breakdown of the order.

As noted in the June 19, 1964, decision covering the Washington regional hearing on compensatory payments (29 F.R. 9002), there is no way to treat milk disposed of in the marketing area by an unregulated handler equally with producer milk other than to classify, pool and price it in a comparable manner. In the case of plants having insufficient association with the market to meet pool plant requirements, it was concluded that the inequalities resulting from pricing only the small percentage of the milk at such plants which was disposed of in the marketing area would not be serious enough to jeopardize marketing conditions within the marketing area.

However, in the case of plants which have sufficient association with the market to meet the pool plant requirements, permitting them to dispose of a portion of their receipts outside the marketing area completely free of regulation would, because of the volume of milk they dispose of in the marketing area, disrupt orderly marketing processes within the marketing area and render ineffective the classification and pricing provisions of the order. With a handler free to value a portion of his milk at any price he chose (zero if he desired) it would be impossible to enforce uniform prices to all regulated handlers on a uniform basis of payments to the producers who supply the market. It is essential, therefore, that the order price all the producer milk received at a pool plant regardless of the point of disposition.

Other proposed counties (Jefferson, Jennings and Scott Counties, Indiana, and Trimble County, Kentucky) should not be added to the marketing area. Distribution in these counties by Order 46 handlers is quite small in relation to total county sales. On the other hand, milk distribution from other nearby regulated markets tends to be of major significance. In Scott County, Indiana, for example, Louisville-Lexington-Evansville regulated handlers sell only about 16 percent of the milk while other handlers from other Federal order markets account for most of the remainder. A similar relationship exists in the other proposed counties where sales by handlers from other regulated markets exceed those of Order 46 handlers by a considerable margin. Such areas may not be considered an integral part of the primary distribution area for Order No. 46 handlers since distributors from other markets are the dominant sellers.

Only one handler selling milk in this four-county area is not fully regulated by some Federal order. This is a Madison, Indiana distributor who is partially regulated by the Louisville-Lexington-Evansville order. About three percent of this handler's milk is distributed in the present Order No. 46 marketing area. By contrast, 60 percent of his sales are in the proposed counties where other order handlers are the dominant distributors. An expansion to include these counties thus would fully regulate under Order No. 46 the partially regulated Madison, Indiana handler whose primary competition is from other regulated markets.

Should the partially regulated handler significantly further expand his sales in the Louisville-Lexington-Evansville marketing area to any great extent he would lose his status as a partially regulated handler and automatically become fully regulated. Order No. 46 handlers thus have assurance that they will not be selling milk at a disadvantage to this handler in their own primary distribution areas. In view of the foregoing, Jefferson, Jennings and Scott Counties, Indiana and Trimble County, Kentucky should not be added to the marketing area at this time.

A proposal to delete Montgomery County, Kentucky, located on the eastern edge of the marketing area, from the marketing area, was submitted by a Morehead, Kentucky handler who is currently partially regulated under the order because of his Montgomery County sales. The Morehead handler maintains that the high price he must pay to hold his producer milk supply plus the additional cost of partial regulation make it difficult for him to compete in Montgomery County and that deletion of the county is necessary to place him on reasonable price terms with regulated handlers.

Milk for this handler's plant, located between the Louisville-Lexington-Evansville and the Tri-State order marketing areas, is supplied by producers in Fleming, Bath, Montgomery and Rowan Counties. Many producers in this general area sell milk to Tri-State order regulated handlers. Because of competition from these handlers for milk, the Morehead handler has had to pay the Tri-State order blend price for the Huntington district (Charleston-Huntington district effective April 1, 1963) in order to maintain a supply of milk for his plant.

Payment of this price has increased his cost of milk to a level considerably higher than that of his Louisville-Lexington-Evansville competitors in Montgomery County for much of the year. During 1963, for example, the Tri-State order blend price for the Charleston-Huntington district averaged slightly higher than the Louisville-Lexington-Evansville Class I price. In this connection official notice is taken of the uniform price announcements of the market administrator of the Tri-State order for 1963. At times the price paid by the handler to his producers for all milk has been as much as 50 cents higher than the Order No. 46 Class I price.

With the handler's cost of producer milk at this level there is no indication that regulation of Montgomery County is necessary to insure reasonably competitive conditions in the county. There was no showing in the record that the fully regulated handlers selling in Montgomery County would be competitively disadvantaged by deletion of the county. None of the such regulated handlers appeared to oppose its deletion. In view of the foregoing, Montgomery County, Kentucky should be deleted from the marketing area.

The redefinition of the marketing area requires no change in the three-cent per hundredweight maximum rate of administrative assessment now provided in the order. Although three or four handlers will become regulated with the inclusion of the 16 additional counties, there will not be a large increase in the amount of milk priced and pooled under the order. The additional milk involved should not on the average alter the cost of administering the order. The rate of administrative assessment is subject to review, of course, and may be reduced from the three-cent per hundredweight maximum if at any time it appears that a lower rate will cover administrative expenses.

2. *Diversion of producer milk between pool plants.* A proposal to amend the order to provide for diversions of producer milk between pool plants should be adopted. When the Louisville-Lexington and Ohio Valley orders were merged to the present Louisville-Lexington-Evansville order, the provisions of those orders which permitted such inter-plant diversions were not included in the present order. This resulted in loss of flexibility in handler operations and reduced efficiency in the allocation of milk among plants in the market. To regain the efficiencies it was proposed that the provision be placed in the order at this time.

Frequently, it is convenient and economical to move milk directly from the farm to another pool plant on a temporary basis, and yet permit the producers to remain on the payroll of the plant where their milk normally is received. In most instances, operating and accounting advantages are achieved by this procedure. In the absence of provision for inter-pool plant diversions, however, such milk must be physically received at one pool plant and then transferred to the other in order for it to remain producer milk at the plant where it is customarily received. Such transfers result in additional handling and hauling expense which in no way benefits producers or handlers.

Because of the considerable variation in the types of facilities available at pool plants in the Louisville-Lexington-Evansville market, both for fluid and nonfluid uses, milk supplies must be allocated among the plants. Providing for diversion of producer milk to other pool plants on any number of days during the month would enable handlers to move all milk surplus to bottling needs to other pool plants for bottling or manufacturing without loss of identification with the pool plant of primary association. Such a provision would minimize handling and hauling costs and permit maximum flexibility in handler operations. For these reasons, provision for diversions between pool plants should be included in the order.

3. *Revision of the route definition.* The definition of "route" should be revised to make it clear that deliveries of packaged milk through distribution points to wholesale or retail outlets are to be considered route disposition under the order. It also should be specified in the order that such deliveries are to be attributed to the plant from which the Class I milk was moved through the distribution points to wholesale or retail outlets without intermediate movement to another milk plant. The wording of the present definition of route has caused some confusion concerning sales through distribution points. The revision described above will clarify the meaning of the order in this respect without changing substantively the route definition.

A further clarification of the present route definition should be made to delete that part of the definition which excludes from route disposition any milk sales to a food processing plant which uses the milk for other than fluid consumption. In view of the structure of the other sections of the order which use this provision, this language is no longer necessary.

4. *Provision for two accounting periods per month.* The proposal to permit handlers to elect two accounting periods within a month should not be adopted.

Two accounting periods were proposed by a regulated handler for the purpose of reducing the cost (insofar as the classification and pricing provisions of the order determine such cost) of importing other source milk at times when producer milk becomes short for a portion of the month. It was alleged, for example, that producer milk supplies might be adequate for Class I bottling requirements at the beginning of the month but inadequate later in the month. Multiple accounting periods were proposed to permit greater amounts of other source milk to be allocated to Class I at such times of short local supply.

Prior to August 1 the allocation provisions called for "down-allocation" to Class II milk of receipts of other source milk, i.e., producer milk received by handlers was given high priority in Class I and other source milk was assigned in sequence beginning with Class II (lower-valued class) to the extent use in such class was available to absorb it. Such allocation provisions often resulted in the down-allocation of fluid milk products which had been classified and priced as Class I milk under another Federal order. Consequently, it was possible that in certain circumstances more milk could be priced as Class I than was actually so used. For example, under the provisions for down-allocation formerly included in the Louisville-Lexington-Evansville order other source milk was assigned to any available Class II milk at the plant in the following sequence: Unpriced other source milk and any other order milk priced as as surplus under an other Federal order were first assigned to Class II. Next, five percent of producer milk was assigned to the surplus class. Lastly, both packaged (except certain sour cream and dietary products) and Class I bulk milk from other order plants were assigned to any remaining Class II milk at the plant. Under these provisions some producer milk which actually was put to surplus use in the early part of the month might be allocated to Class I even though it was not available for Class I use at the particular time during the month when producer supplies became short. Use of two accounting periods could reduce appreciably the impact of such Class II allocation on the cost of receiving other source milk purchased as Class I milk under another order.

Three decisions, all issued June 19, 1964, by the Assistant Secretary and effective August 1, 1964, official notice of which are taken, revised and integrated the allocation provisions of most milk orders. These new provisions are adopted in the Louisville-Lexington-Evansville order. Under the new provisions, a handler supplementing his producer milk supplies with packaged Class I milk from a plant under another Federal order would have 98 percent of such milk allocated to Class I and two percent to Class II. This will provide the receiving handler essentially the same classification and pricing treatment of such milk as is applied to any quantities which might move from another regulated market into this market for direct route disposition without further obligation under this order.

As to bulk fluid milk products imported from another federally regulated market, the August 1 amendments to the various orders provide generally for proration of the transferred quantity based on the marketwide utilization of milk in the receiving market.[1] Also, the transferor market order accepts the classification assignment, or allocation, of the receiving market order. Thus, the same amount of milk will be priced in the shipping market as Class I and Class II as is assigned to these classes in the receiving market. No milk will be assigned to Class II in the receiving market which is required to be paid for as Class I in the shipping market. Moreover, the quantities of bulk milk transferred between regulated markets which will be assigned to Class II are greatly reduced as compared with the prior provisions for down-allocation to the full extent of the receiving handler's Class II use.

Under such marketwide proration, the maximum quantity of bulk imports from another regulated market to meet an Order No. 46 handler's fluid requirements which would be allocated to Class II ordinarily would not exceed 30 percent of the quantity imported since the marketwide Class II use has exceeded this percentage in only three of the last 17 months (through May 1964). During the fall months when producer supplies are at the seasonal low, the Class II use of producer receipts for the market averages only about 20 percent. Marketwide proration in this manner would apply, of course, for each period if multiple accounting periods were employed. Since the same proration would apply whether there was one or more than one accounting period within the month, providing for more than one accounting period would serve little purpose with regard to receipts of milk from other order plants.

[1] In some instances the transferee-handler's percentage of Class II use may be higher than the market percentage, in which case his percentage is used. In any case, the amount allocated to Class II may not exceed the transferee-handler's volume in such class.

It would virtually never be necessary for a handler to go outside the Federal order system to obtain supplies necessary to meet a temporary shortage of local producer milk. Milk received by a handler but not subject to classification pricing under any Federal order, as pointed out in the June 19 decisions, presents a danger to the Federal order unless such milk is properly allocated, along with producer milk, to the total available utilization at the regulated plant, and is subject to an appropriate rate of payment to the producer-settlement fund when it is allocated to Class I. When such milk from unregulated plants is sold for fluid use in a Federal order market in competition with milk classified and priced under the order, means for integrating it into the regulatory scheme must be provided.

Such means was provided by the June 19 decision and subsequent order amendments. Having adopted provisions in various orders which give appropriate treatment to milk from unregulated sources throughout the order system, there is no apparent need to give further accommodation to it by adopting additional provisions to the disadvantage (in classification) of producer milk. Adoption of multiple accounting periods with respect to such milk holds open this possibility.

It may be noted in this connection that in the unlikely event a handler must obtain milk from a plant not regulated under any Federal order to supplement producer supplies, such milk would receive a classification on a pro-rata basis with all milk from regulated sources received at the plant if the receiving handler has Class I utilization of at least 80 percent for the month. In the circumstance of short producer milk supply cited by proponent, this would permit assignment of a major portion of any such imported milk directly to Class I milk even with the monthly accounting plan. The obligation to the pool on such milk in Class I is computed at the difference between the Class I price and blend price for producer milk. It is therefore concluded that no additional provisions are appropriate further to reduce order obligations on handlers with respect to supplemental supplies of other source milk received from handlers regulated by another order or from unregulated handlers. The provision for two accounting periods should not be adopted.

5. *Classification of butterfat in fluid milk products dumped.* Butterfat in fluid milk products which are dumped should be Class II milk.

A handler proposed that the order (1) permit butterfat in fluid milk products dumped to be accounted for as so disposed of and therefore to be classified as Class II milk, and (2) to include in Class II milk also any wasted product resulting from broken containers, in addition to the shrinkage of fluid milk products up to a maximum two percent which is now assignable to Class II milk.

It is concluded that butterfat in fluid milk products dumped should be Class II milk. In the case of route returns of certain fluid milk products, such as homogenized milk and milk products or chocolate milk, it is difficult and impractical to salvage the butterfat for further use unless the plant can dispose of it as livestock feed (also a Class II use). Most of the regulated plants, particularly small plants, have no facilities for the further processing of route returns into manufactured products.

Skim milk in products dumped presently may be classified as Class II milk if the market administrator has been notified in advance of the contemplated dumping action and afforded an opportunity to verify it. Likewise, the dumping of butterfat in fluid milk products should be made only on advance notification to the market administrator with opportunity given for him to verify it. With the safeguard of verification provided, there was no objection to the proposal and it is adopted on such basis.

The proposal to classify as Class II milk any "waste" milk or milk product resulting from broken containers either in the plant or on routes over and above the quantities thereof permissible as Class II under the present shrinkage allowance and dumping provisions should not be adopted.

Although handlers suffer losses when containers are broken, it is not reasonable to pass back to the producer this cost of operating a milk plant. To grant the proposal would assess against the producer a cost brought about not by lack of efficiency or responsibility on his part but by lack of efficiency or responsibility of persons or equipment over which only the handler has control. The proposal would not encourage maximum efficiency in milk handling. The handler has bought the milk on delivery to his plant. It is his problem to handle it efficiently. Moreover, it would be impracticable for the market administrator to verify each loss resulting from a container broken either in a plant or on a route.

6. *Revision of the shrinkage allowance on bulk cream.* The amount of allowable shrinkage in Class II milk with respect to interplant transfers of bulk cream should be modified.

The present order allows only 0.5 percent shrinkage in Class II milk at the transferor plant on all fluid milk products transferred in bulk to another plant, pool or nonpool. A handler proposed to limit such 0.5 percent Class II shrinkage allowance (in the first plant) to bulk transfers of fluid whole milk between pool plants. Under this proposal, transfers of other fluid milk products, either in cans or in bulk to another pool plant, would not be subject to such limitation of 0.5 percent in the transferor plant and therefore the maximum two percent allowance in Class II would be applied thereto.

Proponent witness stated that while his company is able to operate within such 0.5 percent shrinkage allowance on transfers of whole milk to other pool plants, cream frequently accrues at its pool plant and must be moved to a nonpool butter, or ice cream manufacturing, plant for processing. When this occurs, the 0.5 percent allowance is not adequate to cover the original separation of the cream in the transferor pool plant, causing "excess" losses of butterfat in most months and a resulting Class I classification of the excess amounts.

Another handler suggested a modification of the above proposal to limit the 0.5 percent shrinkage allowance on any transfers of fluid whole milk in bulk to nonpool plants as well as to other pool plants. While this provision would allow shrinkage up to two percent on bulk cream transferred to other plants, pool or nonpool, the 0.5 percent limitation would continue to apply to transfers of fluid whole milk to both pool and nonpool plants as under the present order.

Normally, a greater shrinkage is experienced in the processing operation than in the single function of receiving. The proposal for division of shrinkage between plants recognizes the separate receiving and processing functions, giving only a minor portion of the shrinkage allowance to the plant where the milk is received and without processing is shipped to other plants, and assigning the larger portion of the allowance to the plant where the milk is actually processed.

Such division of shrinkage continues to be appropriate. However, an exception should be made when the handler receives and separates the milk in the first plant and transfers the resulting cream to other plants. In such case the handler should be permitted the additional 1.5 percent allowance at the transferor-plant inasmuch as the principal processing function, as well as the receiving function, would have been performed there with respect to the milk represented by the bulk cream transfers. The record does not indicate that similar exception should apply, however, with respect to any fluid milk product other than bulk cream, and therefore the amendment adopted applies only to transfers of bulk cream.

7. *Classification of fluid milk products used in pancake mix.* Fluid milk products utilized in pancake mix should be reclassified from Class I to Class II milk.

One handler in recent months introduced to the market a product distributed under the label "pancake mix". This product, processed in the handler's regulated plant, consists principally of skim milk and commercial bakery mix (flour, yeast, sugar, etc., as indicated on the container) prepared by a large food company in the ratio of 120 pounds of fluid skim milk to each 100 pounds of bakery mix. It has a thick consistency although it will pour from its container. The handler claimed the use of such skim milk in this product, processed in his pool plant, to be a "surplus" use, and proposed that the skim milk so utilized be reclassified from Class I to Class II milk to be priced equivalent to other surplus uses.

The use of skim milk in such product is not comparable with the fluid uses of milk and skim milk which are disposed of in "fluid milk products". Once mixed the skim milk cannot be recovered from the product to be reused in fluid form. Use in the handler's plant is appropriately compared with similar product use by commercial food processors not in the business of handling fluid milk. Similar use of skim milk in pancake mix is Class II milk under the present

order when prepared by a commercial bakery or similar food processing establishment using fluid skim milk received by transfer from a regulated handler's plant. There was no opposition to the reclassification requested.

It is concluded, therefore, that the fluid milk product definition should be modified to exclude pancake mix (fluid or frozen), thus effecting the reclassification of any skim milk or butterfat used therein to Class II milk.

8. *Class I price proposals.* The proposals to reduce the Class I and uniform prices at plants located in the western portion of the marketing area should not be adopted. Also, an alternative proposal to reduce the Class I price by 25 cents on a marketwide basis should not be adopted.

Two handlers at Evansville, Indiana, joined in proposals having the principal objective of reducing the Class I and blend prices at plants in Evansville, Indiana, and in other western portions of the marketing area, by 25 cents per hundredweight. One proposal would do this by making price adjustments based on plant location. An alternative method suggested would change the stated Class I differential (over the basic formula price) in the order from $1.29 to $1.04 per hundredweight, with the effect of an across-the-board decrease in Class I prices of 25 cents at all regulated plants irrespective of location.

Another handler at Holland, Indiana, proposed that the Class I and blend prices for milk delivered to plants located at Tell City, Indiana, and at other Indiana locations within the marketing area lying west of Indiana State Highway No. 37 be reduced by 15 cents per hundredweight, as an adjustment for location.

a. *Reduction in Class I price differential.* The separate proponents had similar objectives, i.e., closer alignment of the Class I prices at their plant locations with minimum Class I prices effective under the Suburban St. Louis market order, particularly for plant locations in southeastern and southern Illinois. Proponents distribute 50 percent or more of their bottled milk throughout the western portion of the Louisville-Lexington-Evansville (Order No. 46) marketing area where certain southern Illinois handlers also distribute milk.

Proponents testified to important and growing competition for fluid milk sales within the western portion (particularly the Indiana counties) of the marketing area from Illinois handlers with milk priced under the Suburban St. Louis order. They pointed to the difference in the minimum Class I price levels applicable under the Suburban St. Louis and Louisville-Lexington-Evansville orders, contending that Suburban St. Louis handlers can purchase milk at minimum prices which proponents deem unduly out of line with minimum prices under the Louisville-Lexington-Evansville order. Because there is a seasonal differential of 40 cents from high to low in the Suburban St. Louis order Class I price and the Louisville-Lexington-Evansville order provides a "flat" Class I price differential throughout the year, there are certain months when Suburban St. Louis handlers enjoy a significantly lower price relative to Louisville-Lexington-Evansville handlers. Proponents testified that Suburban St. Louis handlers take advantage of this price difference to obtain new store accounts during the months of seasonally low prices. This, they contend, has resulted in the loss of some local wholesale accounts which were being served by proponents. They claim also that in meeting the competitive price level to hold other accounts their resale prices in the Indiana counties have been reduced.

The supply-demand adjustor in Order No. 46 reflects the relationship between producer receipts and Class I sales of handlers regulated under the order so as to increase the Class I price when sales increase relative to receipts and decrease the price when receipts increase relative to sales. This provides a price incentive to attract an adequate supply of milk for Class I use by handlers regulated under the order. The supply-demand adjustments have been substantially on the plus side since September 1962. During 1963 they averaged 19 cents per hundredweight and in the first seven months of 1964 they averaged 20 cents per hundredweight.

For the 12 months ending with June 1964 producer receipts increased 6.17 percent over the 12 months ending with June 1963 while Class I use of producer milk increased 7.47 percent for the same period. Class I utilization for the market for the 12 months immediately preceding the hearing amounted to 74.8 percent of producer receipts. Thus, it does not appear that the Class I price provisions, inclusive of the plus supply-demand adjustments since 1962, have resulted in a price level which may be considered unreasonably high in terms of attracting an adequate supply of milk for the market as a whole, including the necessary reserves to meet sales fluctuations. Such supply-sales conditions also indicate that any reduction in the Class I price level in a portion of the marketing area might necessitate an offsetting price increase in the remaining portion of the market to maintain gross returns to producers for Class I milk and thus assure an adequate supply of milk on a marketwide basis. To reduce the Class I differential by 25 cents on a marketwide basis would not be appropriate in these circumstances.

b. *Location pricing.* The Class I price structure should be one which will assure that sufficient milk will be moved to the more populous centers of this elongated marketing area to meet Class I needs. Thus, the Class I price at Evansville should be at a level which will attract a supply of milk to fulfill Class I needs at plants in that location. The proponent handlers at Evansville have expanded their sales in other areas, particularly to the south in competition with handlers regulated under the Nashville order. While inter-order competition has resulted in sales shifts it was not shown that there is a reduced need for milk for Class I use at proponents' plants because of the competition from milk under the Suburban St. Louis order. Since supplies produced close to Evansville are not adequate to meet the requirements of Evansville plants, a Class I price at that location which is somewhat higher than that applicable in the adjacent rural area of southeastern Illinois is reasonable in view of the need to attract the substantial quantities of milk needed for this urban community.

Evansville handlers receive milk from approximately 350 producers. About 200 of these producers have farms in nearby southwestern Indiana counties and the farms of about 40 producers are located about 75 miles north of Evansville in the State of Illinois. The remaining producers have their farms in Kentucky. Approximately 75 of the farms of the Kentucky producers supplying the Evansville handlers are located in Logan, Edmonson and Grayson Counties which are 80–100 miles south of Evansville.

About one-fifth of the producers now shipping milk to Evansville handlers, mainly those located in the south-central Kentucky counties of Logan, Edmonson and Grayson, are located as near or nearer to Nashville or Louisville than to Evansville. Evansville handlers thus compete for about 20 percent of their supplies of milk in production areas which are closer to other plants under the Louisville-Lexington-Evansville and Nashville orders, at which Class I or blend price levels would not be affected by proponents proposed change in location adjustments. It is reasonable to expect that these producers would ship their milk to such other outlets where prices would be higher in the event the price at Evansville were lowered appreciably. Since Evansville handlers indicated a Class I utilization higher than the market average, it must be presumed that any significant loss of such producers because of an uncompetitive blend price level would require them to seek other supplies.

The Evansville handlers did not demonstrate, however, that other supplies of milk were available to them at lower prices. The only evidence of the cost of alternative supplies was a reference to two loads of milk brought into the market from Wisconsin during October 1963. The net cost of this milk was stated to be 40 cents per hundredweight above the Order No. 46 Class I price (including a plus 27-cents supply-demand adjustment). It should be pointed out in this connection, however, that the seasonal Class I differential under the Chicago order (the supply source) is at its highest seasonal level in October. There was no evidence that there is milk available to them at lower cost from the nearby Suburban St. Louis market or that producers who now ship to that market are readily available for association with the Evansville market even though the minimum blend price at Evansville is higher than at southern Illinois plants under the Suburban St. Louis order.

Plants at Madisonville, Russellville, Hopkinsville and Bowling Green have generally common supply and sales areas. It is doubtful that the Madisonville and Russellville plants under Order No. 46 could attract supplies of milk at the prices which would result under this proposal since the Class I and blend prices at such locations would be significantly lower than prices applicable at the nearby plants in Hopkinsville and Bowling Green, Kentucky, under the Paducah and Nashville orders, respectively.

While not to the same degree, the proposal of the handler at Holland, Indiana, for a 15-cent location adjustment at plants in certain locations in the Indiana portion of the marketing area would result in price misalignment if adopted for the Evansville and Madisonville locations as well as for the Holland area. If adopted only for a more confined area such as Holland and Tell City, it would create misalignments between Order No. 46 plants, that is, between the Holland plant and plants at Evansville, Indiana, and Owensboro, Kentucky. Thus, this proposal likewise would tend to shift price differences to new locations with little apparent improvement in marketing conditions for either handlers or producers.

In view of the foregoing, we may not conclude that the Class I price at Evansville should be reduced. This hearing did not open up, of course, reconsideration of the pricing structure of the Suburban St. Louis market. The Department announced on November 5, 1964, however, it would review the Class I price level of the latter market and the scope of the marketing area regulated. All interested parties are invited to submit proposals for review at an early hearing. Thus, further opportunity is provided to consider whether the alignment of Suburban St. Louis prices with prices in adjacent markets may be improved.

It was requested in the exceptions that a final decision on the Class I price issue only be delayed until after the Suburban St. Louis hearing. The handler contended that the findings and conclusions on Class I pricing should be reconsidered in light of whatever evidence is adduced at that hearing. He maintained that such evidence might provide a basis for both raising the Suburban St. Louis Class I price and lowering the Class I price in the western portion of the Louisville-Lexington-Evansville marketing area.

The evidence on marketing conditions obtained at this hearing does not warrant any decrease in the Order No. 46 Class I price at this time. No good purpose would be served by delaying issuance of a final decision on the Class I price issue. The Class I price level remains the same whether or not the order included as part of this decision becomes effective since the present order Class I price provisions are not changed by any amendment included in this decision. The request therefore must be denied.

*Rulings on proposed findings and conclusions.* Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

*General findings.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held;

(d) All milk and milk products handled by handlers, as defined in the tentative marketing agreement and the order, as hereby proposed to be amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(e) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his prorata share of such expense, three cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to: producer milk and milk received from a cooperative association as a handler pursuant to § 1046.8(c); other source milk allocated to Class I pursuant to § 1046.46(a) (3) and (7) and the corresponding steps of § 1046.46(b); and Class I milk disposed of from a partially regulated distributing plant on routes in the marketing area that exceeds Class I milk received during the month at such plant from pool plants and other order plants.

*Rulings on exceptions.* In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

*Marketing agreement and order.* Annexed hereto and made a part hereof are two documents entitled respectively, "Marketing Agreement Regulating the Handling of Milk in the Louisville-Lexington-Evansville Marketing Area", and "Order Amending the Order Regulating the Handling of Milk in the Louisville-Lexington-Evansville Marketing Area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

*It is hereby ordered,* That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

*Referendum order; determination of representative period; and designation of referendum agent.* It is hereby directed that a referendum be conducted to determine whether the issuance of the attached order, as amended and as hereby proposed to be amended, regulating the handling of milk in the Louisville - Lexington - Evansville marketing area, is approved or favored by the producers, as defined under the terms of the order, as amended and as hereby proposed to be amended, and who, during the representative period, were engaged in the production of milk for sale within the aforesaid marketing area.

The month of October 1964 is hereby determined to be the representative period for the conduct of such referendum.

J. E. Bobo is hereby designated agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders (15 F.R. 5177), such referendum to be completed on or before the 30th day from the date this decision is issued.

Signed at Washington, D.C., on December 11, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

*Order[1] Amending the Order Regulating the Handling of Milk in the Louisville-Lexington-Evansville Marketing Area*

**§ 1046.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Louisville-Lexington-Evansville marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(4) All milk and milk products handled by handlers, as defined in the order as hereby amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, three cents per hundredweight or such amount not to exceed three cents per hundredweight as the Secretary may prescribe, with respect to: (i) Producer milk and milk received from a cooperative association as a handler pursuant to § 1046.8(c); (ii) Other source milk allocated to Class I pursuant to § 1046.46(a) (3) and (7) and the corresponding steps of § 1046.46(b); and (iii) Class I milk disposed of from a partially regulated distributing plant on routes in the marketing area that exceeds Class I milk received during the month at such plant from pool plants and other order plants.

*Order relative to handling—It is therefore ordered,* That on and after the effective date hereof, the handling of milk in the Louisville-Lexington-Evansville marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended and as hereby amended, as follows:

1. Section 1046.6 is revised to read as follows:

**§ 1046.6 Louisville-Lexington-Evansville marketing area.**

The "Louisville-Lexington-Evansville marketing area", hereinafter called the "marketing area", means all the territory geographically within the counties listed below and all territory wholly or partly therein occupied by municipal corporations and institutions owned or operated by Federal, State or local governments:

INDIANA COUNTIES

| | |
|---|---|
| Clark. | Orange. |
| Crawford. | Perry. |
| Daviess. | Pike. |
| Dubois. | Posey. |
| Floyd. | Spencer. |
| Gibson. | Vanderburgh. |
| Harrison. | Warrick. |
| Knox. | Washington. |
| Martin. | |

KENTUCKY COUNTIES

| | |
|---|---|
| Adair. | Jessamine. |
| Anderson. | Larue. |
| Bourbon. | Lincoln. |
| Boyle. | Logan. |
| Breckinridge. | Madison. |
| Bullit. | Marion. |
| Butler. | McLean. |
| Casey. | Meade. |
| Clark. | Mercer. |
| Clinton. | Muhlenberg. |
| Cumberland. | Nelson. |
| Daviess. | Ohio. |
| Edmonson. | Oldham. |
| Fayette. | Pulaski. |
| Franklin. | Russell. |
| Garrard. | Scott. |
| Grayson. | Shelby. |
| Green. | Spencer. |
| Hancock. | Taylor. |
| Hardin. | Union. |
| Hart. | Washington. |
| Henderson. | Wayne. |
| Henry. | Webster. |
| Hopkins. | Woodford. |
| Jefferson. | |

2. Section 1046.14 is revised to read as follows:

**§ 1046.14 Producer milk.**

"Producer milk" means that skim milk and butterfat contained in milk of a producer which is:

(a) Received from producers at a pool plant for the account of the person operating such plant. When milk is withdrawn at more than one pool plant from the same load delivered by a farm tank pickup truck, the entire load shall be deemed to have been received at the first pool plant at which any of such milk was withdrawn unless:

(1) There is an agreement among the operators of the pool plants receiving such milk providing for other receiving handler(s) to report and pay for all or a portion of such milk; or

(2) The milk involved is that which is delivered to pool plants for the account of a cooperative association pursuant to § 1046.8(c).

(b) Diverted by a handler from a pool plant to another pool plant for any number of days of the month. Milk so diverted shall be deemed to have been received by the diverting handler at the location of the pool plant from which it is diverted.

(c) Diverted from a pool plant to a nonpool plant for the account of the operator of the pool plant or a cooperative association, subject to the following conditions:

(1) Milk so diverted shall be deemed to have been received at the pool plant from which it is diverted; and

(2) Producer milk pursuant to this paragraph shall not include the milk of any person during any of the months of October, November, January and February on days on which it is diverted by a handler to a nonpool plant in excess of 22 days (11 days in the case of every-other-day delivery) during the month.

(d) Received by a cooperative association in its capacity as a handler pursuant to § 1046.8(c).

3. Section 1046.15 is revised to read as follows:

**§ 1046.15 Fluid milk product.**

"Fluid milk product" means milk, skim milk, buttermilk, flavored milk, milk drinks (plain or flavored), reconstituted milk or skim milk, fortified milk or skim milk (including "diet" foods), cream (sweet or sour), half and half, or any mixture in fluid form of milk or skim milk and cream (except ice cream mix, frozen dessert mix, pancake mix, evaporated milk, condensed milk, aerated cream products, eggnog, and cultured sour mixtures not labeled as Grade A) which are neither sterilized nor packaged in hermetically sealed containers.

4. Section 1046.17 is revised to read as follows:

**§ 1046.17 Route.**

"Route" means delivery (including disposition from a plant store or from a distribution point and distribution by a vendor) of a fluid milk product(s) to a wholesale or retail outlet(s) other than to a milk plant(s). A delivery through a distribution point shall be attributed to the plant from which the Class I milk is moved through a distribution point to wholesale or retail outlets without intermediate movement to another milk plant.

5. In § 1046.41, paragraph (b) (4) and (7) is revised to read as follows:

**§ 1046.41 Classes of utilization.**

* * * * * *

(b) * * *

(4) Disposed of for livestock feed, or in fluid milk products dumped if the market administrator has been notified in advance and afforded the opportunity to verify such dumping.

* * * * *

(7) In shrinkage of skim milk and butterfat, respectively, assigned pursuant to § 1046.42(b) (1), but not to exceed the following:

(i) Two percent of skim milk and butterfat, respectively, physically received directly from producers' farms and by diversion from other pool plants; plus

(ii) One and one-half percent of skim milk and butterfat, respectively, in milk received at a pool plant from a cooperative association in its capacity as a handler pursuant to § 1046.8(c), except that if the handler operating such pool plant files notice with the market administrator on or before the date he submits his monthly report applicable to such milk pursuant to § 1046.30 that he is purchasing such milk on the basis of weights determined at the farm from farm bulk tank measurements, the applicable percentage shall be two percent; plus

(iii) One and one-half percent of skim milk and butterfat, respectively, in fluid milk products received at a pool plant in bulk (except bulk cream) as a transfer from other pool plants; plus

(iv) One and one-half percent of receipts of fluid milk products in bulk from an other order plant, exclusive of the quantity for which Class II utilization was requested by the operator of such plant and the handler; plus

(v) One and one-half percent of receipts of fluid milk products in bulk from unregulated supply plants, exclusive of the quantity for which Class II utilization was requested by the handler; less

(vi) One and one-half percent of skim milk and butterfat, respectively, in fluid milk products transferred in bulk (except bulk cream) from a pool plant to other plants; and plus

(vii) One-half of one percent of skim milk and butterfat, respectively, in producer milk received by a cooperative association in its capacity as a handler pursuant to § 1046.8(c), unless the exception provided in subdivision (ii) of this subparagraph applies; and

6. In § 1046.44, paragraphs (a) and (b) are revised to read as follows:

**§ 1046.44 Transfers.**

* * * * *

(a) At the utilization reported pursuant to § 1046.30 by the operator(s) of both plants, otherwise as Class I milk, if transferred or diverted by the operator of a pool plant or a cooperative association in its capacity as a handler pursuant to § 1046.8(c) to another pool plant, subject in either event to the following conditions:

(1) The skim milk or butterfat so assigned to either class shall be limited to the amount thereof remaining in such class in the transferee plant after computations pursuant to § 1046.46(a) (8) and the corresponding step of § 1046.46(b);

(2) If the transferor plant received during the month other source milk to be allocated pursuant to § 1046.46(a) (3) and the corresponding step of § 1046.46 (b), the skim milk and butterfat so transferred or diverted shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor handler received during the month other source milk to be allocated pursuant to § 1046.46(a) (7) or (8) and the corresponding steps of § 1046.46(b), the skim milk and butterfat so transferred or diverted up to the total of such receipts shall not be classified as Class I milk to a greater extent than would be applicable to a like quantity of such other source milk received at the transferee plant;

(b) If a specified utilization of skim milk and butterfat transferred or diverted to a pool plant of another handler by a cooperative association in its capacity as a handler pursuant to § 1046.8(c) is not claimed by both handlers pursuant to paragraph (a) of this section, such skim milk and butterfat shall be classified pro rata to the respective amounts remaining in each class at the pool plant of the receiving handler after making the assignment pursuant to § 1046.46(a) (8) and the corresponding step of § 1046.46(b), and after assignment of milk for which specified classification has been claimed by handlers pursuant to paragraph (a) of this section.

[F.R. Doc. 64-12932; Filed, Dec. 16, 1964; 8:46 a.m.]

# ATOMIC ENERGY COMMISSION

## [ 10 CFR Parts 30, 31, 32, 33, 34, 35, 36 ]

## LICENSING OF BYPRODUCT MATERIAL

### Proposed Recodification

Notice is hereby given that the Atomic Energy Commission is considering recodification of its regulations—"Licensing of Byproduct Material", 10 CFR Part 30 and "Radiation Safety Requirements for Radiographic Operations", 10 CFR Part 31.

In the proposed recodification, common requirements applicable to all byproduct material licensing would be retained in Part 30 while the remainder of the sections would be relocated in proposed new parts designated Parts 31,[1] 32, 33, 34, 35 and 36, each of which would be applicable to certain classes or categories of uses or users of byproduct material. The requirements of Parts 31–36 would be in addition to those of Part 30 and other applicable provisions in the Commission's regulations.

The parts as recodified would be:

Part 30—Rules of General Applicability to Licensing of Byproduct Material: This part would include licensing and related provisions which apply generally to all byproduct material users, licensees or applicants for licenses, and would include such matters as definitions; exemptions; general requirements for specific licenses; common terms and conditions of licenses; inspections, records and tests; and enforcement procedures.

Part 31—General Licenses for Certain Quantities of Byproduct Material and Byproduct Material Contained in Certain Items: This part would include general licenses for quantities of and items containing byproduct material. It would not include general licenses for export and certain of the general licenses for import, which would be set out in Part 36, or general licenses for medical uses, if any, which would be set out in Part 35.

Part 32—Specific Licenses to Manufacture, Distribute, or Import Exempted and Generally Licensed Items Containing Byproduct Material: This part would include the special requirements applicable to specific licenses to manufacture, distribute, or import byproduct material or items containing byproduct material for distribution to persons exempted under Part 30 or generally licensed under Parts 31 or 35.

Part 33—Specific Licenses of Broad Scope for Byproduct Material: This part would include provisions applicable to licenses for multiple quantities and types of byproduct material under which activities involving the use of byproduct material in processing for distribution and research and development are carried on.

Part 34—Licenses for Radiography and Radiation Safety Requirements for Radiographic Operations: This part would include the licensing requirements for use of sealed sources in radiography (presently set out in § 30.24(g) of Part 30) and the radiation safety requirements for persons holding licenses for radiography now contained in Part 31.

Part 35—Human Uses of Byproduct Material: This part would include the special requirements for (1) licensing of individual physicians for human use of byproduct material, (2) licensing of human use of byproduct material in sealed sources and (3) licensing of human use of byproduct material in institutions, now set out in § 30.24 (a), (b) and (c) of Part 30. It would also include any general licenses for human use of byproduct material.

Part 36—Export and Import of Byproduct Material: This part would include the requirements for specific licenses, the general licenses and other provisions relating to export and import of byproduct material. Proposed Part 36 does not presently contain provisions respecting import.

Each proposed recodified section is followed by a citation in brackets to the present section of the regulations upon which it is based. A cross-reference table has been placed at the end of each part to permit easy comparison of the old regulations with the new. When finally adopted, Parts 30–36 will include the substance of any applicable rules or amendments adopted and made effective during the period between the date of this notice and the effective date of the final rule.

The purpose of the recodification of Part 30 is to simplify and clarify the format of the present regulations, so that persons subject to byproduct material licensing regulations can conveniently use and understand them. No substantive changes have been made, and thus the requirements under the present regulations will not be changed by the proposed recodification. The only additions or deletions made are minor editorial changes and the elimination of repetition and of obsolete provisions. Since the proposed amendment would effect no substantive changes in the regulations, notice and public procedure thereon are not required under the Administrative Procedure Act; however, the Commission wishes to give interested parties the op-

[1] The provisions of present Part 31 would be incorporated in a Part 34, and Part 31 would be reassigned to General Licenses for Certain Quantities of Byproduct Material and Byproduct Material Contained in Certain Items. Parts 32–36 are open numbers.

portunity to submit written comments, criticisms and suggestions for improvement. Comments should be submitted to the Secretary, United States Atomic Energy Commission, Washington, D.C., 20545, within thirty (30) days after publication of this notice in the FEDERAL REGISTER. Comments received after that period will be considered if practicable to do so, but assurance of consideration cannot be given except as to comments filed within the period specified.

In consideration of the foregoing, it is proposed to amend Chapter 1 of Title 10 of the Code of Federal Regulations by deleting Parts 30 and 31 and substituting therefor new Parts 30, 31, 32, 33, 34, 35 and 36 reading as hereinafter set forth.

(Sec. 161, 68 Stat. 948; 42 U.S.C. 2201)

Dated at Germantown, Md., this 3d day of December 1964.

For the Atomic Energy Commission.

F. T. HOBBS,
*Assistant Secretary to the Commission.*

## PART 30—RULES OF GENERAL APPLICABILITY TO LICENSING OF BYPRODUCT MATERIAL

GENERAL PROVISIONS

Sec.
30.1 Purpose and scope.
30.2 Resolution of conflict.
30.3 Activities requiring license.
30.4 Definitions.
30.5 Interpretations.
30.6 Communications.

EXEMPTIONS

30.11 Exemptions from licensing.
30.12 Persons operating Commission-owned facilities.
30.13 Carriers.
30.14 Exempt concentrations.
30.15 Certain luminous timepieces.
30.16 Lock illuminators installed in automobile locks.
30.17 Balances of precision.

LICENSES

30.31 Types of licenses.
30.32 Applications for specific licenses.
30.33 General requirements for issuance of specific licenses.
30.34 Terms and conditions of licenses.
30.35 References in licenses outstanding on effective date of recodification of this part.
30.36 Expiration of licenses.
30.37 Applications for renewal of licenses.
30.38 Applications for amendment of licenses.
30.39 Commission action on applications to renew or amend.

RECORDS, INSPECTIONS AND TESTS

30.51 Records.
30.52 Inspections.
30.53 Tests.

ENFORCEMENT

30.61 Modification and revocation of licenses.
30.62 Right to withhold or recall byproduct material.
30.63 Violations.

SCHEDULES

30.70 Schedule A—Exempt concentrations.

AUTHORITY: The provisions of this Part 30 issued under sec. 161, 68 Stat. 948; 42 U.S.C. 2201. Interpret or apply secs. 81, 82, 182, 183, 68 Stat. 935, 953, 954; 42 U.S.C. 2111, 2112, 2232, 2233. For the purposes of sec. 223, 68 Stat. 958; 42 U.S.C. 2273, § 30.34(c) issued under sec. 161 b., 68 Stat. 948; 42 U.S.C. 2201 (b) and §§ 30.51 and 30.52 issued under sec. 161 p., 68 Stat. 950; 42 U.S.C. 2201(p).

GENERAL PROVISIONS

### § 30.1 Purpose and scope.

This part prescribes rules governing licensing of byproduct material under the Atomic Energy Act of 1954, as amended (68 Stat. 919), and exemptions from the licensing requirements permitted by section 81 of the Act, applicable to all persons in the United States.

[§§ 30.1, 30.2]

### § 30.2 Resolution of conflict.

The requirements of this part are in addition to, and not in substitution for, other requirements of this chapter. In any conflict between the requirements in this part and a specific requirement in another part of the regulations in this chapter, the specific requirement governs.

### § 30.3 Activities requiring license.

Except for persons exempt as provided in this part and Part 150 of this chapter, no person shall manufacture, produce, transfer, receive, acquire, own, possess, use, import or export byproduct material except as authorized in a specific or general license issued pursuant to the regulations in this chapter.

[§ 30.3]

### § 30.4 Definitions.

As used in this part and Parts 31–36 of this chapter:

(a) "Act" means the Atomic Energy Act of 1954, including any amendments thereto;

[§ 30.4(a)]

(b) Terms defined in section 11 of the Act shall have the same meaning when used in the regulations in this part and Parts 31–36 to the extent such terms are not specifically defined in this part;

[§ 30.4 (q)]

(c) "Agreement State" means any State with which the Commission has entered into an effective agreement under subsection 274 b. of the Act. "Non-agreement State" means any other State;

[§ 30.4 (u)]

(d) "Byproduct material" means any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material;

[§ 30.4(b)]

(e) "Commission" means the Atomic Energy Commission and its duly authorized representatives;

[§ 30.4 (c)]

(f) "Curie" means that amount of radioactive material which disintegrates at the rate of 37 billion atoms per second;

[§ 30.4(d)]

(g) "Government agency" means any executive department, commission, independent establishment, corporation, wholly or partly owned by the United States of America which is an instrumentality of the United States, or any board, bureau, division, service, office, officer, authority, administration, or other establishment in the executive branch of the Government;

[§ 30.4 (v)]

(h) "Human use" means the internal or external administration of byproduct material, or the radiation therefrom, to human beings;

[§ 30.4(e)]

(i) "License", except where otherwise specified means a license for byproduct material issued pursuant to the regulations in this chapter;

[§ 30.4(f)]

(j) "Microcurie" means that amount of radioactive material which disintegrates at the rate of 37 thousand atoms per second;

[§ 30.4(g)]

(k) "Person" means (1) any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than the Commission, any State or any political subdivision of, or any political entity within a State, any foreign government or nation or any political subdivision of any such government or nation, or other entity; and (2) any legal successor, representative, agent, or agency of the foregoing;

[§ 30.4(h)]

(l) "Physician" means an individual licensed by a State or territory of the United States, the District of Columbia or the Commonwealth of Puerto Rico to dispense drugs in the practice of medicine;

[§ 30.4(i)]

(m) "Production facility" means production facility as defined in the regulations contained in Part 50 of this chapter;

[§ 30.4(j)]

(n) "Radiographer" means any individual who performs or who, in attendance at the site where the sealed source or sources are being used, personally supervises radiographic operations and who is responsible to the licensee for assuring compliance with the requirements of the Commission's regulations and the conditions of the license;

[§ 30.4(r)]

(o) "Radiographer's assistant" means any individual who, under the personal supervision of a radiographer, uses radiographic exposure devices, sealed sources or related handling tools, or survey instruments in radiography;

[§ 30.4(s)]

(p) "Radiography" means the examination of the structure of materials by nondestructive methods, utilizing sealed sources of byproduct materials;

[§ 30.4(t)]

(q) "Research and development" means (1) theoretical analysis, exploration, or experimentation; or (2) the extension of investigative findings and theories of a scientific or technical nature into practical application for experimental and demonstration purposes, including the experimental production and testing of models, devices, equipment, materials and processes. "Research and development" as used in this part and Parts 31–36 does not include the internal or external administration of byproduct material, or the radiation therefrom, to human beings;

[§ 30.4(k)]

(r) "Sealed source" means any byproduct material that is encased in a capsule designed to prevent leakage or escape of the byproduct material;

[§ 30.4(l)]

(s) "Source material" means source material as defined in the regulations contained in Part 40 of this chapter;

[§ 30.4(m)]

(t) "Special nuclear material" means special nuclear material as defined in the regulations contained in Part 70 of this chapter;

[§ 30.4(n)]

(u) "United States", when used in a geographical sense, includes all territories and possessions of the United States, the Canal Zone and Puerto Rico;

[§ 30.4(o)]

(v) "Utilization facility" means a utilization facility as defined in the regulations contained in Part 50 of this chapter.

[§ 30.4(p)]

### § 30.5 Interpretations.

Except as specifically authorized by the Commission in writing, no interpretation of the meaning of the regulations in this part and Parts 31–36 by any officer or employee of the Commission other than a written interpretation by the General Counsel will be recognized to be binding upon the Commission.

[§ 30.5]

### § 30.6 Communications.

Except where otherwise specified, all communications and reports concerning the regulations in this part and Parts 31–36 and applications filed under them, should be addressed to the United States Atomic Energy Commission, Washington, D.C., 20545, Attention: Director, Division of Materials Licensing. Communications and reports may be delivered in person at the Commission's offices at 1717 H Street NW., Washington, D.C.; at 4915 St. Elmo Avenue, Bethesda, Md.; or at Germantown, Md.

EXEMPTIONS

### § 30.11 Exemptions from licensing.

The Commission may upon the application of any interested person, or upon its own initiative, exempt certain classes or quantities of byproduct material or kinds of uses or users from the requirements for a license set forth in section 81 of the Act and in the regulations in this part and Parts 31–36 when it makes a finding that the exemption of such classes or quantities of such material or such kinds of uses or users will not constitute an unreasonable risk to the common defense and security and to the health and safety of the public.

[§ 30.8]

### § 30.12 Persons operating Commission-owned facilities.

Any person is exempt from the requirements for a license set forth in section 81 or 82 of the Act and from the regulations in this part and Parts 31–36 to the extent that such person operates Commission-owned plants and laboratories on behalf of the Commission. In any such case, such person's obligations with respect to the byproduct material are covered by the applicable contract between such person and the Commission.

[§ 30.6]

### § 30.13 Carriers.

Common and contract carriers and the United States Post Office Department are exempt from the regulations in this part and Parts 31–36 and the requirements for a license set forth in section 81 of the Act to the extent that they transport byproduct material in the regular course of their business as carriers.

[§ 30.7]

### § 30.14 Exempt concentrations.

(a) Except as provided in paragraphs (c) and (d) of this section, any person is exempt from the requirements for a license set forth in section 81 of the Act and from the regulations in this part and Parts 31–36 of this chapter to the extent that such person receives, possesses, uses, transfers, owns or acquires products or materials containing byproduct material in concentrations not in excess of those listed in § 30.70.

[§ 30.9(a)]

(b) This section shall not be deemed to authorize the import of byproduct material or products containing byproduct material.

[§ 30.9(b)]

(c) A manufacturer, processor, or producer of a product or material in an agreement State is exempt from the requirements for a license set forth in section 81 of the Act and from the regulations in this part and Parts 31, 32, 33, 34 and 36, to the extent that he transfers byproduct material contained in a product or material in concentrations not in excess of those specified in § 30.70 and introduced into the product or material by a licensee holding a specific license issued by an agreement State or the Commission expressly authorizing such introduction. This exemption does not apply to the transfer of byproduct material contained in any food, beverage, cosmetic, drug, or other commodity or product designed for ingestion or inhalation by, or application to, a human being.

[§30.9(c)]

(d) Notwithstanding the provisions of this section and § 30.34(c), no person may introduce byproduct material into a product or material knowing or having reason to believe that it will be transferred to persons not licensed by the Commission or by an agreement State, except in accordance with a license issued pursuant to § 32.11 of this chapter.

[§ 30.32(f)]

### § 30.15 Certain luminous timepieces.

(a) Except for persons who apply tritium to luminous timepieces or hands or dials and persons who import for sale or distribution luminous timepieces or hands or dials containing tritium, any person is exempt from the requirements for a license set forth in section 81 of the Act and from the regulations in Parts 20 and 30–36 of this chapter to the extent that such person receives, possesses, uses, transfers, exports, owns or acquires luminous timepieces or hands or dials containing tritium.

(b) Any person who desires to apply tritum to luminous timepieces or hands or dials for sale or distribution, or desires to import for sale or distribution luminous timepieces or hands or dials containing tritium, should apply for a specific license, pursuant to § 32.14 of this chapter, which license states that the luminous timepieces or hands or dials may be distributed by the licensee to persons exempt from the regulations pursuant to paragraph (a) of this section.

[§ 30.10]

### § 30.16 Lock illuminators installed in automobile locks.

Any person is exempt from the requirements for a license set forth in section 81 of the Act and from the regulations in Parts 20 and 30–36 of this chapter to the extent that he receives, possesses, uses, transfers, exports, owns or acquires lock illuminators each containing not more than 15 millicuries of tritium installed in an automobile lock. The manufacture, installation into automobile locks, or importation for sale or distribution of lock illuminators whether or not installed in automobile locks, is not included in this exemption, but may be authorized by a specific license under the provisions of Part 32 of this chapter.

[§ 30.12]

### § 30.17 Balances of precision.

(a) Except for persons who apply tritium to balances of precision or the parts thereof and persons who import for sale or distribution balances of precision or the parts thereof containing tritium, any person is exempt from the requirements for a license set forth in section 81 of the Act and from the regulations in Parts 20 and 30–36 of this chapter to the extent that he receives, possesses, uses, transfers, exports,[1] owns or acquires such balances or balance parts, provided that each balance part contains not more

[1] Export shipment of precision balances is subject to the licensing authority and regulations of the Department of Commerce. Issuance of an exemption by the Atomic Energy Commission for export of tritium contained in balances of precision or the parts thereof does not relieve any person from complying with the licensing requirements and regulations of the Department of Commerce.

than 0.5 millicurie of tritium and each balance contains not more than 1.0 millicurie of tritium.

(b) Any person who desires to apply tritium to balances of precision or the parts thereof for sale or distribution or desires to import for sale or distribution balances of precision or the parts thereof containing tritium, should apply for a specific license, pursuant to § 32.18 of this chapter, which license states that the balances of precision or the parts thereof may be distributed by the licensee to persons exempt from the regulations pursuant to paragraph (a) of this section.

[§ 30.14]

LICENSES

### § 30.31 Types of licenses.

Licenses for byproduct material are of two types: General and specific. Specific licenses are issued to named persons upon applications filed pursuant to the regulations in this part and Parts 32–36. General licenses are effective without the filing of applications with the Commission or the issuance of licensing documents to particular persons.

[§ 30.20]

### § 30.32 Applications for specific licenses.

(a) Applications for specific licenses shall be filed on Form AEC 313, "Application for By-Product Material License", with the United States Atomic Energy Commission, 1717 H Street NW., Washington, D.C., 20545, Attention: Director, Division of Materials Licensing, and shall set forth the information called for by the form. Information contained in previous applications, statements or reports filed with the Commission may be incorporated by reference, provided that such references are clear and specific.

(b) The Commission may at any time after the filing of the original application, and before the expiration of the license, require further statements in order to enable the Commission to determine whether the application should be granted or denied or whether a license should be modified or revoked.

(c) Each application shall be signed by the applicant or licensee or a person duly authorized to act for and on his behalf.

(d) An application for license filed pursuant to the regulations in this part and Parts 32–36 will be considered also as an application for licenses authorizing other activities for which licenses are required by the Act, provided that the application specifies the additional activities for which licenses are requested and complies with regulations of the Commission as to applications for such licenses.

[§ 30.22]

### § 30.33 General requirements for issuance of specific licenses.

(a) An application for a specific license will be approved if:

(1) The application is for a purpose authorized by the Act;

(2) The applicant's proposed equipment and facilities are adequate to protect health and minimize danger to life or property;

(3) The applicant is qualified by training and experience to use the material for the purpose requested in such manner as to protect health and minimize danger to life or property; and

(4) The applicant satisfies any special requirements contained in Parts 32–36.

[§ 30.23]

(b) Upon a determination that an application meets the requirements of the Act, and the regulations of the Commission, the Commission will issue a specific license authorizing the possession and use of byproduct material (Form AEC 374, "Byproduct Material License").

[§ 30.31(a)]

### § 30.34 Terms and conditions of licenses.

(a) Each license issued pursuant to the regulations in this part and the regulations in Parts 31–36 shall be subject to all the provisions of the Act, now or hereafter in effect, and to all valid rules, regulations and orders of the Commission.

[§ 30.32(a)]

(b) No license issued or granted pursuant to the regulations in this part and Parts 31–36, nor any right under a license shall be transferred, assigned or in any manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of control of any license to any person, unless the Commission shall, after securing full information, find that the transfer is in accordance with the provisions of the Act and shall give its consent in writing.

[§§ 30.32(b), 30.38]

(c) Each person licensed by the Commission pursuant to the regulations in this part and Parts 31–46 shall confine his possession and use of the byproduct material to the locations and purposes authorized in the license. Except as otherwise provided in the license, a license issued pursuant to the regulations in this part and Parts 31–36 shall carry with it the right to receive, acquire, own, possess and import byproduct material and to transfer such material to other licensees within the United States authorized to receive such material.

[§ 30.32(c)]

(d) Each license issued pursuant to the regulations in this part and Parts 31–36 shall be deemed to contain the provisions set forth in section 183b.–d., inclusive, of the Act, whether or not these provisions are expressly set forth in the license.

[§ 30.32(d)]

(e) The Commission may incorporate, in any license issued pursuant to the regulations in this part and Parts 31–36, at the time of issuance, or thereafter by appropriate rule, regulation or order, such additional requirements and conditions with respect to the licensee's receipt, possession, use and transfer of byproduct material as it deems appropriate or necessary in order to:

(1) Promote the common defense and security;

(2) Protect health or to minimize danger to life or property;

(3) Protect restricted data;

(4) Require such reports and the keeping of such records, and to provide for such inspections of activities under the license as may be necessary or appropriate to effectuate the purposes of the Act and regulations thereunder.

[§ 30.31(b)]

### § 30.35 References in licenses outstanding on effective date of recodification of this part.

References to sections of Parts 30 and 31 and to Parts 30 and 31 in licenses outstanding on _____ shall be deemed to be references to the sections of Parts 30–36 and to Parts 30–36 superseding those denoted in the outstanding licenses.

### § 30.36 Expiration of licenses.

Except as provided in § 30.37(b), each specific license shall expire at the end of the day, in the month and year stated therein.

[§ 30.34]

### § 30.37 Applications for renewal of licenses.

(a) Applications for renewal of a specific license shall be filed in accordance with § 30.32.

(b) In any case in which a licensee, not less than thirty (30) days prior to the expiration of his existing license, has filed an application in proper form for renewal or for a new license, such existing license shall not expire until the application has been finally determined by the Commission.

[§ 30.35]

### § 30.38 Applications for amendment of licenses.

Applications for amendment of a license shall be filed in accordance with § 30.32 and shall specify the respects in which the licensee desires his license to be amended and the grounds for such amendment.

[§ 30.36]

### § 30.39 Commission action on applications to renew or amend.

In considering an application by a licensee to renew or amend his license the Commission will apply the applicable criteria set forth in § 30.33 and Parts 32–36 of this chapter.

[§ 30.37]

RECORDS, INSPECTIONS AND TESTS

### § 30.51 Records.

Each person who receives byproduct material pursuant to a license issued pursuant to the regulations in this part and Parts 31–36 shall keep records showing the receipt, transfer, export and disposal of such byproduct material.

[§ 30.41]

### § 30.52 Inspections.

(a) Each licensee shall afford to the Commission at all reasonable times opportunity to inspect byproduct material and the premises and facilities wherein byproduct material is used or stored.

(b) Each licensee shall make available to the Commission for inspection, upon reasonable notice, records kept by him pursuant to the regulations in this chapter.

[§ 30.43]

### § 30.53 Tests.

Each licensee shall perform, or permit the Commission to perform, such tests as the Commission deems appropriate or necessary for the administration of the regulations in this part and Parts 31–36, including tests of:

(a) Byproduct material,

(b) Facilities wherein byproduct material is utilized or stored,

(c) Radiation detection and monitoring instruments, and

(d) Other equipment and devices used in connection with the utilization or storage of byproduct material.

[§ 30.44]

ENFORCEMENT

### § 30.61 Modification and revocation of licenses.

(a) The terms and conditions of each license issued pursuant to the regulations in this part and Parts 31–36 shall be subject to amendment, revision or modification by reason of amendments to the Act, or by reason of rules, regulations and orders issued in accordance with the terms of the Act.

(b) Any license may be revoked, suspended or modified, in whole or in part, for any material false statement in the application or any statement of fact required under section 182 of the Act, or because of conditions revealed by such application or statement of fact or any report, record or inspection or other means which would warrant the Commission to refuse to grant a license on an original application, or for violation of, or failure to observe any of the terms and provisions of the Act or of any rule, regulation or order of the Commission.

(c) Except in cases of willfulness or those in which the public health, interest or safety requires otherwise, no license shall be modified, suspended or revoked unless, prior to the institution of proceedings therefor, facts or conduct which may warrant such action shall have been called to the attention of the licensee in writing and the licensee shall have been accorded an opportunity to demonstrate or achieve compliance with all lawful requirements.

[§ 30.51]

### § 30.62 Right to withhold or recall byproduct material.

The Commission may withhold, recall or order the withholding or recall of byproduct material from any licensee who is not equipped to observe or fails to observe such safety standards to protect health, as may be established by the Commission, or who uses such materials in violation of law or regulation of the Commission, or in a manner other than as disclosed in the application therefor or approved by the Commission.

[§ 30.52]

### § 30.63 Violations.

An injunction or other court order may be obtained prohibiting any violation of any provision of the Act or any regulation or order issued thereunder. Any person who willfully violates any provision of the Act or any regulation or order issued thereunder may be guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both, as provided by law.

[§ 30.61]

SCHEDULES

### § 30.70 Schedule A—Exempt concentrations.

| Element (atomic number) | Isotope | Column I Gas concentration uc/ml [1] | Column II Liquid and solid concentration uc/ml [2] |
|---|---|---|---|
| Antimony (51) | Sb 122 | ---------- | $3\times10^{-4}$ |
| | Sb 124 | ---------- | $2\times10^{-4}$ |
| | Sb 125 | ---------- | $1\times10^{-3}$ |
| Argon (18) | A 37 | $1\times10^{-3}$ | ---------- |
| | A 41 | $4\times10^{-7}$ | ---------- |
| Arsenic (33) | As 73 | ---------- | $5\times10^{-3}$ |
| | As 74 | ---------- | $5\times10^{-4}$ |
| | As 76 | ---------- | $2\times10^{-4}$ |
| | As 77 | ---------- | $8\times10^{-4}$ |
| Barium (56) | Ba 131 | ---------- | $2\times10^{-3}$ |
| | Ba 140 | ---------- | $3\times10^{-4}$ |
| Beryllium (4) | Be 7 | ---------- | $2\times10^{-3}$ |
| Bismuth (83) | Bi 206 | ---------- | $4\times10^{-4}$ |
| Bromine (35) | Br 82 | $4\times10^{-7}$ | $3\times10^{-3}$ |
| Cadmium (48) | Cd 109 | ---------- | $2\times10^{-3}$ |
| | Cd 115m | ---------- | $3\times10^{-4}$ |
| | Cd 115 | ---------- | $3\times10^{-4}$ |
| Calcium (20) | Ca 45 | ---------- | $9\times10^{-4}$ |
| | Ca 47 | ---------- | $5\times10^{-4}$ |
| Carbon (6) | C 14 | $1\times10^{-4}$ | $8\times10^{-3}$ |
| Cerium (58) | Ce 141 | ---------- | $9\times10^{-4}$ |
| | Ce 143 | ---------- | $4\times10^{-4}$ |
| | Ce 144 | ---------- | $1\times10^{-4}$ |
| Cesium (55) | Cs 131 | ---------- | $2\times10^{-2}$ |
| | Cs 134m | ---------- | $6\times10^{-3}$ |
| | Cs 134 | ---------- | $9\times10^{-3}$ |
| Chlorine (17) | Cl 38 | $9\times10^{-7}$ | $4\times10^{-3}$ |
| Chromium (24) | Cr 51 | ---------- | $2\times10^{-3}$ |
| Cobalt (27) | Co 57 | ---------- | $5\times10^{-3}$ |
| | Co 58 | ---------- | $1\times10^{-3}$ |
| | Co 60 | ---------- | $5\times10^{-4}$ |
| Copper (29) | Cu 64 | ---------- | $3\times10^{-3}$ |
| Dysprosium (66) | Dy 165 | ---------- | $4\times10^{-3}$ |
| | Dy 166 | ---------- | $4\times10^{-4}$ |
| Erbium (68) | Er 169 | ---------- | $9\times10^{-4}$ |
| | Er 171 | ---------- | $1\times10^{-3}$ |
| Europium (63) | Eu 152 (T/2=9.2 Hrs) | ---------- | $6\times10^{-4}$ |
| | Eu 155 | ---------- | $2\times10^{-3}$ |
| Fluorine (9) | F 18 | $2\times10^{-6}$ | $8\times10^{-3}$ |
| Gadolinium (64) | Gd 153 | ---------- | $2\times10^{-3}$ |
| | Gd 159 | ---------- | $8\times10^{-4}$ |
| Gallium (31) | Ga 72 | ---------- | $4\times10^{-4}$ |
| Germanium (32) | Ge 71 | ---------- | $2\times10^{-2}$ |
| Gold (79) | Au 196 | ---------- | $2\times10^{-3}$ |
| | Au 198 | ---------- | $5\times10^{-4}$ |
| | Au 199 | ---------- | $2\times10^{-3}$ |
| Hafnium (72) | Hf 181 | ---------- | $7\times10^{-4}$ |
| Hydrogen (1) | H 3 | $5\times10^{-6}$ | $3\times10^{-2}$ |
| Indium (49) | In 113m | ---------- | $1\times10^{-2}$ |
| | In 114m | ---------- | $2\times10^{-4}$ |
| Iodine (53) | I 126 | $3\times10^{-8}$ | $2\times10^{-3}$ |
| | I 131 | $3\times10^{-8}$ | $2\times10^{-4}$ |
| | I 132 | $8\times10^{-8}$ | $6\times10^{-4}$ |
| | I 133 | $1\times10^{-7}$ | $7\times10^{-4}$ |
| | I 134 | $2\times10^{-7}$ | $1\times10^{-3}$ |
| Iridium (77) | Ir 190 | ---------- | $2\times10^{-3}$ |
| | Ir 192 | ---------- | $4\times10^{-4}$ |
| | Ir 194 | ---------- | $3\times10^{-4}$ |
| Iron (26) | Fe 55 | ---------- | $8\times10^{-3}$ |
| | Fe 59 | ---------- | $6\times10^{-4}$ |
| Krypton (36) | Kr 85m | $1\times10^{-6}$ | ---------- |
| | Kr 85 | $3\times10^{-6}$ | ---------- |
| Lanthanum (57) | La 140 | ---------- | $2\times10^{-4}$ |
| Lead (82) | Pb 203 | ---------- | $4\times10^{-3}$ |

| | Y 91 | ---------- | $3\times10^{-4}$ |
| | Y 92 | ---------- | $6\times10^{-4}$ |
| | Y 93 | ---------- | $3\times10^{-4}$ |
| Zinc (30) | Zn 65 | ---------- | $1\times10^{-2}$ |
| | Zn 69m | ---------- | $7\times10^{-4}$ |
| | Zn 69 | ---------- | $2\times10^{-2}$ |
| Zirconium (40) | Zr 95 | ---------- | $6\times10^{-4}$ |
| | Zr 97 | ---------- | $2\times10^{-4}$ |
| Beta and/or gamma emitting byproduct material not listed above with half-life less than 3 years. | ---------- | $1\times10^{-10}$ | $1\times10^{-6}$ |

NOTE 1: Many radioisotopes disintegrate into isotopes which are also radioactive. In expressing the concentrations in Schedule A, the activity stated is that of the parent isotope and takes into account the daughters.

NOTE 2: For purposes of § 30.14 where there is involved a combination of isotopes, the limit for the combination should be derived as follows:

Determine for each isotope in the product the ratio between the concentration present in the product and the exempt concentration established in Schedule A for the specific isotope when not in combination. The sum of such ratios may not exceed "1" (i.e., unity).

Example:

$$\frac{\text{Concentration of Isotope A in Product}}{\text{Exempt concentration of Isotope A}} + \frac{\text{Concentration of Isotope B in Product}}{\text{Exempt concentration of Isotope B}} \leq 1$$

[1] Values are given only for those materials normally used as gases.

[2] uc/gm for solids.

[§ 30.73]

## PART 31—GENERAL LICENSES FOR CERTAIN QUANTITIES OF BYPRODUCT MATERIAL AND BYPRODUCT MATERIAL CONTAINED IN CERTAIN ITEMS

Sec.
31.1 Purpose and scope.
31.2 Terms and conditions.
31.3 Certain devices and equipment.
31.4 Certain quantities of byproduct material.
31.5 Certain measuring, gauging or controlling devices.
31.6 General license to install devices generally licensed in § 31.5.
31.7 Luminous safety devices for use in aircraft.
31.8 Americium 241 in the form of calibration or reference sources.
31.9 General license to own byproduct material.

SCHEDULES

31.100 Schedule A—Generally licensed quantities.

AUTHORITY: The provisions of this Part 31 issued under sec. 161, 68 Stat. 948; 42 U.S.C. 2201. Interpret or apply secs. 81, 82, 183, 68 Stat. 935, 954; 42 U.S.C. 2111, 2112, 2233. For the purpose of sec. 223, 68 Stat. 958; 42 U.S.C. 2273, § 31.2(b) issued under sec. 161b., 68 Stat. 948; 42 U.S.C. 2201(b).

### § 31.1 Purpose and scope.

This part establishes general licenses for certain quantities of byproduct material and byproduct material contained in certain items. Part 30 of this chapter also contains provisions applicable to the subject matter of this part.

### § 31.2 Terms and conditions.

(a) The general licenses provided in this part are subject to the provisions of §§ 30.14(d), 30.34 (a) through (e), 30.51 through 30.63 and Parts 20 and 36 of this chapter[1] unless indicated otherwise in the language of the general license.

(b) Persons who transfer, receive, acquire, own, possess, use or import items and quantities of byproduct material pursuant to the general licenses provided in §§ 31.3 and 31.4:

(1) Shall not effect an increase in the radioactivity of said items or quantities by adding other radioactive material thereto, by combining byproduct material from two or more such items or quantities, or by altering them in any other manner so as to increase thereby the rate of radiation therefrom;

(2) Shall not administer externally or internally, or direct the administration of, said items or quantities or any part thereof to a human being for any purpose, including, but not limited to, diagnostic, therapeutic, and research purposes;

(3) Shall not add, or direct the addition of, said items or quantities or any part thereof to any food, beverage, cosmetic, drug, or other product designed for ingestion or inhalation by, or application to, a human being;

(4) Shall not include said items or quantities or any part thereof in any device, instrument, apparatus (including component parts and accessories thereto) intended for use in diagnosis, treatment or prevention of disease in human beings or animals or otherwise intended to affect the structure or any function of the body of human beings or animals.

[§ 30.21(b)]

[1] Attention is directed particularly to the provisions of the regulations in Part 20 of this chapter which relate to the labelling of containers.

### § 31.3 Certain devices and equipment.

A general license is hereby issued to transfer, receive, acquire, own, possess and use byproduct material incorporated in the following devices or equipment which have been manufactured, tested and labeled by the manufacturer in accordance with the specifications contained in a specific license issued to him by the Commission.

(a) *Static elimination device.* Device designed for use as static eliminators which contain, as a sealed source or sources, byproduct material consisting of a total of not more than 500 microcuries of Polonium 210 per device.

(b) *Spark gap and electronic tubes.* Spark gap tubes and electronic tubes which contain byproduct material consisting of not more than 5 microcuries per tube of Cesium 137, or Nickel 63, or Krypton 85 gas, or not more than one microcurie per tube of Cobalt 60.

(c) *Light meter.* Devices designed for use in measuring or determining light intensity which contain, as a sealed source or sources, byproduct material consisting of a total of not more than 200 microcuries of Strontium 90 per device.

(d) *Ion generating tube.* Devices designed for ionization of air which contain, as a sealed source or sources, byproduct material consisting of a total of not more than 500 microcuries of Polonium 210 per device or of a total of not more than 50 millicuries of Hydrogen 3 (tritium) per device.

[§§ 30.21(a)(1) and 30.71]

### § 31.4 Certain quantities of byproduct material.

A general license is hereby issued to transfer, receive, acquire, own, possess, use and import the quantities of byproduct material listed in § 31.100, Schedule A, provided that no person shall at any one time possess or use, pursuant to the general licensing provisions of this section, more than a total of ten such scheduled quantities.

[§ 30.21(a)(2)]

### § 31.5 Certain measuring, gauging or controlling devices.

(a) Subject to the provisions of this section, a general license is hereby issued to own, receive, acquire, possess and use byproduct material when contained in devices designed and manufactured for the purpose of detecting, measuring, gauging or controlling thickness, density, level, interface location, radiation, leakage, or qualitative or quantitative chemical composition, or for producing light or an ionized atmosphere.

(b) The general license contained in this section applies only to devices which have been:

(1) Manufactured in accordance with the specifications contained in a specific license issued by the Commission to the manufacturer of the device pursuant to § 32.51 of this chapter, or in accordance with the specifications contained in a specific license issued to the manufacturer by an agreement State; and

(2) Installed on the premises of the general licensee by a person authorized to install such devices under a specific license issued to the installer by the Commission pursuant to Parts 30 and 32 or by an agreement State, provided that the specific license referred to in subparagraph (1) of this paragraph contains provisions authorizing the transfer of such devices to, and the installation of such devices in the premises of, general licensees.

(c) The general license contained in this section applies only to devices which (1) are labeled in accordance with the provisions of the specific license which authorizes the distribution of the device to general licensees, and (2) bear a label containing the following or a substantially similar statement which contains the information called for in the following statement:

This device, generally licensed pursuant to § 31.5 of 10 CFR, Part 31 [2] has been manufactured and distributed pursuant to license No. ------ issued by ---------- (insert either "Atomic Energy Commission" or name of agreement State, whichever is applicable).

----------
(Name of supplier)

(d) Persons who own, receive, acquire, possess or use a device pursuant to the general license contained in this section:

(1) Shall not transfer, abandon or dispose of the device, except by transfer to a person authorized by a specific license from the Commission or an agreement State to receive such device;

(2) Shall assure that all labels affixed to the device at the time of receipt and bearing the statement, "Removal of this label is prohibited by regulations of the Atomic Energy Commission", are maintained thereon and shall comply with all instructions contained in such labels;

(3) Shall have the device tested for leakage of radioactive material and proper operation of the on-off mechanism and indicator, if any, at no longer than six-month intervals; provided that devices containing only krypton need not be tested for leakage, and devices containing only tritium need not be tested for any purpose;

(4) Shall have the tests required by subparagraph (3) of this paragraph and all other services involving the radioactive material, its shielding and containment, performed by the supplier or other person holding a specific license from the Commission or an agreement State to manufacture, install or service such devices;

(5) Shall maintain records of all tests performed on the devices as required under this section, including the dates and results of the tests and the names of the persons conducting the tests;

(6) Upon the occurrence of a failure of or damage to, or any indication of a possible failure of or damage to, the shielding or containment of the radioactive material or the on-off mechanism or indicator, shall immediately suspend operation of the device until it has been repaired by the supplier or other person holding a specific license from the Commission or an agreement State to manufacture, install or service such devices, or disposed of by transfer to a person authorized to receive the byproduct material contained in the device; and

(7) Shall be exempt from the requirements of Part 20 of this chapter, except that such persons shall comply with the provisions of §§ 20.402 and 20.403 of this chapter.

(e) Persons who possess byproduct material pursuant to this general license shall not export such byproduct material without a specific license from the Commission authorizing such export.

[§ 30.21(c)(1)–(5)]

[2] Devices acquired not more than 8 months after ----------, may bear labels referring instead to "§ 30.21(c) of 10 CFR, Part 30," until the label is replaced.

### § 31.6 General license to install devices generally licensed in § 31.5.

Any person who holds a specific license issued by an agreement State authorizing the holder to manufacture, install or service a device described in § 31.5 within such agreement State is hereby granted a general license to install and service such device in any nonagreement State; *Provided*, That:

(a) Such person shall file a report with the United States Atomic Energy Commission, Washington, D.C., 20545, Attention: Director, Division of Materials Licensing, within 30 days after the end of each calendar quarter in which any device is transferred or installed. Each such report shall identify each general licensee under § 31.5 by name and address, the type of device transferred, and the quantity and type of byproduct material contained in the device.

(b) The device has been manufactured, labelled, installed, and serviced in accordance with applicable provisions of the specific license issued to such person by the agreement State.

(c) Such person assures that any labels required to be affixed to the device under regulations of the agreement State which licensed manufacture of the device bear a statement that "Removal of this label is prohibited by the regulations of the Atomic Energy Commission."

(d) Such person shall furnish to each general licensee to whom he transfers such device or on whose premises he installs such device a copy of the general license contained in § 31.5.

[§ 30.21(c)(6)]

### § 31.7 Luminous safety devices for use in aircraft.

(a) A general license is hereby issued to own, receive, acquire, possess and use tritium contained in luminous safety devices for use in aircraft, provided each device contains not more than four curies of tritium and that each device has been manufactured, assembled or imported in accordance with a license issued under the provisions of § 32.53 of this chapter.

(b) Persons who own, receive, acquire, possess or use luminous safety devices pursuant to the general license in this section are exempt from the requirements of Part 20 of this chapter, except that they shall comply with the provisions of §§ 20.402 and 20.403 of this chapter.

(c) This general license does not authorize the manufacture, assembly, repair or import of luminous safety devices containing tritium.

(d) This general license does not authorize the export of luminous safety devices containing tritium except in accordance with the provisions of Part 36 of this chapter.

[§ 30.21(d)]

### § 31.8 Americium 241 in the form of calibration or reference sources.

(a) A general license is hereby issued to those persons listed below to own, receive, acquire, possess, use and transfer, in accordance with the provisions of paragraphs (b) and (c) of this section, americium 241 in the form of calibration or reference sources:

(1) Any person in a non-agreement State who holds a specific license issued by the Commission which authorizes him to receive, possess, use and transfer byproduct material, source material, or special nuclear material; and

(2) Any Government agency, as defined in § 30.4(g) of this chapter, which holds a specific license issued by the Commission which authorizes it to receive, possess, use and transfer byproduct material, source material, or special nuclear material.

(b) The general license in paragraph (a) of this section applies only to calibration or reference sources which have been manufactured in accordance with the specifications contained in a specific license issued by the Commission to the manufacturer or importer of the sources pursuant to § 32.57 of this chapter or in accordance with the specifications contained in a specific license issued to the manufacturer by an agreement State which authorizes manufacture of the sources for distribution to persons generally licensed by the agreement State.

(c) The general license in paragraph (a) of this section is subject to the provisions of §§ 30.14(d), 30.34 (a) through (e), and 30.51 through 30.63 of this chapter, and to the provisions of Part 20 of this chapter. In addition, persons who own, receive, acquire, possess, use and transfer one or more calibration or reference sources pursuant to this general license:

(1) Shall not possess at any one time, at any one location of storage or use, more than 5 microcuries of americium 241 in such sources;

(2) Shall not receive, possess, use or transfer such source unless the source, or the storage container, bears a label which includes the following statement

or a substantially similar statement which contains the information called for in the following statement:

| Column No. I | Column No. II |
|---|---|

## PART 32—SPECIFIC LICENSES TO MANUFACTURE, DISTRIBUTE, OR

for the issuance of specific licenses to persons who introduce byproduct ma-

The report shall be submitted within 30 days after the end or each calendar year

### § 32.15 Certain automobile lock illuminators; requirements for li-

devices for use in aircraft, provided each

or a substantially similar statement which contains the information called for in the following statement:

**The receipt, possession, use and transfer of this source, Model ——, Serial No. ——, are subject to a general license and the regulations of the United States Atomic Energy Commission or of a State with which the Commission has entered into an agrement for the exercise of regulatory authority. Do not remove this label.**

**CAUTION — RADIOACTIVE MATERIAL — THIS SOURCE CONTAINS AMERICIUM 241. DO NOT TOUCH RADIOACTIVE PORTION OF THIS SOURCE.**

---

**(Name of manufacturer or importer)**

(3) Shall not transfer, abandon, or dispose of such source except by transfer to a person authorized by a license from the Commission or an agreement State to receive the source.

(4) Shall store such source, except when the source is being used, in a closed container adequately designed and constructed to contain americium 241 which might otherwise escape during storage.

(5) Shall not use such source for any purpose other than the calibration of radiation detectors or the standardization of other sources.

(d) This general license does not authorize the manufacture or import of calibration or reference sources containing americium 241.

(e) This general license does not authorize the export of calibration or reference sources containing americium 241.

[§ 30.21(e)]

### § 31.9 General license to own byproduct material.

A general license is hereby issued to own byproduct material without regard to quantity. Notwithstanding any other provision of this chapter, a general licensee under this paragraph is not authorized to manufacture, produce, transfer, receive, possess, use, import or export byproduct material, except as authorized in a specific license.

[§ 30.21(f)]

SCHEDULES

### § 31.100 Schedule A—Generally licensed quantities.

The following quantities of byproduct material are generally licensed pursuant to § 31.4.

| Byproduct material | Column No. I Not as a sealed source (microcuries) | Column No. II As a sealed source (microcuries) |
|---|---|---|
| Antimony (Sb 124) | 1 | 10 |
| Arsenic 76 (As 76) | 10 | 10 |
| Arsenic 77 (As 77) | 10 | 10 |
| Barium 140—Lanthanum 140 (Ba-La 140) | 1 | 10 |
| Beryllium (Be 7) | 50 | 50 |
| Cadmium 109—Silver 109 (CdAg 109) | 10 | 10 |
| Calcium 45 (Ca 45) | 10 | 10 |
| Carbon 14 (C14) | 50 | 50 |
| Cerium 144 — Praseodymium (CePr 144) | 1 | 10 |
| Cesium—Barium 137 (CsBa 137) | 1 | 10 |
| Chlorine 36 (Cl 36) | 1 | 10 |
| Chromium 51 (Cr 51) | 50 | 50 |
| Cobalt 60 (Co 60) | 1 | 10 |
| Copper 64 (Cu 64) | 50 | 50 |
| Europium 154 (Eu 154) | 1 | 10 |
| Fluorine 18 | 50 | 50 |
| Gallium 72 (Ga 72) | 10 | 10 |
| Germanium 71 (Ge 71) | 50 | 50 |
| Gold 198 (Au 198) | 10 | 10 |
| Gold 199 (Au 199) | 10 | 10 |
| Hydrogen 3 (Tritium) (H 3) | 250 | 250 |
| Indium 114 (In 114) | 1 | 10 |
| Iodine 131 (I 131) | 10 | 10 |
| Iridium 192 (Ir 192) | 10 | 10 |
| Iron 55 (Fe 55) | 50 | 50 |
| Iron 59 (Fe 59) | 1 | 10 |
| Lanthanum 140 (La 140) | 10 | 10 |
| Manganese 52 (Mn 52) | 1 | 10 |
| Manganese 56 (Mn 56) | 50 | 50 |
| Molybdenum 99 (Mo 99) | 10 | 10 |
| Nickel 59 (Ni 59) | 1 | 10 |
| Nickel 63 (Ni 63) | 1 | 10 |
| Niobium 95 (Nb 95) | 10 | 10 |
| Palladium 109 (Pd 109) | 10 | 10 |
| Palladium 103—Rhodium 103 (Pd-Rh 103) | 50 | 50 |
| Phosphorus 32 (P 32) | 10 | 10 |
| Polonium 201 (Po 210) | 0.1 | 1 |
| Potassium 42 (K–42) | 10 | 10 |
| Praseodymium 143 (Pr 143) | 10 | 10 |
| Promethium 147 (Pm 147) | 10 | 10 |
| Rhenium 186 (Re 186) | 10 | 10 |
| Rhodium 105 (Rh 105) | 10 | 10 |

## PART 32—SPECIFIC LICENSES TO MANUFACTURE, DISTRIBUTE, OR IMPORT EXEMPTED AND GENERALLY LICENSED ITEMS CONTAINING BYPRODUCT MATERIAL

Sec.

32.1 Purpose and scope.

Subpart A—Exempt Concentrations and Items

32.11 Introduction of byproduct material in exempt concentrations into products or materials, and transfer of ownership or possession: requirements for license.
32.12 Same; material transfer reports.
32.13 Same; prohibition of introduction.
32.14 Certain luminous timepieces; requirements for license to apply or import tritium.
32.15 Certain automobile lock illuminators; requirements for license to install or import.
32.16 Same; quality control.
32.17 Same; material transfer reports.
32.18 Balances of precision; requirements for license to apply or import tritium.
32.19 Same; material transfer reports.
32.40 Schedule A—Prototype tests for automobile lock illuminators.

Subpart B—Generally Licensed Items

32.51 Certain measuring, gauging or controlling devices generally licensed under § 31.5 of this chapter; requirements for license to distribute.
32.52 Same; material transfer reports.
32.53 Luminous safety devices for use in aircraft; requirements for license to manufacture, assemble, repair or import.
32.54 Same; labelling of devices.
32.55 Same; quality control; prohibition of transfer.
32.56 Same; material transfer reports.
32.57 Calibration or reference sources containing americium 241; requirements for license to manufacture or import.
32.58 Same; labelling of devices.
32.59 Same; leak testing of each source.
32.60 Same; material transfer reports.
32.101 Schedule B—Prototype tests for luminous safety devices for use in aircraft.
32.102 Schedule B—Prototype tests for calibration or reference sources containing americium 241.

Subpart C—Quality Control Sampling Procedures

32.110 Quality control sampling precedures under certain specific licenses.

AUTHORITY: The provisions of this Part 32 issued under sec. 161, 68 Stat. 948; 42 U.S.C. 2201. Interpret or apply secs. 81, 182, 183, 68 Stat. 935, 953, 954; 42 U.S.C. 2111, 2232, 2233.

### § 32.1 Purpose and scope.

(a) This part prescribes requirements for the issuance of specific licenses to persons who manufacture, distribute or import items containing byproduct material for distribution to (1) persons exempted from the licensing requirements of Part 30, or (2) persons generally licensed under Parts 31 or 35. This part also prescribes certain regulations governing holders of such licenses. In addition, this part prescribes requirements for the issuance of specific licenses to persons who introduce byproduct material into a product or material owned by or in the possession of the licensee or another and regulations governing holders of such licenses.

(b) The provisions and requirements of this part are in addition to, and not in substitution for, other requirements of this chapter. In particular, the provisions of Part 30 of this chapter apply to applications and licenses subject to this part.

## Subpart A—Exempt Concentrations and Items

### § 32.11 Introduction of byproduct material in exempt concentrations into products or materials, and transfer of ownership or possession: requirements for license.

An application for a specific license authorizing the introduction of byproduct material into a product or material owned by or in the possession of the licensee or another and the transfer of ownership or possession of the product or material containing the byproduct material will be approved if the applicant:

(a) Satisfies the general requirements specified in § 30.33 of this chapter;

(b) Provides a description of the product or material into which the byproduct material will be introduced, intended use of the byproduct material and the product or material into which it is introduced, method of introduction, initial concentration of the byproduct material in the product or material, control methods to assure that no more than the specified concentration is introduced into the product or material, estimated time interval between introduction and transfer of the product or material, and estimated concentration of the radioisotopes in the product or material at the time of transfer; and

(c) Provides reasonable assurance that the concentrations of byproduct material at the time of transfer will not exceed the concentrations in § 30.70, that reconcentration of the byproduct material in concentrations exceeding those in § 30.70 is not likely, that use of lower concentrations is not feasible, and that the product or material is not likely to be incorporated in any food, beverage, cosmetic, drug or other commodity or product designed for ingestion or inhalation by, or application to, a human being.

[§ 30.24(h)(1)]

### § 32.12 Same; material transfer reports.

Each person licensed under § 32.11 shall file a report in duplicate with the Director, Division of Materials Licensing, describing the type and quantity of each product or material into which byproduct material has been introduced during the reporting period, name and address of the person who owns or possesses the product or material into which byproduct material has been introduced, the type and quantity of byproduct material introduced into each such product or material, and the initial concentrations of byproduct material in the product or material at time of transfer of the byproduct material by the licensee. The report shall be submitted within 30 days after the end or each calendar year in which the licensee introduces byproduct material into a product or material pursuant to a license granted under § 32.11.

[§ 30.24(h)(2)]

### § 32.13 Same; prohibition of introduction.

Notwithstanding the provisions of §§ 30.14 and 30.34(c) of this chapter no person may introduce byproduct material into a product or material knowing or having reason to believe that it will be transferred to persons not licensed by the Commission or by an agreement State, except in accordance with a license issued pursuant to § 32.11.

[§30.32(f)]

### § 32.14 Certain luminous timepieces; requirements for license to apply or import tritium.

An application for a specific license to apply tritium contained in luminous compounds to timepieces or hands or dials, or to import timepieces or hands or dials containing tritium for use pursuant to § 30.15 of this chapter will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter;

(b) The applicant submits sufficient information relating to the chemical and physical composition and characteristics of the luminous compound(s), the method of application of each compound, quality control procedures and prototype testing of luminous dials, and

(c) The tritium is bound in the luminous compound in a non-water-soluble and non-labile form and the compound is bound to the dials or hands. The tritium will be considered to be properly bound to the dials and hands if there is no visible flaking or chipping and the total loss of tritium does not exceed 5 percent of the total tritium when prototype dials and hands are subjected to the following tests in the order specified below:

(1) Attachment of dials to a vibrating fixture and vibration at a rate of not less than 26 cycles per second and a vibration acceleration of not less than 2 G for a period of not less than one hour; and

(2) Attachment of the hub ends of the hands to a clamp and bending of hands over a one-inch diameter cylinder; and

(3) Total immersion of the dials and hands used in the tests described in subparagraphs (1) and (2) of this paragraph in 100 milliliters of water at room temperature for a period of 24 consecutive hours and analysis of the test water for its radioactive material content by liquid scintillation counting or other equally sensitive method.

(d) Not more than a total of 25 millicuries of tritium will be applied per timepiece; and

(e) Not more than a total of 5 millicuries of tritium will be applied per hand and not more than 15 millicuries will be applied per dial (bezels when used shall be considered as part of the dial).

[§ 30.24(i)]

### § 32.15 Certain automobile lock illuminators; requirements for license to install or import.

An application for a specific license to install lock illuminators into automobile locks, or to import for sale or distribution lock illuminators in automobile locks for use pursuant to § 30.16 of this chapter will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter;

(b) The applicant submits sufficient information regarding the lock illuminators pertinent to evaluation of the potential radiation exposure, including:

(1) Chemical and physical form and maximum quantity of tritium in each lock illuminator;

(2) Details of construction and design of the lock illuminator;

(3) Details of the method of binding or containing the tritium;

(4) Details of the method of installing the lock illuminators into the automobile lock so that the lock illuminator is not readily removable from the automobile lock;

(5) Procedures for and results of prototype testing to demonstrate that the lock illuminator will not become detached from the lock and the tritium will not be released to the environment under the most severe conditions likely to be encountered in normal use of the lock illuminator;

(6) Quality control procedures to demonstrate that production lots of the lock illuminators will meet the specifications established by the Commission for such lock illuminators;

(7) Any additional information, including experimental studies and tests, required by the Commission to facilitate determination of the safety of the lock illuminator.

(c) Each lock illuminator will contain no more than 15 millicuries of tritium;

(d) The Commission determines that:

(1) The tritium is bound in the luminous compound in a nonwater soluble and nonlabile form, and the compound is incorporated and bound in the lock illuminator in such a manner that the tritium will not be released under the most severe conditions which are likely to be encountered in normal use and handling;

(2) The tritium is incorporated in the lock illuminator so as to preclude direct physical contact by any person with the tritium;

(3) The method of installing the lock illuminator into the automobile lock is such that the lock illuminator will not become detached from the lock under the most severe conditions which are likely to be encountered in normal use and handling;

(4) The device consisting of the automobile lock with the installed lock illuminator has been subjected to the prototype tests and meets the requirements prescribed by § 32.40, Schedule A.

[§ 30.24(m)(1)(i)–(iv)]

### § 32.16 Same; quality control.

Each person licensed under § 32.15 shall:

(a) Maintain quality control in the manufacture of lock illuminators, or the

installation of lock illuminators into automobile locks;

(b) Subject production lots to such quality control tests as may be required as a condition of the license issued under this paragraph, sampled in accordance with § 32.110; and

(c) Visually inspect each device in production lots and reject any device which has an observable physical defect that could affect containment of the tritium.

[§ 30.24(m)(2)]

**§ 32.17 Same; material transfer reports.**

Each person licensed under § 32.15 shall file an annual report with the Director, Division of Materials Licensing, which shall state the total quantity of tritium transferred to other persons under § 30.16 of this chapter, during the reporting period, in the form of lock illuminators contained in automobile locks. Such report shall identify by name and address all persons to whom a total of more than 5 curies of tritium were distributed under § 30.16 of this chapter during the reporting period. Each report shall cover the year ending June 30 and shall be filed within 30 days thereafter.

[§ 30.24(m)(3)]

**§ 32.18 Balances of precision; requirements for license to apply or import tritium.**

An application for a specific license to apply tritium to balances of precision or the parts thereof, or to import balances of precision or the parts thereof containing tritium, for use pursuant to § 30.17 of this chapter will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter; and

(b) The applicant submits sufficient information regarding the balance parts pertinent to evaluation of the potential radiation exposure, including:

(1) Chemical and physical form and maximum quantity of tritium in each balance part;

(2) Details of construction and design of the balance part;

(3) Details of the method of incorporation and binding of the tritium in the balance part;

(4) Procedures for and results of prototype testing of balance parts to demonstrate that the tritium contained in each part will not be released or be removed from the part under normal conditions of use of the balance;

(5) Details of quality control procedures to be followed in the fabrication of balance parts containing tritium; and

(6) Any additional information, including experimental studies and tests, required by the Commission to facilitate determination of the safety of the balance part.

(c) Each balance part will contain no more than 0.5 millicurie of tritium and each balance will contain no more than 1.0 millicurie of tritium.

(d) The Commission determines that:

(1) The method of incorporation and binding of the tritium in the balance part is such that the tritium will not be released or be removed from the part under normal conditions of use and handling; and

(2) The tritium is incorporated or enclosed in the balance part so as to preclude direct physical contact with the tritium by any person under ordinary circumstances of use.

[§ 30.24(o)(1)]

**§ 32.19 Same; material transfer reports.**

Each person licensed under § 32.18 shall file an annual report with the Director, Division of Materials Licensing, which shall state the total quantity of tritium transferred to other persons under § 30.17 of this chapter, during the reporting period, in the form of balances of precision or the parts thereof. Each report shall cover the year ending June 30 and shall be filed within 30 days thereafter.

[§ 30.24(o)(2)]

**§ 32.40 Schedule A—Prototype tests for automobile lock illuminators.**

An applicant for a license pursuant to § 32.15 shall conduct the following prototype tests on each of five prototype devices, consisting of the automobile lock with the installed illuminator in the following order:

(a) The device shall be subjected to 100 hours of accelerated weathering in a suitable weathering machine which simulates the most severe conditions of normal use;

(b) The device shall be dropped upon a concrete or iron surface in a 3-foot free gravitational fall, or shall be subjected to an equivalent treatment in a test device simulating such a fall. The drop test shall be repeated 100 times from random orientations;

(c) The device shall be attached to a vibratory fixture and vibrated at a rate of not less than 26 cycles per second and a vibration acceleration of not less than 2 G for a period of not less than 1 hour;

(d) On completion of the foregoing tests, the device shall be immersed in 30 inches of water for 24 hours and shall show no visible evidence of water entry into the lock illuminator. Absolute pressure of the air above the water shall then be reduced to 1 inch of mercury. Lowered pressure shall be maintained for 1 minute or until air bubbles cease to be given off by the water, whichever is the longer. Pressure shall then be increased to normal atmospheric pressure. Any evidence of bubbles emanating from within the lock illuminator, or water entering the lock illuminator, shall be considered leakage;

(e) After each of the tests prescribed by this section, each device shall be examined for evidence of physical damage and for loss of tritium. Any evidence of damage to or failure of any device which could affect the containment of the tritium in such devices shall be cause for rejection of the design on which such prototype devices were constructed or manufactured if the damage or failure is attributable to design defect. Loss of tritium from each tested device shall be measured both by sampling the immersion test water used in paragraph (d) of this section and by wiping with filter paper the entire accessible area of the lock illuminator. Measurements of tritium shall be made in an apparatus calibrated to measure tritium. If more than 0.1 percent of the original amount of tritium in the device is found in the immersion test water of test (d) of this section, or if more than 2,200 disintegrations per minute of tritium on the filter paper is measured after any of the tests in (a) to (d) of this section the device shall be rejected.

[§ 30.24(m)(1)(v)(a)–(e)]

## Subpart B—Generally Licensed Items

**§ 32.51 Certain measuring gauging or controlling devices generally licensed under § 31.5 of this chapter: requirements for license to distribute.**

An application for a specific license to distribute devices, containing byproduct material, designed and manufactured for the purpose of detecting, measuring, gauging or controlling thickness, density, level, interface location, radiation, leakage, or qualitative or quantitative chemical composition, or for producing light or an ionized atmosphere, to persons generally licensed under § 31.5 of this chapter will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter; and

(b) The applicant submits sufficient information relating to the design, manufacture, prototype testing, quality control procedures, labeling, proposed uses and potential hazards of the device to provide reasonable assurance that:

(1) The byproduct material contained in the device will not be lost;

(2) No person would receive a radiation exposure to a major portion of his body in excess of 0.5 rem in a year under ordinary circumstances of use;

(3) The device can be safely operated by persons not having training in radiological protection; and

(4) The byproduct material within the device would not be accessible to unauthorized persons.

(c) In describing the label or labels and contents thereof to be affixed to the device, the applicant should separately indicate those instructions and precautions which are necessary to assure safe operation of the device. Such instructions and precautions shall be contained on labels bearing the statement, "Removal of this label prohibited by regulations of the Atomic Energy Commission."

[§ 30.24(f)]

**§ 32.52 Same: material transfer reports.**

Each licensee authorized under § 32.51 to distribute the devices described therein to generally licensed persons shall:

(a) Report to the Director, Division of Materials Licensing, all transfers of such devices to persons generally licensed under § 31.5 of this chapter. Such report shall identify each general licensee by name and address, the type of device transferred, and the quantity and type of byproduct material contained in the device. The report shall be submitted within 30 days after the end of each calendar quarter in which such a device is transferred to generally licensed persons; and

(b) Furnish to each general licensee to whom he transfers such device a copy of the general license contained in § 31.5 of this chapter.

[§ 30.32(e)]

**§ 32.53 Luminous safety devices for use in aircraft: requirements for license to manufacture, assemble, repair or import.**

An application for a specific license to manufacture, assemble, repair or import luminous safety devices containing tritium for use in aircraft, for distribution to persons generally licensed under § 31.7 of this chapter, will be approved if:

(a) The application satisfies the general requirements specified in § 30.33 of this chapter;

(b) The applicant submits sufficient information regarding each device pertinent to evaluation of the potential radiation exposure, including:

(1) Chemical and physical form and maximum quantity of tritium in each device;

(2) Details of construction and design;

(3) Details of the method of binding or containing the tritium;

(4) Procedures for and results of prototype testing to demonstrate that the tritium will not be released to the environment under the most severe conditions likely to be encountered in normal use;

(5) Any quality control procedures proposed as alternatives to those prescribed by § 32.55;

(6) Any additional information, including experimental studies and tests, required by the Commission to facilitate a determination of the safety of the device.

(c) Each device will contain no more than four curies of tritium.

(d) The Commission determines that:

(1) The method of incorporation and binding of the tritium in the device is such that the tritium will not be released under the most severe conditions which are likely to be encountered in normal use and handling of the device;

(2) The tritium is incorporated or enclosed so as to preclude direct physical contact by any person with it;

(3) The device is so designed that it cannot easily be disassembled; and

(4) The device has been subjected to and has satisfactorily passed the prototype tests prescribed by § 32.101, Schedule B.

[§ 30.24(j)(1)(i)–(iv)]

**§ 32.54 Same: labelling of devices.**

A person licensed under § 32.53 to manufacture, assemble or import devices containing tritium for distribution to persons generally licensed under § 31.7 of this chapter shall affix to each device a label which shall include the manufacturer's or importer's license number, the radiation symbol prescribed by § 20.203 (a) of this chapter, a statement that the device contains tritium and is generally licensed by the USAEC pursuant to § 31.7, and such other information as may be required by the Commission, including disposal instructions when appropriate. If the Commission determines that labelling on the device is not feasible and that an unreasonable risk to the health and safety of the public will not be created, it may dispense with the labelling of the device on condition that a leaflet bearing the prescribed information is enclosed in the container in which the device is shipped.

[§ 30.24(j)(1)(vi)]

**§ 32.55 Same: quality control: prohibition of transfer.**

(a) Each person licensed under § 32.53 shall visually inspect each device and shall reject any which has an observable physical defect that could affect containment of the tritium.

(b) Each person licensed under § 32.53 shall subject a number of devices from each production lot, sampled in accordance with § 32.110, to the following quality control procedures:

(1) Each device shall be immersed in 30 inches of water for 24 hours and shall show no visible evidence of water entry. Absolute pressure of the air above the water shall then be reduced to 1 inch of mercury. Lowered pressure shall be maintained for 1 minute or until air bubbles cease to be given off by the water, whichever is the longer. Pressure shall then be increased to normal atmospheric pressure. Any device which leaks as evidenced by bubbles emanating from within the device, or water entering the device, shall be rejected.

(2) The immersion test water from the preceding test (1) of this paragraph shall be measured for tritium content by an apparatus that has been calibrated to measure tritium. If more than 0.1 percent of the original amount of tritium in any device is found to have leaked into the immersion test water, the leaking device shall be rejected.

(c) An application for a license or for amendment of a license may include a description of quality control procedures proposed as alternatives to those prescribed by paragraph (b), and proposed criteria for acceptance under those procedures. The Commission will approve the proposed alternative procedures if the applicant demonstrates that they will assure the rejection of any device which has a leakage rate exceeding 0.1 percent of the original quantity of tritium in any 24-hour period.

(d) No person licensed under § 32.53 shall transfer to persons generally licensed under § 31.7 of this chapter any luminous safety device which has been tested and rejected under the criteria and procedures specified in this section.

[§ 30.24(j)(2)]

**§ 32.56 Same; material transfer reports.**

Each person licensed under § 32.53 shall file an annual report with the Director, Division of Materials Licensing, which shall state the total quantity of tritium transferred to persons generally licensed under § 31.7 of this chapter. The report shall identify each general licensee by name, state the kinds and numbers of luminous devices transferred, and specify the quantity of tritium in each kind of device. Each report shall cover the year ending June 30 and shall be filed within thirty (30) days thereafter.

[§ 30.24(j)(3)]

**§ 32.57 Calibration or reference sources containing americium 241: requirements for license to manufacture or import.**

An application for a specific license to manufacture or import calibration or reference sources containing americium 241, for distribution to persons generally licensed under § 31.8 of this chapter, will be approved if:

(a) The applicant satisfies the general requirements of § 30.33 of this chapter;

(b) The applicant submits sufficient information regarding each type of calibration or reference source pertinent to evaluation of the potential radiation exposure, including:

(1) Chemical and physical form and maximum quantity of americium 241 in the source;

(2) Details of construction and design;

(3) Details of the method of incorporation and binding of the americium 241 in the source;

(4) Procedures for and results of prototype testing of sources, which are designed to contain more than 0.005 microcurie of americium 241, to demonstrate that the americium 241 contained in each source will not be released or be removed from the source under normal conditions of use;

(5) Details of quality control procedures to be followed in manufacture of the source;

(6) Description of labelling to be affixed to the source or the storage container for the source;

(7) Any additional information, including experimental studies and tests, required by the Commission to facilitate a determination of the safety of the source.

(c) Each source will contain no more than 5 microcuries of americium 241.

(d) The Commission determines, with respect to any type of source containing more than 0.005 microcurie of americium 241, that:

(1) The method of incorporation and binding of the americium 241 in the source is such that the americium 241 will not be released or be removed from the source under normal conditions of use and handling of the source; and

(2) The source has been subjected to and has satisfactorily passed the prototype tests prescribed by § 32.102, Schedule C.

[§ 30.24(n)(1)(i)–(iv)]

**§ 32.58 Same: labelling of devices.**

Each person licensed under § 32.57 shall affix to each source, or storage container for the source, a label which shall contain sufficient information relative to safe use and storage of the source and shall include the following statement or a substantially similar statement which contains the information called for in the following statement:

The receipt, possession, use and transfer of this source, Model ------, Serial No. ------, are subject to a general license and the regulations of the United States Atomic Energy Commission or of a State with which the Commission has entered into an agreement for the exercise of regulatory authority. Do not remove this label.

CAUTION — RADIOACTIVE MATERIAL — THIS SOURCE CONTAINS AMERICIUM 241. DO NOT TOUCH RADIOACTIVE PORTION OF THIS SOURCE.

---

(Name of manufacturer or importer)

[§ 30.24(n)(2)]

**§ 32.59 Same; leak testing of each source.**

Each person licensed under § 32.57 shall perform a dry wipe test upon each source containing more than 0.1 microcurie of americium 241 prior to transferring the source to a general licensee under § 31.8 of this chapter. This test shall be performed by wiping the entire radioactive surface of the source with a filter paper with the application of moderate finger pressure. The radioactivity on the paper shall be measured by using radiation detection instrumentation capable of detecting 0.005 microcurie of americium 241. If any such test discloses more than 0.005 microcurie of radioactive material, the source shall be deemed to be leaking or losing americium 241 and shall not be transferred to a general licensee under § 31.8 of this chapter.

[§ 30.24(n)(3)]

**§ 32.60 Same; material transfer reports.**

Each person licensed under § 32.57 shall file an annual report with the Director, Division of Materials Licensing, which shall state the total quantity of americium 241 transferred to persons generally licensed under § 31.8 of this chapter. The report shall identify each general licensee by name and address, state the kinds and numbers of sources transferred, and specify the quantity (in microcuries) of americium 241 in each kind of source. Each report shall cover the calendar year and shall be filed within thirty (30) days after the end of each calendar year.

[§ 30.24(n)(4)]

**§ 32.101 Schedule B—Prototype tests for luminous safety devices for use in aircraft.**

An applicant for a license pursuant to § 32.53 shall conduct prototype tests on each of five prototype luminous safety devices for use in aircraft as follows:

(a) *Temperature-altitude test.* The tritium device shall be placed in a test chamber as it would be used in service. A temperature-altitude condition schedule shall be followed as outlined in the following steps:

Step 1. The internal temperature of the test chamber shall be reduced to −62° C. (−80° F.) and the device shall be maintained for at least 1 hour at this temperature at atmospheric pressure.

Step 2. The internal temperature of the test chamber shall be raised to −54° C. (−65° F.) and maintained until the temperature of the device has stabilized at −54° C. at atmospheric pressure.

Step 3. The atmospheric pressure of the chamber shall be reduced to 83 millimeters of mercury absolute pressure while the chamber temperature is maintained at −54° C.

Step 4. The internal temperature of the chamber shall be raised to −10° C. (+14° F.) and maintained until the temperature of the device has stabilized at −10° C., and the internal pressure of the chamber shall then be adjusted to atmospheric pressure. The test chamber door shall then be opened in order that frost will form on the device, and shall remain open until the frost has melted but not long enough to allow the moisture to evaporate. The door shall then be closed.

Step 5. The internal temperature of the chamber shall be raised to +85° C. (185° F.) at atmospheric pressure. The temperature of the device shall be stabilized at +85° C. and maintained for 2 hours. The device shall then be visually inspected to determine the extent of any deterioration.

Step 6. The chamber temperature shall be reduced to +71° C. (160° F.) at atmospheric pressure. The temperature of the device shall be stabilized at +71° C. for a period of 30 minutes.

Step 7. The chamber temperature shall be reduced to +55° C. (130° F.) at atmospheric pressure. The temperature of the device shall be stabilized at this temperature for a period of 4 hours.

Step 8. The internal temperature of the chamber shall be reduced to +30° C. (86° F.) and the pressure to 138 millimeters of mercury absolute pressure and stabilized. The device shall be maintained under these conditions for a period of 4 hours.

Step 9. The temperature of the test chamber shall be raised to +35° C. (95° F.) and the pressure reduced to 83 millimeters of mercury absolute pressure and stabilized. The device shall be maintained under these conditions for a period of 30 minutes.

Step 10. The internal pressure of the chamber shall be maintained at 83 millimeters of mercury absolute pressure and the temperature reduced to +20° C. (68° F.) and stabilized. The device shall be maintained under these conditions for a period of 4 hours.

(b) *Vibration tests.* This procedure applies to items of equipment (including vibration isolating assemblies) intended to be mounted directly on the structure of aircraft powered by reciprocating, turbojet, or turbo-propeller engines or to be mounted directly on gas-turbine engines. The device shall be mounted on an apparatus dynamically similar to the most severe conditions likely to be encountered in normal use. At the end of the test period, the device shall be inspected thoroughly for possible damage. Vibration tests shall be conducted under both resonant and cycling conditions according to the following Vibration Test Schedule (Table I):

VIBRATION TEST SCHEDULE

TABLE I

[Times shown refer to one axis of vibration]

| Type | Vibration at room temperature | Vibration at 160° F. (71° C.) | Vibration at −65° F. (−54° C.) |
|---|---|---|---|
| | *Minutes* | *Minutes* | *Minutes* |
| Resonance | 60 | 15 | 15 |
| Cycling | 60 | 15 | 15 |

(1) *Determination of resonance frequency.* Individual resonance frequency surveys shall be conducted by applying vibration to each device along each of any set of three mutually perpendicular axes and varying the frequency of applied vibration slowly through a range of frequencies from 5 cycles per second to 500 cycles per second with the double amplitude of the vibration not exceeding that shown in Figure 1 for the related frequency.

(2) *Resonance tests.* The device shall be vibrated at the determined resonance frequency for each axis of vibration for the periods and temperature conditions shown in Table I and with the applied double amplitude specified in Figure 1 for that resonance frequency. When more than one resonant frequency is encountered with vibration applied along any one axis, the test period may be accomplished at the most severe resonance or the period may be divided among the resonant frequencies, whichever is considered most likely to produce failure. When resonant frequencies are not apparent within the specified frequency range, the specimen shall be vibrated for periods twice as long as those shown for resonance in Table I at a frequency of 55 cycles per second and an applied double amplitude of 0.060 inch.

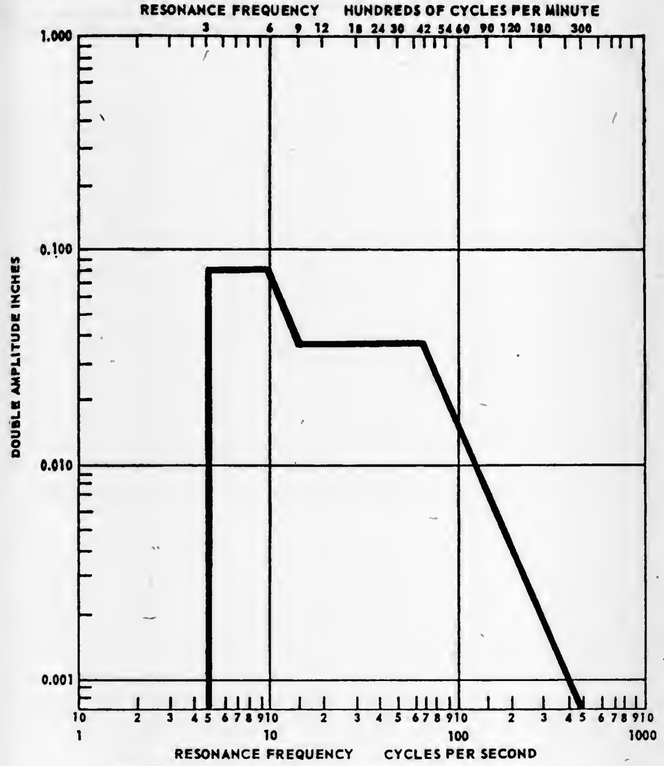

FIGURE 1—Amplitude of vibration at resonance frequency.

(3) *Cycling.* Devices to be mounted only on vibration isolators shall be tested by applying vibration along each of three mutually perpendicular axes of the device with an applied double amplitude of 0.060 inch and the frequency cycling between 10 and 55 cycles per second in 1-minute cycles for the periods and temperature conditions shown in Table I. Devices to be installed in aircraft without vibration isolators shall be tested by applying vibration along each of three mutually perpendicular axes of the device with an applied double amplitude of 0.036 inch or an applied acceleration of 10G, whichever is the limiting value, and the frequency cycling between 10 and 500 cycles per second in 15-minute cycles for the periods and temperature conditions shown in Table I.

(c) *Accelerated weathering tests.* The device shall be subjected to 100 hours of accelerated weathering in a suitable weathering machine. Panels of Corex D glass shall surround the arc to cut off the ultraviolet radiation below a wavelength of 2,700 angstroms. The light of the carbon arcs shall fall directly on the face of the device. The temperature at the sample shall be maintained at 50° C. plus or minus 3° C. Temperature measurements shall be made with a black panel thermometer.

(d) *Shock test.* The device shall be dropped upon a concrete or iron surface in a 3-foot free gravitational fall, or shall be subjected to equivalent treatment in a test device simulating such a free fall. The drop test shall be repeated 100 times from random orientations.

(e) *Hermetic seal and waterproof test.* On completion of all other tests prescribed by this section, the device shall be immersed in 30 inches of water for 24 hours and shall show no visible evidence of water entry. Absolute pressure of the air above the water shall then be reduced to 1 inch of mercury. Lowered pressure shall be maintained for 1 minute or until air bubbles cease to be given off by the water, whichever is the longer. Pressure shall then be increased to normal atmospheric pressure. Any evidence of bubbles emanating from within the device, or water entering the device, shall be considered leakage.

(f) *Observations.* After each of the tests prescribed by this section, each device shall be examined for evidence of physical damage and for loss of tritium. Any evidence of damage to or failure of any device which could affect containment of the tritium shall be cause for rejection of the design if the damage or failure is attributable to a design defect. Loss of tritium from each tested device shall be measured by wiping with filter paper an area of at least 100 square centimeters on the outside surface of the device, or by wiping the entire surface area if it is less than 100 square centimeters. The amount of tritium in the water used in the hermetic seal and waterproof test prescribed by test (e) of this section shall also be measured. Measurements shall be made in an apparatus calibrated to measure tritium. The detection on the filter paper of more than 2,200 disintegrations per minute of tritium per 100 square centimeters of surface wiped or in the water of more than 0.1 percent of the original amount of tritium in any device shall be cause for rejection of the tested device.

[§ 30.24(j)(1)(v)(a)-(f)]

**§ 32.102 Schedule C—Prototye tests for calibration or reference sources containing americium 241.**

An applicant for a license pursuant to § 32.57 shall, for any type of source which is designed to contain more than 0.005 microcurie of americium 241, conduct prototype tests, in the order listed, on each of five prototypes of such source, which contains more than 0.005 microcurie of americium 241, as follows:

(a) *Initial measurement.* The quantity of radioactive material deposited on the source shall be measured by direct counting of the source.

*Dry wipe test.* The entire radioactive surface of the source shall be wiped with filter paper with the application of moderate finger pressure. Removal of radioactive material from the source shall be determined by measuring the radioactivity on the filter paper or by direct measurement of the radioactivity on the source following the dry wipe.

(c) *Wet wipe test.* The entire radioactive surface of the source shall be wiped with filter paper, moistened with water, with the application of moderate finger pressure. Removal of radioactive material from the source shall be determined by measuring the radioactivity on the filter paper after it has dried or by direct measurement of the radioactivity on the source following the wet wipe.

(d) *Water soak test.* The source shall be immersed in water at room temperature for a period of 24 consecutive hours. The source shall then be removed from the water. Removal of radioactive material from the source shall be determined by direct measurement of the radioactivity on the source after it has dried or by measuring the radioactivity in the residue obtained by evaporation of the water in which the source was immersed.

(e) *Dry wipe test.* On completion of the preceding tests in this section, the dry wipe test described in paragraph (b) shall be repeated.

(f) *Observations.* Removal of more than 0.005 microcurie of radioactivity in any test prescribed by this section shall be cause for rejection of the source design if the damage or failure is attributable to a design defect. Sampling Table B for a lot of that size, all devices in that lot shall be sampled or the entire lot rejected. Succeeding lots

ability to comply with the operating and emergency procedures of the applicant;

(c) The applicant has established and submits to the Commission satisfactory

(f) *Observations.* Removal of more than 0.005 microcurie of radioactivity in any test prescribed by this section shall be cause for rejection of the source design. Results of prototype tests submitted to the Commission shall be given in terms of radioactivity in microcuries and percent of removal from the total amount of radioactive material deposited on the source.

[§ 30.24(n)(1)(v)]

## Subpart C—Quality Control Sampling Procedures

### § 32.110 Quality control sampling procedures under certain specific licenses.

(a) Each production lot of devices licensed under §§ 32.14, 32.15, or 32.53 shall be sampled in accordance with Sampling Table A in this section. If the permissible number of rejects specified in Sampling Table A for a lot of that size is exceeded, all devices in that lot shall be sampled or the entire lot rejected. If ten (10) or more successive lots have been tested and none of them includes a larger number of rejects than specified in Sampling Table A, the succeeding lots may be sampled in accordance with Sampling Table B in this section.

(b) If any lot sampled in accordance with Sampling Table B includes a larger number of rejects than specified in Sampling Table B for a lot of that size, all devices in that lot shall be sampled or the entire lot rejected. Succeeding lots shall be sampled in accordance with the provisions of paragraph (a) of this section.

(c) Sampling Table A:

| Lot size | Sample size | Permissible number of rejects |
|---|---|---|
| Less than 15 | All | 0 |
| 15–110 | 15 | 0 |
| 111–180 | 25 | 0 |
| 181–300 | 35 | 0 |
| 301–500 | 50 | 1 |
| 501–800 | 75 | 2 |
| 801–1,300 | 110 | 3 |
| 1,301–3,200 | 150 | 4 |
| 3,201–8,000 | 225 | 5 |
| 8,001–22,000 | 300 | 7 |

(d) Sampling Table B:

| Lot size | Sample size | Permissible number of rejects |
|---|---|---|
| Less than 5 | All | 0 |
| 5–110 | 3 | 0 |
| 111–180 | 5 | 0 |
| 181–300 | 7 | 1 |
| 301–500 | 10 | 1 |
| 501–800 | 15 | 1 |
| 801–1,300 | 22 | 2 |
| 1,301–3,200 | 30 | 2 |
| 3,201–8,000 | 45 | 3 |
| 8,001–22,000 | 60 | 4 |

## PART 33—SPECIFIC LICENSES OF BROAD SCOPE FOR BYPRODUCT MATERIAL

Sec.
33.1 Purpose and scope.

REQUIREMENTS FOR SPECIFIC LICENSES

33.11 Licenses for multiple quantities or types of byproduct material for use in research and development.
33.12 Licenses for multiple quantities or types of byproduct material for use in processing.

AUTHORITY: The provisions of this Part 33 issued under sec. 161, 68 Stat. 948; 42 U.S.C. 2201. Interpret or apply secs. 81, 182, 183, 68 Stat. 935, 953, 954; 42 U.S.C. 2111, 2232, 2233.

### § 33.1 Purpose and scope.

This part prescribes requirements for the issuance of specific licenses of broad scope for byproduct material and certain regulations governing holders of such licenses. The provisions and requirements of this part are in addition to, and not in substitution for, other requirements of this chapter. In particular, the provisions of Part 30 of this chapter apply to applications and licenses subject to this part.

REQUIREMENTS FOR SPECIFIC LICENSES

### § 33.11 License for multiple quantities or types of byproduct material for use in research and development.

An application for a specific license for multiple quantities or types of byproduct material for use in research and development will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter; and

(b) The applicant has received a reasonable number of licenses for a variety of radioisotopes for a variety of research and development uses; and

(c) The applicant has established an isotope committee (composed of such persons as a radiological safety officer, a representative of the business office, and one or more persons trained or experienced in the safe use of radioactive materials) which will review and approve, in advance of purchase of radioisotopes, proposals for such uses; and

(d) The applicant has appointed a radiological safety officer who will advise on or be available for advice and assistance on radiological safety problems.

[§ 30.24(d)]

### § 33.12 Licenses for multiple quantities or types of byproduct material for use in processing.

An application for a specific license for multiple quantities and types of byproduct material for use in processing for distribution to other authorized persons will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter; and

(b) The applicant has received a reasonable number of licenses for processing and distribution of a variety of radioisotopes; and

(c) The applicant has appointed a radiological safety officer who will advise on or be available for advice and assistance on radiological safety problems.

[§ 30.24(e)]

Appendix A.

AUTHORITY: The provisions of this Part 34 issued under sec. 161, 68 Stat. 948; 42 U.S.C. 2201. Interpret or apply secs. 81, 182, 183, 68 Stat. 935, 953, 954; 42 U.S.C. 2111, 2232, 2233.

### § 34.1 Purpose and scope.

This part prescribes requirements for the issuance of licenses for the use of sealed sources containing byproduct material and radiation safety requirements for persons using such sealed sources in radiography. The provisions and requirements of this part are in addition to, and not in substitution for, other requirements of this chapter. In particular, the privisions of Part 30 of this chapter apply to applications and licenses subject to this part. Nothing in this part shall apply to uses of byproduct material for medical diagnosis or therapy.

### § 34.2 Definitions.

As used in this part:

(a) "Radiography" means the examination of the structure of materials by nondestructive methods, utilizing sealed sources of byproduct materials;

(b) "Radiographer" means any individual who performs or who, in attendance at the site where the sealed source or sources are being used, personally supervise radiographic operations and who is responsible to the licensee for assuring compliance with the requirements of the Commission's regulations and the conditions of the license;

(c) "Radiographer's assistant" means any individual who, under the personal supervision of a radiographer, uses radiographic exposure devices, sealed sources or related handling tools, or radiation survey instruments in radiography;

(d) "Radiographic exposure device" means any instrument containing a sealed source fastened or contained therein, in which the sealed source or shielding thereof may be moved, or otherwise changed, from a shielded to unshielded position for purposes of making a radiographic exposure;

(e) "Sealed source" means any byproduct material that is encased in a capsule designed to prevent leakage or escape of the byproduct material;

(f) "Storage container" means a device in which sealed sources are transported or stored.

[§ 31.3(a)–(f)]

### § 34.3 Applications for specific licenses.

Applications for specific licenses for use of sealed sources in radiography shall be filed on Form AEC 313R, "Application for Byproduct Material Licenses—Use of Sealed Sources in Radiography."

## Subpart A—Specific Licensing Requirements

### § 34.11 Issuance of specific licenses for use of sealed sources in radiography.

An application for a specific license for use of sealed sources in radiography will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter;

(b) The applicant will have an adequate program for training radiographers and radiographers' assistants and submits to the Commission a schedule or description of such program which specifies the:

(1) Initial training;

(2) Periodic training;

(3) On-the-job training;

(4) Means to be used by the licensee to determine the radiographers' knowledge and understanding of and ability to comply with Commission regulations and licensing requirements, and the operating and emergency procedures of the applicant; and

(5) Means to be used by the licensee to determine the radiographer's assistant's knowledge and understanding of and ability to comply with the operating and emergency procedures of the applicant;

(c) The applicant has established and submits to the Commission satisfactory written operating and emergency procedures as described in § 34.32;

(d) The applicant will have an adequate internal inspection system, or other management control, to assure that Commission license provisions, Commission regulations, and the applicant's operating and emergency procedures are followed by radiographers and radiographers' assistants;

(e) The applicant submits a description of its over-all organizational structure pertaining to the radiography program, including specified delegations of authority and responsibility for operation of the program; and

(f) The applicant who desires to conduct his own leak tests has established adequate procedures to be followed in leak testing sealed sources, for possible leakage and contamination and submits to the Commission a description of such procedures including:

(1) Instrumentation to be used,

(2) Method of performing test, e.g., points on equipment to be smeared and method of taking smear, and

(3) Pertinent experience of the person who will perform the test.

[§ 30.24(g)]

## Subpart B—Radiation Safety Requirements

EQUIPMENT CONTROL

### § 34.21 Limits on levels of radiation for radiographic exposure devices and storage containers.

Radiographic exposure devices measuring less than four (4) inches from the sealed source storage position to any exterior surface of the device shall have no radiation level in excess of 50 milliroentgens per hour at six (6) inches from any exterior surface of the device. Radiographic exposure devices measuring a minimum of four (4) inches from the sealed source storage position to any exterior surface of the device, and all storage containers for sealed sources or for radiographic exposure devices, shall have no radiation level in excess of 200 milliroentgens per hour at any exterior surface, and ten (10) milliroentgens per hour at one meter from any exterior surface. The radiation levels specified are with the sealed source in the shielded (i.e., "off") position.

[§ 31.101]

### § 34.22 Locking of radiographic exposure devices and storage containers.

Each radiographic exposure device shall be provided with a lock or outer locked container designed to prevent unauthorized or accidental removal or exposure of a sealed source and shall be kept locked at all times except when under the direct surveillance of a radiographer or radiographer's assistant, or as may be otherwise authorized pursuant to § 34.41. Each storage container likewise shall be provided with a lock and

kept locked when containing sealed sources except when the container is under the direct surveillance of a radiographer or radiographer's assistant. The locking mechanism shall be protected against unauthorized or accidental removal.

### § 34.23 Storage precautions.

(a) Sealed sources shall be stored in a manner which will minimize danger from explosion or fire.

(b) When not in use, radiographic exposure devices containing sealed sources shall be secured against unauthorized movement.

(c) When not in use, storage containers shall be locked and secured against unauthorized movement.

### § 34.24 Radiation survey instruments.

(a) Each radiographer and each radiographer's assistant shall have available to him at all times when sealed sources are in use at a temporary jobsite a radiation survey instrument capable of measuring radiation levels from 0.5 milliroentgen per hour to 50 milliroentgens per hour.

(b) Each radiographer and each radiographer's assistant shall have available to him at all times when sealed sources are in use at a temporary jobsite a radiation survey instrument capable of measuring radiation levels from 0.5 milliroentgen per hour to 1 roentgen per hour.

(c) Each radiation survey instrument required by paragraphs (a) and (b) of this section shall be calibrated at intervals not to exceed six months and after each instrument repair.

### § 34.25 Leak testing, repair, tagging, opening, modification and replacement of sealed sources.

(a) Each sealed source shall be tested for leakage at intervals not to exceed six months. In the absence of a certificate from a transferor indicating that a test has been made within six months prior to the transfer, the sealed source shall not be put in use until tested. The test for leakage shall be capable of detecting the presence of 0.005 microcurie of radioactivity on the test sample. The test sample shall be taken from the sealed source or from the surfaces of the device in which the sealed source is mounted or stored on which one might reasonably expect contamination to accumulate. A record of each leak test shall be kept in units of microcuries and maintained for inspection by the Commission for one year after the next required leak test is performed or until the sealed source is transferred or disposed of.

(b) Any sealed source which is found to be leaking shall be withdrawn from use immediately and repaired or disposed of in accordance with Commission regulations. A report describing the sealed source and the circumstances which led to the discovery of the leaking sealed source shall be filed with the Commission within five days of the discovery.

(c) Repair of any sealed source, or opening or modification by any person other than the manufacturer, which may expose radiographers, radiographers' assistants or other persons to radiation shall be performed only by persons specifically authorized by the Commission or an Agreement State to perform such work.

(d) Each sealed source, except those containing only hydrogen, shall be tagged with a durable, legible, readily visible identification tag bearing the word "Caution" and the standard radiation symbol.

### § 34.26 Quarterly inventory.

Each licensee shall conduct a quarterly inventory to account for all sealed sources and for devices containing depleted uranium received and possessed under the license. Records of inventories shall be maintained for one year from the date of the inventory and shall include sufficient information to identify each sealed source and device containing depleted uranium by radionuclide, quantity, and serial number or other unique identifier.

### § 34.27 Utilization logs.

Each licensee shall maintain utilization logs showing for each sealed source the following information:

(a) A description, including the radionuclide and quantity, and the manufacturer's identification number of the sealed source;

(b) The identity of the radiographer to whom assigned;

(c) The plant or jobsite where used and the dates of use; and

(d) The date returned to storage.

PERSONAL RADIATION SAFETY REQUIREMENTS FOR RADIOGRAPHERS AND RADIOGRAPHERS' ASSISTANT

### § 34.31 Limitations.

(a) Neither radiographers nor radiographers' assistants shall act as such for more than five consecutive days.

(b) Radiographers and radiographers' assistants shall not engage in radiography during the 24 hours immediately following five consecutive days of radiography.

### § 34.32 Operating and emergency procedures.

(a) Each licensee shall maintain current operating and emergency procedures and shall provide a copy of such procedures to each radiographer and each radiographer's assistant. The operating procedures shall include:

(1) Inspection of the job and the surrounding area to determine whether conditions at the jobsite are such that operations can be conducted safely;

(2) Use of the minimum exposure time, distance, and shielding necessary to make safe exposures;

(3) Actions to be taken to establish a restricted area;

(4) Use of survey instruments to determine that sources have returned to the shielded position after each exposure;

(5) Use of survey instruments to determine that each area is safe before leaving the jobsite;

(6) Actions to be taken if a sealed source fails to return to the shielded position;

(7) Actions to be taken if the dosimeter reading is off scale or if the dosimeter is damaged;

(8) Actions to be taken if a sealed source is ruptured; and

(9) Actions to be taken if a radiographer or radiographer's assistant is involved in an accident.

(b) Each licensee shall maintain current emergency procedures and shall provide a copy of such procedures to each radiographer and each radiographer's assistant. The emergency procedures shall include:

(1) Actions to be taken to assure the safety of persons in the event of an accident;

(2) Actions to be taken to secure the sealed source and to minimize exposure of persons to radiation in the event a sealed source is ruptured;

(3) Actions to be taken to control persons exposed to radiation in excess of the limits specified in Part 20 of this chapter;

(4) Actions to be taken to assure that persons who have been exposed to excessive radiation receive prompt medical attention; and

(5) Actions to be taken to notify the Commission or other appropriate regulatory agency in the event of an accident involving sealed sources.

### § 34.33 Personnel monitoring control.

(a) Each licensee shall supply dosimeters to radiographers and radiographers' assistants and shall require their use.

(b) Each licensee shall require that each dosimeter worn by a radiographer or radiographer's assistant be returned for processing and reading at intervals not to exceed one month.

(c) Each licensee shall maintain records of the radiation exposure of all radiographers and radiographers' assistants for inspection by the Commission. The records shall be maintained for one year after the next required entry is made.

PRECAUTIONARY PROCEDURES IN RADIOGRAPHIC OPERATIONS

### § 34.41 Security.

Each licensee shall control access to sealed sources in storage to prevent tampering or removal by unauthorized persons.

### § 34.42 Posting.

(a) Each area in which sealed sources are used at a temporary jobsite shall be conspicuously posted with a sign or signs bearing the standard radiation symbol and the words "Caution, Radioactive Material" and "Do Not Operate Without Authorization."

(b) Each area in which sealed sources are stored shall be conspicuously posted with a sign or signs bearing the standard radiation symbol and the words "Caution, Radioactive Material" and "Do Not Operate Without Authorization."

### § 34.43 Radiation surveys and survey records.

(a) Each licensee shall make or cause to be made surveys of all areas where sealed sources are used or stored to assure compliance with § 20.105 of this chapter.

(b) Each licensee shall maintain records of surveys made to comply with paragraph (a) of this section for inspection by the Commission. The records shall be maintained for one year after the next required entry is made.

EXEMPTIONS

### § 34.51 Applications for exemptions.

Any person may apply for an exemption from the requirements of the regulations in this part as it determines are authorized by law and will not endanger life or property or the common defense and security. Any such application shall be filed in accordance with § 30.11 of this chapter.

35.2 Definitions.
35.3 Applications for specific licenses.

**Subpart A—Specific Licensing Requirements**

35.11 Issuance of specific licenses for use of byproduct material in the healing arts.

**Subpart B—Radiation Safety Requirements**

35.21 Radiation safety.
35.22 Quarterly inventory.
35.23 Records of use.

**Subpart C—Precautionary Procedures**

35.31 Notifications, reports and records of misadministrations.
35.32 Safety instruction.
35.33 Surveillance.
35.34 Control of sealed sources.
35.35 Control of mobile remote afterloader units.
35.36 Suspension of licensee's authority.

AUTHORITY: The provisions of this Part 35 issued under sec. 161, 68 Stat. 948; 42 U.S.C. 2201. Interpret or apply secs. 81, 182, 183, 68 Stat. 935, 953, 954; 42 U.S.C. 2111, 2232, 2233.

### § 35.1 Purpose and scope.

This part prescribes requirements for the issuance of specific licenses for the use of byproduct material in the healing arts and certain regulations governing holders of such licenses. The provisions and requirements of this part are in addition to, and not in substitution for, other requirements of this chapter. In particular, the provisions of Part 30 of this chapter apply to applications and licenses subject to this part.

### § 35.2 Definitions.

As used in this part:

(a) "Authorized user" means a physician who is authorized by the Commission or an Agreement State to use byproduct material for medical purposes.

(b) "Authorized medical physicist" means an individual who is authorized by the Commission or an Agreement State to perform medical physics services.

(c) "Authorized nuclear pharmacist" means a pharmacist who is authorized by the Commission or an Agreement State to prepare radiopharmaceuticals for medical use.

(d) "Misadministration" means the administration of byproduct material or radiation from byproduct material to a patient, whether or not he is the human research subject, in accordance with the written directive, where the administration results in, or is likely to result in, a substantial adverse effect on the health of the patient or human research subject.

(e) "Mobile remote afterloader unit" means a device containing sealed sources which is used to transport sealed sources to and from a treatment site and to remotely load the sealed sources into applicators.

(f) "Physician" means a person licensed by a State or Territory to prescribe and administer drugs in connection with the healing arts.

(g) "Written directive" means an order in writing for a specific patient, dated and signed by a physician before administration of byproduct material or radiation from byproduct material to the patient, whether or not he is the human research subject, specifying the byproduct material and dose to be administered.

### § 35.3 Applications for specific licenses.

Applications for specific licenses for use of byproduct material in the healing arts shall be filed on Form AEC 313, "Application for Byproduct Material Licenses—Use of Sealed Sources in Radiography."

## Subpart A—Specific Licensing Requirements

### § 35.11 Issuance of specific licenses for use of byproduct material in the healing arts.

An application for a specific license for use of byproduct material in the healing arts will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter;

(b) The applicant will have an adequate program for training physicians, authorized medical physicists, authorized nuclear pharmacists, and individuals who will operate mobile remote afterloader units and submits to the Commission a description of such program which specifies the:

(1) Initial training;

(2) Periodic training;

(3) On-the-job training;

(4) Means to be used by the licensee to determine the trainees' knowledge and understanding of and ability to comply with Commission regulations and licensing requirements, and the operating and emergency procedures of the applicant; and

(5) Means to be used by the licensee to determine the trainees' knowledge and understanding of and ability to comply with the operating and emergency procedures of the applicant;

(c) The applicant has established and submits to the Commission satisfactory written operating and emergency procedures as described in § 35.32;

(d) The applicant will have an adequate internal inspection system, or other management control, to assure that Commission license provisions, Commission regulations, and the applicant's operating and emergency procedures are followed by physicians, authorized medical physicists, authorized nuclear pharmacists, individuals who will operate mobile remote afterloader units, and their assistants;

(e) The applicant submits a description of its over-all organizational structure pertaining to the medical program, including specified delegations of authority and responsibility for operation of the program; and

(f) The applicant who desires to conduct his own leak tests has established adequate procedures to be followed in leak testing sealed sources, for possible leakage and contamination and submits to the Commission a description of such procedures including:

(1) Instrumentation to be used,

(2) Method of performing test, e.g., points on equipment to be smeared and method of taking smear, and

(3) Pertinent experience of the person who will perform the test.

[§ 30.24(g)]

## Subpart B—Radiation Safety Requirements

### § 35.21 Radiation safety.

(a) Each licensee shall secure sealed sources against unauthorized removal from storage.

(b) Each licensee shall control access to sealed sources in storage to prevent tampering or removal by unauthorized persons.

(c) Each licensee shall conduct adequate radiation surveys of each area where sealed sources are used or stored to assure compliance with § 20.105 of this chapter.

(d) Each licensee shall maintain records of surveys made to comply with paragraph (c) of this section for inspection by the Commission. The records shall be maintained for one year after the next required entry is made.

(e) Each licensee shall maintain adequate survey instruments.

(f) Each licensee shall test each sealed source for leakage at intervals not to exceed six months. In the absence of a certificate from a transferor indicating that a test has been made within six months prior to the transfer, the sealed source shall not be put in use until tested. The test for leakage shall be capable of detecting the presence of 0.005 microcurie of radioactivity on the test sample. The test sample shall be taken from the sealed source or from the surfaces of the device in which the sealed source is mounted or stored on which one might reasonably expect contamination to accumulate. A record of each leak test shall be kept in units of microcuries and maintained for inspection by the Commission for one year after the next required leak test is performed or until the sealed source is transferred or disposed of.

(g) Any sealed source which is found to be leaking shall be withdrawn from use immediately and repaired or disposed of in accordance with Commission regulations. A report describing the sealed source and the circumstances which led to the discovery of the leaking sealed source shall be filed with the Commission within five days of the discovery.

(h) Each licensee shall maintain current operating and emergency procedures and shall provide a copy of such procedures to each physician, authorized medical physicist, authorized nuclear pharmacist, individual who will operate mobile remote afterloader units, and their assistants. The operating procedures shall include:

(1) Use of the minimum exposure time, distance, and shielding necessary to make safe exposures;

(2) Actions to be taken to establish a restricted area;

(3) Use of survey instruments to determine that sources have returned to the shielded position after each exposure;

(4) Use of survey instruments to determine that each area is safe before leaving the jobsite;

(5) Actions to be taken if a sealed source fails to return to the shielded position;

(6) Actions to be taken if the dosimeter reading is off scale or if the dosimeter is damaged;

(7) Actions to be taken if a sealed source is ruptured; and

(8) Actions to be taken if a physician, authorized medical physicist, authorized nuclear pharmacist, individual who will operate mobile remote afterloader units, or their assistants is involved in an accident.

(i) Each licensee shall maintain current emergency procedures and shall provide a copy of such procedures to each physician, authorized medical physicist, authorized nuclear pharmacist, individual who will operate mobile remote afterloader units, and their assistants. The emergency procedures shall include:

(1) Actions to be taken to assure the safety of persons in the event of an accident;

(2) Actions to be taken to secure the sealed source and to minimize exposure of persons to radiation in the event a sealed source is ruptured;

(3) Actions to be taken to control persons exposed to radiation in excess of the limits specified in Part 20 of this chapter;

(4) Actions to be taken to assure that persons who have been exposed to excessive radiation receive prompt medical attention; and

(5) Actions to be taken to notify the Commission or other appropriate regulatory agency in the event of an accident involving sealed sources.

### § 35.22 Quarterly inventory.

Each licensee shall conduct a quarterly inventory to account for all sealed sources and for devices containing depleted uranium received and possessed under the license. Records of inventories shall be maintained for one year from the date of the inventory and shall include sufficient information to identify each sealed source and device containing depleted uranium by radionuclide, quantity, and serial number or other unique identifier.

### § 35.23 Records of use.

Each licensee shall maintain records showing for each sealed source the following information:

(a) A description, including the radionuclide and quantity, and the manufacturer's identification number of the sealed source;

(b) The identity of the physician, authorized medical physicist, authorized nuclear pharmacist, individual who will operate mobile remote afterloader units, or their assistants to whom assigned;

(c) The plant or jobsite where used and the dates of use; and

(d) The date returned to storage.

## Subpart C—Precautionary Procedures

### § 35.31 Notifications, reports and records of misadministrations.

(a) Each licensee shall notify the Commission by telephone and telegram, mailgram or facsimile transmission of any misadministration within 24 hours after discovery of the misadministration.

(b) Each licensee shall report in writing to the Commission within 15 days after discovery of the misadministration:

(1) The name of the prescribing physician;

(2) A brief description of the event;

(3) The effect on the patient;

(4) Action taken to prevent recurrence; and

(5) Whether the licensee notified the patient or human research subject.

(c) Each licensee shall maintain records of misadministrations for inspection by the Commission. The records shall be maintained for one year after the next required entry is made.

### § 35.32 Safety instruction.

(a) Each licensee shall provide safety instruction to physicians, authorized medical physicists, authorized nuclear pharmacists, individuals who will operate mobile remote afterloader units, and their assistants, and to other personnel who work in or frequent areas where sealed sources are used or stored. The safety instruction shall include:

(1) Precautions and procedures to minimize exposure of personnel to radiation;

(2) Purpose and responsibility of the licensee's radiation protection program;

(3) Duties of personnel working in or frequenting areas where sealed sources are used or stored;

(4) Responsibility to report promptly to the licensee any condition which may lead to or cause a violation of Commission regulations or the conditions of the license or unnecessary exposure to radiation; and

(5) Appropriate responses to emergencies or unusual conditions.

(b) Each licensee shall maintain records of safety instruction for inspection by the Commission. The records shall be maintained for one year after the next required entry is made.

### § 35.33 Surveillance.

(a) Each licensee shall provide dosimeters to physicians, authorized medical physicists, authorized nuclear pharmacists, individuals who will operate mobile remote afterloader units, and their assistants and shall require their use.

(b) Each licensee shall require that each dosimeter worn by a physician, authorized medical physicist, authorized nuclear pharmacist, individual who will operate mobile remote afterloader units, or their assistants be returned for processing and reading at intervals not to exceed one month.

(c) Each licensee shall maintain records of the radiation exposure of all physicians, authorized medical physicists, authorized nuclear pharmacists, individuals who will operate mobile remote afterloader units, and their assistants for inspection by the Commission. The records shall be maintained for one year after the next required entry is made.

### § 35.34 Control of sealed sources.

(a) Each licensee shall control access to sealed sources in storage to prevent tampering or removal by unauthorized persons.

(b) Each licensee shall post each area in which sealed sources are used at a temporary jobsite with a sign or signs bearing the standard radiation symbol and the words "Caution, Radioactive Material" and "Do Not Operate Without Authorization."

(c) Each licensee shall post each area in which sealed sources are stored with a sign or signs bearing the standard radiation symbol and the words "Caution, Radioactive Material" and "Do Not Operate Without Authorization."

### § 35.35 Control of mobile remote afterloader units.

(a) Each licensee shall control access to mobile remote afterloader units to prevent tampering or removal by unauthorized persons.

(b) Each licensee shall post each area in which mobile remote afterloader units are used with a sign or signs bearing the standard radiation symbol and the words "Caution, Radioactive Material" and "Do Not Operate Without Authorization."

(c) Each licensee shall post each area in which mobile remote afterloader units are stored with a sign or signs bearing the standard radiation symbol and the words "Caution, Radioactive Material" and "Do Not Operate Without Authorization."

### § 35.36 Suspension of licensee's authority.

The Commission may suspend, in whole or in part, the licensee's authority to use byproduct material in the healing arts where it finds that the licensee has failed to comply with the requirements of this part.

kept locked when containing sealed sources except when the container is under the direct surveillance of a radiographer or radiographer's assistant.

[§ 31.102]

**§ 34.23 Storage precautions.**

Locked radiographic exposure devices and storage containers shall be physically secured to prevent tampering or removal by unauthorized personnel.

[§ 31.103]

**§ 34.24 Radiation survey instruments.**

The licensee shall maintain sufficient calibrated and operable radiation survey instruments to make physical radiation surveys as required by this part and Part 20 of this chapter. Each radiation survey instrument shall be calibrated at intervals not to exceed three (3) months and after each instrument servicing and a record maintained of the latest date of calibration. Instrumentation required by this section shall have a range such that two millifroentgens per hour through one roentgen per hour can be measured.

[§ 31.104]

**§ 34.25 Leak testing, repair, tagging, opening, modification and replacement of sealed sources.**

(a) The replacement of any sealed source fastened to or contained in a radiographic exposure device and leak testing, repair, tagging, opening or any other modification of any sealed source shall be performed only by persons specifically authorized by the Commission to do so.

(b) Each sealed source shall be tested for leakage at intervals not to exceed 6 months. In the absence of a certificate from a transferor that a test has been made within the 6 months prior to the transfer, the sealed source shall not be put into use until tested.

(c) The leak test shall be capable of detecting the presence of 0.005 microcurie of removable contamination on the sealed source. An acceptable leak test for sealed sources in the possession of a radiography licensee would be to test at the nearest accessible point to the sealed source storage position, or other appropriate measuring point, by a procedure to be approved pursuant to § 34.11 (f). Records of leak test results shall be kept in units of microcuries and maintained for inspection by the Commission.

(d) Any test conducted pursuant to paragraphs (b) and (c) of this section which reveals the presence of 0.005 microcurie or more of removable radioactive material shall be considered evidence that the sealed source is leaking. The licensee shall immediately withdraw the equipment involved from use and shall cause it to be decontaminated and repaired or to be disposed of, in accordance with Commission regulations. A report shall be filed within 5 days of the test, with the United States Atomic Energy Commission, Washington, D.C., 20545, Attention: Director, Division of Materials Licensing, describing the equipment involved, the test results, and the corrective action taken. A copy of such report shall be sent to the Director of the appropriate Atomic Energy Commission Regional Compliance Office listed in Appendix D of Part 20 of this chapter "Standards for Protection Against Radiation."

(e) A sealed source which is not fastened to or contained in a radiographic exposure device shall have permanently attached to it a durable tag at least one (1) inch square bearing the prescribed radiation caution symbol in conventional colors, magenta or purple on a yellow background, and at least the instructions: "Danger—Radioactive Material—Do Not Handle—Notify Civil Authorities if Found.

[§31.105]

**§ 34.26 Quarterly inventory.**

Each licensee shall conduct a quarterly physical inventory to account for all sealed sources received and possessed under his license. The records of the inventories shall be maintained for inspection by the Commission, and shall include the quantities and kinds of byproduct material, location of sealed sources, and the date of the inventory.

[§ 31.106]

**§ 34.27 Utilization logs.**

Each licensee shall maintain current logs, which shall be kept available for inspection by the Commission at the address specified in the license, showing for each sealed source the following information:

(a) A description (or make and model number) of the radiographic exposure device or storage container in which the sealed source is located;

(b) The identity of the radiographer to whom assigned; and

(c) The plant or site where used and dates of use.

[§ 31.107]

PERSONAL RADIATION SAFETY REQUIREMENTS FOR RADIOGRAPHERS AND RADIOGRAPHERS' ASSISTANTS

**§ 34.31 Limitations.**

(a) The licensee shall not permit any person to act as a radiographer until such person:

(1) Has been instructed in the subjects outlined in Appendix A of this part and shall have demonstrated understanding thereof;

(2) Has received copies of and instruction in the regulations contained in this part and the applicable sections of Part 20 of this chapter, AEC license(s), and the licensee's operating and emergency procedures, and shall have demonstrated understanding thereof; and

(3) Has demonstrated competence to use the radiographic exposure devices, sealed sources, related handling tools and survey instruments which will be employed in his assignment.

(b) The licensee shall not permit any person to act as a radiographer's assistant until such person:

(1) Has received copies of and instructions in the licensee's operating and emergency procedures, and shall have demonstrated understanding thereof; and

(2) Has demonstrated competence to use under the personal supervision of the radiographer the radiographic exposure devices, sealed sources, related handling tools and radiation survey instruments which will be employed in his assignment.

[§ 31.201]

**§ 34.32 Operating and emergency procedures.**

The licensee's operating and emergency procedures shall include instructions in at least the following:

(a) The handling and use of licensed sealed sources and radiographic exposure devices to be employed such that no person is likely to be exposed to radiation doses in excess of the limits established in Part 20 of this chapter "Standards for Protection Against Radiation";

(b) Methods and occasions for conducting radiation surveys;

(c) Methods for controlling access to radiographic areas;

(d) Methods and occasions for locking and securing radiographic exposure devices, storage containers and sealed sources;

(e) Personnel monitoring and the use of personnel monitoring equipment;

(f) Transporting sealed sources to field locations, including packing of radiographic exposure devices and storage containers in the vehicles, posting of vehicles and control of the sealed sources during transportation;

(g) Minimizing exposure of persons in the event of an accident;

(h) The procedure for notifying proper persons in the event of an accident; and

(i) Maintenance of records.

[§ 31.202]

**§ 34.33 Personnel monitoring control.**

(a) The licensee shall not permit any person to act as a radiographer or as a radiographer's assistant unless, at all times during radiographic operations, each such person shall wear a film badge and either a pocket dosimeter or pocket chamber. Pocket dosimeters and pocket chambers shall be capable of measuring doses from zero to at least 200 milliroentgens. A film badge shall be assigned to and worn by only one person.

(b) Pocket dosimeters and pocket chambers shall be read and doses recorded daily. A film badge shall be immediately processed if a pocket chamber or pocket dosimeter is discharged beyond its range. The film badge reports received from the film badge processor and records of pocket dosimeter and pocket chamber readings shall be maintained for inspection by the Commission.

[§ 31.203]

PRECAUTIONARY PROCEDURES IN RADIOGRAPHIC OPERATIONS

**§ 34.41 Security.**

During each radiographic operation the radiographer or radiographer's assistant shall maintain a direct surveillance of the operation to protect against unauthorized entry into a high radiation area, as defined in Part 20 of this chapter, except (a) where the high radiation area is equipped with a control device or an alarm system as described in § 20.203 (c) (2), or (b) where the high radiation area is locked to protect against unauthorized or accidental entry.

[§ 31.301]

**§ 34.42 Posting.**

Notwithstanding any provisions in § 20.204(c) of this chapter, areas in which radiography is being performed shall be conspicuously posted as required by § 20.203 (b) and (c) (1) of this chapter.

[§ 31.302]

**§ 34.43 Radiation surveys and survey records.**

(a) No radiographic operation shall be conducted unless calibrated and operable radiation survey instrumentation as described in § 34.24 is available and used at each site where radiographic exposures are made.

(b) A physical radiation survey shall be made after each radiographic exposure during a radiographic operation to determine that the sealed source has been returned to its shielded condition.

(c) A physical radiation survey shall be made to determine that each sealed source is in its shielded condition prior to securing the radiographic exposure device and storage container as specified in § 34.22.

(d) Records shall be kept of the surveys required by paragraph (c) of this section and maintained for inspection by the Commission.

[§ 31.303]

EXEMPTIONS

**§ 34.51 Applications for exemptions.**

The Commission may, upon application by any licensee or upon its own initiative, grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not result in undue hazard to life or property.

[§ 31.401]

APPENDIX A

I. Fundamentals of radiation safety.
A. Characteristics of gamma radiation.
B. Units of radiation dose (mrem) and quantity of radioactivity (curie).
C. Hazards of excessive exposure of radiation.
D. Levels of radiation from licensed material.
E. Methods of controlling radiation dose.
1. Working time.
2. Working distances.
3. Shielding.
II. Radiation detection instrumentation to be used.
A. Use of radiation survey instruments.
1. Operation.
2. Calibration.
3. Limitations.
B. Survey techniques.
C. Use of personnel monitoring equipment.
1. Film badges.
2. Pocket dosimeters.
3. Pocket chambers.
III. Radiographic equipment to be used.
A. Remote handling equipment.
B. Radiographic exposure devices.
C. Storage containers.
IV. The requirements of pertinent Federal Regulations.
V. The licensee's written operating and emergency procedures.

## PART 35—HUMAN USES OF BYPRODUCT MATERIAL

Sec.
35.1 Purpose and scope.
35.2 License requirements.
35.3 Definitions.

SPECIFIC LICENSES

35.11 Specific licenses for human use of byproduct material in institutions.
35.12 Specific licenses to individual physicians for human use of byproduct material.
35.13 Specific licenses for human use of byproduct material in sealed sources.

AUTHORITY: The provisions of this Part 35 issued under sec. 161, 68 Stat. 948; 42 U.S.C. 2201. Interpret or apply secs. 81, 182, 183, 68 Stat. 935, 953, 954; 42 U.S.C. 2111, 2232, 2233.

**§ 35.1 Purpose and scope.**

This part prescribes regulations governing the licensing of byproduct material for human uses. It includes special requirements for issuance of specific licenses authorizing human use of byproduct material, general licenses for human use of byproduct material of specified types and forms, and certain regulations governing the holders of such specific and general licenses. The provisions and requirements of this part are in addition to, and not in substitution for, other requirements of this chapter. In particular, the provisions of Part 30 of this chapter apply to applications and licenses subject to this part.

**§ 35.2 License requirements.**

No person subject to the regulations in this chapter shall receive, possess, use or transfer byproduct material for any human use except in accordance with a specific or general license issued pursuant to the regulations in this part and Part 30 or with an exemption under Part 30.

**§ 35.3 Definitions.**

As used in this part:

(a) "Human use" means the internal or external administration of byproduct material, or the radiation therefrom, to human beings;

[§ 30.4(e)]

(b) "Physician" means an individual licensed by a State or territory of the United States, the District of Columbia or the Commonwealth of Puerto Rico to dispense drugs in the practice of medicine.

[§ 30.4(l)]

SPECIFIC LICENSES

**§ 35.11 Specific licenses for human use of byproduct material in institutions.**

An application by an institution for a specific license for human use of byproduct material will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter;

(b) The applicant has appointed a medical isotopes committee of at least three members to evaluate all proposals for research, diagnosis, and therapeutic use of radioisotopes within that institution. Membership of the committee

should include physicians expert in internal medicine, hematology, therapeutic radiology, and a person experienced in assay of radioisotopes and protection against ionizing radiations;

(c) The applicant possesses adequate facilities for the clinical care of patients;

(d) The physician designated on the application as the individual user has substantial experience in the proposed use, the handling and administration of radioisotopes and, where applicable, the clinical management of radioactive patients; and

(e) If the application is for a license to use unspecified quantities or multiple types of byproduct material, the applicant has previously received a reasonable number of licenses for a variety of byproduct materials for a variety of human uses.

[§ 30.24(a)]

**§ 35.12 Specific licenses to individual physicians for human use of byproduct material.**

An application by an individual physician for a specific license for human use of byproduct material will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter;

(b) The applicant has access to a hospital possessing adequate facilities to hospitalize and monitor the applicant's radioactive patients whenever it is advisable; and

(c) The applicant has extensive experience in the proposed use, the handling and administration of radioisotopes, and where applicable, the clinical management of radioactive patients. (The physician shall furnish suitable evidence of such experience with his application. A statement from the medical isotope committee in the institution where he acquired his experience, indicating its amount and nature, may be submitted as evidence of such experience.)

[§ 30.24(b)]

**§ 35.13 Specific licenses for human use of byproduct material in sealed sources.**

An application for a specific license for use of a sealed source for human use will be approved if:

(a) The applicant satisfies the general requirements specified in § 30.33 of this chapter; and

(b) The applicant or, if the application is made by an institution, the individual user (1) has specialized training in the therapeutic use of the radioactive device considered (teletherapy unit, beta applicator, etc.) or has experience equivalent to such training; and (2) is a physician.

[§ 30.24(c)]

## PART 36—EXPORT AND IMPORT OF BYPRODUCT MATERIAL

Sec.
36.1 Purpose and scope.
36.2 Communications.
36.3 License requirements for export of byproduct material.

SPECIFIC LICENSES

36.11 Applications for specific licenses.
36.12 Issuance of specific licenses for export of byproduct material.

GENERAL LICENSES

36.21 Export of certain byproduct material to countries other than Cuba or Subgroup A countries.
36.22 Export of certain quantities of tritium and polonium 210.
36.23 Export of americium 241.

SCHEDULES

36.50 Schedule A.

AUTHORITY: The provisions of this Part 36 issued under sec. 161, 68 Stat. 948; 42 U.S.C. 2201. Interpret or apply secs. 81, 82, 182, 183, 68 Stat. 935, 953, 954; 42 U.S.C. 2111, 2112, 2232, 2233.

**§ 36.1 Purpose and scope.**

This part prescribes regulations governing specific licenses for the export of byproduct material and establishes certain general licenses for the export from and import into the United States of byproduct material. The provisions and requirements of this part are in addition to, and not in substitution for, other requirements of this chapter. In particular, the provisions of Part 30 apply to applications and licenses subject to this part.

**§ 36.2 Communications.**

(a) All communications and reports concerning the regulations in this part with regard to export should be addressed to the United States Atomic Energy Commission, Washington, D.C., 20545, Attention: Director, Division of State and Licensee Relations.

(b) All communications and reports concerning the regulations in this part with regard to import should be addressed to the United States Atomic Energy Commission, Washington, D.C., 20545, Attention: Director, Division of Materials Licensing.

(c) Communications and reports may be delivered in person at the Commission's office at 1717 H Street NW., Washington, D.C.; at 4915 St. Elmo Avenue, Bethesda, Md.; or at Germantown, Md.

**§ 36.3 License requirements for export of byproduct material.**

(a) No person shall export byproduct material from the United States except as authorized pursuant to the regulations in this part and Part 30.

(b) No person may export byproduct material from the United States knowing or having reason to believe that it is to be reexported directly or indirectly, in whole or in part, from the country of ultimate destination shown on the export license, shipper's export declaration, bill of lading, or commercial invoice, unless either:

(1) The reexport has been authorized by the Commission; or

(2) At the time of export, the material may be exported directly from the United States to the new country of ultimate destination under the terms of one of the general licenses established in this part.

[§ 30.33 (a), (h)]

SPECIFIC LICENSES

**§ 36.11 Applications for specific licenses.**

Applications for specific licenses for export of byproduct material from the United States shall be filed in triplicate on Form AEC–7 with the United States Atomic Energy Commission, Washington, D.C., 20545, Attention: Director, Division of State and Licensee Relations. Applications may also be filed in person at the Commission's offices at 1717 H Street NW., Washington, D.C.; at 4915 St. Elmo Avenue, Bethesda, Md.; or at Germantown, Md.

**§ 36.12 Issuance of specific licenses for export of byproduct material.**

The Commission may, upon application by an interested person, issue a license authorizing the export of byproduct material to a country or destination listed in § 36.50, Schedule A, for the export of byproduct material in quantities or forms not authorized for export under general license if, in the opinion of the Commission, the proposed export would not be inimical to the common defense and security.

[§ 30.33(e)]

GENERAL LICENSES

**§ 36.21 Export of certain byproduct material to countries other than Cuba or Subgroup A countries.**

Any licensee may export byproduct material covered by his license to any foreign country except Cuba or countries or areas now or hereafter listed as Subgroup A countries or destinations in § 371.3 of the Comprehensive Export Schedule of the United States Department of Commerce (15 CFR 371.3): *Provided*, That the authority conferred by this section shall apply only to byproduct material having an atomic number from 3 to 83, inclusive, and to tritium when contained in luminous safety devices installed in aircraft and distributed as generally licensed items pursuant to § 31.7 of this chapter.

[§ 30.33(b)]

**§ 36.22 Export of certain quantities of tritium and polonium 210.**

(a) A general license is hereby issued authorizing any person to export from the United States to any countries or destinations not listed in § 36.50, Schedule A, 5,000 curies of tritium and 5,000 curies of polonium 210 in a calendar quarter. Not more than 1,000 curies of tritium may be exported by any person to any one country or destination in a calendar quarter and not more than 100 curies of tritium may be exported by any person in a single shipment under this general license. Exports under this general license may be in one or more of the following forms or products only:

(1) Tritium activated luminous paint;
(2) Tritium labeled organic compounds;
(3) Tritiated accelerator targets;
(4) Polonium 210 static eliminators;
(5) Polonium 210 neutron sources;
(6) Tritium or polonium 210 calibration standards;
(7) Luminescent light sources;
(8) Tritium sources for chromatography instruments;
(9) Electron tubes; or
(10) Tritium as a contaminant of Helium 3 in a concentration not to exceed 2.5 millicuries of tritium per liter of Helium 3.[1]

(b) A person exporting byproduct material pursuant to the general license established by paragraph (a) of this section, shall file with the Collector of Customs, or the Postmaster, one copy, in addition to those otherwise required, of the Shipper's Export Declaration, covering each export, marked for transmittal to the Division of State and Licensee Relations of the United States Atomic Energy Commission, Washington, D.C., 20545. In addition to such other information as may be required, the following information shall be included in the Shipper's Export Declaration: Identification of the byproduct material; the quantity in curies; and the ratio of tritium to the total quantity of hydrogen if the material is tritium-activated luminous paint.

[§ 30.33 (d) and (f)]

**§ 36.23 Export of americium 241.**

A general license designated AEC–GRO–BMG is hereby issued authorizing any person to export americium 241 from the United States to any countries or destinations not listed in § 36.50, Schedule A.

[§ 30.33(g)]

[1] Export shipments of Helium gas are subject to the licensing authority and regulations of the Department of State. Issuance of a specific or general license by the Commission for tritium contained in Helium 3 does not relieve any person from complying with the licensing requirements and regulations of the Department of State applicable to the export of Helium 3.

SCHEDULES

**§ 36.50 Schedule A.**

(a) Albania.
(b) Bulgaria.
(c) China, including Manchuria (and excluding Taiwan (Formosa)) (includes Inner Mongolia; the provinces of Tsinghai and Sikang; Sinkiang; Tibet; the former Kwantung Leased Territory, the present Port Arthur Naval Base Area and Liaoning Province).
(d) Communist-controlled area of Viet Nam.
(e) Cuba.
(f) Czechoslovakia.
(g) East Germany (Soviet Zone of Germany and the Soviet Sector of Berlin).
(h) Estonia.
(i) Hungary.
(j) Latvia.
(k) Lithuania.
(l) North Korea.
(m) Outer Mongolia.
(n) Poland.
(o) Rumania.
(p) Union of Soviet Socialist Republics.

[§ 30.75]

## [10 CFR Parts 30, 150]

## LICENSING OF BYPRODUCT MATERIAL: EXEMPTIONS AND CONTINUED REGULATORY AUTHORITY IN AGREEMENT STATES[1]

### Transfers of Exempt Concentrations of Byproduct Material

Under the Commission's current regulations, a person such as a radiotracer firm may be authorized, by a specific Commission license, to introduce, in non-agreement States, byproduct materials in exempt concentrations into a product or material owned by another (10 CFR 30.24). The licensee of an agreement State may be authorized, under a specific agreement State license, to perform the same type of services in the agreement State. However, the agreement State licensee would not be authorized, under a strict interpretation of the Commission's regulations, to perform such service for owners of products or materials in non-agreement States without a specific license from the Commission, even though § 150.20 of 10 CFR Part 150 grants to any person possessing a specific license from an agreement State, a general license to conduct the same activity in non-agreement States for twenty days in any twelve consecutive months.[2] The reason for this is that § 150.20(b)(2) prohibits the general licensee from transferring or disposing of radioactive material in non-agreement States except by transfer to a person specifically licensed by the Commission to receive such material, and introduction of byproduct material into a product or material in the course of performing radiotracer services may be considered a "transfer" to the owner.[3]

No useful purpose would be served, in these circumstances, in requiring an additional Commission license authorizing the introduction of exempt concentrations into products or materials to enable the holder of an agreement State specific license to perform services in non-agreement States which he could perform under his State license alone in the agreement State.

Consequently, the Commission proposes to revise its regulations so that, subject to the conditions of the general license of 10 CFR 150.20 (which is limited to twenty days in any twelve consecutive months) a person holding an agreement State specific license may introduce byproduct material in exempt concentrations into products or materials for persons in non-agreement States

[1] States to which the Commission has transferred certain regulatory authority over radioactive material by formal agreement, pursuant to section 274 of the Atomic Energy Act of 1954, as amended.

[2] This general license is provided only if the agreement State license does not limit the authorized activity to specified installations or locations.

[3] The product owner in the non-agreement State may obtain a specific license from the Commission to receive the byproduct material and the radiotracer firm from the agreement State could then perform the radiotracer service under the general license of § 150.20. In most instances, however, the firms which contract for radiotracer services are relying on the technical competence of the radiotracer firm and do not desire to file an application with the Commission and obtain a specific license.

who are exempt under § 30.9 of 10 CFR Part 30. This would be accomplished by amending § 150.20(b)(2) to authorize transfer of radioactive material, under the general license of § 150.20, to persons exempt under § 30.9, as well as to persons specifically licensed by the Commission to receive such material.

Title 10 CFR Part 30 would also be amended by the deletion of § 30.32(f), which contains the requirement for a specific license for the introduction of byproduct material into a product for transfer to persons exempt under § 30.9, and by the incorporation of the requirement into § 30.9 as a new paragraph (d). The language of the paragraph would be modified to permit introduction of byproduct material under the general license of § 150.20, as well as under a license issued pursuant to § 30.24(h) of Part 30, and to make other clarifying, editorial changes. The purpose of moving the substance of present § 30.32(f) into § 30.9 is to consolidate in one section both the exemption for certain concentrations of byproduct material and the limitations on that exemption. In addition, § 30.9(a) would be amended by adding to the excepting clause a reference to paragraph (c) as well as paragraph (d) (in lieu of § 30.32(f)).

Pursuant to the Atomic Energy Act of 1954, as amended, and the Administrative Procedure Act of 1946, notice is hereby given that adoption of the following amendments of 10 CFR Parts 30 and 150 is contemplated. All interested persons who desire to submit written comments or suggestions for consideration in connection with the proposed amendment should send them to the Secretary, United States Atomic Energy Commission, Washington, D.C., 20545, within sixty days after publication of this notice in the FEDERAL REGISTER. Comments received after that period will be considered if it is practicable to do so, but assurance of consideration cannot be given except as to comments filed within the period specified.

1. Section 30.9 of Part 30 is amended by revising paragraph (a) and adding a new paragraph (d) to read as follows:

**§ 30.9 Exempt concentrations.**

(a) Except as provided in paragraphs (c) and (d) of this section, any person is exempt from the requirements for a license set forth in section 81 of the Act and from the regulations in this part to the extent that such person receives, possesses, uses, transfers, owns or acquires products or materials containing byproduct material in concentrations not in excess of those listed in § 30.73.

* * * * *

(d) No person may introduce byproduct material into a product or material knowing or having reason to believe that it will be transferred to persons exempt under this section or equivalent regulations of an agreement State, except in accordance with a license issued pursuant to § 30.24(h) of this part or the general license provided in § 150.20 of Part 150.

2. Section 30.32(f) of Part 30 is deleted.

3. Section 150.20(b)(2) of Part 150 is amended to read as follows:

**§ 150.20 Recognition of State licenses.**

* * * * *

(b) * * *

(2) Shall not in any non-agreement State transfer or dispose of radioactive material possessed or used under the general license provided in this section except by transfer to a person (i) specifically licensed by the Commission to receive such material, or (ii) exempt from the requirements for a license for such material under § 30.9 of Part 30.

(Sec. 161, Stat. 948; 42 U.S.C. 2201; sec. 274, 73 Stat. 688; 42 U.S.C. 2021)

Dated at Washington, D.C., this 14th day of December 1964.

For the Atomic Energy Commission.

W. B. McCOOL,
*Secretary.*

## DEPARTMENT OF JUSTICE

### Immigration and Naturalization Service

### STATEMENT OF ORGANIZATION

### Ports of Entry; New York

Effective upon publication in the FEDERAL REGISTER, the following amendment to the Statement of Organization of the Immigration and Naturalization Service (19 F.R. 8071, December 8, 1954), as amended, is prescribed:

The list of Class B ports of entry of District No. 7—Buffalo, N.Y., of subparagraph (2) *Ports of entry for aliens arriving by vessel or by land transportation* of paragraph (c) *Suboffices* of sec. 1.51 *Field Service* is amended by deleting "Chaumont, N.Y.," and "Heart Island, N.Y. (June–September)."

Dated: December 14, 1964.

RAYMOND F. FARRELL,
*Commissioner of Immigration and Naturalization.*

[F.R. Doc. 64–12950; Filed, Dec. 16, 1964; 8:49 a.m.]

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

### ALASKA

### Notice of Filing of Plat of Survey and Order Providing for Opening of Public Lands

DECEMBER 9, 1964.

1. Plat of rectangular survey of the lands described below will be officially filed in the Anchorage Land Office, Anchorage, Alaska, effective at 10:00 a.m., January 4, 1965.

SEWARD MERIDIAN

T. 30 S., R. 29 W.,
Sec. 29, lots 1–8;
Sec. 30, lots 1–8, N½NE¼, E½NW¼;
Sec. 31, lots 1–11, S½SE¼; SE¼SW¼;
Sec. 32, lots 1–5, S½NE¼, SE¼NW¼, SW¼, SE¼.
Containing 1,348.66 acres.

2. The land in this survey, in general, is nearly level to rolling along the shore line on both sides of Larsen Bay and Uyak Bay, becoming mountainous with distance inland from shore. The soil is a mixture of gravel, sand, clay and loam throughout the survey. The timber is birch and cottonwood, with an undergrowth of alder; scattered willow is predominant along the flat land and along the streams near the meander lines. The village of Larsen Bay is located along the shore in Secs. 31 and 32. The only access to the land is via airplane or boat.

3. Subject to any existing valid rights, the provisions of existing withdrawals, and the requirements of applicable law, the above described land is hereby opened to filing applications, selections and locations in accordance with the following:

a. Applications and selections under the nonmineral public land land laws may be presented to the Manager, Anchorage District and Land Office, beginning on the date of this order. Such applications, selections and offers will be considered as filed on the hour and respective dates shown for the various classes enumerated in the following paragraphs:

(1) Applications by persons having prior existing valid settlement rights, preference rights conferred by existing laws, or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph.

(2) All valid applications and selections under the nonmineral public land laws presented prior to 10:00 a.m., on January 4, 1965, will be considered as simultaneously filed at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing. The lands will also be open to mining location at that date and hour.

4. Persons claiming preference rights based upon valid settlement, statutory preference or equitable claims must enclose properly corroborated statements in support of their applications, setting forth all facts relevant to their claim. Detailed rules and regulations governing applications which may be filed pursuant to this notice can be found in Title 43 of the Code of Federal Regulations.

5. Applications for these lands, which shall be filed in the Land Office at Anchorage, Alaska, shall be acted upon in accordance with the regulations contained in § 1821.2–3 (formerly § 295.8) of Title 43 of the Code of Federal Regulations to the extent such regulations are applicable. Applications under the homestead and homesite laws shall be governed by the regulations contained in §§ 2233.9–1(a), 2211.9–1(a), and 2211.0–6(a) (formerly in Parts 64, 65 and 166) of Title 43 of the Code of Federal Regulations.

6. Inquiries concerning these lands shall be addressed to the Manager, Anchorage District and Land Office, 555 Cordova Street, Anchorage, Alaska.

JAMES W. SCOTT,
*Manager,*
*Anchorage District and Land Office.*

[F.R. Doc. 64–12944; Filed, Dec. 16, 1964; 8:48 a.m.]

### NEVADA

### Notice of Filing of Plats of Survey and Order Providing for Opening of Lands

DECEMBER 8, 1964.

1. Plats of survey of lands described below will be officially filed at the Nevada Land Office, Reno, Nev., effective at 10:00 a.m. on January 12, 1965.

MOUNT DIABLO MERIDIAN

T. 33 S., R. 66 E. (Group 395),
Sec. 5, lots 7, 8;
Sec. 15, lots 3, 4, 5, 6, 7, NE¼NW¼, SE¼NW¼, SW¼NE¼, W½SE¼, SW¼;
Sec. 16, SE¼SE¼;
Sec. 21, lots 5, 6, NE¼NE¼, SE¼NE¼;
Sec. 22, lots 1, 2, 3, 4, 5, NW¼NE¼, NW¼.

2. The area described above aggregates 1,155.73 acres. The plat was accepted May 17, 1962. Available data indicates the lands included in this plat, consist of the old flood plain of the Colorado River ascending into the rolling desert on the west side. Soils vary from sandy loam and silt to gravel and exposed granite formation. The above described lands are withdrawn by order dated October 16, 1931, under first form for the Colorado River Reclamation Project and by order dated June 22, 1923, as Power Site Classification 55. In addition, all the lands except section 22 are segregated from entry pursuant to Public Law 433 approved April 22, 1960 (74 Stat. 74) for conveyance to the Colorado River Commission of Nevada acting for the State of Nevada. In view of this, the lands described will not be subject to disposition under the general public land laws by reason of official filing of this plat.

T. 10 N., R. 43 E. (Group 384),
Sec. 6, lots 16, 17, 18;
Sec. 7, lots 1, 2, 3, 4, 5, 6, 7, 8;
Sec. 16, lots 1, 2, 5, 6.

3. The area described above aggregates 650.81 acres. The plat was accepted May 6, 1963. Available data indicates the lands included in the plat are nearly level to gently rolling to rough with sandy and gravelly clay loam soils. The above described lands are withdrawn by Presidential Proclamation dated December 10, 1910, and are now a part of the Toiyabe National Forest and are not subject to disposition under the general public land laws by reason of official filing of this plat.

T. 16 N., R. 35 E. (Group 407),
Tract 37.

4. The area described above aggregates 5.00 acres. The plat was accepted August 16, 1963. The above land has been patented pursuant to the Act of Congress of June 1, 1938 (52 Stat. 609) as amended and is not subject to disposition under the general public land laws by reason of official filing of this plat.

T. 21 S., R. 64 E. (Group 397),
Tract 37.

5. The area described above aggregates 5.00 acres. The plat was accepted

August 16, 1963. The above land has been patented pursuant to the Act of Congress of August 27, 1954 (68 Stat. A2 23) and is not subject to disposition under the general public land laws by reason of official filing of this plat.

T. 25 S., R. 62 E. (Group 372),
Secs. 1 through 36 incl.

6. The area described above aggregates 24,171.08 acres. The plat was accepted December 18, 1963. Available data indicates the lands included in this plat varies from nearly level in the south to rough mountainous in the north with sandy and gravelly clay loam soils. The above described lands are segregated from entry pursuant to Public Law 339 approved March 6, 1958, for conveyance to the Colorado River Commission of Nevada acting for the State of Nevada and are not subject to disposition under the general public land laws by reason of official filing of this plat.

T. 26 S., R. 62 E. (Group 372),
Secs. 1 through 36 incl.

7. The area described above aggregates 24,384.07 acres. The plat was accepted December 18, 1963. Available data indicates the lands included in the plat varies from nearly level and rolling in the east, rough, broken mountainous in the central, and gently rolling to level in the west. The soils are sandy and gravelly. The following lands are segregated from entry pursuant to Public Law 339 approved March 6, 1958, for conveyance to the Colorado River Commission of Nevada acting for the State of Nevada and are not subject to disposition under the general public land laws by reason of official filing of this plat:

T. 26 S., R. 62 E.,
Secs. 1, 2, 11, 12, 13, 14.

T. 25 S., R. 64 E. (Group 372),
Secs. 1 through 36 incl.

8. The area described above aggregates 23,135.83 acres. The plat was accepted December 18, 1963. Available data indicates the lands included in the plat varies from an alluvial fan in the north, while the remainder of the township is broken mountainous terrain. The following lands are segregated from entry pursuant to Public Law 339 approved March 6, 1958, for conveyance to the Colorado River commission of Nevada acting for the State of Nevada and are not subject to disposition under the general public land laws by reason of official filing of this plat:

T. 25 S., R. 64 E.,
Secs. 1, 2, 3, 4, 5, 6.

T. 18 S., R. 66 E. (Group 415),
Secs. 1, 2, 3, 4, 11, 12.

9. The area described above aggregates 3,829.38 acres. The plat was accepted February 6, 1964. Available data indicate the lands included in this plat consists of very rough limestone and exposed red sandstone formations.

T. 8 S., R. 44 E. (Group 396),
Secs. 5, 6, 7, 8.

10. The area described above aggregates 2,555.96 acres. The plat was accepted February 24, 1964. Available data indicates the lands included in this plat consists of sandy loam and clay soils, suitable for cultivation if water for irrigation is available. The following lands are embraced in allowed Pittman entry, Nevada 010898 and are not subject to disposition under the general public land laws by reason of official filing of this plat:

T. 8 S., R. 44 E.,
Secs. 7, 8.

11. Subject to any existing valid rights and the requirements of applicable law, the above-described lands are hereby opened to filing applications, selections, and location, except for applications under the Small Tract and Desert Land Laws, in accordance with the following: Applications and selections under the nonmineral public land laws may be presented to the Manager mentioned below, beginning on the date of the order. Such applications, selections and offers will be considered as filed on the hour and respective dates shown for the various classes enumerated in the following paragraphs: Applications by persons having prior existing valid Settlement rights, preference rights conferred by existing laws, or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph. All valid applications and selections under the nonmineral public land laws presented prior to 10:00 a.m., January 12, 1965, will be considered as simultaneously filed at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing.

12. Persons claiming preference rights based upon valid settlement, statutory preference, or equitable claims must enclose properly corroborated statements in support of their applications, setting forth all facts relevant to their claims. Detailed rules and regulations governing applications which may be filed pursuant to this notice can be found in Title 43 of the Code of Federal Regulations. Inquiries concerning these lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Post Office Box 1551, Reno, Nev.

DONALD I. BAILEY,
*Acting Manager,*
*Nevada Land Office.*

## CIVIL SERVICE COMMISSION

### DIGITAL COMPUTER SYSTEMS ANALYST AND SUPERVISORY DIGITAL COMPUTER SYSTEMS OPERATOR

### Positions for Which There Is Determined To Be Manpower Shortage

Under the provisions of Public Law 86-587, the Civil Service Commission has determined that there is a manpower shortage for the following:

| Series and grade | Positions | Location | Effective date |
|---|---|---|---|
| GS-334-12 | Digital computer systems analyst | New Orleans, La. metropolitan area. | Nov. 13, 1964 |
| GS-332-11 | Supervisory digital computer systems operator. | New Orleans, La. metropolitan area. | Do. |

Comparable positions not subject to the Classification Act also are covered.

Expenses of travel and transportation to their first duty stations may be paid for appointees to positions as listed above. Any such payments as a result of this determination must be made in accordance with travel regulations issued by the Bureau of the Budget.

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] MARY V. WENZEL,
*Executive Assistant to the Commissioners.*

[F.R. Doc. 64-12948; Filed, Dec. 16, 1964; 8:48 a.m.]

## FEDERAL AVIATION AGENCY

[OE Docket No. 64-EA-11]

### KENTUCKY AUTHORITY FOR EDUCATIONAL TELEVISION

### Determination of No Hazard to Air Navigation

The Federal Aviation Agency has circularized the following proposal for aeronautical comment and has conducted study (EA-OE-5782) to determine its effect upon the safe and efficient utilization of the navigable airspace.

Kentucky Authority for Educational Television, Lexington, Ky., proposes to construct a television antenna structure near Somerset, Ky., at latitude 37°10'00" N., longitude 84°40'28" W. The overall height of the structure would be 2549.2 feet above mean sea level (1019.2 feet above ground).

This proposal was previously studied under Case No. 1-OE-2852. The result was a Determination of No Hazard issued by the Eastern Region on January 10, 1963. Since this determination has expired and the application is still pending with the Federal Communications Commission, the proponent has requested that the determination be extended.

The structure would exceed the standards for determining hazards to air navigation in § 77.23(a)(1) of the Federal Aviation Regulations by 519.2 feet.

The aeronautical study disclosed that the structure would not require a change in instrument flight rule (IFR) minimum altitudes or procedures and would have no adverse effect upon IFR aeronautical operations. Further, it would not be located in proximity to a commonly used visual flight rules (VFR) route or in an area where there is a significant volume of VFR traffic.

Based upon the aeronautical study, it is the finding of the Agency that the proposed structure would have no substantial adverse effect upon aeronautical operations, procedures or minimum flight altitudes.

Therefore, pursuant to the authority delegated to me by the Administrator (§ 77.37 [New]), it is found that the proposed structure would have no substantial adverse effect upon the safe and efficient utilization of navigable airspace and it is hereby determined that the proposed structure would not be a hazard to air navigation provided that it is obstruction marked and lighted in accordance with Agency standards.

This determination is effective and will become final 30 days after the date of issuance unless an appeal is filed under § 77.39 [New] (27 F.R. 10352). If the appeal is denied, the determination will then become final as of the date of the denial or 30 days after the issuance of the determination, whichever is later. Unless otherwise revised or terminated, a final determination hereunder will expire 18 months after its effective date or upon earlier abandonment of the construction proposal (§ 77.41 [New]).

Issued in Washington, D.C., on December 8, 1964.

JOSEPH VIVARI,
*Acting Chief,*
*Obstruction Evaluation Branch.*

## FEDERAL POWER COMMISSION

[Docket Nos. G-3693, etc.]

### ELLIOTT OIL, INC., ET AL.

### Findings and Order

DECEMBER 8, 1964.

Findings and order after statutory hearing issuing certificates of public convenience and necessity, amending certificates, permitting and approving abandonment of service, terminating certificates, making successor in interest co-respondent, redesignating proceedings, requiring filing of agreement and undertaking, and accepting related rate schedules and supplements for filing.

Each of the Applicants listed herein has filed an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas in interstate commerce, for permission and approval to abandon service, or a petition to amend an existing certificate authorization, all as more fully described in the respective applications and petitions (and any supplements or amendments thereto) which are on file with the Commission.

The Applicants herein have filed related FPC Gas Rate Schedules and propose to initiate or abandon, add or delete natural gas service in interstate commerce as indicated by the tabulation herein. All sales certificated herein are either equal to or below the ceiling prices established by the Commission's Statement of Policy 61-1, as amended, or involve sales for which permanent certificates have been previously issued.

Harvey H. Henry, Applicant in Docket No. G-20508, proposes to continue the sales of natural gas made by Delhi-Taylor Oil Corporation, heretofore authorized in said docket. Applicant proposes to sell natural gas pursuant to a contract dated June 16, 1958, as supplemented and amended, which has heretofore been designated as Delhi-Taylor Oil Corporation FPC Gas Rate Schedule No. 32, and which is herein redesignated as Harvey H. Henry FPC Gas Rate Schedule No. 1. The rate proposed to be collected by Applicant under said rate schedule is in effect subject to refund in Docket No. RI64-89. Applicant has filed a motion in said docket to be joined as a co-respondent therein, insofar as said proceeding pertains to sales made under Harvey H. Henry's FPC Gas Rate Schedule No. 1. Accordingly, Applicant will be joined as a co-respondent in Docket No. RI64-89, said proceeding will be redesignated, and Applicant will be required to file an agreement and undertaking to assure the refund of any amounts collected on or after September 1, 1963, in excess of the amount determined to be just and reasonable in said proceeding.

After due notice a petition to intervene by the Philadelphia Gas Works Division of The United Gas Improvement Company was filed in Docket No. CI65-50 in the matter of the application filed July 20, 1964, in said docket. A notice of intervention filed by the Public Utilities Commission of the State of California and a petition to intervene by Pacific Gas and Electric Company were filed in Docket No. CI65-101 in the matter of the application filed August 3, 1964, in said docket. The petitions to intervene and the notice of intervention have been withdrawn, and no other petitions to intervene, notices of intervention, or protest to the granting of any of the respective applications in this order have been received.

At a hearing held on November 30, 1964, the Commission on its own motion received and made a part of the record in these proceedings all evidence, including the applications, amendments and exhibits thereto, submitted in support of the respective authorizations sought herein, and upon consideration of the record,

The Commission finds:

(1) Each Applicant herein is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission or will be engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and will, therefore, be a "natural-gas company" within the meaning of said Act upon the commencement of the service under the respective authorizations granted hereinafter.

(2) The sales of natural gas hereinbefore described, as more fully described in the respective applications, amendments and/or supplements herein, will be made in interstate commerce, subject to the jurisdiction of the Commission, and such sales by the respective Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of subsections (c) and (e) of section 7 of the Natural Gas Act.

(3) The sales of natural gas by the respective Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are required by the public convenience and necessity and certificates therefor should be issued as hereinafter ordered and conditioned.

(4) The respective Applicants are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate authorizations heretofore issued by the Commission in Docket Nos. G–3693, G–4537, G–5716, G–8832, G–14459, G–15404, G–10818, G–19563, G–19565, G–20508, G–20566, CI61–613, CI61–1592, CI61–1612, CI61–1714, CI62–434, CI62–857, CI63–318, CI63–869, CI63–1040, and CI64–136 should be amended as hereinafter ordered.

(6) The sales of natural gas proposed to be abandoned by the respective Applicants, as hereinbefore described, all as more fully described in the tabulation herein, and in the respective applications, are subject to the requirements of subsection (b) of section 7 of the Natural Gas Act, and such abandonments should be permitted and approved as hereinafter ordered.

(7) The certificates of public convenience and necessity heretofore issued to the Applicants herein, relating to the several abandonments hereinafter permitted and approved should be terminated.

(8) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Harvey H. Henry should be joined as a co-respondent in Docket No. RI64–89, that said proceeding should be redesignated, and that Applicant be required to file an agreement and undertaking.

(9) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the name of the respondent in the rate proceedings pending in Docket Nos. RI60–228 [1] and RI64–332 be changed from Elliott, Inc., to Elliott Oil, Inc., that said proceedings be redesignated accordingly, and that the agreements and undertakings filed in said proceedings by Elliott, Inc. shall remain in full force and effect as though filed by Elliott Oil, Inc.

(10) The respective related rate schedules and supplements as designated or redesignated in the tabulation herein, should be accepted for filing as hereinafter ordered.

The Commission orders:

(A) Certificates of public convenience and necessity be and the same are hereby issued, upon the terms and conditions of this order, authorizing the sales by the respective Applicants herein of natural gas in interstate commerce for resale, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary for such sales, all as hereinbefore described and as more fully described in the respective applications, amendments, supplements and exhibits in this consolidated proceeding.

(B) The certificates granted in paragraph (A) above are not transferable and shall be effective only so long as Applicants continue the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(C) The grant of the certificates issued in paragraph (A) above shall not be construed as a waiver of the requirements of section 4 of the Natural Gas Act or of Part 154 or Part 157 of the Commission's regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against the respective Applicants. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts here involved. Nor shall the grant of the certificates aforesaid for service to the particular customers involved imply approval of all of the terms of the respective contracts, particularly as to the cessation of service upon termination of said contracts, as provided by section 7(b) of the Natural Gas Act. Nor shall the grant of the certificates aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales of natural gas subject to said certificates.

(D) The certificate authorizations heretofore issued to the respective Applicants in Docket Nos. G–4537, G–15404, G–19563, G–19565, CI61–1592, CI63–318, CI63–1040 and CI64–136 are hereby amended by adding thereto authorization to sell natural gas to the same purchasers and in the same areas as covered by the original authorizations, pursuant to the rate schedule supplements as indicated in the tabulation herein.

(E) The certificates heretofore issued in Docket Nos. G–5716, G–10818, CI61–613 and CI63–869 are hereby amended by deleting therefrom authorization granted herein, in Docket Nos. CI64–1173, CI65–330, CI65–369 and CI64–1309.

(F) The certificate heretofore issued in Docket No. G–3693 is hereby amended to reflect the change in corporate name from Elliott, Inc. to Elliott Oil, Inc., as indicated in the tabulation herein.

(G) The certificates heretofore issued in Docket Nos. G–8832, G–14459, G–20508, G–20566, CI61–612, CI61–1714, CI62–434, CI62–857 and CI63–869 are hereby amended by changing the certificate holders to the respective successors in interest as indicated in the tabulation herein.

(H) Permission for and approval of the abandonment of service by the respective Applicants, as hereinbefore described and as more fully described in the respective applications herein, are hereby granted.

(I) The certificates heretofore issued in Docket Nos. G–5566, G–8404, G–11985, G–20476, CI61–240 and CI63–823 are hereby terminated.

(J) Applicant in Docket No. CI65–50 shall submit a supplement to its related rate schedule and a revised billing statement to reflect the 20.0¢ rate.

(K) The certificate issued in Docket No. CI65–362 is hereby conditioned as follows:

(a) The initial price, including tax reimbursement shall not exceed 15.0 cents per Mcf at 14.65 psia.

(b) In the event that the Commission amends its Policy Statement No. 61–1 by adjusting the boundary between the Panhandle area and the "Other Oklahoma" area so as to increase the initial wellhead price for new gas in the areas involved herein, Applicant thereupon may substitute the new rate consistent with the contract reflecting the amount of such increase, and thereafter collect the new rate prospectively, in lieu of the initial rate herein required.

(c) The allowances for take-or-pay provisions in the related rate schedule are subject to the ultimate disposition with respect to such provisions in the rule-making proceeding in Docket No. R–199; however, Applicant will not be required to file take-or-pay provisions for less than 80 percent of the annual quantity.

(L) Harvey H. Henry is hereby joined as a co-respondent in Docket No. RI64–89, and said proceeding is redesignated accordingly.[2]

(M) Within 30 days from the issuance of this order Harvey H. Henry shall execute, in the form set out below,[3] and shall file with the Secretary of the Commission, an acceptable agreement and undertaking in Docket No. RI64–89 to assure the refund of any excess charges, together with interest at the rate of 7 percent per annum, collected by him on or after September 1, 1963, for sales under his FPC Gas Rate Schedule No. 1.

(N) Harvey H. Henry shall comply with the refunding and reporting procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder, and his agreement and undertaking filed in Docket No. RI64–89 shall remain in full force and effect until discharged by the Commission.

(O) The name of the respondent in the rate proceedings pending in Docket Nos. RI60–228 and RI64–332 be and the same is hereby changed from Elliott, Inc. to Elliott Oil, Inc., and said proceedings are redesignated accordingly.[4] The agreements and undertakings filed in said proceedings by Elliott, Inc. shall remain in full force and effect as though filed by Elliott Oil, Inc.

(P) The respective related rate schedules and supplements as indicated in the tabulation herein, are hereby accepted for filing; the rate schedules relating to the successions herein, are hereby redesignated and accepted, subject to the applicable Commission Regulations under the Natural Gas Act to be effective on the dates indicated in the tabulation herein.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE, *Secretary.*

[1] Petition to amend certificate to show change in corporate name.
[2] Original filing of Dec. 5, 1962, was made by predecessor, Western Natural Gas Co.; by letter dated Nov. 26, 1963, Sinclair was substituted as certificate holder therein.
[3] Effective date: Date of transfer of properties.
[4] Transfers all of W. D. Noel's interest to E. G. Rodman.
[5] Effective date: Date of initial delivery.
[6] Mid-America Trust, Inc., is succeeding Virginia Rutherford as agent.
[7] Contract between Northern Natural Gas Producing Co., and buyer which covers assigned acreage; on file as Northern's FPC GRS No. 2.
[8] To Smith from Northern Natural Gas Producing Co. for its interest in No. 2 Mills "A" Well (depths below 3,400').
[9] To Smith from Northern Natural Gas Producing Co. for its interest in No. 1 Brown Well (depths below top of Pennsylvanian System).
[10] To Smith from Northern Natural Gas Producing Co. for its interest in No. 2 Nix "A" Well (depths below top of Pennsylvanian System).
[11] To be accepted as supplement only, not as a change in predecessors filed rate.
[12] Agreement whereby Smith is to connect Brown and Nix (low-deliverability) Wells to buyer's existing gathering system.
[13] Deletes acreage from coverage by the Feb. 7, 1964 amendment (supplement No. 4) which was acquired by Smith from Shell Oil Co., and is to be covered by Smith's FPC GRS No. 14.
[14] Succession to 50 percent of the interests of Delhi-Taylor Oil Corp.
[15] Sale of Delhi-Taylor properties to Continental and Tenneco Oil Co.
[16] Supplement to application which applicant expresses a willingness to accept a certificate at 20.0 cents per Mcf in lieu of the proposed price of 20.625 cents per Mcf.
[17] Contract provides for rate of 17.0 cents per Mcf, however, applicant agrees to accept permanent certificate at area ceiling rate of 13.0 cents per Mcf.
[18] Partially succeeding Gulf Oil Corp.'s FPC GRS No. 52.
[19] Contract filed as exhibit to certificate application. No rate schedule filings submitted.
[20] Source of gas depleted.
[21] Effective date: Date of this order.
[22] Production of gas no longer economically feasible.
[23] Basic contract provides for initial rate of 16.8 cents per Mcf, however, applicant states it is willing to accept a permanent certificate at 15.0 cents per Mcf and under same terms and conditions as the certificate issued to Cleary in Docket No. CI61-1461, by order issued Mar. 30, 1964.
[24] Adopts basic contract between Cleary Petroleum, Inc., and Arkansas Louisiana Gas Co.; on file as Cleary's FPC GRS No. 6.
[25] Contract between Shell Oil Co. and buyer which covers assigned acreage; on file as Shell's FPC GRS No. 240.
[26] Sets price at 14 cents for gas produced from formation below 3,400 feet and above top of Morrowan Series and 16 cents for gas produced from formations below top of Morrowan Series. Present production will be from deep zone at 16-cent price.
[27] To Smith from Shell for its interest in No. 1 Brown Well.
[28] Production failure.

## TENNECO OIL CO. ET AL.

### Notice of Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

DECEMBER 10, 1964.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service heretofore authorized as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on all applications in which no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a protest or petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

See footnotes at end of table.

[1] Application filed in Docket No. C162-1081; being treated as a petition to amend Docket No. G-3626 to show succession in interest.
[2] Subject to upward B.t.u. adjustment.
[3] Applicant's share of gas from Klumpp "D" Sand Unit "F" will be disposed of under contract with new purchaser.
[4] Amendment filed to add acreage and to cover interests of nonoperators.
[5] The quantity of gas attributable to this small interest does not economically merit the laying of gathering facilities for sale of gas to purchaser.
[6] As conditioned per order issued in Docket Nos. G-13221, et al.
[7] Subject to upward and downward B.t.u. adjustment.
[8] Application previously noticed Dec. 17, 1963, in Docket Nos. G-5671, et al. at a rate of 15.6235 cents per Mcf; however applicant agreed to accept last clean rate of predecessor, Everbright Oil Co.
[9] Production above base of Permian System.
[10] Production below Permian System and above Pennsylvanian System.
[11] Production below top of Pennsylvanian System.
[12] Includes 2.0 cents gathering and treatment charge.
[13] Includes 1.0 cent per Mcf for compression charge.
[14] Maximum 2.0 cents per Mcf deducted from price in the event Buyer elects to install compression.
[15] Lease has lapsed by its own terms.
[16] Rate per Mcf for gas from that portion of Ohlson "B" lease acquired from H. E. Bangert, et al.
[17] Production from Clemence Unit.
[18] Production from Olson Unit.
[19] Subject to B.t.u. adjustment and deduction by buyer if buyer treats gas.

[F.R. Doc. 64-12896; Filed, Dec. 16, 1964; 8:45 a.m.]

# SECURITIES AND EXCHANGE COMMISSION

[File No. 812-1684]

## NATIONAL INDUSTRIES, INC.

### Notice of Filing of Application for Order That Company Is Not an Investment Company

DECEMBER 11, 1964.

Notice is hereby given that National Industries, Inc. ("National"), Louisville, Ky., a Kentucky corporation, has filed an application pursuant to section 3(b)(2) of the Investment Company Act of 1940 ("Act") for an order of the Commission declaring that it is primarily engaged in a business or businesses other than that of investing, reinvesting, owning, holding, or trading in securities, either directly, through majority-owned subsidiaries, or through controlled companies conducting similar types of businesses. All interested persons are referred to the application, which is on file with the Commission, for a full statement of applicant's representations, which are summarized below.

A summary of National's assets as of June 30, 1964, adjusted to reflect certain sales and acquisitions through October 12, 1964, on the basis of the values assigned by National is set forth in Table I below:

TABLE I

| | Percent voting securities owned | National's assets | |
|---|---|---|---|
| | | Amount | Percent |
| Securities of majority-owned subsidiaries: | | | |
| G*E*S* Stores, Inc. | 100.0 | $2,449,219 | 7.81 |
| Bargain Town, U.S.A., Inc. | 50.7 | 4,830,700 | 15.40 |
| Magic World of Sound, Inc.[1] | 100.0 | 8,140,727 | 25.96 |
| The Protective Life Ins. Co.[2] | 90.0 | 300,000 | .96 |
| International Life Insurance Co. of the Americas | 96.0 | 500,000 | 1.59 |
| National Auto Realty Co. | 100.0 | 38,230 | |
| Eighth & Oak Auto Salvage Co. | 100.0 | 19,327 | |
| Durham & Wagner, Inc. | 100.0 | 200 | |
| Due from subsidiaries | | 232,269 | .74 |
| Total | | 16,501,772 | 52.61 |
| Miscellaneous assets | | 335,043 | 1.07 |
| Securities of companies less than majority-owned: | | | |
| Foundation Life Insurance Co. | 36.7 | 5,250,000 | 16.74 |
| RIC Group, Inc. | 11.8 | 1,131,900 | 3.61 |
| Hamilton Life Insurance Co. | 4.5 | 798,171 | 2.55 |
| Missouri-Kansas Texas R.R. | 17.1 | 2,534,218 | 8.08 |
| Notes receivable | | 3,473,256 | 11.07 |
| Investments in oil properties | | 899,372 | 2.87 |
| Investments in other companies | | 439,400 | 1.40 |
| Total | | 14,526,317 | 46.32 |
| Total assets less cash | | 31,363,132 | 100.00 |
| Cash | | 711,632 | |
| | | 32,074,764 | |

[1] The assets of Magic World of Sound, Inc. include 96,529 shares (12.6 percent) of the outstanding common stock of Life Insurance Co. of Kentucky valued at $7,432,733.
[2] The assets of The Protective Life Insurance Co. consist of 26,754 shares (4 percent) of the common stock of Missouri Fidelity Insurance Co. and options to purchase additional shares.

Investment securities represented by National's holdings of less than majority-owned subsidiaries aggregate $14,526,317, or approximately 46 percent of its total assets exclusive of cash. If Magic World of Sound, Inc.'s holdings of Life Insurance Company of Kentucky are deemed to be assets of National, the parent of Magic World of Sound, Inc., and if a proportionate part of the assets of The Protective Life Insurance Co. are deemed to belong to National, which owns 90 percent of its outstanding common stock, National's investment securities would aggregate $22,229,050, or 70.9 percent of its total assets exclusive of cash. Consequently, it appears that National is an investment company, as defined in section 3(a)(3) of the Act. However, National claims that it is entitled to a finding that it is not an investment company because of the following circumstances.

National states that it is primarily engaged in the following businesses: used car sales, financing used car purchases, repair of automatic transmissions, sale of automobile parts (all on its own account); distribution of children's educational records (through Magic World of Sound, Inc., a wholly-owned subsidiary); retail discount store operations (through G*E*S* Stores, Inc., a wholly-owned subsidiary, and Bargain Town, U.S.A., Inc., a 50.7 percent owned subsidiary); life insurance (through Foundation Life Insurance Co., 36.7 percent owned, International Life Ins. Co. of the Americas, 96 percent owned, and Life Insurance Co. of Kentucky, controlled through Magic World of Sound, Inc. together with others).

Notice is further given that any interested person may, not later than December 28, 1964, at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon applicant at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing shall be issued upon request or upon the Commission's own motion.

For the Commission (pursuant to delegated authority).

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

## STANDARD SYSTEM INVESTMENT CORP.

### Notice of Proposal To Terminate Registration

DECEMBER 11, 1964.

Notice is hereby given that the Securities and Exchange Commission ("Commission") on its own motion proposes to declare by order, pursuant to section 8(f) of the Investment Company Act of 1940 ("Act"), that Standard System Investment Corp. ("Standard"), 1002 Liberty National Bank & Trust Company Building, Savannah, Ga., has ceased to be an investment company.

Standard registered as a face-amount certificate company under section 8(a) of the Act by notification of registration filed on February 23, 1942. At that time Standard was in receivership and was in the process of a court-supervised liquidation. Thereafter, all of the assets of the company were distributed to security holders and, on June 4, 1947, the receiver was discharged by order of the Court, Chatham County, Savannah, Ga.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, on its motion, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and that upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than January 8, 1965, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the motion may be issued by the Commission upon the basis of the information stated in this notice, unless an order for hearing upon this motion shall be issued upon request or upon the Commission's direction.

For the Commission (Pursuant to delegated authority).

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

# INTERSTATE COMMERCE COMMISSION

[Notice 1095]

## MOTOR CARRIER TRANSFER PROCEEDINGS

DECEMBER 14, 1964.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of pratice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC 67392. By order of December 10, 1964, The Transfer Board approved the transfer to Andrew Malatesta, Sr., Andrew Malatesta, Jr., and Stella Malatesta, a partnership, doing business as S. Malatesta & Sons, Paterson, N.J., of the operating rights issued by the Commission, August 25, 1958, under Certificate in No. MC 20551, to Andrew Malatesta, Sr., Andrew Malatesta, Jr., Frank Malatesta and Stella Malatesta, a partnership, doing business as S. Malatesta & Sons, Paterson, N.J., authorizing the transportation, over irregular routes, of household goods, between points in Passaic, Essex, Hudson, Union, Morris, and Bergen Counties, N.J., on the one hand, and, on the other, points in New Jersey, New York, Pennsylvania, and Connecticut; between Philadelphia, Pa., on the one hand, and, on the other, points in New York, New Jersey, Delaware, and Maryland; between Philadelphia, Pa., and points in Pennsylvania within 25 miles of City Hall, Philadelphia, on the one hand, and, on the other, points in New Jersey; household goods, between Baltimore, Md., and points in Maryland within 25 miles of Baltimore, on the one hand, and, on the other, points in New Jersey, New York, Pennsylvania, Rhode Island, Delaware, Massachusetts, Connecticut, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Ohio, Indiana, Illinois, Michigan and the District of Columbia, subject to certain restrictions; and between Baltimore, Md., and points in Baltimore County, Md., on the one hand, and, on the other, points in New Jersey, New York, Pennsylvania, Delaware, Rhode Island, Massachusetts, Connecticut, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, and the District of Columbia. John M. Zachara, Post Office Box 2860, Paterson, N.J., attorney for applicants.

No. MC–FC 67397. By order of December 10, 1964, The Transfer Board approved the transfer to Robert A. Reader, doing business as Reader's Express, West Winfield, N.Y., of the operating rights in Certificate No. MC 14749, issued October 31, 1957, to Richard H. DuPont, doing business as DuPont's Express Service, Mohawk, N.Y., authorizing the transportation, over regular routes, of: General commodities with the usual exceptions, between Utica, N.Y., and Little Falls, N.Y., serving specified intermediate points. L. Murray Doody, Jr., 75 State Street, Albany, N.Y., 12207, attorney for applicants.

No. MC–FC 67398. By order of December 10, 1964, The Transfer Board approved the transfer to Max Marquis, doing business as Valley Trucking Co., Post Office Box 1626, Brownsville, Tex., of the operating rights in Certificate No. MC 118341, issued May 11, 1962, to H & R Distributors, Inc., 164 Calle Jacaranda, Brownsville, Tex., authorizing the transportation over irregular routes of: Frozen vegetables, from Brownsville, Tex., to specified points in Louisiana, Tennessee, Virginia, Ohio, Michigan, Florida, New York, Mississippi, Pennsylvania, and Georgia.

No. MC–FC 67399. By order of December 10, 1964, The Transfer Board approved the transfer to M & M Construction Service, Inc., New Albany, Ind., of the operating rights in Certificate No. MC 114295, issued March 26, 1956, to Harry T. Neely and Bertha J. Neely, doing business as M & M Construction Service, New Albany, Ind., authorizing the transportation, over irregular routes, of: Such commodities (except cement) as are transported in dump trucks, from Louisville, Ky., to points in a specified portion of Indiana and Kentucky. Ollie L. Merchant, 140 South Fifth Street, Louisville, Ky., 40202, attorney for applicants.

No. MC–FC 67400. By order of December 10, 1964, The Transfer Board approved the transfer to James D. Newton, Post Office Box 122, Hillsdale, Kans., of the operating rights in Certificates Nos. MC 64575, MC 64575 Sub 1, and MC 64575 Sub 2, issued May 11, 1949, January 17, 1947, and May 26, 1964, respectively, to Ray B. Rees, Hillsdale, Kans., authorizing the transportation, over regular routes, of: General commodities, with certain exceptions, from Kansas City, Mo., to Hillsdale, Kans.; household goods and emigrant movables, between Hillsdale, and points within ten miles, on the one hand, and, on the other, points in Missouri; feed, seed, and agricultural implements and parts between Hillsdale, Kans., and Kansas City, Mo.

[SEAL] HAROLD D. McCOY, *Secretary.*

**UNITED STATES STATUTES AT LARGE**

**[88th Cong., 1st Sess.]**

**Contains laws and concurrent resolutions enacted by the Congress during 1963, reorganization plan, and Presidential proclamations. Included is a numerical listing of bills enacted into public and private law, and a guide to the legislative history of bills enacted into public law.**

**Price: $7.50**

**Published by Office of the Federal Register, National Archives and Records Service, General Services Administration**

**Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402**

**FEDERAL REGISTER**

Area Code 202 Phone 963-3261

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration (mail address National Archives Building, Washington, D.C. 20408), pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

# Rules and Regulations

## Title 45—PUBLIC WELFARE

### Chapter VII—Commission on Civil Rights

### REVISION OF CHAPTER

Chapter VII of Title 45 of the Code of Federal Regulation is revised to read as follows:

Part
701 Organization and functions of the Commission.
702 Rules on hearings of the Commission.
703 Operations and functions of State Advisory Committees.
704 Communications and confidential information.

### PART 701—ORGANIZATION AND FUNCTIONS OF THE COMMISSION

Subpart A—Operations and Functions

701.1 Establishment.
701.2 Responsibilities.

Subpart B—Organization Statement

701.11 Membership of the Commission.
701.12 Staff organization.

AUTHORITY: The provisions of this Part 701 issued under secs. 101-106, 71 Stat. 634-636, as amended; 42 U.S.C. 1975-1975e.

#### Subpart A—Operations and Functions

**§ 701.1 Establishment.**

The United States Commission on Civil Rights (hereinafter referred to as the "Commission") is a bipartisan agency of the Executive branch of the Government. Established under the Civil Rights Act of 1957, 71 Stat. 634, the Commission derives its responsibilities from that Act and from amendments to it in the Civil Rights Act of 1960, 74 Stat. 86, and in the Civil Rights Act of 1964, 78 Stat. 241. (Hereinafter the 1957 Act as amended will be referred to as "the Act.")

**§ 701.2 Responsibilities.**

(a) The Commission's responsibilities under section 104(a) of the Act may be summarized briefly as follows:

(1) Investigating sworn allegations that certain citizens of the United States are being deprived of their right to vote and have that vote counted by reason of color, race, religion, or national origin;

(2) Studying and collecting information concerning legal developments constituting a denial of equal protection of the laws under the Constitution;

(3) Appraising the laws and policies of the Federal Government with respect to equal protection of the laws under the Constitution;

(4) Serving as a national clearinghouse for information in respect to denials of equal protection of the laws because of race, color, religion, or national origin;

(5) Investigating sworn allegations that citizens are being accorded or denied the right to vote in Federal elections as a result of patterns or practices of fraud or discrimination.

(b) Under section 104(b) of the Act the Commission is charged with: The submission of interim reports to the President and to the Congress at such times as the Commission, the Congress, or the President shall deem desirable, and the submission to the President and to the Congress of the final report of its activities, findings, and recommendations not later than January 31, 1968.

(c) In fulfilling these responsibilities the Commission is authorized by the Act to hold hearings; to constitute State Advisory Committees; to consult with Governors, Attorneys General, other representatives of State and local governments, and private organizations; and to issue subpenas for the production of documents and the attendance of witnesses. The Act also provides that all Federal agencies shall cooperate fully with the Commission to the end that it may effectively carry out its functions and duties.

#### Subpart B—Organization Statement

**§ 701.11 Membership of the Commission.**

Pursuant to section 101 of the Act:

(a) The Commission is composed of six members, appointed by the President by and with the advice and consent of the Senate, not more than three of whom are of the same political party.

(b) The Chairman and Vice-Chairman of the Commission are designated by the President, the Vice-Chairman acting as Chairman in the absence or disability of the Chairman or in the event of a vacancy in that office.

(c) No vacancy in the Commission affects its powers and any vacancy is filled in the same manner and subject to the same limitation with respect to party affiliations as the original appointment was made.

(d) Four members of the Commission constitute a quorum.

**§ 701.12 Staff organization.**

(a) Pursuant to section 105(a) of the Act, the staff of the Commission consists of a Staff Director, appointed by the President by and with the advice and consent of the Senate, and of such other personnel as the Commission may appoint within the limitations of its appropriation.

(b) The staff organization of the Commission is as follows:

(1) *Office of the Staff Director.* The Office of the Staff Director is responsible, following general directives of the Commission, for fulfilling the statutory duties and responsibilities enumerated in the Act, as amended, by: Providing for the over-all organization, management and administration of the Commission staff; developing and recommending top-level policies for Commission action, planning, organizing, operating and reporting on all programs, functions and activities approved by the Commission, and providing leadership to the heads of the several staff divisions and offices to assure a coordinated effort resulting in the maximum efficiency and effectiveness.

(2) *Office of General Counsel.* The Office of General Counsel is responsible for: The final review as to legal sufficiency, prior to submission to the Staff Director and the Commission, of the work product of the several staff units; final determination of all matters relating to the jurisdiction of the Commission and of its State Advisory Committees; the docketing, processing and disposition of complaints filed with the Commission; the planning, development and conduct of Commission hearings; all matters related to the issuance of subpenas by the Commission; the conduct of Commission approved projects or surveys concerning the administration of justice; the preparation of Commission testimony on civil rights legislation; and all matters relating to the contractual authority of the agency and concerning all laws, rules and regulations affecting the day-to-day operation of the agency.

(3) *Office of Business Administration.* The Office of Business Administration is responsible for: The day-to-day administrative functioning of the agency; planning, installing and implementing management controls and practices; providing personnel services including recruitment, placement and classification; the administration of funds including salaries, travel, procurement of supplies, materials, and the like; and providing general office services including messenger, files, reproduction, mail, space and related services.

(4) *Information Office.* The Information Office is responsible for: The preparation and dissemination of Commission information by press release, press conference, personal appearance, personal contact or appropriate literature; maintaining the necessary liaison with all news media in connection with Commission hearings and other activity; and informational liaison with public and private groups and with the general public, including the reception and briefing of visitors and the scheduling of speaking engagements.

(5) *Federal Programs Division.* The Federal Programs Division is responsible for: Maintaining liaison with the various Federal agencies on civil rights matters; appraising the laws and policies of the Federal Government with respect to equal protection of the laws under the Constitution; providing services to the Federal agencies in respect to civil rights policies and their implementation; the conduct of studies and field surveys in respect to Federal program policy and implementation; the preparation of analyses and reports on specific Federal

programs for submission to the Commission; and the conduct of meetings and conferences for the purpose of exchanging ideas and information among Federal authorities and between Federal authorities and other public or private groups.

(6) *Research and Publications Division.* The Research and Publications Division is responsible for: Locating, acquiring, classifying, analyzing and disseminating information on literature and events concerning the status of equal protection of the laws under the Constitution; maintaining a library and information center containing a comprehensive collection of materials pertinent to the civil rights field and a system of retrieval capable of filling requests for a wide range of information; the publication of periodic bulletins containing information on current developments and new literature in the various subject fields; research and preparation of special reports analyzing and interpreting series of developments in particular subject areas; the preparation of other pertinent informational materials; the editing and preparation for publication of Commission manuscripts and transcripts of Commission hearings; and maintaining the necessary liaison with the Government Printing Office and the General Services Administration in connection with Commission publications.

(7) *Field Services Division.* The Field Services Division is responsible for: Organizing, servicing, supervising and keeping at full strength, State Advisory Committees in the 50 States and the District of Columbia; evaluating and assessing potential Committee members in order to maintain a representative Committee in each State; acting as liaison for Commission research projects requiring State Advisory Committee and regional, State and local public or private organization assistance or cooperation; planning such meetings and conferences of State Advisory Committees as may be necessary to enable the Committees to fulfill their role as advisors to the Commission on State and local civil rights matters; giving technical advice and aid to the Committees in the development of reports to the Commission, including the preparation of such reports for publication; assisting in the collection and dissemination of information on the status of equal protection of the laws in the several States through the State Advisory Committee system and through other State and local resources; and the maintenance of such field offices as may be established by the Commission.

(8) *Voting and Investigations Division.* The Voting and Investigations Division is responsible for: The detailed planning and implementation of Commission programs, surveys and investigations concerning denials of voting rights by reason of color, race, religion, or national origin; and concerning voting irregularities in Federal elections resulting from patterns or practices of vote fraud or discrimination; the necessary surveys in specific regional areas with regard to voting disparities, upon which the Commission may recommend that the Secretary of Commerce compile registration and voting statistics; the preparation of detailed analyses and reports on the status of voting rights for submission to the Commission; and such other field survey and investigative work as may be requested by the Staff Director in the implementation of other Commission approved projects or programs.

---

## PART 702—RULES ON HEARINGS OF THE COMMISSION

Sec.
702.1 Definitions.
702.2 Authorization for hearing.
702.3 Notice of hearing.
702.4 Subpenas.
702.5 Conduct of hearings.
702.6 Executive session.
702.7 Counsel.
702.8 Evidence at Commission hearings.
702.9 Cross-examination at public session.
702.10 Voluntary witnesses at public session.
702.11 Special executive session.
702.12 Contempt of the Commission.
702.13 Intimidation of witnesses.
702.14 Transcript of Commission proceedings.
702.15 Witness fees.
702.16 Attendance of news media.
702.17 Communications with respect to Commission hearings.

AUTHORITY: The provisions of this Part 702 issued under secs. 101–106, 71 Stat. 634–636, as amended; 42 U.S.C. 1975–1975e.

### § 702.1 Definitions.

For purposes of the following Rules on Hearings of the United States Commission on Civil Rights, the following definitions shall apply, unless otherwise provided:

(a) "The Act" shall refer to the Civil Rights Act of 1957, 71 Stat. 634, as amended.

(b) "The Commission" shall refer to the United States Commission on Civil Rights or, as provided in § 702.2, to any authorized subcommittee thereof.

(c) "The Chairman" shall refer to the Chairman of the Commission or authorized subcommittee thereof or to any acting Chairman of the Commission or of such subcommittee.

(d) "Hearing" shall refer collectively to a public session of the Commission and any executive session held in connection therewith.

(e) "The rules in this part" shall refer to the Rules on Hearings of the Commission.

### § 702.2 Authorization for hearing.

Under section 105(f) of the Act the Commission or, on the authorization of the Commission, any subcommittee of two or more members, at least one of whom shall be of each major political party, may, for the purpose of carrying out the provisions of the Act, hold such hearings and act at such times and places as the Commission or such authorized subcommittee may deem advisable; and the holding of hearings by the Commission or the appointment of a subcommittee to hold hearings pursuant to this section must be approved by a majority of the Commission, or by a majority of the members present at a meeting at which at least a quorum of four members is present.

### § 702.3 Notice of hearing.

At least thirty days prior to the commencement of any hearing, the Commission shall cause to be published in the FEDERAL REGISTER notice of the date on which such hearing is to commence, the place at which it is to be held and the subject of the hearing.

### § 702.4 Subpenas.

(a) Subpenas for the attendance and testimony of witnesses or the production of written or other matter may be issued by the Commission over the signature of the Chairman and may be served by any person designated by him.

(b) A witness compelled to appear before the Commission or required to produce written or other matter shall be served with a copy of the rules in this part at the time of service of the subpena.

(c) The Commission shall not issue any subpena for the attendance and testimony of witnesses or for the production of written or other matter which would require the presence of the party subpenaed at a hearing to be held outside of the State wherein the witness is found or resides or is domiciled or transacts business, or has appointed an agent for receipt of service of process except that, in any event, the Commission may issue subpenas for the attendance and testimony of witnesses and the production of written or other matter at a hearing held within fifty miles of the place where the witness is found or resides or is domiciled or transacts business or has appointed an agent for receipt of service of process.

(d) The Chairman shall receive and the Commission shall dispose of requests to subpena additional witnesses except as otherwise provided in § 702.6(e).

(e) Requests for subpena shall be in writing, supported by a showing of the general relevance and materiality of the evidence sought. Witness fees and mileage, computed pursuant to § 702.15, shall be paid by the person at whose instance a witness is subpenaed.

(f) Witnesses shall be subpenaed at a reasonably sufficient time in advance of their scheduled appearance, in order to give the witness an opportunity to prepare for his appearance and to employ counsel, should he so desire.

### § 702.5 Conduct of hearings.

(a) The Chairman shall announce in an opening statement the subject of the hearing.

(b) Following the opening statement, the Commission shall first convene in executive session if one is required pursuant to the provisions of § 702.6.

(c) At a hearing, the Chairman shall, subject to the approval of the Commission—

(1) Set the order of presentation of evidence and appearance of witnesses;

(2) Rule on objections and motions;

(3) Administer oaths and affirmations;

(4) Make all rulings with respect to the introduction into or exclusion from the record of documentary or other evidence;

(5) Regulate the course and decorum of the hearing and the conduct of the parties and their counsel to insure that the hearing be conducted in a fair and impartial manner.

(d) Hearings shall proceed with reasonable dispatch and due regard shall be had for the convenience and necessity of witnesses.

(e) The questioning of witnesses shall be conducted only by Members of the Commission, by authorized Commission staff personnel, or by counsel to the extent provided in § 702.7.

(f) In addition to persons served with a copy of the rules in this part pursuant to §§ 702.4 and 702.6, a copy of the rules in this part will be made available to all witnesses at a hearing.

(g) The Chairman may punish breaches of order and decorum by censure and exclusion from the hearings.

### § 702.6 Executive session.

(a) If the Commission determines that evidence or testimony at any hearing may tend to defame, degrade, or incriminate any person, it shall receive such evidence or testimony or summary of such evidence or testimony in executive session.

(b) The Commission shall afford any person defamed, degraded, or incriminated by such evidence or testimony an opportunity to appear and be heard in executive session, with a reasonable number of additional witnesses requested by him, before deciding to use such evidence or testimony.

(1) Such person shall be served with notice in writing of the date, time, and place made available for the appearance of witnesses at executive session, at least ten days prior to such date, or where service is by mail at least 14 days prior to such date. This notice shall be accompanied by a copy of the rules in this part and by a brief summary of the information which the Commission has determined may tend to defame, degrade, or incriminate such person.

(2) The notice, summary, and rules in this part shall be served personally, by depositing the same in the United States mail as certified mail, or by leaving a copy thereof at the last known residence or business address of such person.

(3) The date of service, for purposes of this section, shall be the day when the material is deposited in the United States mail or is delivered in person, as the case may be. When service is made by certified mail, the return post office receipt shall be proof of service; in all other cases, the acknowledgment of the party served, or the verified return of the one making service shall be proof of the same.

(c) If a person receiving notice under this section notifies the Commission within five days of service of such notice, or where service is by mail within 8 days of service of such notice, that the time scheduled therein constitutes a hardship, the Commission may, in its discretion, set a new time for his appearance at executive session.

(d) In the event such person fails to appear at executive session at the time and place made available under paragraph (b) or (c) of this section, he shall not be entitled to another opportunity to appear at executive session, except as provided in § 702.11.

(e) If such person intends to submit sworn statements of himself or others, or if he intends to request that witnesses appear in his behalf at executive session, he shall, no later than 48 hours prior to the time set under paragraph (b) or (c) of this section, submit to the Commission all such statements and a list of all such witnesses. The Commission will inform such person whether the number of witnesses requested is reasonable within the meaning of paragraph (b) of this section. In addition, the Commission will receive and dispose of requests from such person to subpena other witnesses. Requests for subpenas shall be made sufficiently in advance of the scheduled executive session as to afford persons subpenaed reasonable notice of their obligation to appear at that session. Subpenas returnable at executive session shall be governed by the provisions of § 702.4.

(f) Persons for whom an executive session has been scheduled, and persons compelled to appear at such session, may be represented by counsel at such session to the extent provided by § 702.7.

(g) Attendance at executive session shall be limited to Members of the Commission, authorized Commission staff personnel, witnesses and their counsel at the time scheduled for their appearance, and such other persons whose presence is requested or consented to by the Commission.

(h) In the event the Commission determines to release or use evidence or testimony which it has determined may tend to defame, degrade, or incriminate any person, in such a manner as to reveal publicly the identity of such person, such evidence or testimony, prior to such public release or use, will be given at a public session, and the Commission will afford such person an opportunity to appear as a voluntary witness or to file a sworn statement in his behalf and to submit brief and pertinent sworn statements of others.

### § 702.7 Counsel.

(a) Any person compelled to appear in person before the Commission and any witness appearing at a public session of the Commission will be accorded the right to be accompanied and advised by counsel, who will have the right to subject his client to reasonable examination, and to make objections on the record and to argue briefly the basis for such objections.

(b) For the purpose of this section, "counsel" shall mean an attorney at law admitted to practice before the Supreme Court of the United States, or the highest court of any State or Territory of the United States.

(c) The failure of any person to obtain counsel shall not excuse him from attendance in response to a subpena, nor shall any person be excused in the event his counsel is excluded from the hearing pursuant to § 702.5(g). In the latter case, however, the witness shall be afforded a reasonable time to obtain other counsel, said time to be determined by the Commission.

### § 702.8 Evidence at Commission hearings.

(a) The rules of evidence prevailing in courts of law or equity shall not control hearings of the Commission.

(b) Where a witness testifying at a public session offers the sworn statements of other persons, such statements, in the discretion of the Commission, may be included in the record, provided they are received by the Commission 24 hours in advance of his appearance.

(c) The prepared statement of a witness testifying at a public session, in the discretion of the Commission, may be placed into the record or may be read into the record, provided that such statement is received by the Commission 24 hours in advance of his appearance.

(d) In the discretion of the Commission, evidence may be included in the record after the close of a public session, provided the Commission determines that such evidence does not tend to defame, degrade, or incriminate any person.

(e) The Commission will determine the pertinency of testimony and evidence adduced at its hearings, and may refuse to include in the record of a hearing or may strike from the record any evidence it considers to be cumulative, immaterial, or not pertinent.

### § 702.9 Cross-examination at public session.

If the Commission determines that oral testimony of a witness at a public session tends to defame, degrade, or incriminate any person, such person or his counsel shall be permitted to submit questions to the Commission in writing, which, in the discretion of the Commission, may be put to such witness by the Chairman or by authorized Commission staff personnel.

### § 702.10 Voluntary witnesses at public session.

A person who has not been subpenaed and who has not been afforded an opportunity to appear pursuant to § 702.6, may be permitted, in the discretion of the Commission, to make an oral or written statement at a public session. Such person may be questioned to the same extent and in the same manner as other witnesses before the Commission.

### § 702.11 Special executive session.

If, during the course of a public session, new evidence is submitted which the Commission determines may tend to defame, degrade, or incriminate any person, the provisions of § 702.6 shall apply, and such extensions, recesses or continuances of the public session as it deems necessary shall be ordered by the Commission, except that the time and notice requirements of § 702.6 may be modified by the Commission provided reasonable notice of a scheduled executive session is afforded such person, and except that the Commission may, in its discretion, strike such evidence from the record, in which case the provisions of § 702.6 shall not apply.

### § 702.12 Contempt of the Commission.

Proceedings and process of the Com-

executive session may for good cause be limited to inspection of the official transcript of his testimony. Transcript

(d) Pursuant to the authority of Executive Order 11007, dated February

## PART 704—COMMUNICATIONS AND CONFIDENTIAL INFORMATION

**§ 702.12 Contempt of the Commission.**

Proceedings and process of the Commission are governed by section 105(g) of the Act, which provides:

In case of contumacy or refusal to obey a subpena, any district court of the United States or the United States court of any territory or possession, or the District Court of the United States for the District of Columbia, within the jurisdiction of which the inquiry is carried on or within the jurisdiction of which said person guilty of contumacy or refusal to obey is found or resides or is domiciled or transacts business, or has appointed an agent for receipt of service of process, upon application by the Attorney General of the United States shall have jurisdiction to issue to such person an order requiring such person to appear before the Commission or a subcommittee thereof, there to produce pertinent, relevant and nonprivileged evidence if so ordered, or there to give testimony touching the matter under investigation; and any failure to obey such order of the court may be punished by said court as a contempt thereof.

**§ 702.13 Intimidation of witnesses.**

Witnesses to Commission hearings are protected by the provisions of 18 U.S.C. 1505, which provide:

Whoever corruptly, or by threats or force, or by any threatening letter or communication, endeavors to influence, intimidate, or impede any witness in any proceeding pending before any department or agency of the United States, or in connection with any inquiry or investigation being had by either House, or any Committee of either House, or any joint committee of the Congress; or

Whoever injures any party or witness in his person or property on account of his attending or having attended such proceeding, inquiry, or investigation, or on account of his testifying or having testified to any matter pending therein; or

Whoever, with intent to avoid, evade, prevent, or obstruct compliance in whole or in part with any civil investigative demand duly and properly made under the Antitrust Civil Process Act willfully removes from any place, conceals, destroys, mutilates, alters, or by other means falsifies any documentary material which is the subject of such demand; or

Whoever corruptly, or by threats of force, or by any threatening letter or communication influences, obstructs, or impedes or endeavors to influence, obstruct, or impede the due and proper administration of the law under which such proceeding is being had before such department or agency of the United States, or the due and proper exercise of the power of inquiry under which such inquiry or investigation is being had by either House, or any committee of either House or any joint committee of the Congress—

Shall be fined not more than $5,000 or imprisoned not more than five years, or both.

**§ 702.14 Transcript of Commission proceedings.**

(a) An accurate transcript shall be made of the testimony of all witnesses at all hearings, either public or executive sessions, of the Commission or of any subcommittee thereof. Transcripts shall be recorded solely by the official reporter, or by any other person or means designated by the Commission.

(b) Every person who submits data or evidence shall be entitled to retain or, on payment of lawfully prescribed costs, procure a copy or transcript thereof, except that a witness in a hearing held in executive session may for good cause be limited to inspection of the official transcript of his testimony. Transcript copies of public sessions may be obtained by the public upon the payment of the cost thereof.

(c) Any person who has presented testimony at a hearing may ask within sixty days after the close of the hearing to correct errors in the transcript of his testimony. Such requests shall be granted only to make the transcript conform to his testimony as presented at the hearing.

**§ 702.15 Witness fees.**

Pursuant to section 102(j) of the Act: A witness attending any session of the Commission shall receive $6 for each day's attendance and for the time necessarily occupied in going to and returning from the same, and ten cents per mile for going from and returning to his place of residence; witnesses who attend at points so far removed from their respective residences as to prohibit return thereto from day to day shall be entitled to an additional allowance of $10 per day for expenses of subsistence, including the time necessarily occupied in going to and returning from the place of attendance; and mileage payments shall be tendered to the witness upon service of a subpena issued on behalf of the Commission or any subcommittee thereof.

**§ 702.16 Attendance of news media.**

Subject to the physical limitations of the hearing room and consideration of the physical comfort of Commission Members, staff, and witnesses, reasonable access for coverage of public sessions shall be provided to the various means of communication, including newspapers, magazines, radio, newsreels, and television. However, no witness shall be televised, filmed, or photographed during the hearing nor shall his testimony be broadcast or recorded for broadcasting, if he objects.

**§ 702.17 Communications with respect to Commission hearings.**

During any hearing held outside Washington, D.C., communications to the Commission with respect to such hearing must be made to the Chairman or authorized Commission staff personnel in attendance. All requests for subpenas returnable at a hearing, requests for appearance of witnesses at a hearing, and statements or other documents for inclusion in the record of a hearing, required to be submitted in advance, must be submitted to the Chairman, or such authorized person as he may appoint, at an office located in the community where such hearing is scheduled to be held. The location of such office will be set forth in all subpenas issued under the rules in this part and in all notices prepared pursuant to § 702.6.

## PART 703—OPERATIONS AND FUNCTIONS OF STATE ADVISORY COMMITTEES

Sec.
703.1 Name and establishment.
703.2 Functions.
703.3 Scope of subject matter.
703.4 Membership.
703.5 Officers.
703.6 Subcommittees.
703.7 Meetings.
703.8 Reimbursement of members.

AUTHORITY: The provisions of this Part 703 issued under secs. 101–106, 71 Stat. 634–636, as amended; 42 U.S.C. 1975–1975e.

**§ 703.1 Name and establishment.**

Pursuant to section 105(c) of the Act, there are established by the Commission the State Advisory Committees to the Commission (each of which is called in this part the State Committee).

**§ 703.2 Functions.**

By invitation of the Commission, the State Committee is authorized to exercise the following functions within the limits defined in § 703.3.

(a) Advise the Commission in writing of any knowledge or information it has of any alleged deprivation of the right to vote and to have the vote counted, by reason of color, race, religion, or national origin, or that citizens are being accorded or denied the right to vote in Federal elections as a result of patterns or practices of fraud or discrimination.

(b) Advise the Commission concerning legal developments constituting a denial of equal protection of the laws under the Constitution, and as to the effect of the laws and policies of the Federal Government with respect to equal protection of the laws.

(c) Advise the Commission upon matters of mutual concern in the preparation of reports of the Commission to the President and the Congress.

(d) Receive reports, suggestions, and recommendations from individuals, public and private organizations, and public officials upon matters pertinent to inquiries conducted by the State Committee.

(e) Initiate and forward advice and recommendations to the Commission upon matters which the State Committee has studied.

(f) Assist the Commission in matters in which the Commission shall request the assistance of the State Committee.

(g) Attend, as observers, any open hearing or conference which the Commission may hold within the State.

**§ 703.3 Scope of subject matter.**

The scope of subject matter to be dealt with by the State Committee shall be those subjects of inquiry or study with which the Commission itself is authorized to deal, pursuant to section 104(a) of the Act. The State Committee shall confine its studies to the State. It may, however, undertake to study subjects other than those chosen by the Commission for study, within the limits of the Act.

**§ 703.4 Membership.**

Subject to special exceptions made from time to time by the Commission to fit special circumstances, the State Committee shall consist of at least five members appointed by the Commission. Members of the State Committee shall serve for a fixed term to be set by the Commission upon the appointment of each member subject to the duration of advisory committees prescribed by section 8 of Executive Order 11007, February 26, 1962 (3 CFR).

**§ 703.5 Officers.**

(a) The officers of the State Committee shall be a chairman and vice chairman and such other officers as the State Committee deems advisable.

(b) The chairman shall be appointed by the Commission.

(c) The vice chairman and other officers shall be elected by the State Committee by a majority vote of the full membership of the State Committee.

(d) The chairman, or in his absence, the vice chairman, shall:

(1) Call meetings of the State Committee.

(2) Preside over all meetings of the State Committee.

(3) Appoint all subcommittees of the State Committee, with the approval of a majority of the State Committee.

(4) Perform such other functions as the State Committee may authorize or the Commission may request, within the limits of the Act.

**§ 703.6 Subcommittees.**

The State Committee may:

(a) Approve the establishment of subcommittees, composed of members of the State Committee to study and report upon matters under consideration, and it may authorize such subcommittees to take specific action upon matters within the competence of the State Committee.

(b) Designate, with the prior approval of the Commission, or at the request of the Commission, individual members of the State Committee to perform special projects involving research or study within the scope of the subject matter defined in § 703.3.

**§ 703.7 Meetings.**

(a) Meetings of the State Committee shall be called whenever it is deemed necessary or desirable by the Chairman, or by a majority of the State Committee, or by the Commission, provided that the following conditions have been met:

(1) The Commission has given prior written approval of such meeting, and

(2) There is a quorum present. A quorum shall consist of one-half or more of the members of the State Committee, or five members, whichever is the lesser.

(b) Summary minutes shall be prepared and made available as soon as practicable after each meeting for distribution to the members of the State Committee and to the Commission.

(c) In connection with its functions under the regulations in this part and subject to them, a State Committee may hold open meetings for the purpose of soliciting information and advice from local officials and other persons respecting subject matter within its jurisdiction, provided however, that a State Committee shall not, in conjunction with its meetings, or otherwise, purport to conduct a formal hearing or adversary proceeding of any type, take oral testimony under oath, or issue subpenas.

(d) Pursuant to the authority of Executive Order 11007, dated February 26, 1962, section 6(f) thereof, the Chairman of the Commission has made the following determinations:

(1) That compliance with the requirements of section 6, subsections (a), (b), and (c), of the aforesaid Executive Order would interfere with the proper functioning of the State Advisory Committees of the Commission on Civil Rights, in that the assignment of a full-time salaried officer or employee of the Commission to each of the State Advisory Committee meetings would be impossible and impractical within the limitations of the staff and budget of the Commission, and

(2) That the Commission on Civil Rights has retained Consultants, on a part-time basis, to assist the Commission staff in attendance at State Advisory Committee meetings to the end that the intent of the aforesaid Executive Order is complied with, and

(3) That adequate provisions have been otherwise made by the statement governing State Advisory Committees published herewith to insure that such committee operations are subject to Government control and in conformity with the proper purposes and functioning of the Commission, and

(4) That the nature of the function of the State Advisory Committees as set forth in the said statement governing the State Advisory Committees is such that the waiver of the aforesaid requirement specified in section 6, subsections (a), (b), and (c), of the said Executive Order are in the public interest; and

(5) That, therefore, the meeting of a State Advisory Committee shall not be subject to the requirements specified in section 6, subsections (a), (b), and (c), of the Executive Order 11007, dated February 26, 1962.

**§ 703.8 Reimbursement of members.**

(a) State Committee members may be reimbursed by the Commission by a per diem subsistence allowance and for travel expenses at rates not to exceed those prescribed by Congress for Government employees, for the following activities only:

(1) Attendance at meetings, as defined in § 703.7.

(2) Any activity specifically requested and authorized by the Commission to be reimbursed.

(b) Members will be reimbursed for the expense of travel by private automobile on a mileage basis only to the extent such expense is no more than that of suitable public transportation for the same trip, unless special circumstances justify the additional expense of travel by private automobile.

(c) From time to time, the Commission may give prior authorization for the reimbursement of the State Committee for secretarial help and expenses of duplication and the like, for projects specifically requested by the Commission.

(d) No appropriated funds shall be made available to the State Committee except for the reimbursements authorized in this section.

---

## PART 704—COMMUNICATIONS AND CONFIDENTIAL INFORMATION

Sec.
704.1 Communications with the Commission.
704.2 Confidential information.

AUTHORITY: The provisions of this Part 704 issued under secs. 101–106, 71 Stat. 634–636, as amended; 42 U.S.C. 1975–1975e.

**§ 704.1 Communications with the Commission.**

(a) *Complaints.* Any person may bring to the attention of the Commission a grievance which he believes falls within the jurisdiction of the Commission, as set forth in section 104 of the Act. This shall be done by submitting a complaint in writing to Office of General Counsel, United States Commission on Civil Rights, 1701 Pennsylvania Avenue NW., Washington, D.C., 20425. Allegations falling under section 104(a) (1) and (5) of the Act (discrimination or fraud in voting) must be under oath or affirmation. All complaints should set forth the pertinent facts upon which the complaint is based, including but not limited to specification of (1) names and titles of officials or other persons involved in acts forming the basis for the complaint; (2) accurate designations of place locations involved; (3) dates of events described in complaint.

(b) *Other communications.* Requests for information and for Commission literature should be directed to Information Office, United States Commission on Civil Rights, 1701 Pennsylvania Avenue NW., Washington, D.C., 20425. Communications with respect to Commission hearings should be made pursuant to § 702.17 of this chapter. All other communications with the Commission should be directed to Staff Director, United States Commission on Civil Rights, 1701 Pennsylvania Avenue NW., Washington, D.C., 20425.

**§ 704.2 Confidential information.**

(a) By the provisions of section 102(g) of the Act, no evidence or testimony or summary of evidence or testimony taken in executive session may be released or used in public sessions without the consent of the Commission, and any person who releases or uses in public without the consent of the Commission such evidence or testimony taken in executive session shall be fined not more than $1,000, or imprisoned for not more than one year.

(b) All information or documents obtained or prepared by any Member, officer or employee of the Commission, including members of State Advisory Committees, in the course of his official duties, or by virtue of his official status, shall, unless a matter of public record, be deemed confidential. No such person may permit the disclosure or use of the same for any purpose other than for the performance of his official duties.

(c) Any Member, officer or employee of the Commission, including members of State Advisory Committees, who is served with a subpena requiring the disclosure of such information or the production of such documents shall appear in response to such subpena and, unless

otherwise directed by the Commission, shall respectfully decline to disclose the

culosis, (3) establishing and maintaining public health services, (4) the preven-

fiscal year or such longer period for which such plan is approved shall be

otherwise directed by the Commission, shall respectfully decline to disclose the information or produce the documents called for, basing his refusal upon this section. Any such person who is served with such a subpena shall promptly advise the Commission of the service of such subpena, the nature of the information or documents sought, and any circumstances which may bear upon the desirability of making available such information or documents.

*Supersedure.* This revision of Chapter VII supersedes the notice published at 27 F.R. 4569, concerning the operations and functions of the State Advisory Committees of the Commission, and the notice published at 27 F.R. 4570, concerning meetings of the State Advisory Committees.

Dated: December 15, 1964.

JOHN A. HANNAH,
*Chairman,*
*U.S. Commission on Civil Rights.*

[F.R. Doc. 64-13022; Filed, Dec. 17, 1964; 8:50 a.m.]

# Title 42—PUBLIC HEALTH

## Chapter I—Public Health Service, Department of Health, Education, and Welfare

SUBCHAPTER D—GRANTS

## PART 51—GRANTS TO STATES FOR PUBLIC HEALTH SERVICES

### Grants for Dental Health Services

Notice of proposed rule making, public rule making procedures, and delay in effective date have been omitted as unnecessary in the issuance of the following amendments to this part which relate solely to grants for programs relating to dental health services. The purpose of these amendments is to add new material providing the basis for grants for dental health services for which funds were made available by the Department of Health, Education, and Welfare Appropriation Act, 1965.

Pursuant to section 314(j) of the Public Health Service Act, as amended (58 Stat. 695; 42 U.S.C. 246(j)), these amendments are made after consultation with, and with the agreement of, a conference of the State health authorities.

*Effective date.* These amendments shall be effective on the date of publication in the FEDERAL REGISTER.

1. Section 51.1(f) is amended to read as follows:

§ 51.1 Definitions.

* * * * *

(f) "Plans" refers to the information and proposals submitted by the State health authority pursuant to the regulations in this part for activities of the State and political subdivisions thereof for (1) the prevention, treatment and control of venereal disease, (2) the prevention, treatment and control of tuberculosis, (3) establishing and maintaining public health services, (4) the prevention, treatment and control of mental illness, including emotional, psychiatric and neurological disorders, (5) establishing and maintaining organized community programs of heart disease control, (6) the prevention, control and eradication of cancer, (7) services for the chronically ill and the aged, (8) establishing and maintaining radiological health services, or (9) establishing and maintaining dental health services.

* * * * *

2. Section 51.2 is amended by adding thereto a new paragraph (h) which reads as follows:

§ 51.2 Allotments; extent of health problems.

* * * * *

(h) *Dental health.* The extent of the dental health problem shall be determined to be equal to the population of each State.

3. Section 51.3 is amended by adding thereto a new paragraph (i) which reads as follows:

§ 51.3 Basis of allotments.

* * * * *

(i) *Dental health.* Of the amount available for allotment for dental health programs, 100 percent on the basis of population weighted by financial need.

4. Section 51.4(c) is amended to read as follows:

§ 51.4 Allotments; estimates; time of making; duration.

* * * * *

(c) Allotments for each program for the first six months shall be made prior to the beginning of the fiscal year or as soon thereafter as practicable, and shall equal not less than 60 percent nor more than 70 percent of the total sum determined to be available for allotment during that fiscal year. At the end of the second quarter, the amounts of allotments for the first six-month period which have not been certified for payment to the respective States pursuant to § 51.8 shall become available for allotment among the States in the same manner as moneys which had not previously been allotted: *Provided,* That with respect to grants for mental health activities, such amounts of the allotment to any State in any year as are approved in its plan for the development of comprehensive mental health planning shall remain available for expenditure by that State for that purpose during the fiscal year in which the State plan is approved and during such portion of the next succeeding fiscal year as may be approved by the Surgeon General or his designee, and in such cases (1) payments from such amounts shall be made during the period for which such plan has been approved without regard to the six-month allotment limitation in § 51.8(d), and (2) expenditures of public funds of the State or its political subdivision (otherwise allowable for matching payments of mental health grant funds as authorized by § 51.9(a)) which are made during the fiscal year or such longer period for which such plan is approved shall be allowable for matching such payments; and *Provided further,* That with respect to grants from the fiscal year 1965 appropriation for dental health, 100 percent of the funds available for allotment during that year shall be allotted as soon as practicable in the fiscal year, and that such allotments shall remain available for the remainder of the fiscal year.

* * * * *

5. The first sentence in section 51.6(b) is amended to read as follows:

§ 51.6 Plans; contents.

* * * * *

(b) The State health department shall, with respect to its total annual expenditures of Federal and required matching funds for its venereal disease, tuberculosis, heart, cancer, mental health, the chronically ill and the aged, radiological health, and dental health programs, provide in its State plan for the allocation of such expenditures to such programs in accordance with either of the following procedures:

* * * * *

6. Section 51.9(a) is amended to read as follows:

§ 51.9 Required expenditure of State and local funds; funds of cooperating agencies.

(a) Moneys paid to any State or to a cooperating agency pursuant to section 314 of the Act shall be paid upon the condition that there be expended in the State during the fiscal year for which payment is made and for purposes specified in the plan with respect to which payment is made, public funds of the State and its political subdivision (or in the case of payments to a cooperating agency having an approved heart disease control plan, funds of the cooperating agency) in amounts which shall be exclusive of any funds derived from loan or grant from the United States for the same general purpose and which shall equal separately for venereal disease control, tuberculosis, mental health, general health, the chronically ill and the aged, heart disease, radiological health, and dental health, 100 percent of the Federal grant funds expended pursuant to the plan, except that with respect to Federal grant funds appropriated especially for services for the chronically ill and the aged the percentage shall be 50 percent for fiscal years 1962, 1963, and 1964, and 66⅔ percent for fiscal year 1965.

* * * * *

(Sec. 215, 58 Stat. 690, as amended; 42 U.S.C. 216. Interpret or apply sec. 314, 58 Stat. 693, as amended; 42 U.S.C. 246)

Dated: November 24, 1964.

[SEAL] LUTHER L. TERRY,
*Surgeon General.*

Approved: December 14, 1964.

ANTHONY J. CELEBREZZE,
*Secretary.*

[F.R. Doc. 64-12986; Filed, Dec. 17, 1964; 8:49 a.m.]

propeller clearance for airplanes with leaf spring shock struts, has been included in order to eliminate the need for extensive testing ranges for such airplanes. The deflection corresponding to 1.5*g* has been found to be safe and reliable for this purpose and has therefore been included in the rule. That CAM material that has not been incorporated in Part 23 [New] has been determined to be advisory, not regulatory, in nature. This material is being reviewed, and where current and necessary, it will be issued in the Agency's Advisory Circular System.

In the table in present § 3.106, yaw values are given for the "stick" and "wheel" when in fact the yaw values are applicable only to rudder pedal application. The table in this part has been revised accordingly.

The requirement in present CAM 3.294 with regard to approved bolts, pins, screws, and rivets and locking devices for them has been deleted as unnecessary as the Agency does not require specific approval of these items.

Paragraphs A23.7(e) (1) and (3) of Appendix A were reworded, in light of comments received, to make them consistent with the structural load criteria in the basic part.

Other minor changes of a technical clarifying nature have been made. They are not substantive and do not impose any burden on regulated persons.

The definitions, abbreviations, and rules of construction in Part 1 [New] of the Federal Aviation regulations apply to Part 23 [New].

Interested persons have been afforded an opportunity to participate in the making of this regulation and due consideration has been given to all relevant matter presented. The Agency is particularly appreciative of the cooperative spirit in which the public's comments were submitted.

In consideration of the foregoing, Chapter I of Title 14 is amended as follows, effective February 1, 1965:

1. By deleting Part 3.

2. By adding a Part 23 [New] reading as hereinafter set forth.

Issued in Washington, D.C., on September 28, 1964.

N. E. HALABY,
*Administrator.*

changes that have been made do not affect substance. They have been made to ensure consistency in language throughout the new Federal Aviation Regulations, thereby making them easier to understand and apply. Part 23 [New] substitutes the word "must" for "shall". This has been done to reflect the fact that airworthiness standards are simply conditions precedent that are required to be met for the issue of a type certificate. The imperative "shall" would be inappropriate in this case. The failure to meet the standards simply results in a denial of the issue of the type certificate.

The sections in Part 23 [New] have been rearranged and renumbered. This will allow the requirements of this Part to be numbered identically with the comparable requirements in Parts 25 [New], 27 [New], and 29 [New]. In addition, some material has been rearranged in order that the requirements be more logically placed within the Part. An example of this is the regrouping of the requirements in §§ 3.73, 3.73–3, 3.76, 3.84, 3.86, 3.120, 3.123, 3.124, and 3.437 through 3.780, dealing with recording of data and information, into the division of Part 23 [New] dealing with flight manual requirements. A similar rearrangement was the combining of the flutter requirements of §§ 3.159 and 3.311 into § 23.629.

As was stated in the preamble of the notice of proposed rule making of Part 23, those definitions in present Part 3 (and not now in Part 1 or executed in this part) that are necessary, will be recodified with the definitions of other airworthiness parts and added to Part 1 [New].

FAR 23 [New] contains, in addition to the CAM material included in the notice of proposed rule making, CAMs 3.71–1 and 3.311–1, and the second sentence of CAM 3.422–2. CAM 3.71–1 was included as it relaxes the rule by allowing certain tolerances during flight testing. These tolerances are necessary for the proper conduct of flight testing and such tolerances have been safely used in the past. They are now specifically included in the rule on flight testing. The flutter prevention method described in CAM 3.311–1 has been an additional safe acceptable method meeting the flutter requirements of CAR 3.311 and therefore has been included in this part. The second sentence of § 3.422–2, with regard to the amount of deflection necessary to show

# Title 14—AERONAUTICS AND SPACE

## Chapter I—Federal Aviation Agency

[Regulatory Docket No. 4080]

## PART 23—AIRWORTHINESS STANDARDS: NORMAL, UTILITY, AND ACROBATIC CATEGORY AIRPLANES [NEW]

This amendment adds Part 23 [New] to the Federal Aviation regulations to replace Part 3 of the Civil Air Regulations and is a part of the Agency recodification program announced in Draft Release 61-25, published in the FEDERAL REGISTER on November 15, 1961 (26 F.R. 10698).

Part 23 [New] was published as a notice of proposed rule making in the FEDERAL REGISTER on April 14, 1964 (29 F.R. 5111), and given further distribution as Notice No. 64-17.

During the life of the recodification project, Chapter I of Title 14 may contain more than one part bearing the same number. To differentiate between the two, the recodified parts, such as this one, will be labeled "[New]". The label will of course be dropped at the completion of the project as all of the regulations will be new.

Many of the comments received recommended specific substantive changes to the regulations. Although many of the recommendations appear to be meritorious, they cannot be adopted as a part of the recodification program. The purpose of the program is simply to streamline and clarify present regulatory language and delete obsolete or redundant provisions. To attempt substantive changes, other than relaxatory ones that are completely noncontroversial, would delay the project and be contrary to the ground rules specified for it in Draft Release 61-25. However, we recognize that an overall substantive review of the Part is long overdue. This review is now being undertaken and all substantive comments received are being carefully studied.

Present CAR Part 3 reflects the various writing styles used by those who have worked on it in the past. The recodification has allowed us to use one style throughout Part 23 [New]. The style

Subpart A—General

23.757 Auxiliary floats.

Personnel and Cargo Accommodations

23.771 Pilot compartment.
23.773 Pilot compartment view.
23.775 Windshields and windows.
23.777 Cockpit controls.
23.779 Motion and effect of cockpit controls.
23.781 Cockpit control knob shape.
23.783 Doors.
23.785 Seats and berths.
23.787 Cargo compartments.
23.807 Emergency exits.
23.831 Ventilation.

Pressurization

23.841 Pressurized cabins.
23.843 Pressurization tests.

Fire Protection

23.853 Compartment interiors.
23.859 Combustion heater fire protection.

Miscellaneous

23.871 Leveling marks.

Subpart E—Powerplant

General

23.901 Installation.
23.903 Engines.
23.905 Propellers.
23.907 Propeller vibration.
23.925 Propeller clearance.

Fuel System

23.951 General.
23.953 Fuel system independence.
23.955 Fuel flow.
23.957 Flow between interconnected tanks.
23.959 Unusable fuel supply and fuel system operation on low fuel.
23.961 Fuel system hot weather operation.
23.963 Fuel tanks: general.
23.965 Fuel tank tests.
23.967 Fuel tank installation.
23.969 Fuel tank expansion space.
23.971 Fuel tank sump.
23.973 Fuel tank filler connection.
23.975 Fuel tank vents and carburetor vapor vents.
23.977 Fuel tank outlet.

Fuel System Components

23.991 Fuel pumps.
23.993 Fuel system lines and fittings.
23.995 Fuel valves and controls.
23.997 Fuel strainer or filter.
23.999 Fuel system drains.

Oil System

Sec.
23.1011 General.
23.1013 Oil tanks.
23.1015 Oil tank tests.
23.1017 Oil lines and fittings.
23.1019 Oil strainer or filter.
23.1021 Oil system drains.
23.1023 Oil radiators.
23.1027 Propeller feathering system.

Cooling

23.1041 General.
23.1043 Cooling tests.
23.1045 Cooling test procedures for single-engine airplanes.
23.1047 Cooling test procedures for multi-engine airplanes.

Liquid Cooling

23.1061 Installation.
23.1063 Coolant tank tests.

Induction System

23.1091 Air induction.
23.1093 Induction system icing protection.
23.1095 Carburetor deicing fluid flow rate.
23.1097 Carburetor deicing fluid system capacity.
23.1099 Carburetor deicing fluid system detail design.
23.1101 Carburetor air preheater design.
23.1103 Induction system ducts.
23.1105 Induction system screens.

Exhaust System

23.1121 General.
23.1123 Exhaust manifold.
23.1125 Exhaust heat exchangers.

Powerplant Controls and Accessories

23.1141 Powerplant controls: general.
23.1143 Throttle controls.
23.1145 Ignition switches.
23.1147 Mixture controls.
23.1149 Propeller speed and pitch controls.
23.1153 Propeller feathering controls.
23.1157 Carburetor air temperature controls.
23.1163 Powerplant accessories.
23.1165 Engine ignition systems.

Powerplant Fire Protection

23.1183 Lines and fittings.
23.1189 Shutoff means.
23.1191 Firewalls.
23.1193 Cowling.

Subpart F—Equipment

General

23.1301 Function and installation.
23.1303 Flight and navigation instruments.
23.1305 Powerplant instruments.
23.1307 Miscellaneous equipment.

Instruments: Installation

Sec.
23.1321 Arrangement and visibility.
23.1323 Airspeed indicating system.
23.1325 Static air vent system.
23.1327 Magnetic direction indicator.
23.1329 Automatic pilot system.
23.1331 Instruments using a power supply.
23.1335 Flight director instrument.
23.1337 Powerplant instruments.

Electrical Systems and Equipment

23.1351 General.
23.1353 Storage battery design and installation.
23.1357 Circuit protective devices.
23.1361 Master switch.
23.1365 Electric cables.
23.1367 Switches.

Lights

23.1381 Instrument lights.
23.1383 Landing lights.
23.1385 Position light system installation.
23.1387 Position light system dihedral angles.
23.1389 Position light distribution and intensities.
23.1391 Minimum intensities in the horizontal plane of forward and rear position lights.
23.1393 Minimum intensities in any vertical plane of forward and rear position lights.
23.1395 Maximum intensities in overlapping beams of forward and rear position lights.
23.1397 Color specifications.
23.1399 Riding light.
23.1401 Anticollision light system.

Safety Equipment

23.1411 Accessibility.
23.1413 Safety belts.
23.1415 Ditching equipment.
23.1419 Deicers.

Miscellaneous Equipment

23.1431 Electronic equipment.
23.1435 Hydraulic systems.
23.1437 Accessories for multiengine airplanes.

Subpart G—Operating Limitations and Information

23.1501 General.
23.1505 Airspeed limitations.
23.1507 Maneuvering speed.
23.1511 Flap extended speed.
23.1513 Minimum control speed.
23.1519 Weight and center of gravity.

Sec.
23.1521 Powerplant limitations.
23.1523 Minimum flight crew.
23.1525 Kinds of operation.

Markings and Placards

23.1541 General.

Authority: The provisions of this Part 23 issued under secs. 313(a), 601, 603, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421, 1423.

## Subpart A—General

**§ 23.1 Applicability.**

(a) This part prescribes airworthiness standards for the issue of type certificates, and changes to those certificates, for small airplanes in the normal, utility, and acrobatic categories.

(b) Each person who applies under Part 21 [New] for such a certificate or change must show compliance with the applicable requirements of this part.

**§ 23.3 Airplane categories.**

(a) The normal category is limited to airplanes intended for nonacrobatic operation. Nonacrobatic operation includes any maneuvers incident to normal flying, stalls (except whip stalls), and turns in which the angle of bank is not more than 60 degrees.

(b) The utility category is limited to airplanes intended for limited acrobatic operation. Limited acrobatic operation includes any maneuvers incident to normal flying, stalls (except whip stalls), spins (if approved for the particular type of airplane), lazy eights, chandelles, and steep turns in which the angle of bank is more than 60 degrees.

(c) The acrobatic category is limited to airplanes intended for use without restrictions other than those shown to be necessary as a result of required flight tests.

(d) Small airplanes may be certificated in more than one category if the requirements of each requested category are met.

## Subpart B—Flight

### General

**§ 23.21 Proof of compliance.**

(a) Each requirement of this subpart must be met at each appropriate combination of weight and center of gravity within the range of loading conditions for which certification is requested. This must be shown—

(1) By tests upon an airplane of the type for which certification is requested, or by calculations based on, and equal in accuracy to, the results of testing; and

(2) By systematic investigation of each probable combination of weight and center of gravity, if compliance cannot be reasonably inferred from combinations investigated.

(b) The following general tolerances are allowed during flight testing. However, greater tolerances may be allowed in particular tests:

| Item | Tolerance |
|---|---|
| Weight | +5%, −10%. |
| Critical items affected by weight | +5%, −1%. |
| C.G. | ±7% total travel. |

**§ 23.23 Load distribution limits.**

Ranges of weights and centers of gravity within which the airplane may be safely operated must be established. If low fuel adversely affects balance or stability, the airplane must be tested under conditions simulating those that would exist when the amount of usable fuel does not exceed one gallon for each 12 maximum continuous horsepower of the engine or engines.

**§ 23.25 Weight limits.**

(a) *Maximum weight.* The maximum weight (the highest weight at which compliance with each applicable requirement of this part is shown) must be established so that it is—

(1) Not more than—

(i) The highest weight selected by the applicant;

(ii) Except as provided in § 23.473 for multiengine airplanes, the design maximum weight (the highest weight at which compliance with each applicable structural loading condition of this part is shown); or

(iii) The highest weight at which compliance with each applicable flight requirement of this part is shown; and

(2) Assuming a weight of 170 pounds for each occupant of each seat for normal category airplanes and 190 pounds (unless otherwise placarded) for utility and acrobatic category airplanes, not less than the weight with—

(i) Each seat occupied, oil at full tank capacity, and at least enough fuel for one-half hour of operation at rated maximum continuous power; or

(ii) The required minimum crew, and fuel and oil to full tank capacity.

(b) *Minimum weight.* The minimum weight (the lowest weight at which compliance with each applicable requirement of this part is shown) must be established so that it is not more than the sum of—

(1) The empty weight determined under § 23.29;

(2) The weight of the required minimum crew (assuming a weight of 170 pounds for each crewmember);

(3) The weight of the oil at full tank capacity; and

(4) The weight of no more than the quantity of fuel necessary for one-half hour of operation at rated maximum continuous power.

**§ 23.29 Empty weight and corresponding center of gravity.**

(a) The empty weight and corresponding center of gravity must be determined by weighing the airplane with—

(1) Fixed ballast;

(2) Unusable fuel determined under § 23.959;

(3) Undrainable oil (the oil remaining in the airplane while in the ground attitude after drainage of all drainable oil in that attitude);

(4) Engine coolant; and

(5) Hydraulic fluid.

(b) The condition of the airplane at the time of determining empty weight must be one that is well defined and can be easily repeated.

**§ 23.31 Removable ballast.**

Removable ballast may be used in showing compliance with the flight requirements of this subpart, if—

(a) The place for carrying ballast is properly designed and installed, and is marked under § 23.1557; and

(b) The Airplane Flight Manual includes instructions for the proper placement of the removable ballast under each loading condition for which removable ballast is necessary.

**§ 23.33 Propeller speed and pitch limits.**

(a) *General.* The propeller speed and pitch must be limited to values that will assure safe operation under normal operating conditions.

(b) *Propellers not controllable in flight.* For each propeller whose pitch cannot be controlled in flight—

(1) During takeoff and initial climb at $V_Y$, the propeller must limit the engine r.p.m., at full throttle or at maximum allowable takeoff manifold pressure, to a speed not greater than the maximum allowable takeoff r.p.m.; and

(2) During a closed throttle glide at the placarded "never-exceed speed", the propeller may not cause an engine speed above 110 percent of maximum continuous speed.

(c) *Controllable pitch propellers without constant speed controls.* Each propeller that can be controlled in flight, but that does not have constant speed controls, must have a means to limit the pitch range so that—

(1) The lowest possible pitch allows compliance with paragraph (b)(1) of this section; and

(2) The highest possible pitch allows compliance with paragraph (b)(2) of this section.

(d) *Controllable pitch propellers with constant speed controls.* Each controllable pitch propeller with constant speed controls must have—

(1) With the governor in operation, a means at the governor to limit the maximum engine speed to the maximum allowable takeoff r.p.m.; and

(2) With the governor inoperative, a means to limit the maximum engine speed to 103 percent of the maximum allowable takeoff r.p.m. with the propeller blades at the lowest possible pitch and with takeoff manifold pressure, the airplane stationary, and no wind.

### Performance

**§ 23.45 General.**

Compliance with the performance requirements of this subpart must be shown for still air with a standard atmosphere.

**§ 23.49 Stalling speed.**

(a) $V_{S_0}$ is the stalling speed, if obtainable, or the minimum steady speed, in miles per hour (CAS), at which the airplane is controllable, with the—

(1) Engines idling, throttles closed (or at not more than the power necessary for zero thrust at a speed not more than 110 percent of the stalling speed);

(2) Propellers in the takeoff position;

(3) Landing gear extended;

(4) Wing flaps in the landing position;

(5) Cowl flaps closed;

(6) Center of gravity in the most unfavorable position within the allowable landing range; and

(7) Weight used when $V_{S_0}$ is being used as a factor to determine compliance with a required performance standard.

(b) $V_{S_0}$ at maximum weight may not exceed 70 miles per hour for—

(1) Single-engine airplanes; and

(2) Multiengine airplanes of 6,000 pounds or less maximum weight that cannot meet the minimum rate of climb specified in § 23.67(b) with the critical engine inoperative.

(c) $V_{S_1}$ is the calibrated stalling speed, if obtainable, or the minimum steady speed, in miles per hour, at which the airplane is controllable, with the—

(1) Engines idling, throttles closed (or at not more than the power necessary for zero thrust at a speed not more than 110 percent of the stalling speed);

(2) Propellers in the takeoff position;

(3) Airplane in the condition existing in the test in which $V_{S_1}$ is being used; and

(4) Weight used when $V_{S_1}$ is being used as a factor to determine compliance with a required performance standard.

(d) $V_{S_0}$ and $V_{S_1}$ must be determined by flight tests, using the procedure specified in § 23.201.

**§ 23.51 Takeoff.**

(a) For airplanes of more than 6,000 pounds maximum weight (except skiplanes for which landplane takeoff data has been determined under this paragraph and furnished in the Airplane Flight Manual)—

(1) The distance required to take off and climb over a 50-foot obstacle must be determined with—

(i) The engines operating within approved operating limitations; and

(ii) The cowl flaps in the normal takeoff position;

(2) Upon reaching a height of 50 feet above the takeoff surface level, the airplane must have reached a speed of not less than—

(i) $1.3\ V_{S_1}$; or

(ii) Any lesser speed, not less than $V_X$ plus 5 miles per hour, that is shown to be safe under any condition, including turbulence and complete engine failure;

(3) The starting point for measuring seaplane and amphibian takeoff distance may be the point at which a speed of not more than three miles per hour is reached; and

(4) No takeoff made to determine the data required by this section may require exceptional piloting skill or exceptionally favorable conditions.

(b) For airplanes of 6,000 pounds or less maximum weight—

(1) The takeoff may not require exceptional piloting skill;

(2) With takeoff power, there must be enough elevator control—

(i) For a tail-wheel type airplane, to maintain, at $0.8\ V_{S_1}$, an attitude that will allow holding the airplane on the runway until a safe takeoff speed is reached; and

(ii) For a nose-wheel type airplane to raise the nose-wheel clear of the takeoff surface at $0.85\ V_{S_1}$.

**§ 23.65 Climb: all engines operating.**

(a) For airplanes of more than 6,000 pounds maximum weight—

(1) Each airplane must have a steady rate of climb at sea level of at least 300 feet per minute and a steady angle of climb of at least 1:12 for land planes or 1:15 for seaplanes and amphibians with—

(i) Not more than maximum continuous power on each engine;

(ii) The landing gear retracted;

(iii) The wing flaps in the takeoff position; and

(iv) The cowl flaps in the position used in the cooling tests required by §§ 23.1041 through 23.1047;

(2) Each airplane with engines for which the takeoff and maximum continuous power ratings are identical and that has fixed-pitch, two-position, or similar propellers, may use a lower propeller pitch setting than that allowed by § 23.33 to obtain rated engine r.p.m. at $V_X$, if—

(i) The airplane shows marginal performance (such as when it can meet the rate of climb requirements of paragraph (a)(1) of this section but has difficulty in meeting the angle of climb requirements of paragraph (a)(1) of this section or of § 23.77); and

(ii) Acceptable engine cooling is shown at the lower speed associated with the best angle of climb.

(b) Each airplane of 6,000 pounds or less maximum weight must have a steady rate of climb at sea level of at least 300 feet per minute, or $10\ V_{S_1}$ (that is, the number of feet per minute is obtained by multiplying the number of miles per hour by 10), whichever is greater, with—

(1) Takeoff power;

(2) The landing gear extended;

(3) The wing flaps in the takeoff position; and

(4) The cowl flaps in the position used in the cooling tests required by §§ 23.1041 through 23.1047.

**§ 23.67 Climb: one engine inoperative.**

(a) Each multiengine airplane of more than 6,000 pounds maximum weight must be able to maintain a steady rate of climb of at least $0.02\ V_{S_0}^2$ (that is, the number of feet per minute is obtained by multiplying the square of the number of miles per hour by 0.02) at an altitude of 5,000 feet with the—

(1) Critical engine inoperative, and its propeller in the minimum drag position;

(2) Remaining engines at not more than maximum continuous power;

(3) Landing gear retracted;

(4) Wing flaps in the most favorable position; and

(5) Cowl flaps in the position used in the cooling tests required by §§ 23.1041 through 23.1047.

(b) For multiengine airplanes of 6,000 pounds or less maximum weight, the following apply:

(1) Each airplane with a $V_{S_0}$ of more than 70 miles per hour must be able to maintain a steady rate of climb of at least $0.02\ V_{S_0}^2$ (that is, the number of feet per minute is obtained by multiplying the square of the number of miles per hour by 0.02), at an altitude of 5,000 feet with the—

(i) Critical engine inoperative and its propeller in the minimum drag position;
(ii) Remaining engines at not more than maximum continuous power;
(iii) Landing gear retracted;
(iv) Wing flaps in the most favorable position; and
(v) Cowl flaps in the position used in the cooling tests required by §§ 23.1041 through 23.1047.

(2) For each airplane with a stalling speed of 70 miles per hour or less, the steady rate of climb at 5,000 feet must be determined with the—
(i) Critical engine inoperative and its propeller in the minimum drag position;
(ii) Remaining engines at not more than maximum continuous power;
(iii) Landing gear retracted;
(iv) Wing flaps in the most favorable position; and
(v) Cowl flaps in the position used in the cooling tests required by §§ 23.1041 through 23.1047.

### § 23.75 Landing.

(a) For airplanes of more than 6,000 pounds maximum weight (except skiplanes for which landplane landing data have been determined under this paragraph and furnished in the Airplane Flight Manual), the horizontal distance required to land and come to a complete stop (or to a speed of approximately three miles per hour for seaplanes and amphibians) from a point 50 feet above the landing surface must be determined as follows:

(1) A steady gliding approach with a calibrated airspeed of at least 1.5 $V_{S_1}$ must be maintained down to the 50 foot height.

(2) The landing may not require exceptional piloting skill or exceptionally favorable conditions.

(3) The landing must be made without excessive vertical acceleration or tendency to bounce, nose over, ground loop, porpoise, or water loop.

(b) Airplanes of 6,000 pounds or less maximum weight must be able to be landed safely and come to a stop without exceptional piloting skill and without excessive vertical acceleration or tendency to bounce, nose over, ground loop, porpoise, or water loop.

### § 23.77 Balked landing.

For balked landings, each airplane with a maximum weight of—

(a) More than 6,000 pounds, must be able to maintain a steady angle of climb at sea level of at least 1: 30 with—
(1) Takeoff power on each engine;
(2) The landing gear extended; and
(3) The wing flaps in landing position, except that, if the flaps may safely be retracted in two seconds or less without loss of altitude and without sudden changes of angle of attack or exceptional piloting skill, they may be retracted; and

(b) 6,000 pounds or less, must be able to maintain a steady rate of climb at sea level of at least 200 feet per minute, or 5 $V_{S_0}$ (that is, the number of feet per minute is obtained by multiplying the number of miles per hour by five), whichever is greater, with—
(1) Takeoff power on each engine;
(2) The landing gear extended; and
(3) The wing flaps in the landing position, except that, if rapid retraction is possible with safety, without loss of altitude, and without sudden changes of angle of attack or exceptional piloting skill, they may be retracted.

## FLIGHT CHARACTERISTICS

### § 23.141 General.

The airplane must meet the requirements of §§ 23.143 through 23.221—
(a) At the normally expected operating altitudes;
(b) Under any critical loading conditions within the center of gravity range; and
(c) Unless otherwise specified, at the highest weight for which certification is requested.

## CONTROLLABILITY AND MANEUVERABILITY

### § 23.143 General.

(a) The airplane must be safely controllable and maneuverable during—
(1) Takeoff;
(2) Climb;
(3) Level flight;
(4) Dive; and
(5) Landing (power on and power off).

(b) It must be possible to make a smooth transition from one flight condition to another (including turns and slips) without exceptional piloting skill, alertness, or strength, and without danger of exceeding the limit load factor, under any probable operating condition (including, for multiengine airplanes, those conditions normally encountered in the sudden failure of any engine).

(c) If marginal conditions exist with regard to required pilot strength, the "strength of pilots" limits must be shown by quantitative tests. In no case may the limits exceed those prescribed in the following table:

| Values in pounds of force as applied to the control wheel or rudder pedals | Pitch | Roll | Yaw |
|---|---|---|---|
| (a) For temporary application: | | | |
| Stick | 60 | 30 | |
| Wheel (applied to rim) | 75 | 60 | |
| Rudder pedal | | | 150 |
| (b) For prolonged application | 10 | 5 | 20 |

### § 23.145 Longitudinal control.

(a) It must be possible, at speeds below the trim speed, to pitch the nose downward so that the rate of increase in airspeed allows prompt acceleration to the trim speed with—
(1) Maximum continuous power on each engine and the airplane trimmed at $V_X$;
(2) Power off and the airplane trimmed at 1.5 $V_{S_1}$ or at the minimum trim speed, whichever is higher; and
(3) Wing flaps and landing gear (i) retracted, and (ii) extended.

(b) With the landing gear extended, no change in trim or exertion of more control force than can be readily applied with one hand for a short period of time may be required for the following maneuvers:
(1) With power off, flaps retracted, and the airplane trimmed at 1.5 $V_{S_1}$, or at the minimum trim speed, whichever is higher, extend the flaps as rapidly as possible while maintaining the airspeed at approximately 40 percent above the instantaneous value of the stalling speed.
(2) Repeat subparagraph (1) of this paragraph except initially extend the flaps and then retract them as rapidly as possible.
(3) Repeat subparagraph (2) of this paragraph except with maximum continuous power.
(4) With power off, flaps retracted, and the airplane trimmed at 1.5 $V_{S_1}$, or at the minimum trim speed, whichever is higher, apply takeoff power rapidly while maintaining the same airspeed.
(5) Repeat subparagraph (4) of this paragraph, except with the flaps extended.
(6) With power off, flaps extended, and the airplane trimmed at 1.5 $V_{S_1}$, or at the minimum trim speed, whichever is higher, obtain and maintain airspeeds between 1.1 $V_{S_1}$ and either 1.7 $V_{S_1}$ or $V_F$, whichever is lower.

(c) It must be possible, without exceptional piloting skill, to maintain approximately level flight when flap retraction from any position is made during steady horizontal flight at 1.1 $V_{S_1}$ with simultaneous application of not more than maximum continuous power.

(d) It must be possible, with a pilot control force of not more than 10 pounds, to maintain a speed of not more than 1.5 $V_{S_1}$ during a power-off glide with landing gear and wing flaps extended, and with—
(1) The most forward center of gravity approved for the maximum weight; and
(2) The most forward center of gravity approved for any weight.

(e) It must be possible, by using the normal flight and power controls except the primary longitudinal control, to control the descent of the airplane to a zero rate of descent and to an attitude suitable for a controlled landing, without exceptional piloting skill, alertness, or strength, and without exceeding the operational and structural limitations of the airplane.

### § 23.147 Directional and lateral control.

(a) For each multiengine airplane, it must be possible to make turns with 15 degrees of bank both towards and away from an inoperative engine, from a steady climb at 1.4 $V_{S_1}$ or $V_Y$ with—
(1) One engine inoperative and its propeller in the minimum drag position;
(2) The remaining engines at not more than maximum continuous power;
(3) The rearmost allowable center of gravity;
(4) The landing gear (i) retracted, and (ii) extended;
(5) The flaps in the most favorable climb position; and

(6) Maximum weight.

(b) For each multiengine airplane, it must be possible, while holding the wings level within five degrees, to make sudden changes in heading safely in both directions. This must be shown at 1.4 $V_{S_1}$ or $V_F$ with heading changes up to 15 degrees (except that the heading change at which the rudder force corresponds to the limits specified in § 23.143 need not be exceeded), with the—
(1) Critical engine inoperative and its propeller in the minimum drag position;
(2) Remaining engines at maximum continuous power;
(3) Landing gear (i) retracted, and (ii) extended;
(4) Flaps in the most favorable climb position; and
(5) Center of gravity at its rearmost allowable position.

### § 23.149 Minimum control speed.

(a) $V_{MC}$ is the minimum calibrated airspeed at which, when any engine is suddenly made inoperative, it is possible to recover control of the airplane with that engine still inoperative and maintain straight flight, either with zero yaw, or, at the option of the applicant, with an angle of bank of not more than five degrees. $V_{MC}$ may not exceed 1.2 $V_{S_1}$ with—
(1) Takeoff or maximum available power on each engine;
(2) The rearmost allowable center of gravity;
(3) The flaps in the takeoff position; and
(4) The landing gear retracted.

(b) At $V_{MC}$, the rudder forces required to maintain control may not exceed the limitations set forth in § 23.143, and it may not be necessary to throttle the remaining engines. During recovery, the airplane may not assume any dangerous attitude or require exceptional piloting skill, alertness, or strength to prevent a heading change of more than 20 degrees.

### § 23.151 Acrobatic maneuvers.

Each acrobatic and utility category airplane must be able to perform safely the acrobatic maneuvers for which certification is requested. Safe entry speeds for these maneuvers must be determined.

## TRIM

### § 23.161 Trim.

(a) *General.* Each airplane must meet the trim requirements of this section after being trimmed, and without further pressure upon, or movement of, the primary controls or their corresponding trim controls by the pilot or the automatic pilot.

(b) *Lateral and directional trim.* The airplane must maintain lateral and directional trim in level flight at 0.9 $V_H$ or $V_C$, whichever is lower, with the landing gear and wing flaps retracted.

(c) *Longitudinal trim.* The airplane must maintain longitudinal trim during—
(1) A climb with maximum continuous power at a speed between $V_X$ and 1.4 $V_{S_1}$, with the landing gear and wing flaps retracted;
(2) A climb with maximum continuous power at a speed between $V_X$ and 1.4 $V_{S_1}$, with the landing gear retracted and the wing flaps in the takeoff position;
(3) A power approach at 1.5 $V_{S_1}$, with a three degree angle of descent, the landing gear extended, and the wing flaps retracted;
(4) A power approach at 1.5 $V_{S_1}$, with a three degree angle of descent, the landing gear and wing flaps exended, and the most forward center of gravity approved for the maximum weight;
(5) A power approach at 1.5 $V_{S_1}$, with a three degree angle of descent, the landing gear and wing flaps extended, and the most forward center of gravity approved for any weight; and
(6) Level flight at any speed from 0.9 $V_H$ to either $V_X$ or 1.4 $V_{S_1}$, with landing gear and wing flaps retracted.

(d) In addition, each multiengine airplane must maintain longitudinal and directional trim at a speed between $V_Y$ and 1.4 $V_{S_1}$, with—
(1) The critical engine inoperative;
(2) The remaining engines at maximum continuous power;
(3) The landing gear retracted;
(4) The wing flaps retracted; and
(5) An angle of bank of not more than five degrees.

## STABILITY

### § 23.171 General.

The airplane must be longitudinally, directionally, and laterally stable under §§ 23.173 through 23.181. In addition, the airplane must show suitable stability and control "feel" (static stability) in any condition normally encountered in service, if flight tests show it is necessary for safe operation.

### § 23.173 Static longitudinal stability.

Under the conditions specified in § 23.175 and with the airplane trimmed as indicated, the characteristics of the elevator control forces and the friction within the control system must be as follows:

(a) A pull must be required to obtain and maintain speeds below the specified trim speed and a push required to obtain and maintain speeds above the specified trim speed. This must be shown at any speed that can be obtained without excessive control force, except speeds more than the appropriate maximum allowable speed or less than the minimum speed for steady unstalled flight.

(b) The airspeed must return to within plus or minus 10 percent of the original trim speed when the control force is slowly released at any speed within the speed range specified in paragraph (a) of this section.

(c) The stick force must vary with speed so that any substantial speed change results in a stick force clearly perceptible to the pilot.

### § 23.175 Demonstration of static longitudinal stability.

Static longitudinal stability must be shown as follows:

(a) *Climb.* The stick force curve must have a stable slope at speeds between 1.2 $V_{S_1}$, and 1.6 $V_{S_1}$, with—
(1) Flaps retracted;
(2) Landing gear retracted;
(3) Maximum weight;
(4) 75 percent of maximum continuous power; and
(5) The airplane trimmed at 1.4 $V_{S_1}$.

(b) *Cruise.* The stick force curve must have a stable slope at any speed obtainable with a stick force not more than 40 pounds at speeds between 1.3 $V_{S_1}$ and the maximum allowable speed, with—
(1) Landing gear retracted;
(2) Flaps retracted;
(3) Maximum weight;
(4) 75 percent of maximum continuous power; and
(5) The airplane trimmed for level flight.

Compliance with this paragraph must also be shown with the landing gear extended and without exceeding level flight trim speed.

(c) *Approach.* The stick force curve must have a stable slope and the stick force may not exceed 40 pounds at speeds between 1.1 $V_{S_1}$ and 1.8 $V_{S_1}$, with—
(1) Flaps in the landing position;
(2) Landing gear extended;
(3) Maximum weight; and
(4) The airplane trimmed at 1.5 $V_{S_1}$ with enough power to maintain a three degree angle of descent.

### § 23.177 Directional and lateral stability.

(a) *Three-control airplanes.* The stability requirements for three-control airplanes are as follows:

(1) The static directional stability, as shown by the tendency to recover from a skid with the rudder free, must be positive for any landing gear and flap position appropriate to the takeoff, climb, cruise, and approach configurations. This must be shown with symmetrical power up to maximum continuous power, and at speeds from 1.2 $V_{S_1}$ up to the maximum allowable speed for the condition being investigated. The angle of skid for these tests must be appropriate to the type of airplane. At larger angles of skid up to that at which full rudder is used or a control force limit in § 23.143 is reached, whichever occurs first, and at speeds from 1.2 $V_{S_1}$ to $V_A$, the rudder pedal force must not reverse.

(2) The static lateral stability, as shown by the tendency to raise the low wing in a slip, must be positive for any landing gear and flap positions. This must be shown with symmetrical power up to 75 percent of maximum continuous power at speeds above 1.2 $V_{S_1}$, up to the maximum allowable speed for the configuration being investigated. The static lateral stability may not be nega-

tive at 1.2 $V_{S_1}$. The angle of slip for these tests must be appropriate to the type of airplane, but in no case may the slip angle be less than that obtainable with 10 degrees of bank.

(3) In straight, steady slips at 1.2 $V_{S_1}$ for any landing gear and flap positions, and for any symmetrical power conditions up to 50 percent of maximum continuous power, the aileron and rudder control movements and forces must increase steadily (but not necessarily in constant proportion) as the angle of slip is increased up to the maximum appropriate to the type of airplane. At larger slip angles up to the angle at which the full rudder or aileron control is used or a control force limit contained in § 23.143 is obtained, the rudder pedal force may not reverse. Enough bank must accompany slipping to hold a constant heading. Rapid entry into, or recovery from, a maximum slip may not result in uncontrollable flight characteristics.

(4) Any short period oscillation, occurring between stalling speed and the maximum allowable speed, must be heavily damped with the primary controls (i) free and (ii) in a fixed position.

(b) *Two-control (or simplified control) airplanes.* The stability requirements for two-control airplanes are as follows:

(1) The directional stability of the airplane must be shown by showing that, in each configuration, it can be rapidly rolled from a 45 degree bank in one direction to a 45 degree bank in the opposite direction without showing dangerous skid characteristics.

(2) The lateral stability of the airplane must be shown by showing that it will not assume a dangerous attitude or speed when the controls are abandoned for two minutes. This must be done in moderately smooth air with the airplane trimmed for straight level flight at 0.9 $V_H$ or $V_C$, whichever is lower, with flaps and landing gear retracted, and with a rearward center of gravity.

(3) Any short period oscillation occurring between the stalling speed and the maximum allowable speed must be heavily damped with the primary controls (i) free and (ii) in a fixed position.

**§ 23.179 Instrumented stick force measurements.**

Instrumented stick force measurements must be made unless—

(a) Changes in speed are clearly reflected by changes in stick forces; and

(b) The maximum forces obtained under §§ 23.173 and 23.175 are not excessive.

**§ 23.181 Dynamic longitudinal stability.**

Any short period longitudinal oscillation occurring between the stalling speed and the maximum allowable speed must be heavily damped with the primary controls (a) free and (b) fixed.

STALLS

**§ 23.201 Stall demonstration.**

(a) Level wing stalls must be shown with—

(1) Power off; and

(2) A power setting not less than that required to show compliance with § 23.65 for an airplane of more than 6,000 lbs. maximum weight, or with 90 percent of maximum continuous power for an airplane of 6,000 lbs. or less maximum weight.

(b) In either condition required by paragraph (a) of this section, it must be possible to comply with the applicable requirements of § 23.203(a) with flaps and landing gear in any position.

(c) The following procedure must be used to show compliance with § 23.203(a):

(1) With the trim controls adjusted for straight flight at 1.5 $V_{S_1}$, or at the minimum trim speed, whichever is higher, reduce the speed with the elevator control until the speed is slightly above the stalling speed.

(2) Then pull back the elevator control so that the rate of speed reduction will not exceed one mile per hour per second until a stall is produced, as shown by an uncontrollable downward pitching motion of the airplane, or until the control reaches the stop. Normal use of the elevator control for recovery is allowed after the pitching motion has unmistakably developed.

(d) Except where made inapplicable by the special features of a particular type of airplane, the following procedure must be used to measure loss of altitude during a stall:

(1) The approach to the stall must be made as prescribed in paragraph (b) of this section.

(2) The loss of altitude encountered in the stall (power on or power off) is the change in altitude (as observed on the sensitive altimeter testing installation) between the altitude at which the airplane pitches and the altitude at which horizontal flight is regained.

(3) If required, the power used during stall recovery must be that which would be used under normal operating conditions in this maneuver. However, the power used to regain level flight may not be applied until flying control is regained.

(d) For turning flight stalls, the following maneuver must be used to show compliance with § 23.203(b):

(1) Establish a steady, curvilinear, level, coordinated turn in a 30 degree bank and, while maintaining the 30 degree bank, stall the airplane by steadily and progressively tightening the turn with the elevator control until the airplane is stalled, or until the elevator has reached its stop.

(2) When the stall has fully developed, regain level flight with normal use of the controls.

**§ 23.203 Stall characteristics.**

(a) For level wing stalls—

(1) For an airplane with independently controlled rolling and directional controls, it must be possible to produce and to correct roll by unreversed use of the rolling contro and to produce and correct yaw by unreversed use of the directional control, up to the time the airplane pitches in the maneuver prescribed in § 23.201(b);

(2) For an airplane with interconnected lateral and directional controls (two control), for an airplane with only one of these controls, it must be possible to produce and correct roll by unreversed use of the rolling control without producing excessive yaw, up to the time the airplane pitches in the maneuver prescribed in § 23.201(b); and

(3) During the recovery part of the manuever prescribed in § 23.201(b), it must be possible to prevent more than 15 degrees of roll or yaw by the normal use of the controls.

(b) For turning flight stalls, when stalled during a coordinated turn with 30 degrees of bank, 75 percent maximum continuous power on each engine, and flaps and landing gear retracted, it must be possible to regain normal level flight without excessive loss of altitude or uncontrollable rolling or spinning tendencies.

(c) For limited elevator control stalls, it must be possible, when stalled from an excessive climb attitude, to recover without exceeding airspeed or acceleration limits.

**§ 23.205 Stalls: critical engine inoperative.**

(a) A multiengine airplane must have stall characteristics that prevent unintentional spin entry. This must be shown by performing the maneuver prescribed in paragraph (b) of this section, at the lowest practical altitude, with—

(1) The critical engine inoperative and its propeller in the normal inoperative position;

(2) Landing gear extended, with the flaps (i) retracted and (ii) extended; and

(3) The remaining engines at full throttle or maximum continuous power.

(b) The maneuver required by paragraph (a) of this section is as follows: Establish a steady, curvilinear turn and, while maintaining a 15 degree bank (1), toward and (2) away from the inoperative engine, steadily increase the angle of attack with the elevator control until an uncontrollable downward pitching motion occurs. In performing this maneuver it must be possible to—

(1) Produce and correct roll by unreversed use of the lateral control until the airplane stalls; and

(2) Recover immediately to full flight control with wings level, from the stalled condition, by normal use of the controls, reducing power on the operating engines if desired, without exceeding a 60 degree angle of bank.

**§ 23.207 Stall warning.**

There must be a clear and distinct stall warning with the flaps and the landing gear in any position, both in straight and in turning flight. The stall warning must begin at a speed exceeding the stalling speed by not less than five, and not more than 10, miles per hour, and must continue until the stall occurs.

SPINNING

**§ 23.221 Spinning.**

(a) *Normal category.* A single-engine, normal category airplane must be able to recover from a one-turn spin in not more than one additional turn, with the controls used in the manner normally used for recovery. In addition—

(1) For both the flaps-retracted and flaps-extended conditions, the applicable airspeed limit and positive limit maneuvering load factor may not be exceeded;

(2) There may be no excessive back pressure during the spin or recovery; and

(3) It must be impossible to obtain uncontrollable spins with any use of the controls.

For the flaps-extended condition, the flaps may be retracted during recovery.

(b) *Utility category.* A utility category airplane must meet the requirements of paragraph (a) of this section or the requirements of paragraph (c) of this section.

(c) *Acrobatic category.* An acrobatic category airplane must be able to spin at least six turns, and must meet the following requirements:

(1) The airplane must recover from any point in a spin, not exceeding six turns with flaps retracted and one turn with flaps extended, in not more than one and one-half additional turns after normal recovery application of the controls.

(2) For both the flaps-retracted and flaps-extended conditions, the applicable airspeed limit and positive limit maneuvering load factor may not be exceeded. For the flaps-extended condition, the flaps may be retracted during recovery, if a placard is installed prohibiting intentional spins with flaps extended.

(3) It must be impossible to obtain uncontrollable spins with any use of the controls.

(d) *Airplanes "characteristically incapable of spinning".* If it is desired to designate an airplane as "characteristically incapable of spinning", this characteristic must be shown with—

(1) A weight five percent more than the highest weight for which approval is requested;

(2) A center of gravity at least three percent aft of the rearmost position for which approval is requested;

(3) An available elevator up-travel four degrees in excess of that to which the elevator travel is to be limited for approval; and

(4) An available rudder travel seven degrees, in both directions, in excess of that to which the rudder travel is to be limited for approval.

GROUND AND WATER HANDLING CHARACTERISTICS

**§ 23.231 Longitudinal stability and control.**

(a) A landplane may have no uncontrollable tendency to nose over in any reasonably expected operating condition, including rebound during landing or takeoff. Wheel brakes must operate smoothly and may not induce any undue tendency to nose over.

(b) A seaplane or amphibian may not have dangerous or uncontrollable porpoising characteristics at any normal operating speed on the water.

**§ 23.233 Directional stability and control.**

(a) There may be no uncontrollable ground or water looping tendency in 90 degree cross winds, up to a wind velocity of 0.2 $V_{S_0}$, at any speed at which the airplane may be expected to be operated on the ground or water.

(b) A landplane must be satisfactorily controllable, without exceptional piloting skill or alertness, in power-off landings at normal landing speed, without using brakes or engine power to maintain a straight path.

(c) The airplane must have adequate directional control during taxiing.

**§ 23.235 Taxiing condition.**

The shock-absorbing mechanism may not damage the structure of the airplane when the airplane is taxied on the roughest ground that may reasonably be expected in normal operation.

**§ 23.239 Spray characteristics.**

Spray may not dangerously obscure the vision of the pilots or damage the propellers or other parts of a seaplane or amphibian at any time during taxiing, takeoff, and landing.

MISCELLANEOUS FLIGHT REQUIREMENTS

**§ 23.251 Vibration and buffeting.**

Each part of the airplane must be free from excessive vibration under any appropriate speed and power conditions up to at least the minimum value of $V_D$ allowed in § 23.335. In addition, there may be no buffeting, in any normal flight condition, severe enough to interfere with the satisfactory control of the airplane, cause excessive fatigue to the crew, or result in structural damage. Stall warning buffeting within these limits is allowable.

## Subpart C—Structure

### GENERAL

**§ 23.301 Loads.**

(a) Strength requirements are specified in terms of limit loads (the maximum loads to be expected in service) and ultimate loads (limit loads multiplied by prescribed factors of safety). Unless otherwise provided, prescribed loads are limit loads.

(b) Unless otherwise provided, the air, ground, and water loads must be placed in equilibrium with inertia forces, considering each item of mass in the airplane. These loads must be distributed to conservatively approximate or closely represent actual conditions.

(c) If deflections under load would significantly change the distribution of external or internal loads, this redistribution must be taken into account.

(d) Simplified structural design criteria may be used if they result in design loads not less than those prescribed in §§ 23.331 through 23.521. For conventional, single-engine airplanes with design weights of 6,000 pounds or less, the design criteria of Appendix A of this part are an approved equivalent of §§ 23.331 through 23.399. If Appendix A is used, the entire Appendix must be substituted for the corresponding sections of this part.

**§ 23.303 Factor of safety.**

Unless otherwise provided, a factor of safety of 1.5 must be used.

**§ 23.305 Strength and deformation.**

(a) The structure must be able to support limit loads without detrimental, permanent deformation. At any load up to limit loads, the deformation may not interfere with safe operation.

(b) The structure must be able to support ultimate loads without failure for at least three seconds. However, when proof of strength is shown by dynamic tests simulating actual load conditions, the three second limit does not apply.

**§ 23.307 Proof of structure.**

(a) Compliance with the strength and deformation requirements of § 23.305 must be shown for each critical load condition. Structural analysis may be used only if the structure conforms to those for which experience has shown this method to be reliable. In other cases, substantiating load tests must be made. Dynamic tests, including structural flight tests, are acceptable if the design load conditions have been simulated.

(b) Certain parts of the structure must be tested as specified in Subpart D of this part.

### FLIGHT LOADS

**§ 23.321 General.**

(a) Flight load factors represent the ratio of the aerodynamic force component (acting normal to the assumed longitudinal axis of the airplane) to the weight of the airplane. A positive flight load factor is one in which the aerodynamic force acts upward, with respect to the airplane.

(b) Compliance with the flight load requirements of this subpart must be shown—

(1) At each critical altitude within the range in which the airplane may be expected to operate;

(2) At each weight from the design minimum weight to the design maximum weight; and

(3) For each required altitude and weight, for any practicable distribution of disposable load within the operating limitations specified in §§ 23.1583 through 23.1589.

**§ 23.331 Symmetrical flight conditions.**

(a) The appropriate balancing horizontal tail load must be accounted for in a rational or conservative manner when determining the wing loads and linear inertia loads corresponding to any of the symmetrical flight conditions specified in §§ 23.331 through 23.341.

(b) The incremental horizontal tail loads due to maneuvering and gusts must be reacted by the angular inertia of the airplane in a rational or conservative manner.

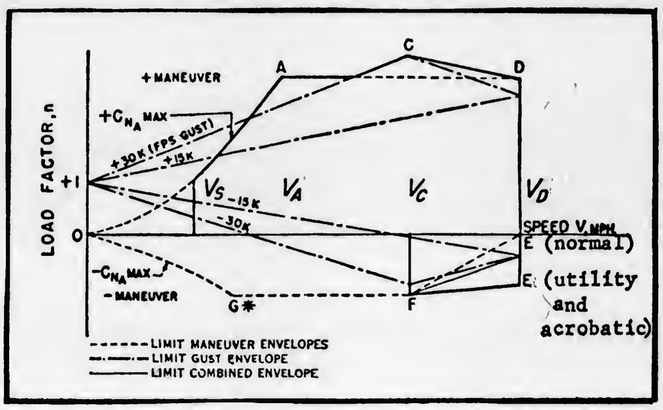
**§ 23.333 Flight envelope.**

(a) *General.* Compliance with the strength requirements of this subpart must be shown at any combination of airspeed and load factor on and within the boundaries of a flight envelope (similar to the one in paragraph (d) of this section) that represents the envelope of the flight loading conditions specified by the maneuvering and gust criteria of paragraphs (b) and (c) of this section respectively.

(b) *Maneuvering envelope.* Except where limited by maximum (static) lift coefficients, the airplane is assumed to be subjected to symmetrical maneuvers resulting in the following limit load factors:

(1) The positive maneuvering load factor specified in § 23.337 at speeds up to $V_D$;

(2) The negative maneuvering load factor specified in § 23.337 at $V_C$; and



(3) Factors varying linearly with speed from the specified value at $V_C$ to 0.0 at $V_D$ for the normal category, and −1.0 at $V_D$ for the acrobatic and utility categories.

(c) *Gust envelope.* Limit gust loads are the loads that would result when the airplane encounters the following symmetrical vertical gusts (assuming that gust load factors vary linearly between $V_C$ and $V_D$):

(1) Positive (up) and negative (down) gusts of 30 feet per second nominal intensity at speeds up to $V_C$.

(2) Positive and negative gusts of 15 feet per second at $V_D$.

(d) *Flight envelope.*

NOTE: Point G need not be investigated when the supplementary condition specified in § 23.369 is investigated.

**§ 23.335 Design airspeeds.**

The selected design airspeeds are equivalent airspeeds (EAS).

(a) *Design cruising speed, $V_C$.* For $V_C$, the following apply:

(1) $V_C$ (in miles per hour) may not be less than—

(i) $38\sqrt{W/S}$ (for normal and utility category airplanes); and

(ii) $42\sqrt{W/S}$ (for acrobatic category airplanes).

(2) For values of $W/S$ more than 20, the numerical multiplying factors must be decreased linearly with $W/S$ to a value of 33 where $W/S=100$. The required minimum value need not be more than $0.9\ V_H$ obtained at sea level.

(b) *Design dive speed, $V_D$.* For $V_D$, the following apply:

(1) With $V_{C\ min}$ the required minimum design cruising speed, $V_D$ (in miles per hour) may not be less than—

(i) $1.40\ V_{C\ min}$ (for normal category airplanes);

(ii) $1.50\ V_{C\ min}$ (for utility category airplanes); and

(iii) $1.55\ V_{C\ min}$ (for acrobatic category airplanes).

(2) For values of $W/S$ more than 20, the numerical multiplying factors must

be decreased linearly with $W/S$ to a value of 1.35 at $W/S=100$.

(c) *Design maneuvering speed $V_A$.* For $V_A$, the following applies:

(1) $V_A$ (in miles per hour) may not be less than $V_S\sqrt{n}$ where—

(i) $V_S$ is a computed stalling speed with flaps retracted at the design weight, normally based on the maximum airplane normal force coefficients, $C_{N_A}$; and

(ii) $n$ is the limit maneuvering load factor used in design.

(2) The value of $V_A$ need not exceed the value of $V_C$ used in design.

**§ 23.337 Limit maneuvering load factors.**

(a) The positive limit maneuvering load factor $n$ may not be less than—

(1) $2.1+\frac{24{,}000}{W+10{,}000}$ for normal category airplanes, except that $n$ need not be more than 3.8 nor may it be less than 2.5;

(2) 4.4 for utility category airplanes; or

(3) 6.0 for acrobatic category airplanes.

(b) The negative limit maneuvering load factor may not be less than—

(1) 0.4 times the positive load factor for the normal and utility categories; or

(2) 0.5 times the positive load factor for the acrobatic category.

(c) Maneuvering load factors lower than those specified in this section may be used if the airplane has design features that make it impossible to exceed these values in flight.

**§ 23.341 Gust load factors.**

In applying gust load requirements—

(a) The slope of the lift curve may be assumed to be that of the wing alone; and

(b) The gust load factors must be computed as follows:

$$n=1+\frac{KUVm}{575(W/S)}$$

where—

$K=\frac{1}{2}(W/S)^{1/4}$ (for $W/S<16$ p.s.f.);

$K=1.33-\frac{2.67}{(W/S)^{3/4}}$ (for $W/S>16$ p.s.f.);

$U$ = nominal gust velocity, f.p.s. (Note that the "effective sharp-edged gust" equals $KU$);

$V$ = airplane speed, m.p.h.;

$m$ = slope of lift curve, $C_L$ per radian, corrected for aspect ratio;

$W/S$ = wing loading, p.s.f.

**§ 23.345 High lift devices.**

(a) If flaps or similar high lift devices to be used for takeoff, approach, or landing are installed, the airplane, with the flaps fully deflected at $V_F$, is assumed to be subjected to symmetrical maneuvers and gusts resulting in limit load factors within the range determined by—

(1) Maneuvering, to a positive limit load factor of 2.0; and

(2) Positive and negative gusts of 15 feet per second acting normal to the flight path in level flight.

(b) $V_F$ must be assumed to be not less than $1.4\ V_S$ or $1.8\ V_{SF}$, whichever is greater, where—

$V_S$ is the computed stalling speed with flaps retracted at the design weight; and

$V_{SF}$ is the computed stalling speed with flaps fully extended at the design weight.

However, if an automatic flap load limiting device is used, the airplane may be designed for the critical combinations of airspeed and flap position allowed by that device.

(c) In designing the flaps and supporting structures, slipstream effects must be accounted for, as specified in paragraph (b) of § 23.457.

(d) In determining external loads on the airplane as a whole, thrust, slipstream, and pitching acceleration may be assumed to be zero.

(e) The requirements of §§ 23.175(c), 23.457, and this section, may be complied with separately or in combination.

**§ 23.347 Unsymmetrical flight conditions.**

The airplane is assumed to be subjected to the unsymmetrical flight conditions of §§ 23.349 and 23.351. Unbalanced aerodynamic moments about the center of gravity must be reacted in a rational or conservative manner, considering the principal masses furnishing the reacting inertia forces.

**§ 23.349 Rolling conditions.**

The wing and wing bracing must be designed for the following loading conditions:

(a) Unsymmetrical wing loads appropriate to the category. Unless the following values result in unrealistic loads, the rolling accelerations may be obtained by modifying the symmetrical flight conditions in § 23.333(d) as follows:

(1) For the acrobatic category, in conditions A and F, assume that 100 percent of the wing airload acts on one side of the plane of symmetry and 60 percent of this load acts on the other side.

(2) For the normal and utility categories, in condition A, assume that 100 percent of the wing airload acts on one side of the airplane and 70 percent of this load acts on the other side. For airplanes of more than 1,000 pounds design weight, the latter percentage may be increased linearly with weight up to 75 percent at 12,500 pounds.

(b) The loads resulting from the aileron deflections and speeds specified in § 23.455, in combination with an airplane load factor of at least two thirds of the positive maneuvering load factor used for design. Unless the following values result in unrealistic loads, the effect of aileron displacement on wing torsion may be accounted for by adding the following increment to the basic airfoil moment coefficient over the aileron portion of the span in the critical condition determined in § 23.333(d):

$$\Delta c_m=-0.01\delta$$

where—

$\Delta c_m$ is the moment coefficient increment; and

$\delta$ is the down aileron deflection in degrees in the critical condition.

**§ 23.351 Yawing conditions.**

The airplane must be designed for yawing loads on the vertical tail surfaces resulting from the loads specified in §§ 23.441 through 23.445.

**§ 23.361 Engine torque.**

(a) Each engine mount and its supporting structure must be designed for the effects of—

(1) The limit torque corresponding to takeoff power and propeller speed acting simultaneously with 75 percent of the limit loads from flight condition A; and

(2) The limit torque corresponding to maximum continuous power and propeller speed, acting simultaneously with the limit loads from flight condition A.

(b) The limit torque is obtained by multiplying the mean torque by a factor of—

(1) 1.33 for engines with five or more cylinders; or

(2) Two, three, or four, for engines with four, three, or two cylinders, respectively.

(c) Engine torque effects need not be investigated for any other conditions.

**§ 23.363 Side load on engine mount.**

(a) Each engine mount and its supporting structure must be designed for a limit load factor in a lateral direction, for the side load on the engine mount, of not less than—

(1) 1.33, or

(2) One-third of the limit load factor for flight condition A.

(b) The side load prescribed in paragraph (a) of this section may be assumed to be independent of other flight conditions.

**§ 23.365 Pressurized cabin loads.**

For each pressurized compartment, the following apply:

(a) The airplane structure must be strong enough to withstand the flight loads combined with pressure differential loads from zero up to the maximum relief valve setting.

(b) The external pressure distribution in flight, and any stress concentrations, must be accounted for.

(c) If landings may be made, with the cabin pressurized, landing loads must be combined with pressure differential loads from zero up to the maximum allowed during landing.

(d) The airplane structure must be strong enough to withstand the pressure differential loads corresponding to the maximum relief valve setting multiplied by a factor of 1.3, omitting other loads.

(e) If a pressurized cabin has two or more compartments separated by bulkheads or a floor, the primary structure must be designed for the effects of sudden release of pressure in any compartment with external doors or windows. This condition must be investigated for the effects of failure of the largest opening in the compartment. The effects of intercompartmental venting may be considered.

**§ 23.369 Special conditions for rear lift truss.**

(a) If a rear lift truss is used, it must be designed for conditions of reversed airflow at a design speed of—

$V=10\sqrt{W/S}+10$ (m.p.h.).

(b) Either aerodynamic data for the particular wing section used, or a value of $C_L$ equalling −0.8 with a chordwise distribution that is triangular between a peak at the trailing edge and zero at the leading edge, must be used.

CONTROL SURFACE AND SYSTEM LOADS

**§ 23.391 Control surface loads.**

(a) The control surface loads specified in §§ 23.397 through 23.459 are assumed to occur in the conditions described in §§ 23.331 through 23.351.

(b) If allowed by the following sections, the values of control surface loading in Appendix B of this part may be used, instead of particular control surface data, to determine the detailed rational requirements of §§ 23.397 through 23.459, unless these values result in unrealistic loads.

**§ 23.395 Control system.**

(a) Each flight control system and its supporting structure must be designed for loads corresponding to at least 125 percent of the computed hinge moments of the movable control surface in the conditions prescribed in §§ 23.391 through 23.459. In addition, the following apply:

(1) The system limit loads need not exceed the higher of the loads that can be produced by the pilot and automatic devices operating the controls. However, autopilot forces need not be added to pilot forces. The system must be designed for the maximum effort of the pilot or autopilot, whichever is higher. In addition, if the pilot and the autopilot act in opposition, the part of the system between them may be designed for the maximum effort of the one that imposes the lesser load.

(2) The design must, in any case, provide a rugged system for service use, considering jamming, ground gusts, taxiing downwind, control inertia, and friction.

(b) A 125 percent factor on computed hinge moments must be used to design elevator, aileron, and rudder systems. However, a factor as low as 1.0 may be used if hinge moments are based on accurate flight test data, the exact reduction depending upon the accuracy and reliability of the data.

(c) Acceptable maximum and minimum pilot forces for elevator, aileron, and rudder controls are shown in § 23.397(b). These pilot forces are assumed to act at the appropriate control grips or pads as they would in flight, and to react at the attachments of the control system to the control surface horns.

**§ 23.397 Control system loads.**

(a) *General.* In the control surface flight loading condition, the airloads on movable sufaces and the corresponding deflections need not exceed those that would result in flight from the application of any pilot force within the ranges specified in paragraph (b) of this section. In applying this criterion, the effects of control system boost and servomechanisms, and the effects of tabs must be considered. The automatic pilot effort must be used for design if it alone can produce higher control surface loads than the human pilot.

(b) *Limit pilot forces.* The limit pilot forces are as follows:

| Control | Maximum forces for design weight $W$ equal to or less than 5,000 pounds [1] | Minimum forces [2] |
|---|---|---|
| Aileron: | | |
| Stick | 67 pounds | 40 pounds. |
| Wheel [3] | 53 $D$ in-pounds [4] | 40 $D$ in-pounds. [4] |
| Elevator: | | |
| Stick | 167 pounds | 100 pounds. |
| Wheel | 200 pounds | 100 pounds. |
| Rudder | 200 pounds | 130 pounds. |

[1] For design weight ($W$) more than 5,000 pounds, the specified maximum values must be increased linearly with weight to 1.18 times the specified values at a design weight of 12,500 pounds.

[2] If the design of any individual set of control systems or surfaces makes these specified minimum forces inapplicable, values corresponding to the pertinent hinge moments obtained under § 23.415, but not less than 0.6 of the specified minimum forces, may be used.

[3] The critical parts of the aileron control system must also be designed for a single tangential force with a limit value of 1.25 times the couple force determined from the above criteria.

[4] $D$=wheel diameter.

**§ 23.399 Dual control system.**

Each dual control system must be designed for the pilots operating in opposition, using individual pilot forces not less than—

(a) 0.75 times those obtained under § 23.395; or

(b) The minimum forces specified in § 23.397(b).

**§ 23.405 Secondary control system.**

Secondary controls, such as wheel brakes, spoilers, and tab controls, must be designed for the maximum forces that a pilot is likely to apply to those controls.

**§ 23.407 Trim tab effects.**

The effects of trim tabs on the control surface design conditions must be accounted for only where the surface loads are limited by maximum pilot effort. In these cases, the tabs are considered to be deflected in the direction that would assist the pilot. These deflections must correspond to the maximum degree of "out of trim" expected at the speed for the condition under consideration.

**§ 23.409 Tabs.**

Control surface tabs must be designed for the most severe combination of airspeed and tab deflection likely to be obtained within the flight envelope for any usable loading condition.

**§ 23.415 Ground gust conditions.**

(a) The control system must be investigated as follows for control surface loads due to ground gusts and taxiing downwind:

(1) If an investigation of the control system for ground gust loads is not required by subparagraph (2) of this paragraph, but the applicant elects to design a part of the control system for these loads, these loads need only be carried from control surface horns through the nearest stops or gust locks and their supporting structures.

(2) If pilot forces less than the minimums specified in § 23.397(b) are used for design, the effects of surface loads due to ground gusts and taxiing downwind must be investigated for the entire control system according to the formula:

$$H=KcSq$$

where—

$H$=limit hinge moment (ft.-lbs.);
$c$=mean chord of the control surface aft of the hinge line (ft.);
$S$=area of control surface aft of the hinge line (sq. ft.);
$q$=dynamic pressure (p.s.f.) based on a design speed not less than $10\sqrt{W/S}+10$ (m.p.h.) except that the design speed need not exceed 60 m.p.h.; and
$K$=limit hinge moment factor for ground gusts derived in paragraph (b) of this section. (For ailerons and elevators, a positive value of $K$ indicates a moment tending to depress the surface and a negative value of $K$ indicates a moment tending to raise the surface).

(b) The limit hinge moment factor $K$ for ground gusts must be derived as follows:

| Surface | $K$ | Position of controls |
|---|---|---|
| (a) Aileron | 0.75 | Control column locked or lashed in mid-position. |
| (b) Aileron | ±0.50 | Ailerons at full throw; + moment on one aileron, − moment on the other. |
| (c) Elevator | ±0.75 | (c) Elevator full up (−). |
| (d) Elevator | | (d) Elevator full down (+). |
| (e) Rudder | ±0.75 | (e) Rudder in neutral. |
| (f) Rudder | | (f) Rudder at full throw. |

HORIZONTAL TAIL SURFACES

**§ 23.421 Balancing loads.**

(a) A horizontal tail balancing load is a load necessary to maintain equilibrium in any specified flight condition with no pitching acceleration.

(b) Horizontal tail surfaces must be designed for the balancing loads occurring at any point on the limit maneuvering envelope and in the flap conditions specified in § 23.345. The distribution in figure 6 of Appendix B may be used.

**§ 23.423 Maneuvering loads.**

Each horizontal tail surface must be designed for maneuvering loads imposed by the following conditions:

(a) A sudden deflection of the elevator control, at $V_A$, to (1) the maximum upward deflection, and (2) the maximum downward deflection, as limited by the control stops, or pilot effort, whichever is critical. The average loading of B23.11 of Appendix B and the distribution in figure 7 of Appendix B may be used.

(b) A sudden upward deflection of the elevator, at speeds above $V_A$, followed by a downward deflection of the elevator, resulting in the following combinations of normal and angular acceleration:

| Condition | Normal acceleration ($n$) | Angular acceleration (radian/sec.$^2$) |
|---|---|---|
| Down load | 1.0 | $+\frac{45}{V}n_m(n_m-1.5)$ |
| Up load | $n_m$ | $-\frac{45}{V}n_m(n_m-1.5)$ |

where—
(1) $n_m$=positive limit maneuvering load factor used in the design of the airplane; and
(2) $V$=initial speed in miles per hour.

The conditions in this paragraph involve loads corresponding to the loads that may occur in a "checked maneuver" (a maneuver in which the pitching control is suddenly displaced in one direction and then suddenly moved in the opposite direction), the deflections and timing avoiding exceeding the limit maneuvering load factor. The total tail load for both down and up load conditions is the sum of the balancing tail loads at $V$ and the specified value of the normal load factor $n$, plus the maneuvering load increment due to the specified value of the angular acceleration. The maneuvering load increment in figure 2 of Appendix B and the distributions in figure 7 (for down loads) and in figure 8 (for up loads) of Appendix B may be used.

**§ 23.425 Gust loads.**

(a) Each horizontal tail surface must be designed for loads resulting from—

(1) Positive and negative gusts of 30 feet per second nominal intensity at $V_C$, corresponding to the flight condition specified in § 23.333(c), with flaps retracted; and

(2) Positive and negative gusts of 15 feet per second nominal intensity at $V_F$, corresponding to the flight condition specified in § 23.345(a)(2), with flaps extended and at $V_D$ corresponding with the flight conditions specified in § 23.333(c)(2) with flaps retracted.

(b) The average loadings in figures 3 and 4 of Appendix B and the distribution in figure 8 of Appendix B may be used instead of the requirements of subparagraph (a)(1).

(c) When determining the total load on the horizontal tail for the conditions specified in paragraph (a) of this section, the initial balancing tail loads for steady unaccelerated flight at the pertinent design speeds $V_F$, $V_C$, and $V_D$ must first be determined. The incremental tail load resulting from the gusts must be added to the initial balancing tail load to obtain the total tail load.

(d) The incremental tail load due to the gust may be computed by the formula

$$\Delta t=0.1KUVS_t a_t\left[1-\frac{36d_w}{R_w}\right]$$

where—
$\Delta t$= the limit gust load increment on the tail in pounds;
$K$=gust coefficient $K$ derived from § 23.341;
$U$=nominal gust intensity in feet per second;
$V$=airplane speed in miles per hour;
$S_t$=tail surface area in square feet;
$a_t$=slope of lift curve of tail surface, $C_L$ per degree, corrected for aspect ratio;
$a_w$=slope of lift curve of wing, $C_L$ per degree; and
$R_w$=aspect ratio of the wing.

**§ 23.427 Unsymmetrical loads.**

The maximum horizontal tail surface loading (load per unit area), as determined under §§ 23.421 through 23.425, must be applied to the horizontal surfaces on one side of the plane of symmetry and the following percentage of that loading must be applied to the opposite side:

$\%=100-10(n-1)$ where $n$ is the specified positive maneuvering local factor

This value may not be more than 80 percent.

VERTICAL TAIL SURFACES

**§ 23.441 Maneuvering loads.**

(a) At speeds up to $V_A$, the vertical tail surfaces must be designed to withstand—

(1) A sudden displacement of the rudder control (with the airplane in unaccelerated flight with zero yaw) to the maximum deflection allowed by the control stops or by pilot strength, whichever is critical;

(2) A yaw angle of 15 degrees with the rudder fully deflected (except as limited by pilot strength) in the direction tending to increase the slip; and

(3) A yaw angle of 15 degrees with the rudder control maintained in the neutral position (except as limited by pilot strength).

(b) The average loading of B23.11 and figure 1 of Appendix B and the distribution in figures 7, 6, and 8 of Appendix B may be used instead of the requirements of subparagraphs (a)(1), (a)(2), and (a)(3), respectively.

(c) The yaw angles specified in paragraph (a)(3) of this section may be reduced if the yaw angle chosen for a particular speed cannot be exceeded in—

(1) Steady slip conditions;

(2) Uncoordinated rolls from steep banks; or

(3) Sudden failure of the critical engine with delayed corrective action.

**§ 23.443 Gust loads.**

(a) Vertical tail surfaces must be designed to withstand, in unaccelerated flight at $V_C$, a gust of 30 feet per second nominal intensity normal to the plane of symmetry.

(b) The gust loading for that part of a vertical tail surface with a well defined leading edge must be computed by the formula

$$\bar{w}=\frac{KUVm}{575}$$

where—
$\bar{w}$=average limit unit pressure in pounds per square foot;
$K=1.33-\frac{4.5}{(W/S_v)^{3/4}}$, except that $K$ may not be less than 1.0.
$U$=nominal gust intensity in feet per second;
$V$=airplane speed in miles per hour;
$m$=slope of lift curve of vertical surface, $C_L$ per radian, corrected for aspect ratio;
$W$=design weight in pounds; and
$S_v$=vertical surface area in square feet.

A value of $K$ obtained by rational determination may be used.

(c) The average loading in figure 5 and the distribution in figure 8 of Appendix B may be used.

**§ 23.445 Outboard fins.**

(a) If outboard fins are on the horizontal tail surface, the tail surfaces must be designed for the maximum horizontal surface load in combination with the corresponding loads induced on the vertical surfaces by endplate effects. These induced effects need not be combined with other vertical surface loads.

(b) If outboard fins extend above and below the horizontal surface, the critical vertical surface loading (the load per unit area as determined under §§ 23.441 and 23.443 must be applied to—

(1) The part of the vertical surfaces above the horizontal surface with 80 percent of that loading applied to the part below the horizontal surface; and

(2) The part of the vertical surfaces below the horizontal surface with 80 percent of that loading applied to the part above the horizontal surface.

AILERONS, WING FLAPS, AND SPECIAL DEVICES

**§ 23.455 Ailerons.**

(a) The ailerons must be designed for the loads to which they are subjected—

(1) In the neutral position during symmetrical flight conditions; and

(2) By the following deflections (except as limited by pilot effort), during unsymmetrical flight conditions:

(i) Sudden maximum displacement of the aileron control at $V_A$. Suitable allowance may be made for control system deflections.

(ii) Sufficient deflection at $V_C$, where $V_C$ is more than $V_A$, to produce a rate of roll not less than obtained in subparagraph (2)(i).

(iii) Sufficient deflection at $V_D$ to produce a rate of roll not less than one-third of that obtained in subparagraph (2)(i).

(b) The average loading in B23.11 and figure 1 of Appendix B and the distribution in figure 9 of Appendix B may be used.

**§ 23.457 Wing flaps.**

(a) The wing flaps, their operating mechanisms, and their supporting structures must be designed for critical loads occurring in the flaps-extended flight conditions with the flaps in any position. However, if an automatic flap load limiting device is used, these components may be designed for the critical combinations of airspeed and flap position allowed by that device.

(b) The effects of propeller slipstream, corresponding to takeoff power, must be taken into account at not less than $1.4\ V_S$, where $V_S$ is the computed stalling speed with flaps fully retracted at the design weight. For the investigation of slipstream effects, the load factor may be assumed to be 1.0.

**§ 23.459 Special devices.**

The loading for special devices using aerodynamic surfaces (such as slots and

spoilers) must be determined from test data.

GROUND LOADS

**§ 23.471 General.**

The limit ground loads specified in this subpart are considered to be external loads and inertia forces that act upon an airplane structure. In each specified ground load condition, the external reactions must be placed in equilibrium with the linear and angular inertia forces in a rational or conservative manner.

**§ 23.473 Ground load conditions and assumptions.**

(a) The design landing weight (the maximum weight for landing conditions at the maximum descent velocity) may be used for structural design purposes only. Except as provided in paragraphs (b) and (c) of this section, this weight may not be less than the maximum weight.

(b) The design landing weight may be as low as 95 percent of the maximum weight if—

(1) The structural limit load values at the maximum weight are not exceeded at speeds up to takeoff speed over terrain as rough as that expected in service;

(2) The minimum fuel capacity is enough for at least one-half hour of operation at maximum continuous power plus the capacity equal to a fuel weight equal to the difference between the maximum weight and the design landing weight; and

(3) The operating limitations limit the takeoff weight to ensure that landing weights in normal operation do not exceed the design landing weight.

(c) The design landing weight of a multiengine airplane may be less than 95 percent of the maximum weight if—

(1) The airplane meets the one-engine-inoperative climb requirements of § 23.67; and

(2) Instead of the corresponding requirements of this part, compliance is shown with the following requirements of Part 25 [New]:

(i) The ground load requirements of §§ 25.471 and 25.473.

(ii) The landing gear requirements of §§ 25.721 through 25.733.

(iii) The fuel jettisoning system requirements of § 25.1001.

(d) The selected limit vertical inertia load factor at the center of gravity of the airplane for the ground load conditions prescribed in this subpart may not be less than that which would be obtained when landing with a descent velocity ($V$), in feet per second, equal to 4.4 $(W/S)^{1/4}$, except that this velocity need not be more than 10 feet per second and may not be less than seven feet per second.

(e) Wing lift not exceeding two-thirds of the weight of the airplane may be assumed to exist throughout the landing impact and to act through the center of gravity. The ground reaction load factor may be equal to the inertia load factor minus the ratio of the above assumed wing lift to the airplane weight.

(f) Energy absorption tests (to determine the limit load factor corresponding to the required limit descent velocities) must be made under § 23.725.

(g) No inertia load factor used for design purposes may be less than 2.67, nor may the limit ground reaction load factor be less than 2.0, unless these lower values will not be exceeded in taxiing at speeds up to takeoff speed over terrain as rough as that expected in service.

**§ 23.477 Landing gear arrangement.**

Sections 23.479 through 23.483, or the conditions in Appendix C, apply to airplanes with conventional arrangements of main and nose gear, or main and tail gear.

**§ 23.479 Level landing conditions.**

(a) For a level landing, the airplane is assumed to be in the following attitudes:

(1) For airplanes with tail wheels, a normal level flight attitude.

(2) For airplanes with nose wheels, attitudes in which—

(i) The nose and main wheels contact the ground simultaneously; and

(ii) The main wheels contact the ground and the nose wheel is just clear of the ground.

The attitude used in subdivision (i) of this subparagraph may be used in the analysis required under subdivision (ii) of this subparagraph.

(b) When investigating landing conditions, the drag components simulating the forces required to accelerate the tires and wheels up to the landing speed must be properly combined with the corresponding instantaneous vertical ground reactions, assuming wing lift and a tire-sliding coefficient of friction of 0.8. However, the drag loads may not be less than 25 percent of the maximum vertical ground reactions (neglecting wing lift).

(c) In determining the wheel spin-up loads for landing conditions, the method set forth in Appendix D or the arbitrary drag components in Appendix C must be used. However, if Appendix D is used, the 25 percent value for the minimum drag component must be used.

**§ 23.481 Tail down landing conditions.**

(a) For a tail down landing, the airplane is assumed to be in the following attitudes:

(1) For airplanes with tail wheels, an attitude in which the main and tail wheels contact the ground simultaneously.

(2) For airplanes with nose wheels, a stalling attitude, or the maximum angle allowing ground clearance by each part of the airplane, whichever is less.

(b) For airplanes with either tail or nose wheels, ground reactions are assumed to be vertical, with the wheels up to speed before the maximum vertical load is attained.

**§ 23.483 One-wheel landing conditions.**

For the one-wheel landing condition, the airplane is assumed to be in the level attitude and to contact the ground on one side of the main landing gear. In this attitude, the ground reactions must be the same as those obtained on that side under § 23.479.

**§ 23.485 Side load conditions.**

(a) For the side load condition, the airplane is assumed to be in a level attitude with only the main wheels contacting the ground and with the shock absorbers and tires in their static positions.

(b) The limit vertical load factor must be 1.33, with the vertical ground reaction divided equally between the main wheels.

(c) The limit side inertia factor must be 0.83, with the side ground reaction divided between the main wheels so that—

(1) $0.5(W)$ is acting inboard on one side; and

(2) $0.33(W)$ is acting outboard on the other side.

**§ 23.493 Braked roll conditions.**

Under braked roll conditions, with the shock absorbers and tires in their static positions, the following apply:

(a) The limit vertical load factor must be 1.33.

(b) The attitudes and ground contacts must be those described in § 23.479 for level landings.

(c) A drag reaction equal to the vertical reaction at the wheel multiplied by a coefficient of friction of 0.8 must be applied at the ground contact point of each wheel with brakes, except that the drag reaction need not exceed the maximum value based on limiting brake torque.

**§ 23.497 Supplementary conditions for tail wheels.**

In determining the ground loads on the tail wheel and affected supporting structures, the following apply:

(a) For the obstruction load, the limit ground reaction obtained in the tail down landing condition is assumed to act up and aft through the axle at 45 degrees. The shock absorber and tire may be assumed to be in their static positions.

(b) For the side load, a limit vertical ground reaction equal to the static load on the tail wheel, in combination with a side component of equal magnitude, is assumed. In addition—

(1) If a swivel is used, the tail wheel is assumed to be swiveled 90 degrees to the airplane longitudinal axis with the resultant ground load passing through the axle;

(2) If a lock, steering device, or shimmy damper is used, the tail wheel is also assumed to be in the trailing position with the side load acting at the ground contact point; and

(3) The shock absorber and tire are assumed to be in their static positions.

**§ 23.499 Supplementary conditions for nose wheels.**

In determining the ground loads on nose wheels and affected supporting structures, and assuming that the shock absorbers and tires are in their static positions, the following conditions must be met:

(a) For aft loads, the limit force components at the axle must be—

(1) A vertical component of 2.25 times the static load on the wheel; and

(2) A drag component of 0.8 times the vertical load.

(b) For forward loads, the limit force components at the axle must be—

(1) A vertical component of 2.25 times the static load on the wheel; and

(2) A forward component of 0.4 times the vertical load.

(c) For side loads, the limit force components at ground contact must be—

(1) A vertical component of 2.25 times the static load on the wheel; and

(2) A side component of 0.7 times the vertical load.

**§ 23.505 Supplementary conditions for skiplanes.**

In determining ground loads on skiplanes, and assuming that the airplane is resting on the ground with one main ski frozen at rest and the other main ski and the tail ski free to slide, a limit side force equal to $P/3$ must be applied at the most convenient point near the tail assembly, with—

(a) $P$ being the static ground reaction on the tail ski; and

(b) A factor of safety of 1.0.

WATER LOADS

**§ 23.521 Water load conditions.**

(a) The structure of seaplanes and amphibians must be designed for water loads developed during takeoff and landing with the seaplane in any attitude likely to occur in normal operation at appropriate forward and sinking velocities under the most severe sea conditions likely to be encountered.

(b) Unless the applicant makes a rational analysis of the water loads, or uses the standards in ANC-3, §§ 25.523 through 25.537 of this chapter apply.

(c) Floats certificated under Part 4a of this chapter before November 9, 1945, may be installed on airplanes that are designed under this part.

EMERGENCY LANDING CONDITIONS

**§ 23.561 General.**

(a) The airplane, although it may be damaged in emergency landing conditions, must be designed as prescribed in this section to protect each occupant under those conditions.

(b) The structure must be designed to give each occupant every reasonable chance of escaping serious injury in a minor crash landing when—

(1) Proper use is made of belts or harnesses provided for in the design; and

(2) The occupant experiences the ultimate inertia forces shown in the following table:

ULTIMATE INERTIA FORCES

| | Normal and utility categories | Acrobatic category |
|---|---|---|
| Upward | 3.0$g$ | 4.5$g$ |
| Forward | 9.0$g$ | 9.0$g$ |
| Sideward | 1.5$g$ | 1.5$g$ |

(c) Each airplane with retractable landing gear must be designed to protect each occupant in a landing—

(1) With the wheels retracted;

(2) With moderate descent velocity; and

(3) Assuming—

(i) An upward ultimate inertia force of 3g; and

(ii) A coefficient of friction of 0.5 at the ground.

(d) If a turnover is reasonably probable, the structure must be designed to protect the occupants in a complete turnover, assuming—

(1) An upward ultimate inertia force of 3g; and

(2) A coefficient of friction of 0.5 at the ground.

(e) Except as provided in § 23.787 the supporting structure must be designed to restrain, under loads up to those specified in paragraph (b)(2) of this section, each item of mass that could injure an occupant if it came loose in a minor crash landing.

FATIGUE EVALUATION

**§ 23.571 Pressurized cabin.**

The strength, detail design, and fabrication of the pressure cabin structure must be evaluated under either of the following:

(a) A fatigue strength investigation, in which the structure is shown by analysis, tests, or both to be able to withstand the repeated loads of variable magnitude expected in service.

(b) A fail safe strength investigation, in which it is shown by analysis, tests, or both that catastrophic failure of the structure is not probable after fatigue failure, or obvious partial failure, of a principal structural element, and that the remaining structures are able to withstand a static ultimate load factor of 75 percent of the limit load factor at $V_C$, considering the combined effects of normal operating pressures, expected external aerodynamic pressures, and flight loads. These loads must be multiplied by a factor of 1.15 unless the dynamic effects of failure under static load are otherwise considered.

## Subpart D—Design and Construction

### § 23.601 General.

The suitability of each questionable design detail and part having an important bearing on safety in operations, must be established by tests.

### § 23.603 Materials and workmanship.

(a) The suitability and durability of materials used in the structure must be—

(1) Established by experience or tests; and

(2) Meet approved specifications that ensure their having the strength and other properties assumed in the design data.

(b) Workmanship must be of a high standard.

### § 23.605 Fabrication methods.

The methods of fabrication used must produce consistently sound structures. If a fabrication process (such as gluing, spot welding, or heat-treating) requires close control to reach this objective, the process must be performed under an approved process specification.

### § 23.607 Self-locking nuts.

No self-locking nut may be used on any bolt subject to rotation in operation.

### § 23.609 Protection of structure.

Each part of the structure must—

(a) Be suitably protected against deterioration or loss of strength in service due to any cause, including—

(1) Weathering;

(2) Corrosion; and

(3) Abrasion; and

(b) Have adequate provisions for ventilation and drainage.

### § 23.611 Inspection provisions.

There must be means to allow close examination of each part requiring recurring inspection, adjustments for proper alignment and function, or lubrication.

### § 23.613 Material strength properties and design values.

(a) Material strength properties must be based on enough tests of material meeting specifications to establish design values on a statistical basis.

(b) The design values must be chosen so that the probability of any structure being understrength because of material variations is extremely remote.

(c) Unless they are inapplicable in a particular case, the design values must be those contained in the following publications (obtainable from the Superintendent of Documents, Government Printing Office, Washington, D.C., 20402):

MIL-HDBK-5, "Metallic Materials and Elements for Flight Vehicle Structure";
MIL-HDBK-17, "Plastics for Flight Vehicles";
ANC-18, "Design of Wood Aircraft Structures"; and
MIL-HDBK-23, "Composite Construction for Flight Vehicles".

### § 23.615 Design properties.

(a) Design properties outlined in MIL-HDBK-5 may be used subject to the following conditions:

(1) Where applied loads are eventually distributed through a single member within an assembly, the failure of which would result in the loss of the structural integrity of the component involved, the guaranteed minimum design mechanical properties ("A" values) listed in MIL-HDBK-5 must be met. Examples of these items include—

(i) Wing lift struts;

(ii) Wing spars;

(iii) Sparcaps in regions such as wing cutouts and wing center sections where loads are transmitted through caps only; and

(iv) Primary attachment fittings dependent on single bolts for load transfer.

(2) Redundant structures in which the partial failure of individual elements would result in applied loads being safely distributed to other load carrying members may be designed on the basis of the "90 percent probability" ("B" values) listed in MIL-HDBK-5. Examples of these items are sheet-stiffener combinations and multirivet or multiple bolt connections.

(b) Design values greater than the guaranteed minimums required by paragraph (a) of this section may be used if a "premium selection" of the material is made in which a specimen of each individual item is tested before use to determine that the actual strength properties of that particular item will equal or exceed those used in design.

(c) Material correction factors for structural items such as sheets, sheet-stringer combinations, and riveted joints, may be omitted if sufficient test data are obtained to allow a probability analysis showing that 90 percent or more of the elements will equal or exceed allowable selected design values.

### § 23.617 Interchangeability of seam-welded and seamless steel tubing.

Seam-welded and seamless steel tubing may be interchanged as follows:

(a) SAE 4130 welded tubing meeting Specification MIL-T-6731 and SAE 4130 seamless tubing meeting Specification MIL-T-6736.

(b) SAE 1025 welded tubing and SAE 1025 seamless tubing meeting Specification MIL-T-5066.

(c) SAE 8630 welded tubing meeting Specification MIL-T-6734 and SAE 8630 seamless tubing meeting Specification MIL-T-6732.

### § 23.619 Special factors.

(a) If there is uncertainty concerning the actual strength of a part of the structure, or if the strength is likely to deteriorate in service before normal replacement, increased factors of safety must be used to ensure that the reliability of that part is not less than that of the rest of the structure, as specified in paragraph (b) of this section and in §§ 23.619 through 23.625.

(b) For parts whose strength is subject to appreciable variability due to uncertainties in manufacturing processes and inspection methods, the factor of safety must be increased so that the probability of any part being understrength from these causes is extremely remote.

(c) Minimum variability factors are in §§ 23.621 through 23.625. Only the highest pertinent variability factor need be considered.

### § 23.621 Casting factors.

(a) *General.* The factors, tests, and inspections specified in paragraphs (b) through (d) of this section must be applied in addition to those necessary to establish foundry quality control. The inspections must meet approved specifications. Paragraphs (c) and (d) of this section apply to any structural castings except castings that are pressure tested as parts of hydraulic or other fluid systems and do not support structural loads.

(b) *Bearing stresses and surfaces.* The casting factors specified in paragraphs (c) and (d) of this section—

(1) Need not exceed 1.25 with respect to bearing stresses regardless of the method of inspection used; and

(2) Need not be used with respect to the bearing surfaces of a part whose bearing factor is larger than the applicable casting factor.

(c) *Critical castings.* For each casting whose failure would preclude continued safe flight and landing of the airplane or result in serious injury to occupants, the following apply:

(1) Each critical casting must—

(i) Have a casting factor of not less than 1.25; and

(ii) Receive 100 percent inspection by visual, radiographic, and magnetic particle or penetrant inspection methods or approved equivalent nondestructive inspection methods.

(2) For each critical casting with a casting factor less than 1.50, three sample castings must be static tested and shown to meet—

(i) The strength requirements of § 23.305 at an ultimate load corresponding to a casting factor of 1.25; and

(ii) The deformation requirements of § 23.305 at a load of 1.15 times the limit load.

(3) Examples of these castings are structural attachment fittings, parts of flight control systems, control surface hinges and balance weight attachments, seat, berth, safety belt, and fuel and oil tank supports and attachments, and cabin pressure valves.

(d) *Noncritical castings.* For each casting other than those specified in paragraph (c) of this section, the following apply:

(1) Except as provided in subparagraphs (2) and (3) of this paragraph, the casting factors and corresponding inspections must meet the following table:

| *Casting factor* | *Inspection* |
|---|---|
| 2.0 or more | 100 per cent visual. |
| Less than 2.0 but more than 1.5. | 100 percent visual, and magnetic particle or penetrant or equivalent nondestructive inspection methods. |
| 1.25 through 1.50. | 100 percent visual, magnetic particle or penetrant, and radiographic, or approved equivalent nondestructive inspection methods. |

(2) The percentage of castings inspected by nonvisual methods may be reduced below that specified in subparagraph (1) of this paragraph when an approved quality control procedure is established.

(3) For castings procured to a specification that guarantees the mechanical properties of the material in the casting and provides for demonstration of these properties by test of coupons cut from the castings on a sampling basis—

(i) A casting factor of 1.0 may be used; and

(ii) The castings must be inspected as provided in subparagraph (1) of this paragraph for casting factors of "1.25 through 1.50" and tested under paragraph (c) (2) of this section.

### § 23.623 Bearing factors.

(a) Except as provided in paragraph (b), the factor of safety in bearings at bolted or pinned joints must be increased to provide for—

(1) Relative motion in operation; and

(2) Joints, with clearance (free fit), subject to pounding or vibration.

(b) No bearing factor need be applied if other special factors apply.

### § 23.625 Fitting factors.

For each fitting (a part or terminal used to join one structural member to another), the following apply:

(a) For each fitting whose strength is not proven by limit and ultimate load tests in which actual stress conditions are simulated in the fitting and surrounding structures, a fitting factor of at least 1.15 must be applied to each part of—

(1) The fitting;

(2) The means of attachment; and

(3) The bearing on the joined members.

(b) No fitting factor need be used for joint designs based on comprehensive test data (such as continuous joints in metal plating, welded joints, and scarf joints in wood).

(c) For each integral fitting, the part must be treated as a fitting up to the point at which the section properties become typical of the member.

### § 23.627 Fatigue strength.

The structure must be designed, as far as practicable, to avoid points of stress concentration where variable stresses above the fatigue limit are likely to occur in normal service.

### § 23.629 Flutter.

(a) Each part of the airplane must be free from flutter under each appropriate speed and power condition up to at least the minimum value of $V_D$ allowed in § 23.335. In addition—

(1) The wings, tail, and control surfaces must be free from flutter, airfoil divergence, and control reversal from lack of rigidity for any condition of operation within the limit $V$-$n$ envelope;

(2) Adequate wing torsional rigidity must be shown by tests or other approved methods;

(3) The mass balance of surfaces must be designed to prevent flutter; and

(4) The natural frequencies of main structural components must be determined by vibration tests or other approved methods.

(b) Flight flutter tests are acceptable as proof of freedom from flutter if it is shown by these tests that proper and adequate attempts to induce flutter have been made within the speed range up to $V_D$, and that the vibratory response of the structure during the test indicates freedom from flutter.

(c) Compliance with the rigidity and mass balance criteria (pages 4–12) in Air Frame and Equipment Engineering Report No. 45 (as corrected) "Simplified Flutter Prevention Criteria" (published by the Federal Aviation Agency) is acceptable as proof of freedom from flutter if—

(1) The wing and aileron flutter prevention criteria, as represented by the wing torsional stiffness and aileron balance criteria, are limited to airplanes without large mass concentrations (such as engines, floats, or fuel tanks in outer wing panels) along the wing span; and

(2) The elevator and rudder balance criteria are used only for tail surface configurations that have fixed-fin and fixed-stabilizer surfaces.

### Wings

### § 23.641 Proof of strength.

The strength of stressed-skin wings must be proven by load tests or by combined structural analysis and load tests.

### § 23.643 Rib tests.

(a) Rib tests must simulate the conditions in the airplane with respect to—

(1) Torsional rigidity of spars;

(2) Fixity conditions;

(3) Lateral supports; and

(4) Attachment to spars.

(b) The effects of ailerons and high lift devices must be accounted for.

### Control Surfaces

### § 23.651 Proof of strength.

(a) Limit load tests of control surfaces are required. These tests must include the horn or fitting to which the control system is attached.

(b) In structural analyses, rigging loads due to wire bracing must be accounted for in a rational or conservative manner.

### § 23.655 Installation.

(a) Movable tail surfaces must be installed so that there is no interference between any surfaces or their bracing when one surface is held in its extreme position and the others are operated through their full angular movement.

(b) If an adjustable stabilizer is used, it must have stops that will limit its ranged travel to that allowing safe flight and landing.

### § 23.657 Hinges.

(a) Control surface hinges, except ball and roller bearing hinges, must have a factor of safety of not less than 6.67 with respect to the ultimate bearing strength of the softest material used as a bearing.

(b) For ball or roller bearing hinges, the approved rating of the bearing may not be exceeded.

(c) Hinges must have enough strength and rigidity for loads parallel to the hinge line.

### § 23.659 Mass balance.

The supporting structure and the attachment of concentrated mass balance weights used on control surfaces must be designed for—

(a) 24$g$ normal to the plane of the control surface;

(b) 12$g$ fore and aft; and

(c) 12$g$ parallel to the hinge line.

### Control Systems

### § 23.671 General.

(a) Each control must operate easily, smoothly, and positively enough to allow proper performance of its functions.

(b) Controls must be arranged and identified to provide for convenience in operation and to prevent the possibility of confusion and subsequent inadvertent operation.

### § 23.673 Primary flight controls.

(a) Primary flight controls are those used by the pilot for the immediate control of pitch, roll, and yaw.

(b) The design of two-control airplanes must minimize the likelihood of complete loss of lateral or directional control in the event of failure of any connecting or transmitting element in the control system.

### § 23.675 Stops.

(a) Each control system must have stops that positively limit the range of motion of the pilot's controls.

(b) Each stop must be so located in the system that the range of travel of its control is not appreciably affected by—

(1) Wear;

(2) Slackness; or

(3) Takeup adjustments.

(c) Each stop must be able to withstand the loads corresponding to the design conditions for the system.

### § 23.677 Trim systems.

(a) Proper precautions must be taken to prevent inadvertent, improper, or abrupt trim tab operation. There must be means near the trim control to indicate to the pilot the direction of trim control movement relative to airplane motion. In addition, there must be means to indicate to the pilot the position of the trim device with respect to the range of adjustment. This means must be visible to the pilot and must be located and designed to prevent confusion.

(b) Trimming devices must be designed so that, when any one connecting or transmitting element in the primary flight control system fails, normal trimming operation may be continued with—

(1) For single-engine airplanes, the longitudinal trimming devices; or

(2) For multiengine airplanes, the longitudinal and directional trimming devices.

(c) Tab controls must be irreversible unless the tab is properly balanced and has no unsafe flutter characteristics. Irreversible tab systems must have adequate rigidity and reliability in the portion of the system from the tab to the attachment of the irreversible unit to the airplane structure.

**§ 23.679 Control system locks.**

If there is a device to lock the control system on the ground or water, there must be means to—

(a) Give unmistakable warning to the pilot when the lock is engaged; and

(b) Prevent the lock from engaging in flight.

**§ 23.681 Limit load static tests.**

(a) Compliance with the limit load requirements of this part must be shown by tests in which—

(1) The direction of the test loads produces the most severe loading in the control system; and

(2) Each fitting, pulley, and bracket used in attaching the system to the main structure is included.

(b) Compliance must be shown (by analyses or individual load tests) with the special factor requirements for control system joints subject to angular motion.

**§ 23.683 Operation tests.**

(a) It must be shown by operation tests that, when the controls are operated from the pilot compartment with the system loaded as prescribed in paragraph (b) of this section, the system is free from—

(1) Jamming;

(2) Excessive friction; and

(3) Excessive deflection.

(b) The prescribed test loads are—

(1) For the entire system, loads corresponding to the limit airloads on the appropriate surface; and

(2) For secondary controls, loads not less than those corresponding to the maximum pilot effort established under § 23.405.

**§ 23.685 Control system details.**

(a) Each detail of each control system must be designed and installed to prevent jamming, chafing, and interference from cargo, passengers, or loose objects.

(b) There must be means in the cockpit to prevent the entry of foreign objects into places where they would jam the system.

(c) There must be means to prevent the slapping of cables or tubes against other parts.

(d) Each element of the flight control system must have design features, or must be distinctively and permanently marked, to minimize the possibility of incorrect assembly that could result in malfunctioning of the control system.

**§ 23.687 Spring devices.**

The reliability of any spring device used in the control system must be established by tests simulating service conditions unless failure of the spring will not cause flutter or unsafe flight characteristics.

**§ 23.689 Cable systems.**

(a) Each cable, cable fitting, turnbuckle, splice, and pulley used must meet approved specifications. In addition—

(1) No cable smaller than ⅛ inch diameter may be used in primary control systems;

(2) Each cable system must be designed so that there will be no hazardous change in cable tension throughout the range of travel under operating conditions and temperature variations; and

(3) There must be means for visual inspection at each fairlead, pulley, terminal, and turnbuckle.

(b) Each kind and size of pulley must correspond to the cable with which it is used, as specified in the pulley specification. Each pulley must have closely fitted guards to prevent the cables from being misplaced or fouled, even when slack. Each pulley must lie in the plane passing through the cable so that the cable does not rub against the pulley flange.

(c) Fairleads must be installed so that they do not cause a change in cable direction of more than three degrees.

(d) Clevis pins subject to load or motion and retained only by cotter pins may not be used in the control system.

(e) Turnbuckles must be attached to parts having angular motion in a manner that will positively prevent binding throughout the range of travel.

(f) Tab control cables are not part of the primary control system and may be less than ⅛ inch diameter in airplanes that are safely controllable with the tabs in the most adverse positions.

**§ 23.693 Joints.**

Control system joints (in push-pull systems) that are subject to angular motion, except those in ball and roller bearing systems, must have a special factor of safety of not less than 3.33 with respect to the ultimate bearing strength of the softest material used as a bearing. This factor may be reduced to 2.0 for joints in cable control systems. For ball or roller bearings, the approved ratings may not be exceeded.

**§ 23.697 Wing flap controls.**

(a) Each wing flap control must be designed so that, when the flap has been placed in any position upon which compliance with the performance requirements of this part is based, the flap will not move from that position unless the control is adjusted or is moved by the automatic operation of a flap load limiting device.

(b) The rate of movement of the flaps in response to the operation of the pilot's control or automatic device must give satisfactory flight and performance characteristics under steady or changing conditions of airspeed, engine power, and attitude.

**§ 23.699 Wing flap position indicator.**

There must be a wing flap position indicator for—

(a) Flap installations with only the retracted and fully extended position, unless—

(1) A direct operating mechanism provides a sense of "feel" and position (such as when a mechanical linkage is employed); or

(2) The flap position is readily determined without seriously detracting from other piloting duties under any flight condition, day or night; and

(b) Flap installation with intermediate flap positions if—

(1) Any flap position other than retracted or fully extended is used to show compliance with the performance requirements of this part; and

(2) The flap installation does not meet the requirements of paragraph (a)(1) of this section.

**§ 23.701 Flap interconnection.**

(a) The motion of flaps on opposite sides of the plane of symmetry must be synchronized by a mechanical interconnection unless the airplane has safe flight characteristics with the flaps retracted on one side and extended on the other.

(b) If an interconnection is used in multiengine airplanes, it must be designed to account for the unsymmetrical loads resulting from flight with the engines on one side of the plane of symmetry inoperative and the remaining engines at takeoff power. For single-engine airplanes, it may be assumed that 100 percent of the critical air load acts on one side and 70 percent on the other.

LANDING GEAR

**§ 23.721 General.**

(a) The shock absorbing elements in main, nose, and tail wheel units must be substantiated by the tests specified in § 23.723.

(b) The shock absorbing ability of the landing gear during taxiing must be shown in the operational tests required by § 23.235.

**§ 23.723 Shock absorption tests.**

(a) It must be shown by energy absorption tests that the limit load factors selected for design under § 23.473 will not be exceeded in landings with the limit descent velocity specified in that section.

(b) The landing gear may not fail, but may yield, in a test showing its reserved energy absorption capacity, simulating a descent velocity of 1.2 times the limit descent velocity, assuming wing lift equal to the weight of the airplane.

**§ 23.725 Limit drop tests.**

(a) If compliance with § 23.723(a) is shown by free drop tests, these tests must be made on the complete airplane, or on units consisting of wheel, tire, and shock absorber, in their proper relation, from free drop heights not less than those determined by the following formula:

$$h \text{ (inches)} = 3.6\ (W/S)^{1/2}$$

However, the free drop height may not be less than 9.2 inches and need not be more than 18.7 inches.

(b) If wing lift is simulated in free drop tests, the landing gear must be dropped with an effective weight equal to

$$W_e = W\left[\frac{h+(1-L)d}{h+d}\right]$$

where—

$W_e$ = the effective weight to be used in the drop test (lbs.);

$h$ = specified free drop height (inches);

$d$ = deflection under impact of the tire (at the approved inflation pressure) plus the vertical component of the axle travel relative to the drop mass (inches);

$W = W_M$ for main gear units (lbs.), equal to the static weight on that unit with the airplane in the level attitude (with the nose wheel clear in the case of nose wheel type airplanes);

$W = W_T$ for tail gear units (lbs.), equal to the static weight on the tail unit with the airplane in the tail-down attitude;

$W = W_N$ for nose wheel units (lbs.), equal to the vertical component of the static reaction that would exist at the nose wheel, assuming that the mass of the airplane acts at the center of gravity and exerts a force of $1.0g$ downward and $0.33g$ forward; and

$L$ = the ratio of the assumed wing lift to the airplane weight, but not more than 0.667.

(c) The attitude in which a landing gear unit is drop tested must simulate the critical landing conditions for the unit.

(d) The value of $d$ used in the computation of $W_e$ in paragraph (b) of this section may not exceed the value actually obtained in the drop test.

(e) The limit inertia load factor must be determined from the drop test in paragraph (b) of this section according to the following formula:

$$n = n_j\frac{W_e}{W} + L$$

where—

$n_j$ = the load factor developed in the drop test (that is, the acceleration $(dv/dt)$ in $g$'s recorded in the drop test) plus 1.0; and

$W_e$, $W$, and $L$ are the same as in the drop test computation.

(f) The value of $n$ determined in accordance with paragraph (e) may not be more than the limit inertia load factor used in the landing conditions in § 23.473.

**§ 23.727 Reserve energy absorption drop test.**

(a) If compliance with the reserve energy absorption requirement in § 23.723 (b) is shown by free drop tests, the drop height may not be less than 1.44 times that specified in § 23.725.

(b) If wing lift equal to the airplane weight is simulated, the units must be dropped with an effective mass equal to $W_e = W\left(\frac{h}{h+d}\right)$ where the symbols and other details are the same as in § 23.725.

**§ 23.729 Retracting mechanism.**

(a) *General.* For airplanes with retractable landing gear, the following apply:

(1) Each landing gear retracting mechanism and its supporting structure must be designed for maximum flight load factors with the gear retracted and must be designed for the combination of friction, inertia, brake torque, and air loads, occurring during retraction at any airspeed up to 1.6 $V_{S_1}$ with flaps retracted, and for any load factor up to those specified in § 23.345 for the flaps-extended condition.

(2) The landing gear and retracting mechanism, including the wheel well doors, must withstand flight loads with the landing gear extended at any speed up to at least 1.6 $V_{S_1}$ with flaps retracted.

(b) *Landing gear lock.* There must be positive means (other than the use of hydraulic pressure) to keep the landing gear extended.

(c) *Emergency operation.* A landplane without manually operated landing gear must have an auxiliary means of extending the gear.

(d) *Operation test.* The proper functioning of the retracting mechanism must be shown by operation tests.

(e) *Position indicator and warning device.* There must be means to indicate to the pilot when the wheels are secured in the extreme positions. In addition, landplanes must have an aural or equally effective warning device that functions continuously, when one or more throttles are closed, until the gear is down and locked. A throttle stop is not an acceptable alternative to an aural landing gear warning device.

**§ 23.731 Wheels.**

(a) Each main and nose wheel must be approved.

(b) The maximum static load rating of each wheel may not be less than the corresponding static ground reaction with—

(1) Design maximum weight; and

(2) Critical center of gravity.

(c) The maximum limit load rating of each wheel must equal or exceed the maximum radial limit load determined under the applicable ground load requirements of this part.

**§ 23.733 Tires.**

(a) Each landing gear wheel must have a tire—

(1) That is a proper fit on the rim of the wheel; and

(2) Whose tire rating (assigned by the Tire and Rim Association or the Administrator) is not exceeded—

(i) By a load on each main wheel tire equal to the corresponding static ground reaction under the design maximum weight and critical center of gravity; and

(ii) By a load on nose wheel tires (to be compared with the dynamic rating established for such tires) equal to the reaction obtained at the nose wheel, assuming the mass of the airplane to be concentrated at the most critical center of gravity and exerting a force of $1.0W$ downward and $0.31W$ forward (where $W$ is the design maximum weight), with the reactions distributed to the nose and main wheels by the principles of statics, and with the drag reaction at the ground applied only at wheels with brakes.

(b) If specially constructed tires are used, the wheels must be plainly and conspicuously marked to that effect. The markings must include the make, size, number of plies, and identification marking of the proper tire.

**§ 23.735 Brakes.**

There must be brakes that are adequate to—

(a) Prevent the airplane from rolling on a paved runway with takeoff power on the critical engine; and

(b) Provide adequate speed control during taxiing without excessive pilot loads.

**§ 23.737 Skis.**

Each ski must be approved. The maximum limit load rating of each ski must equal or exceed the maximum limit load determined under the applicable ground load requirements of this part.

FLOATS AND HULLS

**§ 23.751 Main float buoyancy.**

(a) Each main float must have—

(1) A buoyancy of 80 percent in excess of that required to support the maximum weight of the seaplane or amphibian in fresh water; and

(2) Enough watertight compartments to provide reasonable assurance that the seaplane or amphibian will stay afloat if any two compartments of the main floats are flooded.

(b) Each main float must contain at least four watertight compartments approximately equal in volume.

**§ 23.753 Main float design.**

Each seaplane main float must be approved and must meet the requirements of § 23.521.

**§ 23.755 Hulls.**

(a) The hull of a hull seaplane or amphibian of 1,500 pounds or more maximum weight must have watertight compartments designed and arranged so that the hull, auxiliary floats, and tires (if used), will keep the airplane afloat in fresh water when—

(1) For airplanes of 5,000 pounds or more maximum weight, any two adjacent compartments are flooded; and

(2) For airplanes of 1,500 pounds up to, but not including, 5,000 pounds maximum weight, any single compartment is flooded.

(b) The hulls of hull seaplanes or amphibians of less than 1,500 pounds maximum weight need not be compartmented.

(c) Bulkheads with watertight doors may be used for communication between compartments.

**§ 23.757 Auxiliary floats.**

Auxiliary floats must be arranged so that, when completely submerged in fresh water, they provide a righting moment of at least 1.5 times the upsetting moment caused by the seaplane or amphibian being tilted.

PERSONNEL AND CARGO ACCOMMODATIONS

**§ 23.771 Pilot compartment.**

For each pilot compartment—

(a) The compartment and its equipment must allow each pilot to perform his duties without unreasonable concentration or fatigue; and

(b) The aerodynamic controls listed in § 23.779, excluding cables and control rods, must be located with respect to the propellers so that no part of the pilot or the controls lies in the region between the plane of rotation of any inboard propeller and the surface generated by a line passing through the center of the propeller hub making an angle of 5 degrees forward or aft of the plane of rotation of the propeller.

**§ 23.773 Pilot compartment view.**

(a) Each pilot compartment must be free from glare and reflections that could interfere with the pilot's vision, and designed so that—

(1) The pilot's view is sufficiently extensive, clear, and undistorted, for safe operation; and

(2) Each pilot is protected from the elements so that moderate rain conditions do not unduly impair his view of the flight path in normal flight and while landing.

(b) If certification for night operation is requested, compliance with paragraph (a) of this section must be shown in night flight tests.

**§ 23.775 Windshields and windows.**

(a) Nonsplintering safety glass must be used in internal glass panes.

(b) The design of windshields, windows, and canopies in pressurized airplanes must be based on factors peculiar to high altitude operation, including—

(1) The effects of continuous and cyclic pressurization loadings;

(2) The inherent characteristics of the material used; and

(3) The effects of temperatures and temperature gradients.

(c) On pressurized airplanes, an inclosure canopy including a representative part of the installation must be subjected to special tests to account for the combined effects of continuous and cyclic pressurization loadings and flight loads.

(d) The windshield and side windows forward of the pilot's back when he is seated in the normal flight position must have a luminous transmittance value of not less than 70 percent.

**§ 23.777 Cockpit controls.**

(a) Each cockpit control must be located and (except where its function is obvious) identified to provide convenient operation and to prevent confusion and inadvertent operation.

(b) The controls must be located and arranged so that the pilot, when seated, has full and unrestricted movement of each control without interference from either his clothing or the cockpit structure.

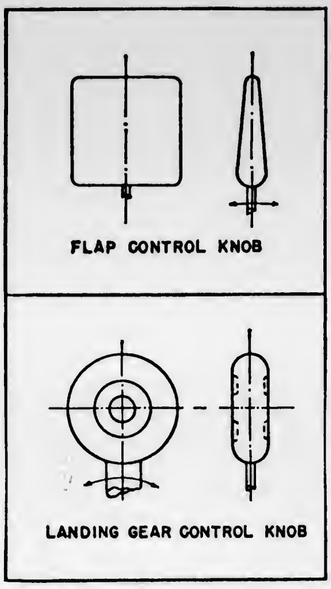
(c) Identical powerplant controls for each engine must be located to prevent confusion as to the engines they control.

(d) Wing flap and auxiliary lift device controls must be located—

(1) Centrally, or to the right of the pedestal or powerplant throttle control centerline; and

(2) Far enough away from the landing gear control to avoid confusion.

(e) The landing gear control must be located to the left of the throttle centerline or pedestal centerline.



**§ 23.779 Motion and effect of cockpit controls.**

Cockpit controls must be designed so that they operate as follows:

| *Controls* | *Motion and effect* |
|---|---|
| Aerodynamic: | |
| Aileron | Right (clockwise) for right wing down. |
| Elevator | Rearward for nose up. |
| Rudder | Right pedal forward for nose right. |
| Powerplant: | |
| Throttle | Forward to open. |

**§ 23.781 Cockpit control knob shape.**

Cockpit control knobs must conform to the general shapes (but not necessarily the exact sizes or specific proportions) in the following figure:

**§ 23.783 Doors.**

(a) Each closed cabin with passenger accommodations must have at least one adequate and easily accessible external door.

(b) No passenger door may be located with respect to any propeller disc so as to endanger persons using that door.

**§ 23.785 Seats and berths.**

(a) Each seat, berth, and its supporting structure, must be designed for occupants weighing at least 170 pounds (or 190 pounds with parachute for seats in utility and acrobatic category airplanes), and for the maximum load factors corresponding to the specified flight and ground load conditions, including the emergency landing conditions prescribed in § 23.561.

(b) Each seat and berth must be approved.

(c) Each pilot seat must be designed for the reactions resulting from the application of pilot forces to the primary flight controls, as prescribed in § 23.395.

(d) Unless otherwise placarded, each seat in utility and acrobatic category airplanes must be designed to accommodate passengers wearing parachutes.

(e) Each berth installed parallel to the longitudinal axis of an airplane must be designed so that the forward part has a padded end-board, canvas diaphragm, or equivalent means that can withstand the static load reaction of the occupant when the occupant is subjected to the forward inertia forces prescribed in § 23.561. In addition—

(1) The berth must have an approved safety belt and may not have corners or other parts likely to cause serious injury to a person occupying it during emergency conditions; and

(2) Safety belt attachments for the berth must be designed to withstand the critical loads resulting from relevant flight and ground load conditions and from the emergency landing conditions prescribed in § 23.561, with the exception of the forward load.

(f) Proof of compliance with the strength and deformation requirements of this section for seats and berths approved as part of the type design and for seat and berth installations may be shown by—

(1) Structural analysis, if the structure conforms to conventional airplane types for which existing methods of analysis are known to be reliable;

(2) A combination of structural analysis and static load tests to limit loads; or

(3) Static load tests to ultimate loads.

The inertia forces prescribed in § 23.561 must be multiplied by a factor of 1.33 (rather than by the fitting factor prescribed in § 23.625) in determining the strength of the atachment of each seat or berth to the structure.

**§ 23.787 Cargo compartments.**

(a) Each cargo compartment must be designed for its placarded maximum weight of contents and for the critical load distributions at the appropriate maximum load factors corresponding to the flight and ground load conditions of this part.

(b) There must be means to prevent the contents of any cargo compartment from becoming a hazard by shifting.

(c) There must be means to protect the passengers from injury by the contents of any cargo compartment when the ultimate forward inertia force is 4.5*g*.

**§ 23.807 Emergency exits.**

(a) *Number and location.* Emergency exits must be located to allow escape without crowding in any probable crash attitude. The airplane must have at least the following emergency exits:

(1) For an airplane with a seating capacity of more than five occupants, but less than 16, at least one emergency exit on the opposite side of the cabin from the main door specified in § 23.783.

(2) For an airplane with a seating capacity of more than 15 occupants, the emergency exit specified in subparagraph (1) of this paragraph, and an emergency exit in the top or side of the cabin for each seven occupants, or fraction thereof, above 15. However, no more than four exits are required if their arrangement and size allow quick evacuation of each occupant.

(3) If the pilot compartment is separated from the cabin by a door that is likely to block the pilot's escape in a minor crash, there must be an exit in the pilot's compartment. The number of exits required by subparagraphs (1) and (2) of this paragraph must then be separately determined for the passenger compartment, using the seating capacity of that compartment.

(b) *Type and operation.* Emergency exits must be movable windows, panels, or external doors, that provide a clear and unobstructed opening large enough to admit a 19-by-26-inch ellipse. In addition, each emergency exit must—

(1) Be readily accessible, requiring no exceptional agility to be used in emergencies;

(2) Have a method of opening that is simple and obvious;

(3) Be arranged and marked for easy location and operation, even in darkness;

(4) Have reasonable provisions against jamming by fuselage deformation; and

(5) In the case of acrobatic category airplanes, allow each occupant to bail out quickly with parachutes at any speed between $V_{S_0}$ and $V_D$.

(c) *Tests.* The proper functioning of each emergency exit must be shown by tests.

**§ 23.831 Ventilation.**

Each passenger and crew compartment must be suitably ventilated. Carbon monoxide concentration may not exceed one part in 20,000 parts of air.

PRESSURIZATION

**§ 23.841 Pressurized cabins.**

Pressurized cabins must have at least the following valves, controls, and indicators, for controlling cabin pressure:

(a) Two pressure relief valves (at least one of which is the normal regulating valve) to automatically limit the positive pressure differential to a predetermined value at the maximum rate of flow delivered by the pressure source. The combined capacity of the relief valves must be large enough so that the failure of any one valve would not cause an appreciable rise in the pressure differential. The pressure differential is positive when the internal pressure is greater than the external.

(b) Two reverse pressure differential relief valves (or their equivalents) to automatically prevent a negative pressure differential that would damage the structure. However, one valve is enough if it is of a design that reasonably precludes its malfunctioning.

(c) A means by which the pressure differential can be rapidly equalized.

(d) An automatic or manual regulator for controlling the intake or exhaust airflow, or both, for maintaining the required internal pressures and airflow rates.

(e) Instruments to indicate to the pilot the pressure differential, the absolute pressure in the cabin, and the rate of change of the absolute pressure.

(f) A warning device to indicate to the pilot when the safe or preset pressure differential and absolute cabin pressure limits are exceeded.

(g) A warning placard for the pilot if the structure is not designed for pressure differentials up to the maximum relief valve setting in combination with landing loads.

(h) A means to stop rotation of the compressor or to divert airflow from the cabin if continued rotation of an engine-driven cabin compressor or continued flow of any compressor bleed air will create a hazard if a malfunction occurs.

**§ 23.843 Pressurization tests.**

(a) *Strength test.* The complete pressurized cabin, including doors, windows, canopy, and valves, must be tested as a pressure vessel for the pressure differential specified in § 23.365(d).

(b) *Functional tests.* The following functional tests must be performed:

(1) Tests of the functioning and capacity of the positive and negative pressure differential valves, and of the emergency release valve, to simulate the effects of closed regulator valves.

(2) Tests of the pressurization system to show proper functioning under each possible condition of pressure, temperature, and moisture, up to the maximum altitude for which certification is requested.

(3) Flight tests, to show the performance of the pressure supply, pressure and flow regulators, indicators, and warning signals, in steady and stepped climbs and descents at rates corresponding to the maximum attainable within the operating limitations of the airplane, up to the maximum altitude for which certification is requested.

(4) Tests of each door and emergency exit, to show that they operate properly after being subjected to the flight tests prescribed in subparagraph (3) of this paragraph.

FIRE PROTECTION

**§ 23.853 Compartment interiors.**

For each compartment to be used by the crew or passengers—

(a) The materials must be at least flash-resistant;

(b) If smoking is to be allowed—

(1) The wall and ceiling linings, and the covering of upholstery, floors, and furnishings must be at least flame resistant; and

(2) There must be an adequate number of self-contained ash trays; and

(c) If smoking is to be prohibited, there must be a placard so stating.

**§ 23.859 Combustion heater fire protection.**

Each gasoline-operated combustion heater must be approved and installed to meet the applicable powerplant installation requirements covering fire hazards and precautions. In addition—

(a) Each applicable requirement concerning fuel tanks, lines, and exhaust systems must be met; and

(b) Means independent of the components provided for the normal continuous control of air temperature, airflow, and fuel flow must be provided, for each heater, to automatically shut off and hold off the ignition and fuel supply of that heater at a point remote from that heater, when—

(1) The heat exchanger temperature or ventilating air temperature exceeds safe limits; or

(2) Either the combustion airflow or the ventilating airflow becomes inadequate for safe operation.

MISCELLANEOUS

**§ 23.871 Leveling marks.**

There must be reference marks for leveling the airplane on the ground.

## Subpart E—Powerplant

### General

**§ 23.901 Installation.**

(a) For the purpose of this part, the airplane powerplant installation includes each component that—

(1) Is necessary for propulsion; and

(2) Affects the safety of the major propulsive units.

(b) Each powerplant must be constructed, arranged, and installed to—

(1) Ensure safe operation; and

(2) Be accessible for necessary inspections and maintenance.

**§ 23.903 Engines.**

Each engine must be type certificated under Part 33 [New].

**§ 23.905 Propellers.**

(a) Each propeller must be type certificated under Part 35 [New] of this chapter.

(b) Engine power and propeller shaft rotational speed may not exceed the limits for which the propeller is certificated.

(c) Each featherable propeller must have a means to unfeather it in flight.

**§ 23.907 Propeller vibration.**

(a) Each propeller with metal blades or highly stressed metal components must be shown to have vibration stresses, in normal operating conditions, that do not exceed values that have been shown by the propeller manufacturer to be safe for continuous operation. This must be shown by—

(1) Measurement of stresses through direct testing of the propeller;

(2) Comparison with similar installations for which these measurements have been made; or

(3) Any other acceptable test method or service experience that proves the safety of the installation.

(b) Proof of safe vibration characteristics for any type of propeller, except for conventional, fixed-pitch, wood propellers must be shown where necessary.

**§ 23.925 Propeller clearance.**

Unless smaller clearances are substantiated, propeller clearances with the airplane at maximum weight, with the most adverse center of gravity, and with the propeller in the most adverse pitch position, may not be less than the following:

(a) *Ground clearance.* There must be a clearance of at least seven inches (for each airplane with nose wheel landing gear) or nine inches (for each airplane with tail wheel landing gear) between each propeller and the ground with the landing gear statically deflected and in the level, normal takeoff, or taxiing attitude, whichever is most critical. In addition, for each airplane with conventional landing gear struts using fluid or mechanical means for absorbing landing shocks, there must be positive clearance between the propeller and the ground in the level takeoff attitude with the critical tire completely deflated and the corresponding landing gear strut bottomed. Positive clearance for airplanes using leaf spring struts is shown with a deflection corresponding to 1.5$g$.

(b) *Water clearance.* There must be a clearance of at least 18 inches between each propeller and the water, unless compliance with § 23.237 can be shown with a lesser clearance.

(c) *Structural clearance.* There must be—

(1) At least one inch radial clearance between the blade tips and the airplane structure, plus any additional radial clearance necessary to prevent harmful vibration;

(2) At least one-half inch longitudinal clearance between the propeller blades or cuffs and stationary parts of the airplane; and

(3) Positive clearance between other rotating parts of the propeller or spinner and stationary parts of the airplane.

### Fuel System

**§ 23.951 General.**

(a) Each fuel system must be constructed and arranged to ensure a flow of fuel at a rate and pressure established for proper engine functioning under any normal operating condition.

(b) Each fuel system must be arranged to allow a fuel pump to draw fuel from one tank at a time. No gravity feed system may supply fuel to an engine from more than one tank at a time, unless the tank air spaces are interconnected so that interconnected tanks will feed equally.

**§ 23.953 Fuel system independence.**

(a) Each fuel system for a multiengine airplane must be arranged so that, in at least one system configuration, the failure of any one component (other than a fuel tank) will not result in the loss of power of more than one engine or require immediate action by the pilot to prevent the loss of power of more than one engine.

(b) If a single fuel tank (or series of fuel tanks interconnected to function as a single fuel tank) is used on a multiengine airplane, the following must be provided:

(1) Independent tank outlets for each engine, each incorporating a shutoff valve at the tank. This shutoff valve may also serve as the firewall shutoff valve required by § 23.995 if the line between the valve and the engine compartment does not contain a hazardous amount of fuel that can drain into the engine compartment.

(2) At least two vents arranged to minimize the probability of both vents becoming obstructed simultaneously.

(3) Filler caps designed to minimize the probability of incorrect installation or inflight loss.

(4) A fuel system in which those parts of the system from each tank outlet to any engine are independent of each part of the system supplying fuel to any other engine.

**§ 23.955 Fuel flow.**

(a) *General.* The ability of the fuel system to provide fuel at the rates specified in this section and at a pressure sufficient for proper carburetor operation must be shown in the attitude that is most critical with respect to fuel feed and quantity of unusable fuel. These conditions may be simulated in a suitable mockup. In addition—

(1) The quantity of fuel in the tank may not exceed the amount established as the unusable fuel supply for that tank under § 23.959 plus that necessary to show compliance with this section; and

(2) If there is a fuel flowmeter, it must be blocked during the flow test and the fuel must flow through the meter bypass.

(b) *Gravity systems.* The fuel flow rate for gravity systems (main and reserve supply) must be 150 percent of the takeoff fuel consumption of the engine.

(c) *Pump systems.* The fuel flow rate for each pump system (main and reserve supply) must be 0.9 pound per hour for each takeoff horsepower or 125 percent of the takeoff fuel consumption of the engine, whichever is more. In addition—

(1) This flow rate is required for each primary engine-driven pump and each emergency pump, and must be available when the pump is running as it would during takeoff; and

(2) For each hand-operated pump, this rate must occur at not more than 60 complete cycles (120 single strokes) per minute.

(d) *Auxiliary fuel systems and fuel transfer systems.* Paragraphs (b) and (c) of this section apply to each auxiliary and transfer system, except that—

(1) The required fuel flow rate must be established upon the basis of maximum continuous power and engine rotational speed, instead of takeoff power and fuel consumption; and

(2) A lesser flow rate may be used for a small auxiliary tank feeding into a large main tank, if there is a suitable placard stating that the auxiliary tank is not to be opened to the main tank unless a predetermined amount of fuel remains in the main tank.

**§ 23.957 Flow between interconnected tanks.**

It must be impossible, in a gravity feed system with interconnected tank outlets, for enough fuel to flow between the tanks to cause an overflow of fuel from any tank vent under the conditions in § 23.959, except that full tanks must be used.

**§ 23.959 Unusable fuel supply and fuel system operation on low fuel.**

(a) The unusable fuel supply for each tank must be established as not less than the quantity at which the first evidence of malfunctioning occurs under the conditions specified in this section. If more than one fuel tank is involved—

(1) Each tank not needed to feed the engine under the conditions specified in this section need only be investigated for the flight conditions in which it is to be used; and

(2) The unusable fuel supply for that tank is based on the most critical applicable conditions.

(b) For test purposes, the quantity of fuel to be used to show compliance with this section must be chosen by the applicant. In addition, when establishing the unusable fuel supply, the following flight conditions must be arranged in order, from the most to the least critical:

(1) Level flight at maximum continuous power, or at the power required for level flight at $V_C$, whichever is lower.

(2) Climb at maximum continuous power at the calculated best angle of climb at minimum weight.

(3) Rapid application of power and subsequent transition to best rate of climb from a power-off glide at 1.3 $V_{S_0}$.

(4) Slips and skids in level flight, climb, and glide, under the applicable conditions specified in subparagraphs (1), (2), and (3) of this paragraph, of the greatest severity likely to be encountered in normal service or turbulent air.

(c) For each acrobatic and utility category airplane, there may be no evidence of malfunctioning during any maneuver in the Airplane Flight Manual. During this test the amount of fuel in each tank may not exceed the unusable fuel supply established under paragraph (b) of this section, plus 0.03 gallon for each maximum continuous horsepower for which certification is requested.

(d) There may be no evidence of malfunctioning during takeoff and one minute of climb at the calculated best angle of climb at takeoff power and minimum weight where the takeoff is begun with the amount of fuel in each tank specified in paragraph (c) of this section.

(e) If an engine can be supplied with fuel from more than one tank, it must be possible, in level flight, to regain full power and fuel pressure to that engine in not more than 10 seconds (for single-engine airplanes) or 20 seconds (for multiengine airplanes) after switching to any full tank after engine malfunctioning due to fuel depletion becomes apparent while the engine is being supplied from any other tank.

**§ 23.961 Fuel system hot weather operation.**

Each fuel system conducive to vapor formation must be free from vapor lock when using fuel at a temperature of 110° F. under critical operating conditions.

**§ 23.963 Fuel tanks: general.**

(a) Each fuel tank must be able to withstand, without failure, the vibration, inertia, fluid, and structural loads that it may be subjected to in operation.

(b) Each flexible fuel tank liner must be of an acceptable kind.

(c) Each integral fuel tank must have adequate facilities for interior inspection and repair.

(d) The total usable capacity of the fuel tanks must be enough for at least one-half hour of operation at maximum continuous power.

(e) Each fuel quantity indicator must be adjusted, as specified in § 23.1337(b), to account for the unusable fuel supply determined under § 23.959.

**§ 23.965 Fuel tank tests.**

(a) Each fuel tank must be able to withstand the following pressures without failure or leakage:

(1) For each conventional metal tank and nonmetallic tank with walls not supported by the airplane structure, a pressure of 3.5 p.s.i., or that pressure developed during maximum ultimate acceleration with a full tank, whichever is greater.

(2) For each integral tank, the pressure developed during the maximum limit acceleration of the airplane with a full tank, with simultaneous application of the critical limit structural loads.

(3) For each nonmetallic tank with walls supported by the airplane structure and constructed in an acceptable manner using acceptable basic tank material, and with actual or simulated support conditions, a pressure of 2 p.s.i. for the first tank of a specific design. The supporting structure must be designed for the critical loads occurring in the flight or landing strength conditions combined with the fuel pressure loads resulting from the corresponding accelerations.

(b) Each fuel tank with large, unsupported, or unstiffened flat areas must be able to withstand the following test without leakage or failure:

(1) Each complete tank assembly and its supports must be vibration tested while mounted to simulate the actual installation.

(2) Except as specified in subparagraph (4) of this paragraph, the tank assembly must be vibrated for 25 hours at an amplitude of not less than 1/32 of an inch (unless another amplitude is substantiated) while 2/3 filled with water or other suitable test fluid.

(3) The test frequency of vibration must be as follows:

(i) If no frequency of vibration resulting from any r.p.m. within the normal operating range of engine speeds is critical, the test frequency of vibration, in number of cycles per minute, must be the number obtained by multiplying the maximum continuous engine speed (r.p.m.) by 0.9.

(ii) If only one frequency of vibration resulting from any r.p.m. within the normal operating range of engine speeds is critical, that frequency of vibration must be the test frequency.

(iii) If more than one frequency of vibration resulting from any r.p.m. within the normal operating range of engine speeds is critical, the most critical of these frequencies must be the test frequency.

(4) Under subparagraph (3) (ii) and (iii) of this paragraph, the time of test must be adjusted to accomplish the same number of vibration cycles that would be accomplished in 25 hours at the frequency specified in subparagraph (3) (i) of this paragraph.

(5) During the test, the tank assembly must be rocked at a rate of 16 to 20 complete cycles per minute, through an angle of 15 degrees on either side of the horizontal (30 degrees total), about an axis parallel to the axis of the fuselage, for 25 hours.

(c) Each integral tank using methods of construction and sealing not previously proven to be adequate by test data or service experience must be able to withstand the vibration test specified in subparagraphs (1) through (4) of paragraph (b).

(d) Each tank with a nonmetallic liner must be subjected to the sloshing test outlined in subparagraph (5) of paragraph (b) of this section, with the fuel at room temperature. In addition, a specimen liner of the same basic construction as that to be used in the airplane must, when installed in a suitable test tank, withstand the sloshing test with fuel at a temperature of 110° F.

**§ 23.967 Fuel tank installation.**

(a) Each fuel tank must be supported so that tank loads are not concentrated. In addition—

(1) There must be pads, if necessary, to prevent chafing between each tank and its supports;

(2) Padding must be nonabsorbent or treated to prevent the absorption of fuel;

(3) If a flexible tank liner is used, it must be supported so that it is not required to withstand fluid loads;

(4) Interior surfaces adjacent to the liner must be smooth and free from projections that could cause wear, unless—

(i) Provisions are made for protection of the liner at those points; or

(ii) The construction of the liner itself provides such protection; and

(5) A positive pressure must be maintained within the vapor space of each bladder cell under any condition of operation, including the critical conditions of low air-speed and rate of descent likely to be encountered.

(b) Each tank compartment must be ventilated and drained to prevent the accumulation of flammable fluids or vapors. Each compartment adjacent to a tank that is an integral part of the airplane structure must also be ventilated and drained.

(c) No fuel tank may be on the engine side of the firewall. There must be at least one-half inch of clearance between the fuel tank and the firewall. No part of the engine nacelle skin that lies immediately behind a major air opening from the engine compartment may act as the wall of an integral tank.

(d) No fuel tank may be in the personnel compartment of a multiengine airplane. If a fuel tank is in the personnel compartment of a single engine airplane, it must—

(1) If no larger than 25 gallons total capacity, be properly drained and ventilated; and

(2) If larger than 25 gallons total capacity—

(i) (For a conventional fuel tank) be isolated from the personnel compartment by fume and fuel proof enclosures; or

(ii) (For a bladder type fuel cell) have a retaining shell that is at least equivalent to a metal fuel tank in structural integrity and in fume and fuel

tightness, and that is drained to the exterior of the airplane.

**§ 23.969 Fuel tank expansion space.**

Each fuel tank must have an expansion space of not less than two percent of the tank capacity, unless the tank vent discharges clear of the airplane (in which case no expansion space is required). It must be impossible to fill the expansion space inadvertently with the airplane in the normal ground attitude.

**§ 23.971 Fuel tank sump.**

Each fuel tank must have a drainable sump with an effective capacity, in the normal ground and flight attitudes, of 0.25 percent of the tank capacity, or 1/16 gallon, whichever is greater, unless—

(a) The fuel system has a sediment bowl or chamber that is accessible for drainage and has a capacity of 1 ounce for every 20 gallons of fuel tank capacity; and

(b) Each fuel tank outlet is located so that, in the normal ground attitude, water will drain from all parts of the tank to the sediment bowl or chamber.

**§ 23.973 Fuel tank filler connection.**

(a) Each fuel tank filler connection must be marked as prescribed in § 23.1557(c).

(b) Spilled fuel must be prevented from entering the fuel tank compartment or any part of the airplane other than the tank itself.

(c) Each filler cap must provide a fuel-tight seal for the main filler opening. However, there may be small openings in the fuel tank cap for venting purposes or for the purpose of allowing passage of a fuel gauge through the cap.

**§ 23.975 Fuel tank vents and carburetor vapor vents.**

(a) Each fuel tank must be vented from the top part of the expansion space. In addition—

(1) Each vent outlet must be located and constructed in a manner that minimizes the possibility of its being obstructed by ice or other foreign matter;

(2) Each vent must be constructed to prevent siphoning of fuel during normal operation;

(3) The venting capacity must allow the rapid relief of excessive differences of pressure between the interior and exterior of the tank;

(4) Airspaces of tanks with interconnected outlets must be interconnected;

(5) There may be no undrainable points in any vent line where moisture can accumulate with the airplane in either the ground or level flight attitudes; and

(6) No vent may terminate at a point where the discharge of fuel from the vent outlet will constitute a fire hazard or from which fumes may enter personnel compartments.

(b) Each carburetor with vapor elimination connections must have a vent line to lead vapors back to one of the fuel tanks. If there is more than one fuel tank, and if it is necessary to use these tanks in a definite sequence for any reason, the vapor vent return line must lead back to the fuel tank to be used first, unless the relative capacities of the tanks are such that return to another tank is preferable.

(c) For acrobatic category airplanes, excessive loss of fuel during acrobatic maneuvers, including short periods of inverted flight, must be prevented. It must be impossible for fuel to siphon from the vent when normal flight has been resumed after any acrobatic maneuver for which certification is requested.

**§ 23.977 Fuel tank outlet.**

(a) There must be a fuel strainer, with 8 to 16 meshes per inch, for the fuel tank outlet. The diameter of the strainer must be at least equal to that of the fuel tank outlet.

(b) If a finger strainer is used—

(1) The length of the strainer must be at least four times the diameter of the outlet; and

(2) Each strainer must be accessible for inspection and cleaning.

FUEL SYSTEM COMPONENTS

**§ 23.991 Fuel pumps.**

(a) *Main pumps.* If there are fuel pumps to maintain a supply of fuel to the engine, at least one pump for each engine must be directly driven by the engine. The fuel pumps must be adequate to meet the flow requirements of applicable § 23.955.

(b) *Emergency pumps.* There must be emergency pumps to feed the engines after the failure of any engine-driven fuel pump other than a fuel injection pump (a pump that supplies proper flow and pressure for fuel injection when the injection is not accomplished in a carburetor) approved as part of an engine.

(c) *Warning means.* If both the normal pump and emergency pump operate continuously, there must be a means to indicate to the appropriate flight crewmembers a malfunction of either pump.

**§ 23.993 Fuel system lines and fittings.**

(a) Each fuel line must be installed and supported to prevent excessive vibration and to withstand loads due to fuel pressure and accelerated flight conditions.

(b) Each fuel line connected to components of the airplane between which relative motion could exist must have provisions for flexibility.

(c) Each flexible connection in fuel lines that may be under pressure and subjected to axial loading must use flexible hose assemblies.

(d) Each flexible hose must be approved or must be shown to be suitable for the particular application.

(e) No flexible hose that might be adversely affected by exposure to high temperatures may be used where excessive temperatures will exist during operation or after engine shutdown.

**§ 23.995 Fuel valves and controls.**

(a) There must be a means to allow appropriate flight crew members to rapidly shut off, in flight, the fuel to each engine individually.

(b) No shutoff valve may be on the engine side of any firewall. In addition, there must be means to—

(1) Guard against inadvertent operation of each shutoff valve; and

(2) Allow appropriate flight crew members to reopen each valve rapidly after it has been closed.

(c) Each valve and fuel system control must—

(1) Have either positive stops or "feel" in the "on" and "off" positions; and

(2) Be supported so that loads resulting from its operation or from accelerated flight conditions are not transmitted to the lines connected to the valve.

(d) Each valve or fuel system control must be installed so that the effect of gravity and vibration will tend to turn its handle to the open or "on" position, not to the closed or "off" position.

(e) Each fuel valve handle and its connections to the valve mechanism must have design features that minimize the possibility of incorrect installation.

**§ 23.997 Fuel strainer or filter.**

(a) There must be a fuel strainer or filter between the fuel tank outlet and the carburetor inlet (or engine driven fuel pump, if there is one).

(b) Each strainer or filter must be accessible for drainage and cleaning.

(c) Each strainer screen must be removable.

**§ 23.999 Fuel system drains.**

(a) There must be at least one drain to allow safe drainage of the entire fuel system with the airplane in its normal ground attitude.

(b) Each drain must have a means to lock it closed.

OIL SYSTEM

**§ 23.1011 General.**

(a) Each engine must have an independent oil system that can supply it with an appropriate quantity of oil at a temperature not above that safe for continuous operation.

(b) The usable oil tank capacity may not be less than the product of the endurance of the airplane under critical operating conditions and the maximum oil consumption of the engine under the same conditions, plus a suitable margin to ensure adequate circulation and cooling.

(c) For an oil system without an oil transfer system, only the usable oil tank capacity may be considered. The amount of oil in the engine oil lines, the oil radiator, and the feathering reserve, may not be considered.

(d) If an oil transfer system is used, and the transfer pump can pump some of the oil in the transfer lines into the main engine oil tanks, the amount of oil in these lines that can be pumped by the transfer pump may be included in the oil capacity.

**§ 23.1013 Oil tanks.**

(a) *Installation.* Each oil tank must be installed to—

(1) Meet the requirements of § 23.967 (a) and (b); and

(2) Withstand any vibration, inertia, and fluid loads expected in operation.

(b) *Expansion space.* Oil tank expansion space must be provided so that—

(1) Each oil tank has an expansion space of not less than the greater of—

(i) 10 percent of the tank capacity; or

(ii) 0.5 gallon; and

(2) It is impossible to fill the expansion space inadvertently with the airplane in the normal ground attitude.

(c) *Filler connection.* Each oil tank filler connection must be marked under § 23.1557(c).

(d) *Vent.* Oil tanks must be vented as follows:

(1) Each oil tank must be vented to the engine crankcase from the top part of the expansion space so that the vent connection is not covered by oil under any normal flight condition.

(2) Oil tank vents must be arranged so that condensed water vapor that might freeze and obstruct the line cannot accumulate at any point.

(3) For acrobatic category airplanes, there must be means to prevent hazardous loss of oil during acrobatic maneuvers, including short periods of inverted flight.

(e) *Outlet.* No oil tank outlet may be enclosed or covered by any screen or guard that might reduce the flow of oil. No oil tank outlet diameter may be less than the diameter of the engine oil pump inlet.

(f) *Flexible liners.* Each flexible oil tank liner must be of an acceptable kind.

**§ 23.1015 Oil tank tests.**

Each oil tank must be tested under § 23.965, except that—

(a) The applied pressure must be five p.s.i. for the tank construction instead of the pressures specified in § 23.965(a); and

(b) For a tank with a nonmetallic liner the test fluid must be oil rather than fuel as specified in § 23.965(d), and the slosh test on a specimen liner must be conducted with the oil at 250° F.

**§ 23.1017 Oil lines and fittings.**

(a) *General.* Each oil line must meet the requirements of § 23.993, except that the inside diameter of the engine oil inlet and outlet lines may not be less than the diameter of the corresponding engine oil pump inlet and outlet.

(b) *Breather lines.* Breather lines must be arranged so that—

(1) Condensed water vapor that might freeze and obstruct the line cannot accumulate at any point;

(2) The breather discharge will not constitute a fire hazard if foaming occurs, or cause emitted oil to strike the pilot's windshield;

(3) The breather does not discharge into the engine air induction system; and

(4) For acrobatic category airplanes, there is no excessive loss of oil from the breather during acrobatic maneuvers, including short periods of inverted flight.

**§ 23.1019 Oil strainer or filter.**

Each oil strainer or filter in the powerplant installation must be constructed and installed so that oil will flow at the normal rate through the rest of the system with the strainer or filter element completely blocked.

**§ 23.1021 Oil system drains.**

There must be at least one accessible drain that—

(a) Allows safe drainage of the entire oil system; and

(b) Has manual or automatic means for positive locking in the closed position.

**§ 23.1023 Oil radiators.**

Each oil radiator and its supporting structures must be able to withstand the vibration, inertia, and oil pressure loads to which it would be subjected in operation.

**§ 23.1027 Propeller feathering system.**

(a) If the propeller feathering system depends on engine oil, there must be means to trap an amount of oil in the tank if the supply becomes depleted due to failure of any part of the lubricating system, other than the tank itself.

(b) The amount of trapped oil must be enough to accomplish feathering and must be available only to the feathering pump.

(c) The ability of the system to accomplish feathering with the trapped oil must be shown.

COOLING

**§ 23.1041 General.**

The powerplant cooling provisions must be able to maintain the temperatures of powerplant components and fluids within the limits established during ground and flight operation.

**§ 23.1043 Cooling tests.**

(a) *General.* Compliance with § 23.1041 must be shown under critical ground, water, and flight operating conditions. For these tests, the following apply:

(1) If the tests are conducted under conditions deviating from the maximum anticipated air temperatures specified in paragraph (b) of this section, the recorded powerplant temperatures must be corrected under paragraphs (c) and (d) of this section, unless a more rational correction method is applicable.

(2) No corrected temperature determined under subparagraph (1) of this paragraph may exceed established limits.

(3) The fuel used during the cooling tests must be of the minimum grade approved for the engines, and the mixture settings must be those used in normal operation.

(4) The test procedures must be as prescribed in §§ 23.1045 and 23.1047.

(5) Water taxiing tests must be conducted on each hull seaplane that may reasonably be expected to be taxied for extended periods.

(b) *Maximum anticipated air temperature.* For cooling tests, the maximum anticipated temperature (hot-day condition) is 100 degrees F. at sea level, decreasing from this value at the rate of 3.6 degrees F. per thousand feet of altitude above sea level up to the altitude at which a temperature of −69.7 degrees F. is reached, above which altitude the temperature is constant at −69.7 degrees F. However, cooling test results for winterization installations may be corrected to any desired temperature.

(c) *Correction factor for cylinder head, oil inlet, carburetor air, and engine and transmission coolant outlet temperatures.* The cylinder head, oil inlet, carburetor air, and engine coolant outlet temperatures must be corrected by adding to them the difference between the maximum anticipated air temperature and the temperature of the ambient air at the time of the first occurrence of the maximum head, oil, air, or coolant temperatures recorded during the cooling test.

(d) *Correction factor for cylinder barrel temperatures.* Cylinder barrel temperatures must be corrected by adding to them 0.7 times the difference between the maximum anticipated air temperature and the temperature of the ambient air at the time of the first occurrence of the maximum cylinder barrel temperature recorded during the cooling test.

**§ 23.1045 Cooling test procedures for single-engine airplanes.**

(a) For each single-engine airplane, engine cooling tests must be conducted as follows:

(1) Engine temperatures must be stabilized in flight with the engines at not less than 75 percent of maximum continuous power.

(2) After temperatures have stabilized, a climb must be begun at the lowest practicable altitude and continued for one minute with the engine at takeoff power.

(3) At the end of one minute, the climb must be continued at maximum continuous power for at least five minutes after the occurrence of the highest temperature recorded.

(b) The climb required in paragraph (a) of this section must be conducted at a speed not more than the best rate-of-climb speed with maximum continuous power unless—

(1) The slope of the flight path at the speed chosen for the cooling test is equal to or greater than the minimum required angle of climb determined under § 23.65(a)(1); and

(2) The airplane has a cylinder head temperature indicator as specified in § 23.1337(e).

(c) The stabilizing and climb parts of the test must be conducted with cowl flap settings selected by the applicant.

**§ 23.1047 Cooling test procedures for multiengine airplanes.**

(a) For each multiengine airplane that meets the minimum one-engine-inoperative climb performance specified in § 23.67(a) or § 23.67(b)(1), engine cooling tests must be conducted as follows:

(1) The airplane must be in the configuration specified in § 23.67(a) or § 23.67(b)(1), except that, when above the critical altitude, the operating engines must be at maximum continuous power or at full throttle.

No. 246—Pt. I——5

(2) The stabilizing and climb parts of the test must be conducted with cowl flap settings selected by the applicant.

(3) The temperatures of the operating engines must be stabilized in flight, with the engines at not less than 75 percent of the maximum continuous power.

(4) After engine temperatures have stabilized, a climb must be—

(i) Begun from 1,000 feet below the critical altitude (or, if this is impracticable, at the lowest altitude that the terrain will allow) or 1,000 feet below the altitude at which the single-engine-inoperative rate of climb is 0.02 $V_{S_0}^2$, whichever is lower; and

(ii) Continued for at least five minutes after the highest temperature has been recorded.

(5) The climb must be conducted at a speed not more than the highest speed at which compliance with the climb requirement of § 23.67(a) or § 23.67(b)(1) can be shown. If the speed used exceeds the speed for best rate of climb with one engine inoperative, the airplane must have a cylinder head temperature indicator as specified in § 23.1337(e).

(b) For each multiengine airplane that cannot meet the minimum one-engine-inoperative climb performance specified in § 23.67(a) or § 23.67(b)(1), engine cooling tests must be conducted as prescribed in paragraph (a) of this section, except that, after stabilizing temperatures in flight, the climb (or descent, for airplanes with zero or negative one-engine-inoperative rates of climb) must be—

(1) Begun as close to sea level as is practicable; and

(2) Conducted at the best rate-of-climb speed (or the speed of minimum rate of descent, for airplanes with zero or negative one-engine-inoperative rates of climb).

LIQUID COOLING

**§ 23.1061 Installation.**

(a) *General.* Each liquid-cooled engine must have an independent cooling system (including coolant tank) installed so that—

(1) Each coolant tank is supported so that tank loads are distributed over a large part of the tank surface;

(2) There are pads between the tank and its supports to prevent chafing; and

(3) No air or vapor can be trapped in any part of the system, except the expansion tank, during filling or during operation.

Padding must be nonabsorbent or must be treated to prevent the absorption of flammable fluids.

(b) *Coolant tank.* The tank capacity must be at least one gallon, plus 10 percent of the cooling system capacity. In addition—

(1) Each coolant tank must be able to withstand the vibration, inertia, and fluid loads to which it may be subjected in operation;

(2) Each coolant tank must have an expansion space of at least 10 percent of the total cooling system capacity; and

(3) It must be impossible to fill the expansion space inadvertently with the airplane in the normal ground attitude.

(c) *Filler connection.* Each coolant tank filler connection must be marked as specified in § 23.1557(c). In addition—

(1) Spilled coolant must be prevented from entering the coolant tank compartment or any part of the airplane other than the tank itself; and

(2) Each recessed coolant filler connection must have a drain that discharges clear of the entire airplane.

(d) *Lines and fittings.* Each coolant system line and fitting must meet the requirements of § 23.993, except that the inside diameter of the engine coolant inlet and outlet lines may not be less than the diameter of the corresponding engine inlet and outlet connections.

(e) *Radiators.* Each coolant radiator must be able to withstand any vibration, inertia, and coolant pressure load to which it may normally be subjected. In addition—

(1) Each radiator must be supported to allow expansion due to operating temperatures and prevent the transmittal of harmful vibration to the radiator; and

(2) If flammable coolant is used, the air intake duct to the coolant radiator must be located so that (in case of fire) flames from the nacelle cannot strike the radiator.

(f) *Drains.* There must be an accessible drain that—

(1) Drains the entire cooling system (including the coolant tank, radiator, and the engine) when the airplane is in the normal ground attitude;

(2) Discharges clear of the entire airplane; and

(3) Has means to positively lock it closed.

**§ 23.1063 Coolant tank tests.**

Each coolant tank must be tested under § 23.965, except that—

(a) The test required by § 23.965(a)(1) must be replaced with a similar test using the sum of the pressure developed during the maximum ultimate acceleration with a full tank or a pressure of 3.5 pounds per square inch, whichever is greater, plus the maximum working pressure of the system; and

(b) For a tank with a nonmetallic liner the test fluid must be coolant rather than fuel as specified in § 23.965(d), and the slosh test on a specimen liner must be conducted with the coolant at operating temperature.

INDUCTION SYSTEM

**§ 23.1091 Air induction.**

(a) The air induction system for each engine must supply the air required by that engine under the operating conditions for which certification is requested.

(b) Each engine must have at least two separate air intake sources, except that an engine with a fuel injection pump need have only one air intake source if the air intake, opening, or passage, is not obstructed by a screen, filter, or other part on which ice might form and restrict the airflow so as to adversely affect engine operation.

(c) Primary air intakes may open within the cowling if that part of the cowling is isolated from the engine accessory section by a fire-resistant diaphragm or if there are means to prevent the emergence of backfire flames.

(d) Each alternate air intake must be located in a sheltered position and may not open within the cowling if the emergence of backfire flames will result in a hazard.

(e) The supplying of air to the engine through the alternate air intake system of the carburetor air preheater may not result in a loss of excessive power in addition to the power loss due to the rise in air temperature.

**§ 23.1093 Induction system icing protection.**

Each engine air induction system must have means to prevent and eliminate icing. Unless this is done by other means, it must be shown that, in air free of visible moisture at a temperature of 30 degrees F.—

(a) Each airplane with sea level engines using conventional venturi carburetors has a preheater that can provide a heat rise of 90° F. with the engines at 75 percent of maximum continuous power;

(b) Each airplane with altitude engines using conventional venturi carburetors has a preheater that can provide a heat rise of 120° F. with the engines at 75 percent of maximum continuous power;

(c) Each airplane with altitude engines using carburetors tending to prevent icing has a preheater that, with the engines at 60 percent of maximum continuous power, can provide a heat rise of—

(1) 100° F.; or

(2) 40° F., if a fluid deicing system meeting the requirements of §§ 23.1095 through 23.1099 is installed;

(d) Each single-engine airplane with a sea level engine using a carburetor tending to prevent icing has a sheltered alternate source of air with a preheat of not less than that provided by the engine cooling air down-stream of the cylinders; and

(e) Each multiengine airplane with sea level engines using a carburetor tending to prevent icing has a preheater that can provide a heat rise of 90° F. with the engines at 75 percent of maximum continuous power.

**§ 23.1095 Carburetor deicing fluid flow rate.**

(a) If a carburetor deicing fluid system is used, it must be able to simultaneously supply each engine with a rate of fluid flow, expressed in pounds per hour, of not less than 2.5 times the square root of the maximum continuous power of the engine.

(b) The fluid must be introduced into the air induction system—

(1) Close to, and upstream of, the carburetor; and

(2) So that it is equally distributed over the entire cross section of the induction system air passages.

**§ 23.1097 Carburetor deicing fluid system capacity.**

(a) The capacity of each carburetor deicing fluid system—

(1) May not be less than the greater of—

(i) That required to provide fluid at the rate specified in § 23.1095 for a time equal to three percent of the maximum endurance of the airplane; or

(ii) 20 minutes at that flow rate; and

(2) Need not exceed that required for two hours of operation.

(b) If the available preheat exceeds 50° F. but is less than 100° F., the capacity of the system may be decreased in proportion to the heat rise available in excess of 50° F.

**§ 23.1099 Carburetor deicing fluid system detail design.**

Each carburetor deicing fluid system must meet the applicable requirements for the design of a fuel system, except as specified in §§ 23.1095 and 23.1097.

**§ 23.1101 Carburetor air preheater design.**

Each carburetor air preheater must be designed and constructed to—

(a) Ensure ventilation of the preheater when the engine is operated in cold air;

(b) Allow inspection of the exhaust manifold parts that it surrounds; and

(c) Allow inspection of critical parts of the preheater itself.

**§ 23.1103 Induction system ducts.**

(a) Each induction system duct must have a drain to prevent the accumulation of fuel or moisture in the normal ground and flight attitudes. No open drain may be on the pressure side of turbosupercharger installations. No drain may discharge where it will cause a fire hazard.

(b) Each duct connected to components between which relative motion could exist must have means for flexibility.

**§ 23.1105 Induction system screens.**

If induction system screens are used—

(a) Each screen must be upstream of the carburetor;

(b) No screen may be in any part of the induction system that is the only passage through which air can reach the engine, unless—

(1) The available preheat is at least 100° F.; and

(2) The screen can be deiced by heated air;

(c) No screen may be deiced by alcohol alone; and

(d) It must be impossible for fuel to strike any screen.

EXHAUST SYSTEM

**§ 23.1121 General.**

(a) Each exhaust system must ensure safe disposal of exhaust gases without fire hazard or carbon monoxide contamination in any personnel compartment.

(b) Unless suitable precautions are taken, no exhaust system part may be dangerously close to any system carrying flammable fluids or vapors, or under any such system that may leak.

(c) Each exhaust system component must be separated by fireproof shields from adjacent flammable parts of the airplane that are outside the engine compartment.

(d) No exhaust gases may discharge dangerously near any fuel or oil system drain.

(e) No exhaust gases may be discharged where they will cause a glare seriously affecting pilot vision at night.

(f) Each exhaust system component must be ventilated to prevent points of excessively high temperature.

**§ 23.1123 Exhaust manifold.**

(a) Each exhaust manifold must be fireproof and corrosion-resistant, and must have means to prevent failure due to expansion by operating temperatures.

(b) Each exhaust manifold must be supported to withstand the vibration and inertia loads to which it may be subjected in operation.

(c) Parts of the manifold connected to components between which relative motion could exist must have means for flexibility.

**§ 23.1125 Exhaust heat exchangers.**

(a) Each exhaust heat exchanger must be constructed and installed to withstand the vibration, inertia, and other loads that it may be subjected to in normal operation. In addition—

(1) Each exchanger must be suitable for continued operation at high temperatures and resistant to corrosion from exhaust gases;

(2) There must be means for inspection of critical parts of each exchanger; and

(3) Each exchanger must be ventilated where it is subject to contact with exhaust gases.

(b) Each heat exchanger used for heating ventilating air must be constructed so that exhaust gases may not enter the ventilating air.

POWERPLANT CONTROLS AND ACCESSORIES

**§ 23.1141 Powerplant controls: general.**

(a) Powerplant controls must be located and arranged under § 23.777 and marked under § 23.1555(a).

(b) Each flexible control must be of an acceptable kind.

(c) Each control must be able to maintain any necessary position without—

(1) Constant attention by flight crew members; or

(2) Tendency to creep due to control loads or vibration.

(d) Each control must be able to withstand operating loads without failure or excessive deflection.

**§ 23.1143 Throttle controls.**

(a) There must be a separate throttle control for each engine.

(b) Throttle controls must be arranged to allow—

(1) Separate control of each engine; and

(2) Simultaneous control of all engines.

(c) Each throttle control must give a positive and immediately responsive means of controlling its engine.

**§ 23.1145 Ignition switches.**

(a) Ignition switches must control each ignition circuit on each engine.

(b) There must be means to quickly shut off all ignition on multiengine airplanes by the grouping of switches or by a master ignition control.

(c) Each master ignition control must have means to prevent its inadvertent operation.

**§ 23.1147 Mixture controls.**

If there are mixture controls, each engine must have a separate control. The controls must be grouped and arranged to allow—

(a) Separate control of each engine; and

(b) Simultaneous control of all engines.

**§ 23.1149 Propeller speed and pitch controls.**

(a) If there are propeller speed or pitch controls, they must be grouped and arranged to allow—

(1) Separate control of each propeller; and

(2) Simultaneous control of all propellers.

(b) The controls must allow ready synchronization of all propellers on multiengine airplanes.

**§ 23.1153 Propeller feathering controls.**

If there are propeller feathering controls, each propeller must have a separate control. Each control must have means to prevent inadvertent operation.

**§ 23.1157 Carburetor air temperature controls.**

There must be a separate carburetor air temperature control for each engine.

**§ 23.1163 Powerplant accessories.**

(a) Each engine-driven accessory must—

(1) Be satisfactory for mounting on the engine concerned; and

(2) Use the provisions on the engine for mounting.

(b) Electrical equipment subject to arcing or sparking must be installed to minimize the probability of contact with any flammable fluids or vapors that might be present in a free state.

**§ 23.1165 Engine ignition systems.**

(a) Each battery ignition system must be supplemented by a generator that is automatically available as an alternate source of electrical energy to allow continued engine operation if any battery becomes depleted.

(b) The capacity of batteries and generators must be large enough to meet the simultaneous demands of the engine ignition system and the greatest demands of any electrical system components that draw from the same source.

(c) The design of the engine ignition system must account for—

(1) The condition of an inoperative generator;

(2) The condition of a completely depleted battery with the generator running at its normal operating speed; and

(3) The condition of a completely depleted battery with the generator operating at idling speed, if there is only one battery.

(d) There must be means to warn appropriate crewmembers if malfunctioning of any part of the electrical system is causing the continuous discharge of any battery used for engine ignition.

POWERPLANT FIRE PROTECTION

**§ 23.1183 Lines and fittings.**

(a) Except as provided in paragraph (b) of this section, each line and fitting carrying flammable fluids in any area subject to engine fire conditions must meet the following requirements:

(1) The line and fitting must be at least fire resistant.

(2) Flexible hose assemblies (hose and end fittings) must be approved.

(b) Paragraph (a) of this section does not apply to—

(1) Lines and fittings forming an integral part of an engine; and

(2) Vent and drain lines, and their fittings, whose failure will not result in, or add to, a fire hazard.

**§ 23.1189 Shutoff means.**

For each multiengine airplane subject to §§ 23.67(a) or 23.67(b)(1), the following apply:

(a) Each engine must have means to shut off or otherwise prevent hazardous quantities of fuel, oil, deicing fluid, and other flammable fluids from flowing into, within, or through any engine compartment, except in lines forming an integral part of an engine.

(b) The closing of the fuel shutoff valve for any engine may not make any fuel unavailable to the remaining engines.

(c) Operation of any shutoff means may not interfere with the later emergency operation of other equipment such as propeller feathering devices.

(d) Each shutoff must be outside of the engine compartment unless an equal degree of safety is provided with the shutoff inside the compartment.

(e) No hazardous amount of flammable fluid may drain into the engine compartment after shutoff.

(f) There must be means to guard against inadvertent operation of each shutoff means, and to make it possible for the crew to reopen the shutoff means in flight after it has been closed.

**§ 23.1191 Firewalls.**

(a) Each engine, auxiliary power unit, fuel burning heater, and other combustion equipment intended for operation in flight, must be isolated from the rest of the airplane by firewalls, shrouds, or equivalent means.

(b) Each firewall or shroud must be constructed so that no hazardous quantity of liquid, gas, or flame can pass from the engine compartment to other parts of the airplane.

(c) Each opening in the firewall or shroud must be sealed with close fitting, fireproof grommets, bushings, or firewall fittings.

(d) Fire-resistant seals may be used on single-engine airplanes and multiengine airplane not subject to § 23.67(a) or (b)(1), if—

(1) Each engine has a volumetric displacement of 1,000 cubic inches or less; and

(2) No opening in the firewall or shroud will allow the passage of a hazardous amount of flame without seals.

(e) Each firewall and shroud must be fireproof and protected against corrosion.

(f) Compliance with the criteria for fireproof materials or components must be shown as follows:

(1) The flame to which the materials or components are subjected must be 2,000±50° F.

(2) Sheet materials approximately 10 inches square must be subjected to the flame from a suitable burner.

(3) The flame must be large enough to maintain the required test temperature over an area approximately five inches square.

(g) Firewall materials and fittings must resist flame penetration for at least 15 minutes.

(h) The following materials may be used in firewalls or shrouds without being tested as required by this section:

(1) Stainless steel sheet, 0.015 inch thick.

(2) Mild steel sheet (coated with aluminum or otherwise protected against corrosion) 0.018 inch thick.

(3) Terne plate, 0.018 inch thick.

(4) Monel metal, 0.018 inch thick.

(5) Steel or copper base alloy firewall fittings.

**§ 23.1193 Cowling.**

(a) Each cowling must be constructed and supported so that it can resist any vibration, inertia, and air loads to which it may be subjected in operation.

(b) There must be means for rapid and complete drainage of each part of the cowling in the normal ground and flight attitudes. No drain may discharge where it will cause a fire hazard.

(c) Cowling must be at least fire resistant.

(d) Each part behind an opening in the engine compartment cowling must be at least fire resistant for a distance of at least 24 inches aft of the opening.

(e) Each part of the cowling subjected to high temperatures due to its nearness to exhaust system ports or exhaust gas impingement, must be fire proof.

## Subpart F—Equipment

GENERAL

**§ 23.1301 Function and installation.**

(a) Each item of equipment essential for safe operation, including radio communication and navigation equipment, must—

(1) Adequately perform its intended function;

(2) In the case of equipment other than radio communications and navigation equipment, function properly when installed;

(3) In the case of radio communications and navigation equipment, be installed as prescribed in § 23.1431; and

(4) Where appropriate, be adequately labeled as to its identification, function, and operating limitations.

(b) Whenever necessary, additional equipment that is installed as prescribed in the operating rules of this chapter, must meet the requirements of this section.

**§ 23.1303 Flight and navigation instruments.**

The following are required flight and navigational instruments:

(a) An airspeed indicator.

(b) An altimeter.

(c) A magnetic direction indicator.

**§ 23.1305 Powerplant instruments.**

(a) The following are required powerplant instruments for each engine or tank:

(1) A fuel quantity indicator.

(2) An oil pressure indicator.

(3) An oil temperature indicator.

(4) A tachometer.

(b) The following powerplant instruments, for each engine or tank, are required as prescribed in this subpart:

(1) A cylinder head temperature indicator.

(2) A fuel pressure indicator for pump fed engines.

(3) A manifold pressure indicator for altitude engines.

(4) An oil quantity indicator.

**§ 23.1307 Miscellaneous equipment.**

(a) There must be an approved safety belt for each occupant.

(b) The following miscellaneous equipment is required as prescribed in this subpart:

(1) A master switch arrangement.

(2) An adequate source of electrical energy.

(3) Electrical protective devices.

INSTRUMENTS: INSTALLATION

**§ 23.1321 Arrangement and visibility.**

(a) Each flight, navigation, and powerplant instrument for use by any pilot must be easily visible to him.

(b) For each multiengine airplane, identical powerplant instruments must be located so as to prevent confusion as to which engine each instrument relates.

(c) Instrument panel vibration may not damage, or impair the accuracy of, any instrument.

**§ 23.1323 Airspeed indicating system.**

(a) Except for an allowable installational error of plus or minus three percent of the calibrated airspeed, or five miles per hour, whichever is greater, each airspeed indicating system must indicate true airspeed at sea level with a standard atmosphere—

(1) At speeds from $V_C$ to 1.3 $V_{S_1}$, with flaps up; and

(2) At 1.3 $V_{S_1}$, with flaps extended.

(b) Calibration must be made in flight.

**§ 23.1325 Static air vent system.**

Each instrument with static air case connections must be vented so that the influence of speed, the opening and closing of windows, airflow variation, and moisture or other foreign matter does not seriously affect its accuracy.

**§ 23.1327 Magnetic direction indicator.**

(a) Each magnetic direction indicator must be installed so that its accuracy is not excessively affected by the airplane's vibration or magnetic fields.

(b) The compensated installation may not have a deviation, in level flight, greater than ten degrees on any heading.

**§ 23.1329 Automatic pilot system.**

If an automatic pilot system is installed, it must meet the following:

(a) Each system must be designed so that the automatic pilot can—

(1) Be quickly and positively disengaged by the pilots to prevent it from interfering with their control of the airplane; or

(2) Be sufficiently overpowered by one pilot to let him control the airplane.

(b) Unless there is automatic synchronization, each system must have a means to readily indicate to the pilot the alignment of the actuating device in relation to the control system it operates.

(c) Each manually operated control for the system operation must be readily accessible to the pilot. Each control must operate in the same plane and sense of motion as specified in § 23.779 for cockpit controls. The direction of motion must be plainly indicated on or near each control.

(d) Each system must be designed and adjusted so that, within the range of adjustment available to the pilot, it cannot produce hazardous loads on the airplane or create hazardous deviations in the flight path, under any flight condition appropriate to its use, either during normal operation or in the event of a malfunction, assuming that corrective action begins within a reasonable period of time.

(e) Each system must be designed so that a single malfunction will not produce a hardover signal in more than one control axis. If the automatic pilot integrates signals from auxiliary controls or furnishes signals for operation of other equipment, positive interlocks and sequencing of engagement to prevent improper operation are required.

(f) There must be protection against adverse interaction of integrated components, resulting from a malfunction.

**§ 23.1331 Instruments using a power supply.**

(a) For each airplane—

(1) Each gyroscopic instrument must derive its energy from power sources adequate to maintain its required accuracy at any speed above the best rate-of-climb speed;

(2) Each gyroscopic instrument must be installed so as to prevent malfunction due to rain, oil, and other detrimental elements; and

(3) There must be a means to indicate the adequacy of the power being supplied to the instruments.

(b) For each multiengine airplane—

(1) There must be at least two independent sources of power (not driven by the same engine), a manual or an automatic means to select each power source, and a means to indicate the adequacy of the power being supplied by each source; and

(2) The installation and power supply systems must be designed so that—

(i) The failure of one instrument will not interfere with the proper supply of energy to the remaining instruments; and

(ii) The failure of the energy supply from one source will not interfere with the proper supply of energy from any other source.

**§ 23.1335 Flight director instrument.**

(a) The flight director instrument, if installed, may not affect the performance and accuracy of the required instruments.

(b) There must be a means to disconnect the flight director instrument from the required instruments or their installations.

**§ 23.1337 Powerplant instruments.**

(a) *Instrument lines.* Each powerplant instrument line must meet the requirements of § 23.993. Each line carrying inflammable fluids or gases under pressure must have restricting orifices or other safety devices at the source of pressure to prevent escape of excessive fluid or gas if the line fails.

(b) *Fuel quantity indicator.* There must be a means to indicate to the flight crewmembers the quantity of fuel in each tank during flight. An indicator, calibrated in either gallons or pounds, and clearly marked to indicate which scale is being used, may be used. In addition—

(1) Each fuel quantity indicator must be calibrated to read "zero" during level flight when the quantity of fuel remaining in the tank is equal to the unusable fuel supply determined under § 23.959;

(2) Each exposed sight gauge used as a fuel quantity indicator must be protected against damage;

(3) Each sight gauge that forms a trap in which water can collect and freeze must have means to allow drainage on the ground;

(4) Tanks with interconnected outlets and airspaces may be considered as one tank and need not have separate indicators; and

(5) No fuel quantity indicator is required for a small auxiliary tank that is

used only to transfer fuel to other tanks if the relative size of the tank, the rate of fuel transfer, and operating instructions are adequate to—

(i) Guard against overflow; and

(ii) Give the flight crewmembers prompt warning if transfer is not proceeding as planned.

(c) *Fuel flowmeter system.* If a fuel flowmeter system is installed, each metering component must have a means to by-pass the fuel supply if malfunctioning of that component severely restricts fuel flow.

(d) *Oil quantity indicator.* There must be a means to indicate the quantity of oil in each tank—

(1) On the ground (such as by a stick gauge); and

(2) In flight, to the flight crew members, if there is an oil transfer system or a reserve oil supply system.

(e) *Cylinder head temperature indicator.* There must be a cylinder head temperature indicator for—

(1) Each air cooled engine with cowl flaps; and

(2) Each airplane for which compliance with § 23.1041 is shown at a speed higher than $V_Y$.

ELECTRICAL SYSTEMS AND EQUIPMENT

**§ 23.1351 General.**

(a) *Electrical system capacity.* Each electrical system must be adequate for the intended use. In addition—

(1) Electric power sources, their transmission cables, and their associated control and protective devices, must be able to furnish the required power at the proper voltage to each load circuit essential for safe operation; and

(2) Compliance with subparagraph (1) of this paragraph must be shown by an electrical load analysis, or by electrical measurements, that account for the electrical loads applied to the electrical system in probable combinations and for probable durations.

(b) *Function.* For each electrical system, the following apply:

(1) Each system, when installed, must be—

(i) Free from hazards in itself, in its method of operation, and in its effects on other parts of the airplane; and

(ii) Protected from fuel, oil, water, other detrimental substances, and mechanical damage.

(2) Electric power sources must function properly when connected in combination or independently.

(3) No failure or malfunction of any electric power source may impair the ability of any remaining source to supply load circuits essential for safe operation.

(4) Each electric power source control must allow the independent operation of each source.

(c) *Generating system.* There must be at least one generator if the electrical system supplies power to load circuits essential for safe operation. In addition—

(1) Each generator must be able to deliver its continuous rated power;

(2) Generator voltage control equipment must be able to dependably regulate the generator output within rated limits; and

(3) Each generator must have a reverse current cutout designed to disconnect the generator from the battery and from the other generators when enough reverse current exists to damage that generator.

(d) *Instruments.* There must be a means to indicate to appropriate flight crewmembers the electric power system quantities essential for safe operation. For direct current systems, an ammeter that can be switched into each generator feeder may be used and if there is only one generator, the ammeter may be in the battery feeder.

**§ 23.1353 Storage battery design and installation.**

(a) Each storage battery must be designed and installed as prescribed in this section.

(b) Safe cell temperatures and pressures must be maintained during any probable charging and discharging condition. No uncontrolled increase in cell temperature may result when the battery is recharged (after previous complete discharge)—

(1) At maximum regulated voltage;

(2) During a flight of maximum duration; and

(3) Under the most adverse cooling condition likely to occur in service.

(c) Compliance with paragraph (b) of this section must be shown by tests unless experience with similar batteries and installations has shown that maintaining safe cell temperatures and pressures presents no problem.

(d) No explosive or toxic gases emitted by any battery in normal operation, or as the result of any probable malfunction in the charging system or battery installation, may accumulate in hazardous quantities within the airplane.

(e) No corrosive fluids or gases that may escape from the battery may damage surrounding structures or adjacent essential equipment.

**§ 23.1357 Circuit protective devices.**

(a) Protective devices, such as fuses or circuit breakers, must be installed in all electrical circuits other than—

(1) The main circuits of starter motors; and

(2) Circuits in which no hazard is presented by their omission.

(b) No protective device may protect more than one circuit essential to flight safety.

(c) Each resettable circuit protective device ("trip free" device in which the tripping mechanism cannot be overridden by the operating control) must be designed so that—

(1) A manual operation is required to restore service after tripping; and

(2) If an overload or circuit fault exists, the device will open the circuit regardless of the position of the operating control.

(d) If the ability to reset a circuit breaker or replace a fuse is essential to safety in flight, that circuit breaker or fuse must be so located and identified that it can be readily reset or replaced in flight.

(e) If fuses are used, there must be one spare of each rating, or 50 percent spare fuses of each rating, whichever is greater.

**§ 23.1361 Master switch arrangement.**

(a) There must be a master switch arrangement to allow ready disconnection of electric power sources from the main bus. The point of disconnection must be adjacent to the sources controlled by the switch.

(b) Load circuits may be connected so that they remain energized after the switch is opened, if they are protected by circuit protective devices, rated at five amperes or less, adjacent to the electric power source.

(c) The master switch or its controls must be so installed that the switch is easily discernible and accessible to a crewmember in flight.

**§ 23.1365 Electric cables.**

(a) Each electric connecting cable must be of adequate capacity.

(b) Each cable that would overheat in the event of circuit overload or fault must be at least flame resistant and may not emit dangerous quantities of toxic fumes.

**§ 23.1367 Switches.**

Each switch must be—

(a) Able to carry its rated current;

(b) Constructed with enough distance or insulating material between current carrying parts and the housing so that vibration in flight will not cause shorting;

(c) Accessible to appropriate flight crewmembers; and

(d) Labeled as to operation and the circuit controlled.

LIGHTS

**§ 23.1381 Instrument lights.**

The instrument lights must—

(a) Make each instrument and control easily readable and discernible;

(b) Be installed so that their direct rays, and rays reflected from the windshield or other surface, are shielded from the pilot's eyes; and

(c) Have enough distance or insulating material between current carrying parts and the housing so that vibration in flight will not cause shorting.

A cabin dome light is not an instrument light.

**§ 23.1383 Landing lights.**

(a) Each installed landing light must be acceptable.

(b) Each landing light must be installed so that—

(1) No dangerous glare is visible to the pilot;

(2) The pilot is not seriously affected by halation; and

(3) It provides enough light for night landing.

**§ 23.1385 Position light system installation.**

(a) *General.* Each part of each position light system must meet the applicable requirements of this section and each system as a whole must meet the requirements of §§ 23.1387 through 23.1397.

(b) *Forward position lights.* Forward position lights must consist of a red and a green light spaced laterally as far apart as practicable and installed forward on the airplane so that, with the airplane in the normal flying position, the red light is on the left side and the green light is on the right side. Each light must be approved.

(c) *Rear position light.* The rear position light must be a white light mounted as far aft as practicable, and must be approved.

(d) *Circuit.* The two forward position lights and the rear position light must make a single circuit.

(e) *Light covers and color filters.* Each light cover or color filter must be at least flame resistant and may not change color or shape or lose any appreciable light transmission during normal use.

**§ 23.1387 Position light system dihedral angles.**

(a) Each forward and rear position light must, as installed, show unbroken light within the dihedral angles described in this section.

(b) Dihedral angle *L* (left) is formed by two intersecting vertical planes, the first parallel to the longitudinal axis of the airplane, and the other at 110 degrees to the left of the first, as viewed when looking forward along the longitudinal axis.

(c) Dihedral angle *R* (right) is formed by two intersecting vertical planes, the first parallel to the longitudinal axis of the airplane, and the other at 110 degrees to the right of the first, as viewed when looking forward along the longitudinal axis.

(d) Dihedral angle *A* (aft) is formed by two intersecting vertical planes making angles of 70 degrees to the right and to the left, respectively, to a vertical plane passing through the longitudinal axis, as viewed when looking aft along the longitudinal axis.

**§ 23.1389 Position light distribution and intensities.**

(a) *General.* The intensities prescribed in this section must be provided by new equipment with each light cover and color filter in place. Intensities must be determined with the light source operating at a steady value equal to the average luminous output of the source at the normal operating voltage of the airplane. The light distribution and intensity of each position light must meet the requirements of paragraph (b) of this section.

(b) *Forward and rear position lights.* The light distribution and intensities of forward and rear position lights must be expressed in terms of minimum intensities in the horizontal plane, minimum intensities in any vertical plane, and maximum intensities in overlapping beams, within dihedral angles *L*, *R*, and *A*, and must meet the following requirements:

(1) *Intensities in the horizontal plane.* Each intensity in the horizontal plane (the plane containing the longitudinal axis of the airplane and perpendicular to the plane of symmetry of the airplane) must equal or exceed the values in § 23.1391.

(2) *Intensities in any vertical plane.* Each intensity in any vertical plane (the plane perpendicular to the horizontal plane) must equal or exceed the appropriate value in § 23.1393, where *I* is the minimum intensity prescribed in § 23.1391 for the corresponding angles in the horizontal plane.

(3) *Intensities in overlaps between adjacent signals.* No intensity in any overlap between adjacent signals may exceed the values in § 23.1395, except that higher intensities in overlaps may be used with main beam intensities substantially greater than the minima specified in §§ 23.1391 and 23.1393, if the overlap intensities in relation to the main beam intensities do not adversely affect signal clarity. When the peak intensity of the forward position lights is more than 100 candles, the maximum overlap intensities between them may exceed the values in § 23.1395 if the overlap intensity in Area A is not more than 10 percent of peak position light intensity and the overlap intensity in Area B is not more than 2.5 percent of peak position light intensity.

(c) *Rear position light installation.* A single rear position light may be installed in a position displaced laterally from the plane of symmetry of an airplane if—

(1) The axis of the maximum cone of illumination is parallel to the flight path in level flight; and

(2) There is no obstruction aft of the light and between planes 70 degrees to the right and left of the axis of maximum illumination.

**§ 23.1391 Minimum intensities in the horizontal plane of forward and rear position lights.**

Each position light intensity must equal or exceed the applicable values in the following table:

| Dihedral angle (light included) | Angle from right or left of longitudinal axis, measured from dead ahead | Intensity (candles) |
|---|---|---|
| *L* and *R* (forward red and green) | 0° to 10° | 40 |
| | 10° to 20° | 30 |
| | 20° to 110° | 5 |
| *A* (rear white) | 110° to 180° | 20 |

**§ 23.1393 Minimum intensities in any vertical plane of forward and rear position lights.**

Each position light intensity must equal or exceed the applicable values in the following table:

| Angle above or below the horizontal plane | Intensity |
|---|---|
| 0° | 1.00 *I.* |
| 0° to 5° | 0.90 *I.* |
| 5° to 10° | 0.80 *I.* |
| 10° to 15° | 0.70 *I.* |
| 15° to 20° | 0.50 *I.* |
| 20° to 30° | 0.30 *I.* |
| 30° to 40° | 0.10 *I.* |
| 40° to 90° | 0.05 *I.* |

**§ 23.1395 Maximum intensities in overlapping beams of forward and rear position lights.**

No position light intensity may exceed the applicable values in the following table, except as provided in § 23.1389(b)(3):

| Overlaps | Maximum intensity | |
|---|---|---|
| | Area A (candles) | Area B (candles) |
| Green in dihedral angle *L* | 10 | 1 |
| Red in dihedral angle *R* | 10 | 1 |
| Green in dihedral angle *A* | 5 | 1 |
| Red in dihedral angle *A* | 5 | 1 |
| Rear white in dihedral angle *L* | 5 | 1 |
| Rear white in dihedral angle *R* | 5 | 1 |

Where—

(a) Area A includes all directions in the adjacent dihedral angle that pass through the light source and intersect the common boundary plane at more than 10 degrees but less than 20 degrees; and

(b) Area B includes all directions in the adjacent dihedral angle that pass through the light source and intersect the common boundary plane at more than 20 degrees.

**§ 23.1397 Color specifications.**

Each position light color must have the applicable International Commission on Illumination chromaticity coordinates as follows:

(a) *Aviation red*—

"*y*" is not greater than 0.335; and
"*z*" is not greater than 0.002.

(b) *Aviation green*—

"*x*" is not greater than $0.440-0.320y$;
"*x*" is not greater than $y-0.170$; and
"*y*" is not less than $0.390-0.170x$.

(c) *Aviation white*—

"*x*" is not less than 0.350;
"*x*" is not greater than 0.540; and
"$y-y_0$" is not numerically greater than 0.01, "$y_0$" being the *y* coordinate of the Planckian radiator for which $x_0=x$.

**§ 23.1399 Riding light.**

(a) Each riding (anchor) light required for a seaplane or amphibian, must be installed so that it can—

(1) Show a white light for at least two miles at night under clear atmospheric conditions; and

(2) Show the maximum unbroken light practicable when the airplane is moored or drifting on the water.

(b) Externally hung lights may be used.

**§ 23.1401 Anticollision light system.**

(a) *General.* If certification for night operation is requested, the airplane must have an anticollision light system that—

(1) Consists of one or more approved anticollision lights located so that their light will not impair the flight crewmembers' vision or detract from the conspicuity of the position lights; and

(2) Meets the requirements of paragraphs (b) through (f) of this section.

(b) *Field of coverage.* The system must consist of enough lights to illuminate the vital areas around the airplane, considering the physical configuration and flight characteristics of the airplane. The field of coverage must extend in

each direction within at least 30 degrees above and 30 degrees below the horizontal plane of the airplane, except that there may be solid angles of obstructed visibility totaling not more than 0.5 steradians.

(c) *Flashing characteristics.* The arrangement of the system, that is, the number of light sources, beam width, speed of rotation, and other characteristics, must give an effective flash frequency of not less than 40, nor more than 100, cycles per minute. The effective flash frequency is the frequency at which the airplane's complete anticollision light system is observed from a distance, and applies to each sector of light including any overlaps that exist when the system consists of more than one light source. In overlaps, flash frequencies may exceed 100, but not 180, cycles per minute.

(d) *Color.* Each anticollision light must be aviation red and must meet the requirements of § 23.1397(a).

(e) *Light intensity.* The minimum light intensities in any vertical plane, measured with the red filter and expressed in terms of "effective" intensities, must meet the requirements of paragraph (f) of this section. The following relation must be assumed:

$$I_e = \frac{\int_{t_1}^{t_2} I(t)\,dt}{0.2+(t_2-t_1)};$$

where:

$I_e$ = effective intensity (candles).
$I(t)$ = instantaneous intensity as a function of time.
$t_2-t_1$ = flash time interval (seconds).

Normally, the maximum value of effective intensity is obtained when $t_2$ and $t_1$ are chosen so that the effective intensity is equal to the instantaneous intensity at $t_2$ and $t_1$.

(f) *Minimum effective intensities for anticollision lights.* Each anticollision light effective intensity must equal or exceed the applicable values in the following table.

| Angle above or below the horizontal plane: | *Effective intensity (candles)* |
|---|---|
| 0° to 5° | 100 |
| 5° to 10° | 60 |
| 10° to 20° | 20 |
| 20° to 80° | 10 |

**§ 23.1411 Accessibility.**

Required safety equipment to be used by the flight crew in an emergency, such as automatic liferaft releases, must be readily accessible.

**§ 23.1413 Safety belts.**

(a) The rated strength of safety belts may not be less than that corresponding with the ultimate load factors specified in § 23.561(b); considering the dimensional characteristics of the belt installation for the specific seat or berth arrangement.

(b) Each belt must be attached so that no part of its anchorage can fail at any load lower than that corresponding with the ultimate load factors specified in § 23.561(b) times a factor of 1.33. This factor must be used instead of the fitting factor prescribed in § 23.625.

(c) For safety belts for berths parallel to the longitudinal axis of the airplane, the forward load factor specified in § 23.561(b) need not be applied.

**§ 23.1415 Ditching equipment.**

(a) Emergency flotation and signaling equipment required by any operating rule in this chapter must be installed so that it is readily available to the crew and passengers.

(b) Each raft and each life preserver must be approved.

(c) Each raft released automatically or by the pilot must be attached to the airplane by a line to keep it alongside the airplane. This line must be weak enough to break before submerging the empty raft to which it is attached.

(d) Each signaling device required by any operating rule in this chapter, must be accessible, function satisfactorily, and must be free of any hazard in its operation.

**§ 23.1419 Deicers.**

Each pneumatic deicer must be installed under approved data. There must be a positive means to deflate the pneumatic boots.

MISCELLANEOUS EQUIPMENT

**§ 23.1431 Electronic equipment.**

Radio equipment and installations must be free from hazards in themselves, in their method of operation, and in their effects on other components.

**§ 23.1435 Hydraulic systems.**

(a) *Design.* Each hydraulic system and its elements must withstand, without yielding, the structural loads expected in addition to hydraulic loads.

(b) *Tests.* Each system must be substantiated by proof pressure tests. When proof tested, no part of any system may fail, malfunction, or experience a permanent set. The proof load of each system must be at least 1.5 times the maximum operating pressure of that system.

(c) *Accumulators.* No hydraulic accumulator or pressurized reservoir may be installed on the engine side of any firewall unless it is an integral part of an engine.

**§ 23.1437 Accessories for multiengine airplanes.**

For multiengine airplanes, engine-driven accessories essential to safe operation must be distributed among two or more engines so that the failure of any one engine will not impair safe operation through the malfunctioning of these accessories.

## Subpart G—Operating Limitations and Information

No. 246—Pt. I——6

**§ 23.1501 General.**

(a) Each operating limitation upon which the type design is based must be made available to the pilot and other appropriate crewmembers.

(b) Any information not covered in paragraph (a) of this section that is necessary for safety must be made available to the crewmembers.

(c) Each operating limitation specified in §§ 23.1505 through 23.1525, and each similar limitation must, if necessary for safety, be—

(1) Established for the airplane; and

(2) Made available to the crewmembers as prescribed in §§ 23.1541 through 23.1589.

**§ 23.1505 Airspeed limitations.**

(a) The never-exceed speed $V_{NE}$ must be established so that it is—

(1) Not less than 0.9 times the minimum value of $V_D$ allowed under § 23.335; and

(2) Not more than the lesser of—

(i) 0.9 $V_D$ established under § 23.335; or

(ii) 0.9 times the maximum speed shown under § 23.251.

(b) The maximum structural cruising speed $V_{NO}$ must be established so that it is—

(1) Not less than the minimum value of $V_C$ allowed under § 23.335; and

(2) Not more than the lesser of—

(i) $V_C$ established under § 23.335; or

(ii) 0.89 $V_{NE}$ established under paragraph (a) of this section.

**§ 23.1507 Maneuvering speed.**

The maneuvering speed $V_A$, determined under § 23.335, must be established as an operating limitation.

**§ 23.1511 Flap extended speed.**

(a) The flap extended speed $V_{FE}$ must be established so that it is—

(1) Not less than the minimum value of $V_F$ allowed in §§ 23.345 and 23.457; and

(2) Not more than the lesser of—

(i) $V_F$ established under § 23.345; or

(ii) $V_F$ established under § 23.457.

(b) Additional combinations of flap setting, airspeed, and engine power may be established if the structure has been proven for the corresponding design conditions.

**§ 23.1513 Minimum control speed.**

The minimum control speed $V_{MC}$, determined under § 23.149, must be established as an operating limitation.

**§ 23.1519 Weight and center of gravity.**

The weight and center of gravity limitations determined under § 23.23 must be established as operating limitations.

**§ 23.1521 Powerplant limitations.**

(a) *General.* The powerplant limitations prescribed in this section must be established so that they do not exceed the corresponding limits for which the engines or propellers are type certificated.

(b) *Takeoff operation.* The powerplant takeoff operation must be limited by—

(1) The maximum rotational speed (rpm);

(2) The maximum allowable manifold pressure (for reciprocating engines);

(3) The maximum allowable gas temperature (for turbine engines);

(4) The time limit for the use of the power or thrust corresponding to the limitations established in subparagraphs (1) through (3) of this paragraph; and

(5) If the time limit in subparagraph (4) of this paragraph exceeds two minutes, the maximum allowable cylinder head (as applicable), liquid coolant, and oil temperatures.

(c) *Continuous operation.* The continuous operation must be limited by—

(1) The maximum rotational speed;

(2) The maximum allowable manifold pressure (for reciprocating engines);

(3) The maximum allowable gas temperature (for turbine engines); and

(4) The maximum allowable cylinder head, oil, and liquid coolant temperatures.

(d) *Fuel grade or designation.* The minimum fuel grade (for reciprocating engines), or fuel designation (for turbine engines), must be established so that it is not less than that required for the operation of the engines within the limitations in paragraphs (b) and (c) of this section.

**§ 23.1523 Minimum flight crew.**

The minimum flight crew for safe operation under VFR must be established, considering the availability and satisfactory operation of the necessary controls by each appropriate crewmember.

**§ 23.1525 Kinds of operation.**

The kinds of operation to which the airplane is limited are established by the category in which it is eligible for certification and by the installed equipment.

MARKINGS AND PLACARDS

**§ 23.1541 General.**

(a) The airplane must contain—

(1) The markings and placards specified in §§ 23.1545 through 23.1567; and

(2) Any additional information, instrument markings, and placards required for the safe operation if it has unusual design, operating, or handling characteristics.

(b) Each marking and placard prescribed in paragraph (a) of this section—

(1) Must be displayed in a conspicuous place; and

(2) May not be easily erased, disfigured, or obscured.

(c) If the airplane is to be certificated in more than one category—

(1) The applicant must select one category on which the placards and markings are to be based;

(2) The placard and marking information for the other categories in which the airplane is to be certificated must be recorded in the Airplane Flight Manual; and

(3) A reference to this information must be on a placard that also indicates the category on which the placards and markings are based.

**§ 23.1543 Instrument markings: general.**

For each instrument—

(a) When markings are on the cover glass of the instrument, there must be means to maintain the correct alignment of the glass cover with the face of the dial; and

(b) Each arc and line must be wide enough and located to be clearly visible to the pilot.

**§ 23.1545 Airspeed indicator.**

(a) Each airspeed indicator must be marked to show calibrated airspeed.

(b) The following markings must be made:

(1) For the never-exceed speed $V_{NE}$, a radial red line.

(2) For the caution range, a yellow arc extending from the red line specified in subparagraph (1) of this paragraph to the upper limit of the green arc specified in subparagraph (3) of this paragraph.

(3) For the normal operating range, a green arc with the lower limit at $V_{S_1}$ with maximum weight and with landing gear and wing flaps retracted, and the upper limit at the maximum structural cruising speed $V_{NO}$ established under § 23.1505(b).

(4) For the flap operating range, a white arc with the lower limit at $V_{S_0}$ at the maximum weight, and the upper limit at the flaps-extended speed $V_{FE}$ established under § 23.1511.

(c) If $V_{NE}$ or $V_{NO}$ vary with altitude, there must be means to indicate to the pilot the appropriate limitations throughout the operating altitude range.

**§ 23.1547 Magnetic direction indicator.**

(a) A placard meeting the requirements of this section must be installed on or near the magnetic direction indicator.

(b) The placard must show the calibration of the instrument in level flight with the engines operating.

(c) The placard must state whether the calibration was made with radio receivers on or off.

(d) Each calibration reading must be in terms of magnetic headings in not more than 30 degree increments.

**§ 23.1549 Powerplant instruments.**

For each required powerplant instrument—

(a) Each maximum and, if applicable, minimum safe operating limit must be marked with a red radial line;

(b) Each normal operating range must be marked with a green arc not extending beyond the maximum and minimum continuous safe operating limits;

(c) Each takeoff and precautionary range must be marked with a yellow arc; and

(d) Each engine speed range that is restricted because of excessive vibration must be marked with a red arc.

**§ 23.1551 Oil quantity indicator.**

Each oil quantity indicator must be marked in sufficient increments to indicate readily and accurately the quantity of oil.

**§ 23.1553 Fuel quantity indicator.**

If the unusable fuel supply for any tank exceeds one gallon, or five percent of the tank capacity, whichever is greater, a red arc must be marked on its indicator extending from the calibrated zero reading to the lowest reading obtainable in level flight.

**§ 23.1555 Control markings.**

(a) Each cockpit control, other than primary flight controls and simple push button type starter switches, must be plainly marked as to its function and method of operation.

(b) Each secondary control must be suitably marked.

(c) For powerplant fuel controls—

(1) Each fuel tank selector control must be marked to indicate the position corresponding to each tank and to each existing cross feed position;

(2) If safe operation requires the use of any tanks in a specific sequence, that sequence must be marked on or near the selector for those tanks; and

(3) Each valve control for any engine of a multiengine airplane must be marked to indicate the position corresponding to each engine controlled.

(d) The usable capacity of each tank must be marked on or near each selector controlling that tank.

(e) For accessory, auxiliary, and emergency controls—

(1) If retractable landing gear is used, the indicator required by § 23.729 must be marked so that the pilot can, at any time, ascertain that the wheels are secured in the extreme positions; and

(2) Each emergency control must be red and must be marked as to method of operation.

**§ 23.1557 Miscellaneous markings and placards.**

(a) *Baggage and cargo compartments, and ballast location.* Each baggage and cargo compartment, and each ballast location, must have a placard stating any limitations on contents, including weight, that are necessary under the loading requirements.

(b) *Seats.* If the maximum allowable weight to be carried in a seat is less than 170 pounds, a placard stating the lesser weight must be permanently attached to the seat structure.

(c) *Fuel and oil filler openings.* The following must be marked on or near each appropriate filler cover:

(1) The word "fuel", the minimum fuel grade or designation for the engines, and the usable fuel tank capacity.

(2) The word "oil" and the oil tank capacity.

(d) *Emergency exit placards.* Each placard and operating control for each emergency exit must be red. A placard must be near each emergency exit control and must clearly indicate the location of that exit and its method of operation.

**§ 23.1559 Operating limitations placard.**

(a) There must be a placard in clear view of the pilot stating: "This airplane must be operated as a ------ or ------ category airplane in compliance with the operating limitations stated in the form of placards, markings, and manuals" (insert correct categories).

(b) There must be a placard in clear view of the pilot that specifies the kind of operations (such as VFR, IFR, day, or night) and the meteorological conditions (such as icing conditions) to which the operation of the airplane is limited, or from which it is prohibited, by the equipment installed.

**§ 23.1561 Safety equipment.**

(a) Safety equipment must be plainly marked as to method of operation.

(b) Stowage provisions for required safety equipment must be marked for the benefit of occupants.

**§ 23.1563 Airspeed placards.**

(a) *For all airplanes.* There must be an airspeed placard in clear view of the pilot and as close as practicable to the airspeed indicator. This placard must list:

(1) The maximum speed for landing gear operation $V_{LO}$ and the maximum speed with landing gear extended $V_{LE}$, if the airplane has retractable landing gear;

(2) The design maneuvering speed $V_A$;

(3) The minimum control speed $V_{MC}$; and

(4) The demonstrated crosswind velocity.

(b) *For airplanes of more than 6,000 pounds.* The placard required by paragraph (a) of this section must also include—

(1) The recommended climb speed;

(2) The best angle of climb speed $V_X$;

(3) The engine-inoperative-climb speed; and

(4) The approach speeds.

**§ 23.1567 Flight maneuver placard.**

(a) For normal category airplanes, there must be a placard in front of and in clear view of the pilot stating: "No acrobatic maneuvers, including spins, approved."

(b) For utility category airplanes, there must be a placard in clear view of the pilot stating: "Acrobatic maneuvers are limited to the following ------" (list approved maneuvers).

(c) For acrobatic category airplanes, there must be a placard in clear view of the pilot listing the approved acrobatic maneuvers and the recommended entry airspeed for each. If inverted flight maneuvers are not approved, the placard must bear a notation to this effect.

AIRPLANE FLIGHT MANUAL

**§ 23.1581 General.**

(a) *Furnishing information.* The applicable information in §§ 23.1583 through 23.1589 must be furnished—

(1) For each airplane of more than 6,000 pounds maximum weight, in an Airplane Flight Manual; and

(2) For each airplane of 6,000 pounds or less maximum weight, in an Airplane Flight Manual or in any combination of manuals, markings, and placards.

(b) *Approval and segregation of information.* Each part of Airplane Flight Manual containing information prescribed in §§ 23.1583 through 23.1589 must be approved, segregated, identified, and clearly distinguished from each unapproved part of that manual.

(c) *Additional information.* Any information not specified in §§ 23.1583 through 23.1589 that is required for safe operation because of unusual design, operating, or handling characteristics, must be furnished.

**§ 23.1583 Operating limitations.**

(a) *Airspeed limitations.* Information necessary for the marking of the airspeed limits on the indicator as required in § 23.1545 must be furnished, including $V_A$ and $V_{LO}$. The significance of each limitation and of the color coding must be explained.

(b) *Powerplant limitations.* Information must be furnished to explain the powerplant limitations and to allow marking the instruments under § 23.1549.

(c) *Weight.* The airplane flight manual must include—

(1) The maximum weight;

(2) The empty weight and center of gravity location;

(3) The useful load; and

(4) The composition of the useful load, including the total weight of fuel and oil with full tanks.

(d) *Load distribution.* The established center of gravity limits must be furnished. If the available loading space is adequately placarded or arranged so that no reasonable distribution of the useful load listed in paragraph (c) of this section will result in a center of gravity outside of the stated limits, the Airplane Flight Manual (where required) need not include any information other than the statement of center of gravity limits. In other cases, the manual must include enough information to indicate loading combinations that will keep the center of gravity within established limits.

(e) *Maneuvers.* The following authorized maneuvers, appropriate airspeed limitations, and unauthorized maneuvers must be furnished as prescribed in this section.

(1) *Normal category airplanes.* For normal category airplanes, acrobatic maneuvers, including spins, are unauthorized. If the airplane has been shown to be "characteristically incapable of spinning" under § 23.221(d), a statement to this effect must be entered. Other normal category airplanes must be placarded against spins.

(2) *Utility category airplanes.* For utility category airplanes, authorized maneuvers shown in the type flight tests must be furnished, together with recommended entry speeds. No other maneuver is authorized. If the airplane has been shown to be "characteristically incapable of spinning" under § 23.221(d), a statement to this effect must be entered.

(3) *Acrobatic category airplanes.* For acrobatic category airplanes, the approved flight maneuvers shown in the type flight tests must be included, together with recommended entry speeds. A placard listing the use of the controls required to recover from spinning maneuvers must be in the cockpit.

(f) *Flight load factor.* The positive limit load factors, in $g$'s, must be furnished.

(g) *Flight crew.* If a flight crew of more than one is required for safety, the number and functions of the minimum flight crew must be furnished.

(h) *Kinds of operation.* The kinds of operation (such as VFR, IFR, day, or night) in which the airplane may or may not be used, and the meteorological conditions under which it may or may not be used, must be furnished. Any installed equipment that affects any operating limitation must be listed and identified as to operational function.

(i) If the unusable fuel supply in any tank exceeds five percent of the tank capacity, or one gallon, whichever is greater, information, showing that the fuel remaining in the tank when the quantity indicator reads "zero" cannot be safely used in flight, must be furnished. This information must be in the Airplane Flight Manual (if provided) and on a placard.

**§ 23.1585 Operating procedures.**

(a) For each airplane, information concerning normal and emergency procedures and other pertinent information necessary to safe operation must be furnished.

(b) For airplanes of more than 6,000 pounds maximum weight, procedures and pertinent information relating to the use of the airspeeds prescribed in § 23.1563 (b) must be furnished.

**§ 23.1587 Performance information.**

(a) *General.* For each airplane, the following information must be furnished:

(1) Any loss of altitude more than 100 feet, or any pitch more than 30 degrees below flight level, occurring during the recovery part of the maneuver prescribed in § 23.201(b).

(2) The conditions under which the full amount of usable fuel in each tank can safely be used. This information must be in the Airplane Flight Manual (if provided) or on a placard.

(b) *Airplanes of more than 6,000 pounds maximum weight.* For each airplane of more than 6,000 pounds maximum weight, the following information must be furnished:

(1) The stalling speed, $V_{S_0}$ at maximum weight.

(2) The stalling speed, $V_{S_1}$ at maximum weight and with landing gear and wing flaps retracted, and the effect upon this stalling speed of angles of bank up to 60 degrees.

(3) The takeoff distance determined under § 23.51(a), the airspeed at the 50-foot height, the airplane configuration (if pertinent), the kind of surface used in the tests, and the pertinent information with respect to cowl flap position, use of flight-path control devices, and use of the landing gear retraction system.

(4) The landing distance determined under § 23.75(a), the airplane configuration (if pertinent), the kind of surface used in the tests, and the pertinent information with respect to flap position and the use of flight-path control devices.

(5) The steady rate of climb, determined under §§ 23.65(a), 23.67(a) (if appropriate) and 23.77(a), the airspeed, power, and, if pertinent, the airplane configuration.

(6) The calculated approximate effect on takeoff distance (subparagraph (3) of this paragraph), landing distance (subparagraph (4) of this paragraph), and steady rate of climb (subparagraph (5) of this paragraph), of variations in—

(i) Altitude from sea level to 8,000 feet; and

(ii) Temperature at these altitudes from minus 60 degrees F. below standard to plus 40 degrees F. above standard.

For skiplanes, a statement in the Airplane Flight Manual of the approximate reduction in climb performance may be used instead of complete new data for the skiplane configuration if—

(1) The landing gear is fixed in both landplane and skiplane configurations;

(2) The climb requirements are not critical; and

(3) The climb reduction in the skiplane configurations is small (30 to 50 feet per minute).

(c) *Multiengine airplanes.* For multiengine airplanes, the following information must be furnished:

(1) The loss of altitude during the one engine inoperative stall shown under § 23.205 (as measured from the altitude at which the airplane starts to pitch uncontrollably to the altitude at which level flight is regained) and the pitch angle during that maneuver. This information must be furnished—

(i) In the Airplane Flight Manual, for airplanes of more than 6,000 pounds maximum weight; and

(ii) On a placard, for airplanes of 6,000 pounds or less maximum weight.

(2) The best climb speed, or the minimum descent speed, with one engine inoperative.

**§ 23.1589 Loading information.**

The following loading information must be furnished:

(a) The weight and location of each item of equipment installed when the airplane was weighed under § 23.25.

(b) Appropriate loading instructions for each possible loading condition between the maximum and minimum weights determined under § 23.25 that can result in a center of gravity beyond—

(1) The extremes selected by the applicant;

(2) The extremes within which the structure is proven; or

(3) The extremes within which compliance with each functional requirement is shown.

## APPENDIX A—SIMPLIFIED DESIGN LOAD CRITERIA FOR CONVENTIONAL, SINGLE-ENGINE AIRPLANES OF 6,000 POUNDS OR LESS MAXIMUM WEIGHT

**A23.1** *General.*

(a) The design load criteria in this Appendix are an approved equivalent of those in §§ 23.321 through 23.399 of this subchapter for the certification of conventional, single-engine airplanes of 6,000 pounds or less maximum weight.

(b) Unless otherwise stated, the nomenclature and symbols in this Appendix are the same as the corresponding nomenclature and symbols in Part 23.

**A23.3** *Special symbols.*

$n_1$ = Airplane Positive Maneuvering Limit Load Factor.

$n_2$ = Airplane Negative Maneuvering Limit Load Factor.

$n_3$ = Airplane Positive 30 fps Gust Limit Load Factor at $V_C$.

$n_4$ = Airplane Negative 30 fps Gust Limit Load Factor at $V_C$.

$n_{flap}$ = Airplane Positive Limit Load Factor With Flaps Fully Extended at $V_F$.

*$V_{F\ min}$ = Minimum Design Flap Speed = $12.5\sqrt{n_1 W/S}$

*$V_{A\ min}$ = Minimum Design Maneuvering Speed = $17.0\sqrt{n_1 W/S}$

*$V_{C\ min}$ = Minimum Design Cruising Speed = $19.5\sqrt{n_1 W/S}$

*$V_{D\ min}$ = Minimum Design Dive Speed = $27.3\sqrt{n_1 W/S}$

*Also see paragraph A23.7(e)(2) of this Appendix.

**A23.5** *Certification in more than one category.*

The criteria in this Appendix may be used for certification in the normal, utility, and acrobatic categories, or in any combination of these categories. If certification in more than one category is desired, the design category weights must be selected to make the term "$n_1 W$" constant for all categories or greater for one desired category than for others. The wings and control surfaces (including wing flaps and tabs) need only be investigated for the maximum value of "$n_1 W$", or for the category corresponding to the maximum design weight, where "$n_1 W$" is constant. If the acrobatic category is selected, a special unsymmetrical flight load investigation in accordance with subparagraphs A23.9(c)(2) and A23.11(c)(2) of this Appendix must be completed. The wing, wing carrythrough, and the horizontal tail structures must be checked for this condition. The basic fuselage structure need only be investigated for the highest load factor design category selected. The local supporting structure for dead weight items need only be designed for the highest load factor imposed when the particular items are installed in the airplane. The engine mount, however, must be designed for a higher side load factor, if certification in the acrobatic category is desired, than that required for certification in the normal and utility categories. When designing for landing loads, the landing gear and the airplane as a whole need only be investigated for the category corresponding to the maximum design weight. These simplifications apply to single-engine aircraft of conventional types for which experience is available, and the Administrator may require additional investigations for aircraft with unusual design features.

**A23.7** *Flight loads.*

(a) Each flight load may be considered independent of altitude and, except for the local supporting structure for dead weight items, only the maximum design weight conditions must be investigated.

(b) Table 1 and figures 3 and 4 of this Appendix must be used to determine values of $n_1$, $n_2$, $n_3$, and $n_4$, corresponding to the maximum design weights in the desired categories.

(c) Figures 1 and 2 of this Appendix must be used to determine values of $n_3$ and $n_4$ corresponding to the minimum flying weights in the desired categories, and, if these load factors are greater than the load factors at the design weight, the supporting structure for dead weight items must be substantiated for the resulting higher load factors.

(d) Each specified wing and tail loading is independent of the center of gravity range. The applicant, however, must select a c.g. range, and the basic fuselage structure must be investigated for the most adverse dead weight loading conditions for the c.g. range selected.

(e) The following loads and loading conditions are the minimums for which strength must be provided in the structure:

(1) *Airplane equilibrium.* The aerodynamic wing loads may be considered to act normal to the relative wind, and to have a magnitude of 1.05 times the airplane normal loads (as determined from paragraphs A23.9 (b) and (c) of this appendix) for the positive flight conditions and a magnitude equal to the airplane normal loads for the negative conditions. Each chordwise and normal component of this wing load must be considered.

(2) *Minimum design airspeeds.* The minimum design airspeeds may be chosen by the applicant except that they may not be less than the minimum speeds found by using figure 3 of this Appendix. In addition, $V_{C\ min}$ need not exceed values of $0.9V_H$ actually obtained at sea level for the lowest design weight category for which certification is desired. In computing these minimum design airspeeds, $n_1$ may not be less than 3.8.

(3) *Flight load factor.* The limit flight load factors specified in Table 1 of this Appendix represent the ratio of the aerodynamic force component (acting normal to the assumed longitudinal axis of the airplane) to the weight of the airplane. A positive flight load factor is an aerodynamic force acting upward, with respect to the airplane.

**A23.9** *Flight conditions.*

(a) *General.* Each design condition in paragraphs (b) and (c) of this section must be used to assure sufficient strength for each condition of speed and load factor on or within the boundary of a $V$–$n$ diagram for the airplane similar to the diagram in figure 4 of this Appendix. This diagram must also be used to determine the airplane structural operating limitations as specified in §§ 23.1501(c) through 23.1513 and 23.1519.

(b) *Symmetrical flight conditions.* The airplane must be designed for symmetrical flight conditions as follows:

(1) The airplane must be designed for at least the four basic flight conditions, "A", "D", "E", and "G" as noted on the flight envelope of figure 4 of this Appendix. In addition, the following requirements apply:

(i) The design limit flight load factors corresponding to conditions "D" and "E" of figure 4 must be at least as great as those specified in Table 1 and figure 4 of this Appendix, and the design speed for these conditions must be at least equal to the value of $V_D$ found from figure 3 of this Appendix.

(ii) For conditions "A" and "G" of figure 4, the load factors must correspond to those specified in Table 1 of this Appendix, and the design speeds must be computed using these load factors with the maximum static lift coefficient $C_{N_A}$ determined by the applicant. However, in the absence of more precise computations, these latter conditions may be based on a value of $C_{N_A} = \pm 1.35$ and the design speed for condition "A" may be less than $V_{A\ min}$.

(iii) Conditions "C" and "F" of figure 4 need only be investigated when $n_3 W/S$ or $n_4 W/S$ are greater than $n_1 W/S$ or $n_2 W/S$ of this Appendix, respectively.

(2) If flaps or other high lift devices intended for use at the relatively low airspeed of approach, landing, and takeoff, are installed, the airplane must be designed for the two flight conditions corresponding to the values of limit flap-down factors specified in Table 1 of this Appendix with the flaps fully extended at not less than the design flap speed $V_{F\ min}$ from figure 3 of this Appendix.

(c) *Unsymmetrical flight conditions.* Each affected structure must be designed for unsymmetrical loadings as follows:

(1) The aft fuselage-to-wing attachment must be designed for the critical vertical surface load determined in accordance with subparagraphs A23.11(c) (1) and (2) of this Appendix.

(2) The wing and wing carry-through structures must be designed for 100 percent of condition "A" loading on one side of the plane of symmetry and 70 percent on the opposite side for certification in the normal and utility categories, or 60 percent on the opposite side for certification in the acrobatic category.

(3) The wing and wing carry-through structures must be designed for the loads resulting from a combination of 75 percent of the positive maneuvering wing loading on both sides of the plane of symmetry and the maximum wing torsion resulting from aileron displacement. The effect of aileron displacement on wing torsion at $V_C$ or $V_A$ using the basic airfoil moment coefficient modified over the aileron portion of the span, must be computed as follows:

(i) $C_m = C_m + 0.01\delta_a$ (up aileron side) wing basic airfoil.

(ii) $C_m = C_m - 0.01\delta_d$ (down aileron side) wing basic airfoil, where $\delta_a$ is the up aileron deflection and $\delta_d$ is the down aileron deflection.

(4) $\Delta$ critical, which is the sum of $\delta_a + \delta_d$, must be computed as follows:

(i) Compute $\Delta_a$ and $\Delta_b$ from the formulas:

$$\Delta_a = \frac{V_A}{V_C} \times \Delta_p \text{ and}$$

$$\Delta_b = 0.5\frac{V_A}{V_D} \times \Delta_p$$

where $\Delta_p$ = the maximum total deflection (sum of both aileron deflections) at $V_A$ with $V_A$, $V_C$, and $V_D$ described in subparagraph (2) of § 23.7(e) of this Appendix.

(ii) Compute $K$ from the formula:

$$K = \frac{(C_m - 0.01\delta_b)V_D^2}{(C_m - 0.01\delta_a)V_C^2}$$

where $\delta_a$ is the down aileron deflection corresponding to $\Delta_a$, and $\delta_b$ is the down aileron deflection corresponding to $\Delta_b$ as computed in step (i).

(iii) If $K$ is less than 1.0, $\Delta_a$ is $\Delta$ critical and must be used to determine $\delta_u$ and $\delta_d$. In this case, $V_C$ is the critical speed which must be used in computing the wing torsion loads over the aileron span.

(iv) If $K$ is equal to or greater than 1.0, $\Delta_b$ is $\Delta$ critical and must be used to determine $\delta_u$ and $\delta_d$. In this case, $V_D$ is the critical speed which must be used in computing the wing torsion loads over the aileron span.

(d) *Supplementary conditions; rear lift truss; engine torque; side load on engine mount.* Each of the following supplementary conditions must be investigated:

(1) In designing the rear lift truss, the special condition specified in § 23.369 may be investigated instead of condition "G" of figure 4 of this Appendix. If this is done, and if certification in more than one category is desired, the value of $W/S$ used in the formula appearing in § 23.369 must be

that for the category corresponding to the maximum gross weight.

(2) Each engine mount and its supporting structures must be designed for the maximum limit torque corresponding to METO power and propeller speed acting simultaneously with the limit loads resulting from the maximum positive maneuvering flight load factor $n_1$. The limit torque must be obtained by multiplying the mean torque by a factor of 1.33 for engines with five or more cylinders. For 4, 3, and 2 cylinder engines, the factor must be 2, 3, and 4, respectively.

(3) Each engine mount and its supporting structure must be designed for the loads resulting from a lateral limit load factor of not less than 1.47 for the normal and utility categories, or 2.0 for the acrobatic category.

**A23.11** *Control surface loads.*

(a) *General.* Each control surface load must be determined using the criteria of paragraph (b) of this section and must lie within the simplified loadings of paragraph (c) of this section.

(b) *Limit pilot forces.* In each control surface loading condition described in paragraphs (c) through (e) of this section, the airloads on the movable surfaces and the corresponding deflections need not exceed those which could be obtained in flight by employing the maximum limit pilot forces specified in the table in § 23.397(b). If the surface loads are limited by these maximum limit pilot forces, the tabs must either be considered to be deflected to their maximum travel in the direction which would assist the pilot or the deflection must correspond to the maximum degree of "out of trim" expected at the speed for the condition under consideration. The tab load, however, need not exceed the value specified in Table 2 of this Appendix.

(c) *Surface loading conditions.* Each surface loading condition must be investigated as follows:

(1) Simplified limit surface loadings and distributions for the horizontal tail, vertical tail, aileron, wing flaps, and trim tabs are specified in Table 2 and figures 5 and 6 of this Appendix. If more than one distribution is given, each distribution must be investigated.

(2) If certification in the acrobatic category is desired, the horizontal tail must be investigated for an unsymmetrical load of 100 percent $\overline{w}$ on one side of the airplane centerline and 50 percent on the other side of the airplane centerline.

(d) *Outboard fins.* Outboard fins must meet the requirements of § 23.455.

(e) *Special devices.* Special devices must meet the requirements of § 23.459.

**A23.13** *Control system loads.*

(a) *Primary flight controls and systems.* Each primary flight control and system must be designed as follows:

(1) The flight control system and its supporting structure must be designed for loads corresponding to 125 percent of the computed hinge moments of the movable control surface in the conditions prescribed in A23.11 of this Appendix. In addition—

(i) The system limit loads need not exceed those that could be produced by the pilot and automatic devices operating the controls; and

(ii) The design must provide a rugged system for service use, including jamming, ground gusts, taxiing downwind, control inertia, and friction.

(2) Acceptable maximum and minimum limit pilot forces for elevator, aileron, and rudder controls are shown in the table in § 23.397(b). These pilots loads must be assumed to act at the appropriate control gripe or pads as they would under flight conditions, and to be reacted at the attachments of the control system to the control surface horn.

(b) *Dual controls.* If there are dual controls, the systems must be designed for pilots operating in opposition, using individual pilot loads equal to 75 percent of those obtained in accordance with paragraph (a) of this section, except that individual pilot loads may not be less than the minimum limit pilot forces shown in the table in § 23.397(b).

(c) *Ground gust conditions.* Ground gust conditions must meet the requirements of § 23.415.

(d) *Secondary controls and systems.* Secondary controls and systems must meet the requirements of § 23.405.

TABLE 1—LIMIT FLIGHT LOAD FACTORS

| LIMIT FLIGHT LOAD FACTORS | | | Normal category | Utility category | Acrobatic category |
|---|---|---|---|---|---|
| FLIGHT Load Factors | Flaps Up | $n_1$ | 3.8 | 4.4 | 6.0 |
| | | $n_2$ | $-0.5n_1$ | | |
| | | $n_3$ | Find $n_3$ from Fig. 1 | | |
| | | $n_4$ | Find $n_4$ from Fig. 2 | | |
| | Flaps Down | $n_{flap}$ | $0.5n_1$ | | |
| | | $n_{flap}$ | Zero* | | |

*Vertical wing load may be assumed equal to zero and only the flap part of the wing need be checked for this condition.

TABLE 2—AVERAGE LIMIT CONTROL SURFACE LOADING

| AVERAGE LIMIT CONTROL SURFACE LOADING | | | | |
|---|---|---|---|---|
| SURFACE | DIRECTION OF LOADING | MAGNITUDE OF LOADING | CHORDWISE DISTRIBUTION | |
| HORIZONTAL TAIL I | a) Up and Down | Figure 5 Curve (2) | Elev. LE, ℄ Hinge, C, C/4 | (A) |
| | b) Unsymmetrical loading (Up and Down) | 100% $\overline{w}$ on one side airplane ℄, 65% $\overline{w}$ on other side of airplane ℄ for the normal and utility categories. For the acrobatic category see A23.11(c). | | (B) |
| VERTICAL TAIL II | a) Right and Left | Figure 5 Curve (1) | Same as (A) above | |
| | b) Right and Left | Figure 5 Curve (1) | Same as (B) above | |
| AILERON III | a) Up and Down | Figure 6 Curve (3) | ℄ Hinge | (C) |
| WING FLAP IV | a) Up | Figure 6 Curve (4) | | (D) |
| | b) Down | .25 x Up Load (a) | Same as (D) above | |
| TRIM TAB V | a) Up and Down | Figure 6 Curve (5) | | |

FIGURE 1 – CHART FOR FINDING $n_3$ FACTOR AT SPEED $V_C$

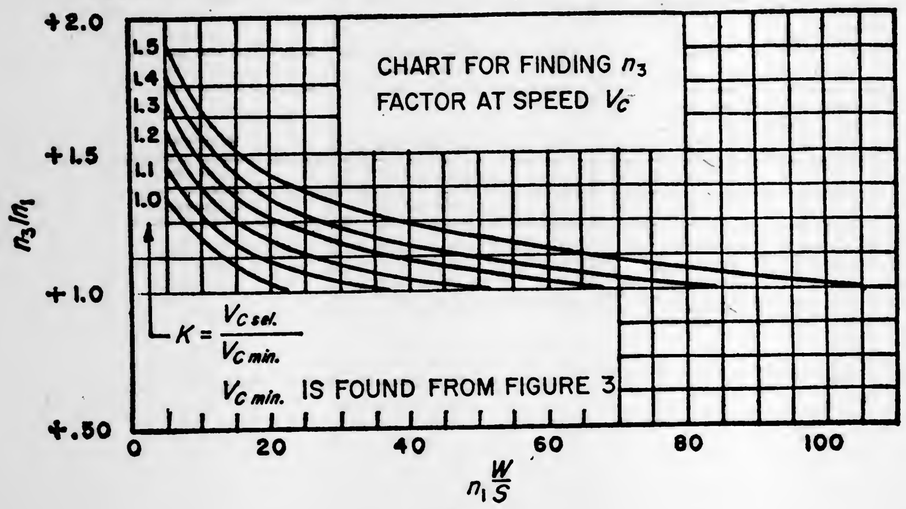


FIGURE 2 – CHART FOR FINDING $n_4$ FACTOR AT SPEED $V_C$

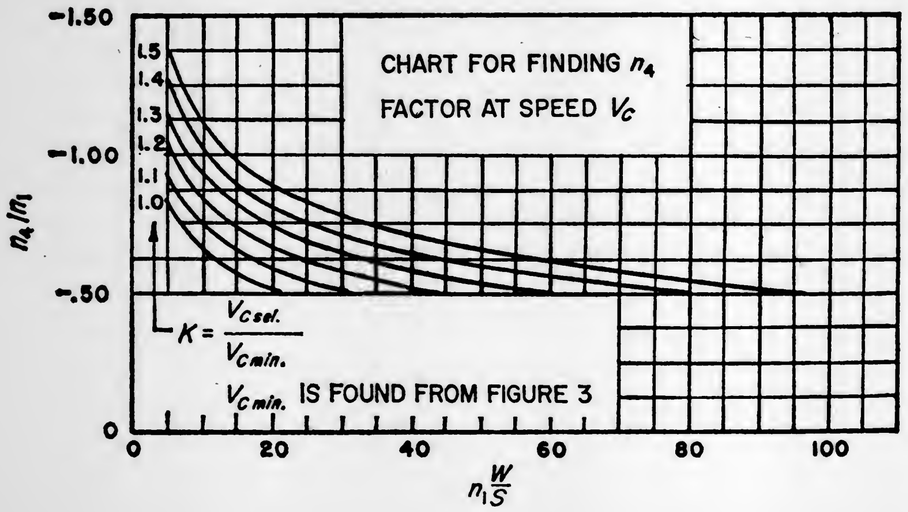

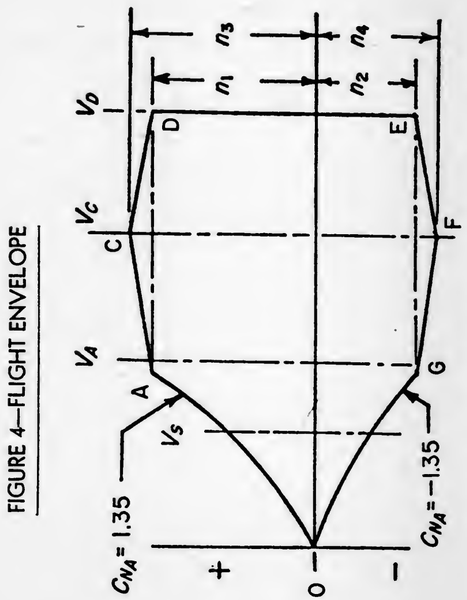

FIGURE 4—FLIGHT ENVELOPE

1. Conditions "C" or "F" need only be investigated when $n_3 \frac{W}{S}$ or $n_4 \frac{W}{S}$ is greater than $n_1 \frac{W}{S}$ or $n_2 \frac{W}{S}$, respectively.

2. Condition "G" need not be investigated when the supplementary condition specified in § 23.369 is investigated.

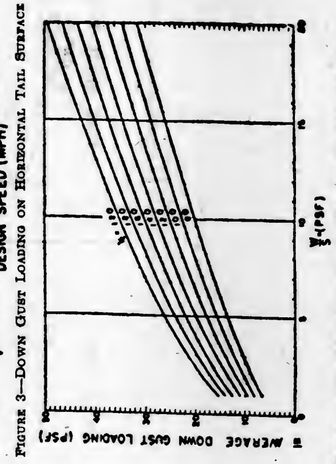

FIGURE 3—DOWN GUST LOADING ON HORIZONTAL TAIL SURFACE

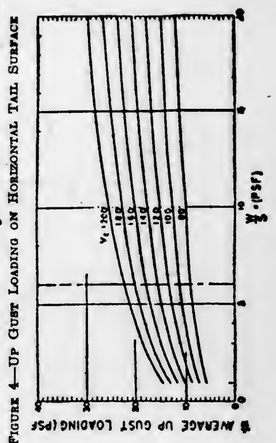

FIGURE 4—UP GUST LOADING ON HORIZONTAL TAIL SURFACE

APPENDIX B—CONTROL SURFACE LOADINGS

B23.1 *General.*

(a) If allowed by the specific requirements in this part, the values of control surface loading in this appendix may be used to determine the detailed rational requirements of §§ 23.397 through 23.459 unless the Administrator finds that these values result in unrealistic loads.

(b) For a seaplane version of a landplane, the landplane wing loadings may be used to determine the limit maneuvering control surface loadings (in accordance with B23.11 and figure 1 of Appendix B) if—

(1) The power of the seaplane engines does not exceed the power of the landplane engines;

(2) The placard maneuver speed of the seaplane does not exceed the placard maneuver speed of the landplane;

(3) The maximum weight of the seaplane does not exceed the maximum weight of the landplane by more than 10 percent;

(4) The landplane service experience does not show any serious control-surface load problem; and

(5) The landplane service experience is of sufficient scope to ascertain with reasonable accuracy that no serious control-surface load problem will develop on the seaplane.

B23.11 *Control surface loads.*

Acceptable values of limit average maneuvering control-surface loadings may be obtained from figure 1 of this Appendix in accordance with the following:

(a) For horizontal tail surfaces—

(1) With the conditions in § 23.423(a), obtain $\bar{w}$ as a function of W/S and surface deflection, using—

(i) Curve C of figure 1 for a deflection of 10° or less;

(ii) Curve B of figure 1 for a deflection of 20°;

(iii) Curve A for a deflection of 30° or more;

(iv) Interpolation for all other deflections; and

(v) The distribution of figure 7; and

(2) With the conditions in § 23.423(b), obtain $\bar{w}$ from curve B of figure (1) using the distribution of figure 7.

(b) For vertical tail surfaces—

(1) With the conditions in § 23.441(a)(1), obtain $\bar{w}$ as a function of W/S and surface deflection using the same requirements as used in subdivisions (a)(1)(i) through (a)(1)(v);

(2) With the conditions in § 23.441(a)(2), obtain $\bar{w}$ from Curve C, using the distribution of figure 6; and

(3) With the conditions in § 23.441(a)(3), obtain $\bar{w}$ from Curve A, using the distribution of figure 8.

(c) For allerons, obtain $\bar{w}$ from Curve B, acting in both the up and down directions, using the distribution of figure 9.

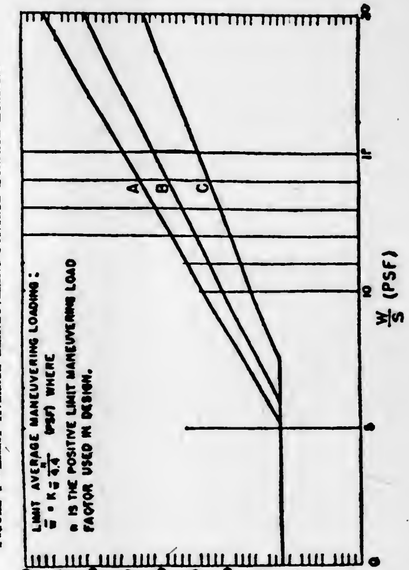

FIGURE 1—LIMIT AVERAGE MANEUVERING CONTROL SURFACE LOADING

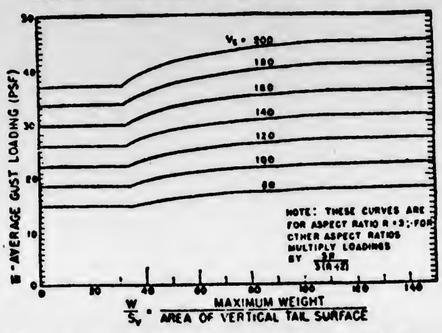
Note: In no case may $\bar{w}$ be less than 12 psf.

FIGURE 5—GUST LOADING ON VERTICAL TAIL SURFACE



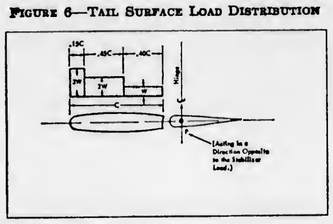


FIGURE 6—TAIL SURFACE LOAD DISTRIBUTION

Notes:

(a) In the balancing conditions in § 23.421—$P$=40% of net balancing load (flaps retracted); and $P$=0 (flaps deflected).

(b) In the condition in § 23.441(a)(2), $P$=20% of net tail load.

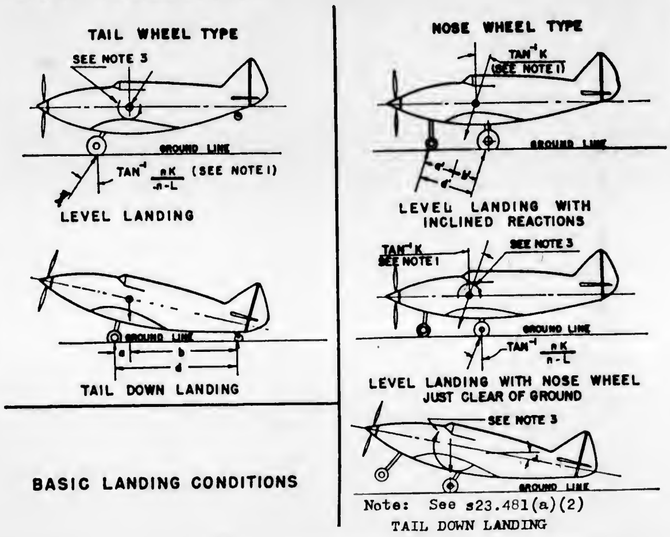
APPENDIX C—BASIC LANDING CONDITIONS

C23.1 *Basic landing conditions.*



| Condition | Tail wheel type | | Nose wheel type | | |
|---|---|---|---|---|---|
| | Level landing | Tail-down landing | Level landing with inclined reactions | Level landing with nose wheel just clear of ground | Tail-down landing |
| Reference section | 23.479(a)(1) | 23.481(a)(1) | 23.479(a)(2)(i) | 23.479(a)(2)(ii) | 23.481(a)(2) and (b) |
| Vertical component at c. g. | $nW$ | $nW$ | $nW$ | $nW$ | $nW$ |
| Fore and aft component at c. g. | $K_nW$ | 0 | $K_nW$ | $K_nW$ | 0 |
| Lateral component in either direction at c. g. | 0 | 0 | 0 | 0 | 0 |
| Shock absorber extension (hydraulic shock absorber) | Note (2) | Note (2) | Note (2) | Note (2) | Note (2) |
| Shock absorber deflection (rubber or spring shock absorber) | 100% Static | 100% Static | 100% Static | 100% Static | 100% Static |
| Tire deflection | $(n-L)W$ | $(n-L)Wb/d$ | $(n-L)Wa'/d'$ | $(n-L)W$ | $(n-L)W$ |
| Main wheel loads (both wheels) | $V_r$: $K_nW$; $D_r$: 0 | 0 | $K_nWa'/d'$ | $K_nW$ | 0 |
| Tail (nose) wheel loads | $V_f$: 0; $D_f$: 0 | $(n-L)Wa/d$ 0 | $(n-L)Wb'/d'$ $K_nWb'/d'$ | 0 0 | 0 0 |
| Notes | (1), (3), and (4) | (4) | (1) | (1), (3), and (4) | (3) and (4) |

NOTE (1). $K$ may be determined as follows: $K$=0.25 for $W$=3,000 pounds or less; $K$=0.33 for $W$=6,000 pounds or greater, with linear variation of $K$ between these weights.

NOTE (2). For the purpose of design, the maximum load factor is assumed to occur throughout the shock absorber stroke from 25 percent deflection to 100 percent deflection unless otherwise shown and the load factor must be used with whatever shock absorber extension is most critical for each element of the landing gear.

NOTE (3). Unbalanced moments must be balanced by a rational or conservative method.

NOTE (4). $L$ is defined in § 23.725(b).

BASIC LANDING CONDITIONS

Note: See s23.481(a)(2) TAIL DOWN LANDING

APPENDIX D—WHEEL SPIN-UP LOADS

D23.1 *Wheel spin-up loads.*

(a) The following method for determining wheel spin-up loads for landing conditions is based on NACA T.N. 863. However, the drag component used for design may not be less than the drag load prescribed in § 23.479(b).

$$F_{H\,max}=\frac{1}{r_e}\sqrt{\frac{2I_w(V_H-V_c)nF_{V\,max}}{t_s}}$$

where—

$F_{H\,max}$ = maximum rearward horizontal force acting on the wheel (in pounds);

$r_e$ = effective rolling radius of wheel under impact based on recommended operating tire pressure (which may be assumed to be equal to the rolling radius under a static load of $n_fW_e$) in feet;

$I_w$ = rotational mass moment of inertia of rolling assembly (in slug feet);

$V_H$ = linear velocity of airplane parallel to ground at instant of contact (assumed to be 1.2 $V_{S_0}$, in feet per second);

$V_c$ = peripheral speed of tire, if pre-rotation is used (in feet per second) (there must be a positive means of pre-rotation before pre-rotation may be considered);

$n$ = effective coefficient of friction (0.80 may be used);

$F_{V\,max}$ = maximum vertical force on wheel (pounds) = $n_fW_e$, where $W_e$ and $n_f$ are defined in § 23.725;

$t_s$ = time interval between ground contact and attainment of maximum vertical force on wheel (seconds). (However, if the value of $F_{V\,max}$, from the above equation exceeds 0.8 $F_{V\,max}$, the latter value must be used for $F_{H\,max}$.)

(b) This equation assumes a linear variation of load factor with time until the peak load is reached and under this assumption, the equation determines the drag force at the time that the wheel peripheral velocity at radius $r_e$ equals the airplane velocity. Most shock absorbers do not exactly follow a linear variation of load factor with time. Therefore, rational or conservative allowances must be made to compensate for these variations. On most landing gears, the time for wheel spin-up will be less than the time required to develop maximum vertical load factor for the specified rate of descent and forward velocity. For exceptionally large wheels, a wheel peripheral velocity equal to the ground speed may not have been attained at the time of maximum vertical gear load. However, as stated above, the drag spin-up load need not exceed 0.8 of the maximum vertical loads.

DISTRIBUTION TABLE

New Appendix H contains the contract provisions required by the Secretary of Labor. For convenience, the provisions are presented in the form of one article to be inserted in the contracts. Paragraph (1) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 5 of the Davis-Bacon Act, as amended. Paragraph (2) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 2 of the Davis-Bacon Act, as amended. Paragraph (3) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 3 of the Davis-Bacon Act, as amended. Paragraph (4) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 4 of the Davis-Bacon Act, as amended. Paragraph (5) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (6) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (7) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (8) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (9) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (10) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (11) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (12) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (13) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (14) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (15) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (16) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (17) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended. Paragraph (18) of the article contains the contract provisions required by the Secretary of Labor in accordance with section 1 of the Davis-Bacon Act, as amended.

(1) The Secretary of Labor may modify any wage determination before the award of the contract or contracts for which it was sought. If the proposed amount of more than $2,000 must be awarded on the basis of public advertising or other method for use on a particular airport development project, each contract

[Docket No. 6357; Amdt. 151-6]

## PART 151—FEDERAL AID TO AIRPORTS [NEW]

### Davis-Bacon Act Fringe Benefit Requirements

The purpose of this amendment to Part 151 [New] of the Federal Aviation Regulations is to incorporate the "Fringe Benefit Requirements" of the Davis-Bacon Act to the extent required by the regulations of the Secretary of Labor (29 CFR Part 5) as amended effective September 30, 1964 (29 F.R. 13462), issued under the Contract Work Hours Standards Act (49 U.S.C. 327-330), and under the Davis-Bacon Act (40 U.S.C. 276a—276a-5). Also, editorial changes in the form of the affected provisions are made that do not involve any substantive change.

Section 15(b) of the Federal Airport Act (49 U.S.C. 1114(b)) requires that "all contracts in excess of $2,000 * * * which involve labor" must contain provisions establishing the minimum wage rates contractors and subcontractors must pay to laborers, and that these minimum wage rates are to be predetermined by the Secretary of Labor. Public Law 88-349 added a provision to section 15(b) stating that the wage determinations of the Secretary of Labor are to be "in accordance with the Davis-Bacon Act, as amended". On September 30, 1964, the Secretary of Labor issued amendments to his regulations, to implement the amendments to the Davis-Bacon Act requiring that locally prevailing fringe benefits be included in future wage determinations, and revising the contract provisions (required by the Contract Work Hours Standards Act) to reflect the new fringe benefit requirements.

Paragraph (c) of § 151.47, "Procedure for the Secretary of Labor's wage determinations", is amended to require sponsors to furnish available pertinent information as to locally prevailing fringe benefits, as well as wage payment information, with Form DB-11. The reference to Form DB-11(a) is deleted as inapplicable. Paragraph (d) of § 151.47, "Use and effectiveness of the Secretary of Labor's wage determination", is amended to allow the Administrator, upon a finding that there is a reasonable time to notify bidders, to give effect to the modified wage determinations of the Secretary of Labor received less than 10 days before bid opening. A new paragraph (f) is added to § 151.47 to make the interpretations of the Secretary of Labor of the fringe benefit provisions of the Davis-Bacon Act (29 CFR 5.20–5.32) applicable to § 151.47.

At present, all provisions that sponsors must insert in full in construction contracts are contained in § 151.49(a). To clearly distinguish between the contract provisions the FAA requires and those the regulations of the Secretary of Labor require, the form of § 151.49(a) is substantially revised, and a new Appendix H is added. The FAA-required contract provisions remain in § 151.49(a), and the contract provisions required by the Secretary of Labor are transferred to new Appendix H.

Revised § 151.49(a) contains subparagraphs (1) through (7), representing all of old subparagraphs (1) through (4), (7) and (14) respectively, and new subparagraphs (8) and (9), representing pertinent parts of old subparagraphs (15) and (16). Since subparagraph (17) of § 151.49(a) was superseded by Amdt. 151-5 to Part 151 [New], effective December 21, 1964, it is deleted as inapplicable to construction contracts made under grant agreements entered into after that date. Also, the statement of applicability of old subparagraph (17) is deleted from amended § 151.49(b). Of course, the deleted provision remains effective as to construction contracts made under grant agreements entered into before December 21, 1964, as each grant agreement provides. The Director of Airports Service is delegated authority in revised § 151.49(a) to amend Appendix H to the extent required from time to time by the rule-making action of the Secretary of Labor. Also, two new paragraphs are added to § 151.49. New paragraph (d), "Corrected wage determinations", reflects the rule of the Secretary of Labor that any wage determinations may be corrected by the Secretary of Labor to rectify clerical errors at the Administrator's request or on his own motion. New paragraph (e) makes the Secretary of Labor's interpretations of the fringe benefit provisions of the Davis-Bacon Act applicable to all provisions of § 151.49.

New Appendix H contains the contract provisions required by the Secretary of Labor. For convenience, the provisions are presented in the form of one article to be inserted in the contracts. Paragraphs are numbered A through H, representing old subparagraphs (5), (6) and (8) through (13), and paragraphs I and J, representing pertinent parts of old subparagraphs (15) and (16) of § 151.49(a). Several of these provisions are directly affected by the amendments to § 5.5 of the Department of Labor regulations (29 CFR 5.5). Paragraph A, "Minimum wages", is amended to add new subparagraphs (3) and (4). Subparagraph (3) provides for the establishment of cash equivalents for required fringe benefits. Subparagraph (4) requires the approval of the Secretary of Labor before the contractor may consider the cost of specified fringe benefits as part of the wages of laborers and mechanics. Paragraph C, "Payrolls and payroll records", is substantially revised. Amended subparagraph (1) requires the contractor to keep additional records concerning required fringe benefits. Amended subparagraph (2) requires the contractor to submit with its "Weekly Statement of Compliance" additional information when approval under § 151.49(a)(5)(iv) is required, and makes the contractor responsible for the submission of subcontractors' payroll records. Paragraph D, "Apprentices", is amended to require the contractor to submit to the sponsor proof of registration of its apprentice program and its apprentices before any apprentices are used.

Since the amendments to §§ 151.47 and 151.49 are so extensive, these sections are published in full as amended. Also, several minor editorial changes are included, and catchlines are added where appropriate. The practice of citing underlying sections of the regulations of the Secretary of Labor is retained in Appendix H only, and these citations are deleted throughout revised §§ 151.47 and 151.49. Section 151.54(b) is also amended to delete a similar citation.

The procedural and effective date requirements of section 4 of the Administrative Procedure Act (5 U.S.C. 1003) do not apply to this amendment because it is within the exception in that section relating to public loans, grants, benefits and contracts.

In consideration of the foregoing, effective January 18, 1965, Part 151 [New] of Chapter I of Title 14 of the Code of Federal Regulations, is amended as hereinafter set forth.

This amendment is made under the authority of the Federal Airport Act, as amended (49 U.S.C. 1101–1120) and Part 5 of Title 29 of the Code of Federal Regulations, as amended.

Issued in Washington, D.C., on December 11, 1964.

N. E. HALABY,
*Administrator.*

1. Section 151.47 is amended to read as follows:

**§ 151.47 Performance of construction work: letting of contracts.**

(a) *Advertising required; exceptions.* Unless the Administrator approves another method for use on a particular airport development project, each contract for construction work on a project in the amount of more than $2,000 must be awarded on the basis of public advertising and open competitive bidding under the local law applicable to the letting of public contracts. Any oral or written agreement or understanding between a sponsor and another public agency that is not a sponsor of the project, under which that public agency undertakes construction work for or as agent of the sponsor, is not considered to be a construction contract for the purposes of this section, or §§ 151.45, 151.49, and 151.51.

(b) *Advertisement; conditions and contents.* There may be no advertisement for bids on, or negotiation of, a construction contract until the Administrator has approved the plans and specifications. The advertisement shall inform the bidders of the contract and reporting provisions required by § 151.54. Unless the estimated contract price or construction cost is $2,000 or less, there may be no advertisement for bids or negotiation until the Administrator has given the sponsor a copy of a decision of the Secretary of Labor establishing the minimum wage rates for skilled and unskilled labor under the proposed contract. In each case, a copy of the wage determination decision must be set forth in the initial invitation for bids or proposed contract or incorporated therein by reference to a copy set forth in the advertised or negotiated specifications.

(c) *Procedure for the Secretary of Labor's wage determinations.* At least 60 days before the intended date of advertising or negotiating under paragraph (b) of this section, the sponsor shall send to the District Airport Engineer, completed Department of Labor Form DB–11, with only the classifications needed in the performance of the work checked. General entries (such as "entire schedule" or "all applicable classifications") may not be used. Additional necessary classifications not on the form may be typed in the blank spaces or on an attached separate list. A classification that can be fitted into classifications on the form, or a classification that is not generally recognized in the area or in the industry, may not be used. Except in areas where the wage patterns are clearly established, the Form must be accompanied by any available pertinent wage payment or locally prevailing fringe benefit information.

(d) *Use and effectiveness of the Secretary of Labor's wage determinations.* (1) Wage determinations are effective only for 120 days from the date of the determinations. If it appears that a determination may expire between bid opening and award, the sponsor shall so advise the FAA as soon as possible. If he wishes a new request for wage determination to be made and if any pertinent circumstances have changed, he shall submit a new Form DB–11 and accompanying information. If he claims that the determination expires before award and after bid opening due to unavoidable circumstances, he shall submit proof of the facts which he claims support a finding to that effect.

(2) The Secretary of Labor may modify any wage determination before the award of the contract or contracts for which it was sought. If the proposed contract is awarded on the basis of public advertisement and open competitive bidding, any modification that the FAA receives less than 10 days before the opening of bids is not effective, unless the Administrator finds that there is reasonable time to notify bidders. A modification may not continue in effect beyond the effective period of the wage determination to which it relates. The Administrator sends any modification to the sponsor as soon as possible. If the modification is effective, it must be incorporated in the invitation for bids, by issuing and addendum to the specifications or otherwise.

(e) *Requirements for awarding construction contracts.* A sponsor may not award a construction contract without the written concurrence of the Administrator (through the District Airport Engineer) that the contract prices are reasonable and that the contract conforms to the sponsor's grant agreement with the United States. A sponsor that awards contracts on the basis of public advertising and open competitive bidding, shall, after the bids are opened, send a tabulation of the bids and its recommendations for award to the District Airport Engineer. The allowable project costs of the work, on which the Federal participation is computed, may not be more than the bid of the lowest responsible bidder. The sponsor may not accept a bid by a contractor whose name appears on the current list of ineligible contractors published by the Comptroller General of the United States under § 5.6(b) of Title 29 of the regulations of the Secretary of Labor (29 CFR Part 5), or a bid by any firm, corporation, partnership, or association in which that contractor has a substantial interest.

(f) *Secretary of Labor's interpretations apply.* Where applicable by their terms, the regulations of the Secretary of Labor (29 CFR 5.20–5.32) interpreting the fringe benefit provisions of the Davis-Bacon Act apply to this section.

2. Section 151.49 is amended to read as follows:

**§ 151.49 Performance of construction work: contract requirements.**

(a) *Contract provisions.* In addition to any other provisions necessary to ensure completion of the work in accordance with the grant agreement, each sponsor entering into a construction contract for an airport development project shall insert in the contract the provisions required by the Secretary of Labor, as set forth in Appendix H of this Part. The Director, Airports Service, may amend any provision in Appendix H from time to time to accord with rule-making action of the Secretary of Labor. The provisions in the following subparagraphs also must be inserted in the contract:

(1) *Federal Aid to Airport Program Project.* The work in this contract is included in Federal-aid Airport Project No. ------ which is being undertaken and accomplished by the [insert sponsor's name] in accordance with the terms and conditions of a grant

agreement between the [insert sponsor's name] and the United States, under the Federal Airport Act (49 U.S.C. 1101) and Part 151 of the Federal Aviation Regulations

liquidated damages under section 104(a) of the Contract Work Hours Standards Act is incorrect or that he violated in-

structively made or incurred during such weekly period (29 CFR 5.5(a)(1)(i)).

(2) Any class of laborers or mechanics which is not listed in the wage determi-

the wages of any laborer or mechanic include the amount of any costs reasonably anticipated in providing benefits under a plan or

in excess of forty hours in such workweek, as the case may be (29 CFR 5.5(c)(1)).

*G. Violations; liability for unpaid wages; liquidated damages.* In the event of any

of Defense (Manpower); the Assistant Secretary of Defense (International Security Affairs); the Senior Military Aide

agreement between the [insert sponsor's name] and the United States, under the Federal Airport Act (49 U.S.C. 1101) and Part 151 of the Federal Aviation Regulations (14 CFR Part 151), pursuant to which the United States has agreed to pay a certain percentage of the costs of the project that are determined to be allowable project costs under that Act. The United States is not a party to this contract and no reference in this contract to the FAA or any representative thereof, or to any rights granted to the FAA or any representative thereof, or the United States, by the contract, makes the United States a party to this contract.

(2) *Consent to assignment.* The contractor shall obtain the prior written consent of the [insert sponsor's name] to any proposed assignment of any interest in or part of this contract.

(3) *Convict labor.* No convict labor may be employed under this contract.

(4) *Veterans' preference.* In the employment of labor (except in executive, administrative, and supervisory positions), preference shall be given to qualified individuals who have served in the military service of the United States (as defined in section 101(1) of the Soldiers' and Sailors' Civil Relief Act of 1940) and have been honorably discharged from that service, except that preference may be given only where that labor is available locally and is qualified to perform the work to which the employment relates.

(5) *Withholding: Sponsor from contractor.* Whether or not payments or advances to the [insert sponsor's name] are withheld or suspended by the FAA, the [insert sponsor's name] may withhold or cause to be withheld from the contractor so much of the accrued payments or advances as may be considered necessary to pay laborers and mechanics employed by the contractor or any subcontractor on the work the full amount of wages required by this contract.

(6) *Nonpayment of wages.* If the contractor or subcontractor fails to pay any laborer or mechanic employed or working on the site of the work any of the wages required by this contract the [insert sponsor's name] may, after written notice to the contractor, take such action as may be necessary to cause the suspension of any further payment or advance of funds until the violations cease.

(7) *FAA inspection and review.* The contractor shall allow any authorized representative of the FAA to inspect and review any work or materials used in the performance of this contract.

(8) *Subcontracts.* The contractor shall insert in each of his subcontracts the provisions contained in paragraphs [insert designations of 6 paragraphs of contract corresponding to subparagraphs (1), (3), (4), (5), (6) and (7) of this paragraph], and also a clause requiring the subcontractors to include these provisions in any lower tier subcontracts which they may enter into, together with a clause requiring this insertion in any further subcontracts that may in turn be made.

(9) *Contract termination.* A breach of paragraphs [insert designation of 3 paragraphs corresponding to subparagraphs (5), (6) and (7) of this paragraph] may be grounds for termination of the contract.

(b) *Exemption of certain contracts.* Appendix H to this Part and paragraph (a)(5) of this section do not apply to prime contracts of $2,000 or less.

(c) *Adjustment in liquidated damages.* A contractor or subcontractor who has become liable for liquidated damages under paragraph G of Appendix H and who claims that the amount administratively determined as liquidated damages under section 104(a) of the Contract Work Hours Standards Act is incorrect or that he violated inadvertently the Contract Work Hours Standards Act notwithstanding the exercise of due care, may—

(1) If the amount determined is more than $100, apply to the Administrator for a recommendation to the Secretary of Labor that an appropriate adjustment be made or that he be relieved of liability for such liquidated damages; or

(2) If the amount determined is $100 or less, apply to the Administrator for an appropriate adjustment in liquidated damages or for release from liability for the liquidated damages.

(d) *Corrected wage determinations.* The Secretary of Labor corrects any wage determination included in any contract under this section whenever the wage determination contains clerical errors. A correction may be made at the Administrator's request or on the initiative of the Secretary of Labor.

(e) *Secretary of Labor's interpretations apply.* Where applicable by their terms, the regulations of the Secretary of Labor (29 CFR 5.20–5.32) interpreting the "fringe benefit provisions" of the Davis-Bacon Act apply to the contract provisions in Appendix H, and to this section.

§ 151.54 [Amended]

3. Section 151.54(b) is amended by striking out the citation "(29 CFR 5.6 (a)(1))" at the end thereof.

4. Appendix H is added to Part 151 [New] to read as follows:

APPENDIX H

There is set forth below the contract provision required by the regulations of the Secretary of Labor in Part 5 of Title 29 of the Code of Federal Regulations. Section 151.49(a) requires sponsors to insert this provision in full in each construction contract.

PROVISION REQUIRED BY THE REGULATIONS OF THE SECRETARY OF LABOR

*A. Minimum wages.* (1) All mechanics and laborers employed or working upon the site of the work will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account (except such payroll deductions as are permitted by regulations issued by the Secretary of Labor under the Copeland Act [29 CFR Part 3]), the full amounts due at time of payment computed at wage rates not less than those contained in the wage determination decision(s) of the Secretary of Labor which is (are) attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between the contractor and such laborers and mechanics; and the wage determination decision(s) shall be posted by the contractor at the site of the work in a prominent place where it (they) can be easily seen by the workers. For the purpose of this paragraph, contributions made or costs reasonably anticipated under section 1(b)(2) of the Davis-Bacon Act on behalf of laborers or mechanics are considered wages paid to such laborers or mechanics, subject to the provisions of subparagraph (4) below. Also for the purpose of this paragraph, regular contributions made or costs incurred for more than a weekly period under plans, funds, or programs, but covering the particular weekly period, are deemed to be constructively made or incurred during such weekly period (29 CFR 5.5(a)(1)(i)).

(2) Any class of laborers or mechanics which is not listed in the wage determination(s) and which is to be employed under the contract, shall be classified or reclassified conformably to the wage determination(s), and a report of the action taken shall be sent by the [insert sponsor's name] to the FAA for approval and transmittal to the Secretary of Labor. In the event that the interested parties cannot agree on the proper classification or reclassification of a particular class of laborers and mechanics to be used, the question accompanied by the recommendation of the FAA shall be referred to the Secretary of Labor for final determination (29 CFR 5.5(a)(1)(ii)).

(3) Whenever the minimum wage rate prescribed in the contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly wage rate and the contractor is obligated to pay a cash equivalent of such a fringe benefit, an hourly cash equivalent thereof shall be established. In the event the interested parties cannot agree upon a cash equivalent of the fringe benefit, the question, accompanied by the recommendation of the FAA shall be referred to the Secretary of Labor for determination (29 CFR 5.5(a)(1)(iii)).

(4) The contractor may consider as part of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing benefits under a plan or program described in section 1(b)(2)(B) of the Davis-Bacon Act, or any bona fide fringe benefits not expressly listed in section 1(b)(2) of the Davis-Bacon Act or otherwise not listed in the wage determination decision(s) of the Secretary of Labor which is included in this contract, only when the Secretary of Labor has found, upon the written request of the contractor, that the applicable standards of the Davis-Bacon Act have been met. Whenever practicable, the contractor should request the Secretary of Labor to make such findings before the making of the contract. In the case of unfunded plans and programs, the Secretary of Labor may require the contractor to set aside in a separate account assets for the meeting of obligations under the plan or program (29 CFR 5.5(a)(1)(iv)).

*B. Withholding: FAA from sponsor.* Pursuant to the terms of the grant agreement between the United States and [insert sponsor's name], relating to Federal-aid Airport Project No. ——, and Part 151 of the Federal Aviation Regulations (14 CFR Part 151), the FAA may withhold or cause to be withheld from the [insert sponsor's name] so much of the accrued payments or advances as may be considered necessary to pay laborers and mechanics employed by the contractor or any subcontractor on the work the full amount of wages required by this contract. In the event of failure to pay any laborer or mechanic employed or working on the site of the work all or part of the wages required by this contract, the FAA may, after written notice to the [insert sponsor's name], take such action as may be necessary to cause the suspension of any further payment or advance of funds until such violations have ceased (29 CFR 5.5(a)(2)).

*C. Payrolls and basic records.* (1) Payrolls and basic records relating thereto will be maintained during the course of the work and preserved for a period of three years thereafter for all laborers and mechanics working at the site of the work. Such records will contain the name and address of each such employee, his correct classification, rates of pay (including rates of contributions or costs anticipated of the types described in section 1(b)(2) of the Davis-Bacon Act), daily and weekly number of hours worked, deductions made and actual wages paid. Whenever the Secretary of Labor has found, under 29 CFR 5.5(a)(1)(iv) (see subparagraph (4) of paragraph (A) above), that

the wages of any laborer or mechanic include the amount of any costs reasonably anticipated in providing benefits under a plan or program described in section 1(b)(2)(B) of the Davis-Bacon Act, the contractor shall maintain records which show that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, and that the plan or program has been communicated in writing to the laborers or mechanics affected, and records which show the costs anticipated or the actual cost incurred in providing such benefits (29 CFR 5.5(a)(3)(i)).

(2) The contractor will submit weekly a copy of all payrolls to the [insert sponsor's name] for transmission to the FAA, as required by § 151.53(a). The copy shall be accompanied by a statement signed by the employer or his agent indicating that the payrolls are correct and complete, that the wage rates contained therein are not less than those determined by the Secretary of Labor and that the classifications set forth for each laborer or mechanic conform with the work he performed. A submission of a "Weekly Statement of Compliance" which is required under this contract and the Copeland regulations of the Secretary of Labor (29 CFR Part 3) and the filing with the initial payroll or any subsequent payroll of a copy of any findings by the Secretary of Labor, under 29 CFR 5.5(a)(1)(iv) (see subparagraph (4) of paragraph (A) above), shall satisfy this requirement. The prime contractor shall be responsible for the submission of copies of payrolls of all subcontractors. The contractor will make the records required under the labor standards clauses of the contract available for inspection by authorized representatives of the FAA and the Department of Labor, and will permit such representatives to interview employees during working hours on the job (29 CFR 5.5(a)(3)(ii)).

*D. Apprentices.* Apprentices will be permitted to work as such only when they are registered, individually, under a bona fide apprenticeship program registered with a State apprenticeship agency which is recognized by the Bureau of Apprenticeship and Training, United States Department of Labor; or, if no such recognized agency exists in a State, under a program registered with the Bureau of Apprenticeship and Training, United States Department of Labor. The allowable ratio of apprentices to journeymen in any craft classification shall not be greater than the ratio permitted to the contractor as to his entire work force under the registered program. Any employee listed on a payroll at an apprentice wage rate, who is not registered as above, shall be paid the wage rate determined by the Secretary of Labor for the classification of work he actually performed. The contractor or subcontractor will be required to furnish to the [insert sponsor's name] written evidence of the registration of his program and apprentices as well as of the appropriate ratios and wage rates, for the area of construction prior to using any apprentices on the contract work (29 CFR 5.5(a)(4)).

*E. Compliance with Copeland Regulations.* The contractor shall comply with the Copeland Regulations (29 CFR Part 3) of the Secretary of Labor which are herein incorporated by reference (29 CFR 5.5(a)(5)).

*F. Overtime requirements.* No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any laborer or mechanic in any workweek in which he is employed on such work to work in excess of eight hours in any calendar day or in excess of forty hours in such workweek unless such laborer or mechanic received compensation at a rate not less than one and one-half times his basic rate of pay for all hours worked in excess of eight hours in any calendar day or in excess of forty hours in such workweek, as the case may be (29 CFR 5.5(c)(1)).

*G. Violations; liability for unpaid wages; liquidated damages.* In the event of any violation of paragraph F of this provision, the contractor and any subcontractor responsible therefore shall be liable to any affected employee for his unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States for liquidated damages. Such liquidated damages shall be computed, with respect to each individual laborer or mechanic employed in violation of said paragraph F of this provision, in the sum of $10 for each calendar day on which such employee was required or permitted to work in excess of eight hours or in excess of the standard workweek of forty hours without payment of the overtime wages required by said paragraph F of this provision (29 CFR 5.5(c)(2)).

*H. Withholding for unpaid wages and liquidated damages.* The FAA may withhold or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor, such sums as may administratively be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in paragraph G of this provision (29 CFR 5.5(c)(3)).

*I. Subcontracts.* The contractor will insert in each of his subcontracts the clauses contained in paragraphs A through H and J of this provision, and also a clause requiring the subcontractors to include these provisions in any lower tier subcontracts which they may enter into, together with a clause requiring this insertion in any further subcontracts that may in turn be made (29 CFR 5.5(a)(6), 5.5(c)(4)).

*J. Contract termination; debarment.* A breach of paragraphs A through I of this provision may be grounds for termination of the contract. A breach of paragraphs A through E and I may also be grounds for debarment as provided in 29 CFR 5.6 of the regulations of the Secretary of Labor (29 CFR 5.5(a)(7)).

# Title 5—ADMINISTRATIVE PERSONNEL

## Chapter I—Civil Service Commission

## PART 213—EXCEPTED SERVICE

### Department of Defense

Section 213.3306 is amended to show the exception under Schedule C of two positions of Secretary, one to the Assistant Secretary of Defense (Administration) and one to the Special Assistant to the Secretary. The section is also amended to show that the position of Secretary to the Assistant Secretary of Defense (Medical and Health) is no longer excepted under Schedule C. Effective upon publication in the FEDERAL REGISTER, subparagraphs (2) and (16) of paragraph (a) of § 213.3306 are amended as set out below.

§ 213.3306 Department of Defense.

(a) *Office of the Secretary.* • • •

(2) Two Private Secretaries to the Deputy Secretary of Defense and one Private Secretary to each of the following: The Director of Defense Research and Engineering; the Assistant Secretary of Defense (Manpower); the Assistant Secretary of Defense (International Security Affairs); the Senior Military Aide to the President; the Assistant Secretary of Defense (Public Affairs); the Assistant Secretary of Defense (Installations and Logistics); the Assistant Secretary of Defense (Administration); the General Counsel; and the Assistant to the Secretary of Defense (Atomic Energy).

• • • • • •

(16) Three Private Secretaries to the Special Assistant to the Secretary of Defense.

• • • • • •

(R.S. 1753, sec. 2, 22 Stat. 403, as amended; 5 U.S.C. 631, 633; E.O. 10577, 19 F.R. 7521, 3 CFR, 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] MARY V. WENZEL,
*Executive Assistant to the Commissioners.*

# Title 7—AGRICULTURE

## Chapter VII—Agricultural Stabilization and Conservation Service (Agricultural Adjustment), Department of Agriculture

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

## PART 722—COTTON

### Subpart—1965 Crop of Extra Long Staple Cotton—National Marketing Quota; National Allotment and Apportionment to the States and Counties; Referendum Date

COUNTY RESERVE

(a) Section 722.354 is issued pursuant to the Agricultural Adjustment Act of 1938, as amended (52 Stat. 31, as amended; 7 U.S.C. 1281 et seq.). This section establishes the county reserve for the 1965 crop of extra long staple cotton. Such determination was made initially by the respective county committees and is hereby approved and made effective by the Administrator, ASCS, pursuant to delegated authority (19 F.R. 74, 21 F.R. 1665, 25 F.R. 3925, 28 F.R. 4368).

(b) Notice that the Secretary was preparing to establish State and county allotments was published in the FEDERAL REGISTER on September 12, 1964 (29 F.R. 12878) in accordance with section 4 of the Administrative Procedure Act (60 Stat. 238; 5 U.S.C. 1003). No written submissions were received in response to such notice.

(c) Since the establishment of county reserves under this section requires immediate action by the Agricultural Stabilization and Conservation State and county committees, it is essential that § 722.354 be made effective as soon as possible. Accordingly, it is hereby determined and found that compliance with the 30-day effective date requirement of section 4 of the Administrative Procedure Act is impracticable and contrary

to the public interest and § 722.354 shall be effective upon filing this document

## PART 722—COTTON

### Subpart—1965 Crop of Upland Cotton—National Marketing Quota; National Allotment and National Reserve and Apportionment to the States and Counties; National Domestic Acreage Allotment; Referendum Date

COUNTY RESERVE

(a) Section 722.262 is issued pursuant to the Agricultural Adjustment Act of 1938, as amended (52 Stat. 31, as amended; 7 U.S.C. 1281 et seq.). This section establishes the county reserve for the 1965 crop of upland cotton. Such determination was made initially by the respective county committees and is hereby approved and made effective by the Administrator, ASCS, pursuant to delegated authority (19 F.R. 74, 21 F.R. 1665, 25 F.R. 3925, 28 F.R. 4368).

(b) Notice that the Secretary was preparing to establish State and county allotments was published in the FEDERAL REGISTER on September 12, 1964 (29 F.R. 12878) in accordance with section 4 of the Administrative Procedure Act (60 Stat. 238; 5 U.S.C. 1003). No written submissions were received in response to such notice.

(c) Since the establishment of county reserves under this section requires immediate action by the Agricultural Stabilization and Conservation State and county committees, it is essential that § 722.262 be made effective as soon as possible. Accordingly, it is hereby determined and found that compliance with the 30-day effective date requirement of section 4 of the Administrative Procedure Act is impracticable and contrary to the public interest and § 722.262 shall be effective upon filing this document with the Director, Office of the Federal Register.

**§ 722.262 County reserve.**

The county reserve is established for the 1965 crop of upland cotton in accordance with § 722.209 of the Acreage Allotment Regulations for the 1964 and Succeeding Crops of Upland Cotton (28 F.R. 11041, as amended). The following table sets forth the county reserve:

ALABAMA

| County | County reserve (acres) | County | County reserve (acres) |
|---|---|---|---|
| Autauga | 162.9 | Colbert | 21.3 |
| Baldwin | 10.2 | Conecuh | 245.6 |

SUBCHAPTER C—SPECIAL PROGRAMS

## PART 751—LAND USE ADJUSTMENT PROGRAM

### Miscellaneous Amendments

The regulations governing the 1964–1965 Cropland Conversion Program, 29 F.R. 13559, are hereby amended as follows:

**§ 751.55 [Amended]**

1. The second sentence of § 751.55 is amended by inserting immediately after the word "payment," the words "rates of forestry incentive payment,".

**§ 751.56 [Amended]**

2. The second sentence of § 751.56 is amended by inserting immediately after the word "payment," the words "rates of forestry incentive payment,".

**§ 751.74 [Amended]**

3.a. The third sentence of paragraph (a) of § 751.74 is amended by inserting immediately after the word "adjustment" in each of the two places where it appears in the sentence the words "and forestry incentive".

b. The second sentence of paragraph (b) of § 751.74 is amended by inserting immediately after the word "adjustment" in each of the two places where it appears in the sentence the words "and forestry incentive,".

**§ 751.77 [Amended]**

4.a. Paragraph (a) of § 751.77 is amended by inserting immediately after the word "adjustment" a comma and the words "forestry incentive,".

b. Paragraph (b) of § 751.77 is amended by inserting immediately after the word "adjustment," the words "forestry incentive,".

**§ 751.78 [Amended]**

5. The second sentence of § 751.78 is amended by inserting immediately after the word "adjustment" a comma and the words "forestry incentive,".

**§ 751.81 [Amended]**

6.a. The first sentence of § 751.81 is amended by inserting immediately after the word "adjustment" a comma and the words "forestry incentive,".

b. The second sentence of § 751.81 is amended by inserting immediately after the word "adjustment" the words "or forestry incentive".

7. Section 751.91 is added to read as follows:

**§ 751.91 Forestry incentive payment.**

Where approved by the Deputy Administrator as necessary because the returns from forestry plantings are remote, a forestry incentive payment may be made in connection with forestry plantings. The forestry incentive payment per acre shall be established or approved by the Deputy Administrator in an amount determined to be fair and reasonable and necessary to encourage the conservation and development of forestry resources. The forestry incentive payment shall be divided among landowners, tenants, and sharecroppers in the manner agreed upon by them as representing their respective contributions to the adjustment in land use (for the period covered by the agreement and for the additional period before returns from the forestry plantings can be expected, resulting from the forestry plantings, except that the county committee may refuse to accept any agreement with respect to which it considers the proposed division of the forestry incentive payment is not fair and equitable. The division of the forestry incentive payment and the amount thereof shall be specified in the agreement.

(Sec. 16(e), 76 Stat. 606; 16 U.S.C. 590p(e))

Effective date: Date of signature.

Signed at Washington, D.C., on December 15, 1964.

## Chapter X—Agricultural Marketing Service (Marketing Agreements and Orders; Milk), Department of Agriculture

[Milk Order No. 63]

## PART 1063—MILK IN QUAD CITIES-DUBUQUE MARKETING AREA

### Order Amending Order

**§ 1063.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Quad Cities-Dubuque marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than January 1, 1965. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of the said order are known to handlers. The recommended decision of the Deputy Administrator, Regulatory Programs, was issued October 9, 1964, and the decision of the Assistant Secretary containing all amendment provisions of this order was issued November 3, 1964. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective January 1, 1965, and that it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER. (section 4(c), Administrative Procedure Act, 5 U.S.C. 1001–1011)

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Quad Cities-Dubuque marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

**§ 1063.22 [Amended]**

1. In § 1063.22(j)(1) the reference "§ 1063.50(a)" is revised to read "§ 1063.50(b)" and the reference "§ 1063.50(b)" is revised to read "§ 1063.50(c)".

2. In § 1063.50, paragraph (b) is redesignated paragraph (c) and the introductory text and the present paragraph (a) are revised to read as follows:

**§ 1063.50 Basic formula and class prices.**

Subject to the provisions of §§ 1063.51 and 1063.52 the basic formula and class prices per hundredweight for the month shall be as follows:

(a) *Basic formula price.* The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the Department for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent at the rate of the Chicago butter price times 0.12. The basic formula price shall be rounded to the nearest cent.

(b) *Class I milk price.* The Class I milk price shall be the basic formula price for the preceding month plus $1.30 August through November, $0.90 March through June and $1.10 in other months: *Provided,* That such Class I price shall be increased or decreased, respectively, two cents for each full percent that the adjusted supply-demand ratio computed pursuant to Part 1030 (Chicago) of this chapter is greater or less than 72 percent, but shall not be increased or decreased more than 24 cents because of such adjusted supply-demand ratio.

* * * * *

3. Section 1063.52(a) is revised to read as follows:

**§ 1063.52 Location differentials to handlers.**

(a) For milk received from producers at a pool plant and disposed of as Class I milk or assigned Class I location adjustment credit pursuant to paragraph (b) of this section and for other source milk for which a location adjustment is applicable, the price computed pursuant to paragraph (b) of this section shall be reduced as follows:

(1) At a plant in Dubuque and Jackson Counties, Iowa, and East Dubuque, Illinois, by 10 cents; and

(2) At a plant located outside the marketing area and 70 miles or more from the City Hall, Rock Island, Ill., by the shortest hard-surfaced highway distance as determined by the market administrator, at the rate set forth in the following schedule:

| | *Rate per hundredweight (cents)* |
|---|---|
| Distance from the Rock Island City Hall (miles): | |
| 70 but less than 80 | 10.0 |
| For each additional 10 miles or fraction thereof an additional | 1.5 |

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: January 1, 1965.

Signed at Washington, D.C., on December 15, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

[Milk Order No. 70]

## PART 1070—MILK IN CEDAR RAPIDS-IOWA CITY MARKETING AREA

### Order Amending Order

**§ 1070.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Cedar Rapids-Iowa City marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than January 1, 1965. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of the said order are known to handlers. The recommended decision of the Deputy Administrator, Regulatory Programs, was issued October 9, 1964, and the decision of the Assistant Secretary containing all amendment provisions of this order was issued November 3, 1964. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective January 1, 1965, and that it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER (section 4(c), Administrative Procedure Act, 5 U.S.C. 1001–1011).

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period were engaged in the production of milk for sale in the marketing area.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Cedar Rapids-Iowa City marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

**§ 1070.22 [Amended]**

1. In § 1070.22(j)(1) the reference "1070.50(a)" is revised to read "§ 1070.50(b)" and the reference "1070.50(b)" is revised to read "§ 1070.50(c)".

2. In § 1070.50, paragraph (b) is redesignated paragraph (c) and the introductory text and the present paragraph (a) are revised to read as follows:

**§ 1070.50 Basic formula and class prices.**

Subject to the provisions of §§ 1070.51 and 1070.52 the basic formula and class prices per hundredweight for the month shall be as follows:

(a) *Basic formula price.* The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the Department for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent at the rate of the Chicago butter price times 0.12. The basic formula price shall be rounded to the nearest cent.

(b) *Class I milk price.* The Class I milk price shall be the basic formula price for the preceding month plus $1.25 August through November, $0.85 March through June and $1.05 in other months: *Provided,* That such Class I price shall be increased or decreased, respectively, two cents for each full percent that the adjusted supply-demand ratio computed pursuant to Part 1030 (Chicago) of this chapter is greater or less than 72 percent, but shall not be increased or decreased more than 24 cents because of such adjusted supply-demand ratio.

* * * * *

**§ 1070.52 [Amended]**

3. In § 1070.52(a) the reference to "§ 1070.50(a)" is revised to read "§ 1070.50(b)".

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: January 1, 1965.

Signed at Washington, D.C., on December 15, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

## PART 1078—MILK IN NORTH CENTRAL IOWA MARKETING AREA

### Order Amending Order

**§ 1078.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the North Central Iowa marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than January 1, 1965. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of the said order are known to handlers. The recommended decision of the Deputy Administrator, Regulatory Programs, was issued October 9, 1964, and the decision of the Assistant Secretary containing all amendment provisions of this order was issued November 3, 1964. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective January 1, 1965, and that it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER (section 4(c), Administrative Procedure Act, 5 U.S.C. 1001–1011).

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least three-fourths of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof, the handling of milk in the North Central Iowa marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

**§ 1078.22 [Amended]**

1. In § 1078.22(j)(1) the reference "1078.50(a)" is revised to read "1078.50(b)" and the reference "1078.50(b)" is revised to read "1078.50(c)".

2. In § 1078.50, paragraph (b) is redesignated paragraph (c) and the introductory text and the present paragraph (a) are revised to read as follows:

**§ 1078.50 Basic formula and class prices.**

Subject to the provisions of §§ 1078.51 and 1078.52 the basic formula and class prices per hundredweight for the month shall be as follows:

(a) *Basic formula price.* The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the Department for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent at the rate of the Chicago butter price times 0.12. The basic formula price shall be rounded to the nearest cent.

(b) *Class I milk price.* The Class I milk price shall be the basic formula price for the preceding month plus $1.25 August through November, $0.85 March through June and $1.05 in other months: *Provided,* That such Class I price shall be increased or decreased, respectively, two cents for each full percent that the adjusted supply-demand ratio computed pursuant to Part 1030 (Chicago) of this chapter is greater or less than 72 percent, but shall not be increased or decreased more than 24 cents because of such adjusted supply-demand ratio: *And provided further,* That for milk received from producers at a pool plant north of the base zone the price otherwise applicable pursuant to this paragraph shall be reduced five cents.

• • • • •

§ 1078.52 [Amended]

3. In § 1078.52 the reference to "§ 1078.50(a)" is revised to read "§ 1078.50(b)".

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: January 1, 1965.

Signed at Washington, D.C., on December 15, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

[F.R. Doc. 64–12976; Filed, Dec. 17, 1964; 8:48 a.m.]

[Milk Order No. 79]

## PART 1079—MILK IN DES MOINES, IOWA, MARKETING AREA

### Order Amending Order

§ 1079.0 Findings and determinations.

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Des Moines, Iowa, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than January 1, 1965. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of the said order are known to handlers. The recommended decision of the Deputy Administrator, Regulatory Programs, was issued October 9, 1964, and the decision of the Assistant Secretary containing all amendment provisions of this order was issued November 3, 1964. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective January 1, 1965, and that it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER (section 4(c), Administrative Procedure Act, 5 U.S.C. 1001–1011).

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Des Moines, Iowa, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

§ 1079.27 [Amended]

1. In § 1079.27(j)(1) the reference "§ 1079.50(a)" is revised to read "§ 1079.50(b)" and the reference "§ 1079.50(b)" is revised to read "§ 1079.50(c)".

2. In § 1079.50, paragraph (b) is redesignated paragraph (c) and the introductory text and the present paragraph (a) are revised to read as follows:

§ 1079.50 Basic formula and class prices.

Subject to the provisions of §§ 1079.51 and 1079.52 the basic formula and class prices per hundredweight for the month shall be as follows:

(a) *Basic formula price.* The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the Department for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent at the rate of the Chicago butter price times 0.12. The basic formula price shall be rounded to the nearest cent.

(b) *Class I milk price.* The Class I milk price shall be the basic formula price for the preceding month plus $1.45 August through November, $1.05 March through June and $1.25 in other months: *Provided,* That such Class I price shall be increased or decreased, respectively, two cents for each full percent that the adjusted supply-demand ratio computed pursuant to Part 1030 (Chicago) of this chapter is greater or less than 72 percent, but shall not be increased or decreased more than 10 cents because of such adjusted supply-demand ratio: *And provided further,* That for milk received from approved dairy farmers at an approved plant outside the base zone the price otherwise applicable pursuant to this paragraph shall be reduced 10 cents.

• • • • •

§ 1079.52 [Amended]

3. In § 1079.52(a) the reference to "§ 1079.50" is revised to read "§ 1079.50(b)".

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: January 1, 1965.

Signed at Washington, D.C., on December 15, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

[F.R. Doc. 64–12977; Filed, Dec. 17, 1964; 8:48 a.m.]

# Title 8—ALIENS AND NATIONALITY

## Chapter I—Immigration and Naturalization Service, Department of Justice

## PART 103—POWERS AND DUTIES OF SERVICE OFFICERS

### Denials, Appeals, and Precedent Decisions

The following amendment to Chapter I of Title 8 of the Code of Federal Regulations is hereby prescribed:

The headnote to § 103.3 is amended to read "Denials, appeals, and precedent decisions" and the following sentence is added at the end thereof. Section 103.3 reads as follows:

§ 103.3 Denials, appeals and precedent decisions.

• • • Those decisions of the Service, the Board of Immigration Appeals (§ 3.1 (g) of this chapter), and the Attorney General which are of precedential value are published and may be purchased from the United States Government Printing Office, Washington, D.C., 20402, or examined at the principal field offices of the Service.

(Sec. 103, 66 Stat. 173; 8 U.S.C. 1103)

This order shall become effective on the date of its publication in the FEDERAL REGISTER. Compliance with the provisions of section 4 of the Administrative Procedure Act (60 Stat. 238; 5 U.S.C. 1003) as to notice of proposed rule making and delayed effective date is unnecessary in this instance because the rule prescribed by the order relates to agency procedure.

Dated: December 14, 1964.

RAYMOND F. FARRELL,
*Commissioner of Immigration and Naturalization.*

[F.R. Doc. 64–12978; Filed, Dec. 17, 1964; 8:48 a.m.]

# Title 33—NAVIGATION AND NAVIGABLE WATERS

## Chapter I—Coast Guard, Department of the Treasury

SUBCHAPTER D—NAVIGATION REQUIREMENTS FOR CERTAIN INLAND WATERS

[CGFR 64–81]

## PART 80—PILOT RULES FOR INLAND WATERS

### Day Signals and Lights for Dredges

The provisions of 33 CFR 80.21 specify the day signals and lights for "self-propelling suction dredges under way and engaged in dredging operations." The purpose of the amendment to 33 CFR 80.21 is to provide for a new type of operation, i.e., for non-self-propelled suction dredges under way and engaged in dredging operations while being pushed ahead by a towboat. The text of 33 CFR 80.21 is revised so the wording includes all dredges under way and engaged in dredging operations, whether self-propelled or non-self-propelled. This change in 33 CFR 80.21 became necessary when it was found that a non-self-propelled dredge (250-foot barge) was engaged in dredging operations while being pushed ahead by a towboat, and the vessels displayed only the lights of a towboat and tow being pushed ahead. Because of its encumbered navigation when performing dredging activities, it was deemed imperative that the mariners in the area should be made aware of this "unit's" limited maneuvering capability. Therefore, by a letter to the owner of this dredge permission was granted to show a central range of white lights and the special red "dredging" lights, while the "unit" is under way and engaged in dredging operations, as well as the proper sidelights for both the barge and towboat. In addition, the arc of visibility of the two red lights in a vertical line at the stern was changed from 4 to 12 points to complete, with the 20-point forward red lights, coverage around the horizon.

Since 1914 the provisions regarding "lights and day signals for vessels, dredges of all types, and vessels working on wrecks and obstructions, etc.," in 33 CFR 80.18 to 80.31a have been identical with the rules for Western Rivers in 33 CFR 95.51 to 95.66 and similar Department of the Army regulations applicable on the Great Lakes in 33 CFR 201.1 to 201.16. The amendment to 33 CFR 80.21 in this document was concurred in by the Corps of Engineers, Department of the Army, but it was decided this change should only answer the immediate problem. Therefore, similar amendments are not included at this time revising the provisions for suction dredges in 33 CFR 95.55 (Western Rivers) and 33 CFR 201.5 (Great Lakes).

The National Association of River and Harbor Contractors was also notified of this change in 33 CFR 80.21 and no adverse comments were received.

Because of the necessity to provide identifying day signals and lights for a non-self-propelled dredge under way while being pushed ahead and engaged in dredging operations in inland waters, an emergency exists as contemplated by section 157(b) in Title 33, U.S. Code, and by section 1003(a) in Title 5, U.S. Code, and it is hereby found that compliance with the provisions of such laws respecting notice of proposed rule making, public rule making procedures thereon and effective date requirements is exempted by specific provisions in such laws.

The amendment to 33 CFR 80.16a(f) corrects a mistake in Coast Guard document CGFR 64–21 (F.R. document 64–4307) published in the FEDERAL REGISTER of April 30, 1964 (29 F.R. 5731). The amendment to § 80.16a(f) inserts the word "length" after the word "hawser" so the phrase will read "with a hawser length, between vessels, of less than 75 feet." In addition, the instruction for the amendment to 33 CFR 80.17(b)(3) is corrected by changing the identification of subparagraph from a non-existent paragraph "(e)(3)" to "(b)(3)."

The authority for 33 CFR Part 80 is amended to include the reference to the Treasury Department Order 167–33, which delegates to the Commandant, U.S. Coast Guard, authority to prescribe regulations under the listed statutory authority.

By virtue of the authority vested in me as Commandant, U.S. Coast Guard, by section 632 of Title 14, U.S. Code, and Treasury Department Orders 120, July 31, 1950 (15 F.R. 6521), and 167–33, September 23, 1958 (23 F.R. 7592), and the statutes cited with the regulations below, the following amendments are prescribed and shall become effective upon the date of publication of this document in the FEDERAL REGISTER:

1. The authority for Part 80 is amended to read as follows:

AUTHORITY: The provisions of this part issued under sec. 2, 30 Stat. 102, as amended; 33 U.S.C. 157. Treasury Department Order 167–33, Sept. 23, 1958, 23 F.R. 7592. Other statutory provisions interpreted or applied are cited to text.

2. The introductory sentence only in § 80.16a(f) is amended to read as follows:

§ 80.16a Lights for barges, canal boats, scows and other nondescript vessels on certain inland waters of the Gulf Coast and the Gulf Intracoastal Waterway.

• • • • •

(f) When two or more barges, canal boats, scows, or other vessels of nondescript type not otherwise provided for, are being towed behind a steam vessel in tandem, with a hawser length, between vessels, of less than 75 feet, such vessels shall carry white lights as follows:

• • • • •

(Sec. 2, 30 Stat. 102, as amended; 33 U.S.C. 157. Interpret or apply R.S. 4233A, as amended, sec. 1, 30 Stat. 98, as amended; 33 U.S.C. 353, 178. Treasury Department Orders 120, July 31, 1950, 15 F.R. 6521; and 167–33, Sept. 23, 1958, 23 F.R. 7592)

LIGHTS AND DAY SIGNALS FOR VESSELS, DREDGES OF ALL TYPES, AND VESSELS WORKING ON WRECKS AND OBSTRUCTIONS, ETC.

3. The "note" preceding § 80.18 is amended to read as follows:

NOTE: The regulations in §§ 80.18 to 80.31a are applicable on the harbors, rivers, and inland waters along the Atlantic and Pacific Coasts and the Coast of the Gulf of Mexico as described in § 80.01. Similar regulations in §§ 95.51 to 95.66 are applicable on the "western rivers" as described in § 95.01. Similar Department of the Army (Corps of Engineers) regulations in §§ 201.1 to 201.16 of this title are applicable on the Great Lakes and their connecting and tributary waters as far east as Montreal. The provisions of § 80.21 now apply to all dredges under way and engaged in dredging operations while the similar provisions in §§ 95.55 and 201.5 apply to self-propelled suction dredges under way and engaged in dredging operations.

4. Section 80.21 is amended to read as follows:

§ 80.21 Dredges under way and engaged in dredging operations.

(a) Dredges under way and engaged in dredging operations shall display by day two black balls not less than two feet in diameter and carried in a vertical line not less than three feet nor more than six feet apart, where they can best be seen from all directions. The term "dredging operations" shall include maneuvering into or out of position at the dredging site but shall not include proceeding to or from the site.

(b) By night, self-propelled dredges under way and engaged in dredging operations shall carry, in addition to the regular running lights, two red lights of the same character as the white masthead light, in a vertical line beneath that light. These red lights shall be not less than three feet nor more than six feet apart and the upper red light shall be not less than three feet nor more than six feet below the masthead light. They

shall also carry on or near the stern two red lights in a vertical line not less than three feet nor more than six feet apart, to show through twelve points of the compass; that is, from right astern to six points on each quarter.

(c) By night, a non-self-propelled dredge which is under way and engaged in dredging operations while being pushed ahead by a towboat shall be considered, with such towboat, for the purpose of compliance with Rules of the Road requirements for lights and shapes, as a single vessel. This vessel shall carry the lights described in paragraph (b) of this section, except that both the dredge and towboat shall carry the sidelights normally required for a barge towed by being pushed ahead and a vessel towing, respectively. When not engaged in dredging operations, this unit shall carry the regular lights for vessels towing and being towed.

Dated: December 14, 1964.

[SEAL] W. D. SHIELDS,
*Vice Admiral, U.S. Coast Guard,*
*Acting Commandant.*

[F.R. Doc. 64-12949; Filed, Dec. 17, 1964; 8:45 a.m.]

# Title 21—FOOD AND DRUGS

## Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

### SUBCHAPTER B—FOOD AND FOOD PRODUCTS

### PART 121—FOOD ADDITIVES

### Subpart D—Food Additives Permitted in Food for Human Consumption

SYNTHETIC FLAVORING SUBSTANCES AND ADJUVANTS

No objections were received in response to the notice published in the FEDERAL REGISTER of October 27, 1964 (29 F.R. 14641), proposing that the food additive regulations (21 CFR 121.1164; 29 F.R. 14625) be amended to provide for the safe use in food of certain synthetic flavoring substances and adjuvants. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(d), 72 Stat. 1787; 21 U.S.C. 348(d)) and under the authority delegated to the Commissioner of Food and Drugs by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), § 121.1164(b) is amended as proposed by inserting alphabetically in the list of substances five new items, as follows:

**§ 121.1164 Synthetic flavoring substances and adjuvants.**

* * * * *

(b) * * *

Anisyl phenylacetate.

* * *

delta-Dodecalactone; 5-hydroxydodecanoic acid, deltalactone.

* * *

Isoamyl acetoacetate.

* * *

Isoamyl isobutyrate.

* * *

Sorbitan monostearate.

Any person who will be adversely affected by the foregoing order may at any time within 30 days from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, written objections thereto, preferably in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the foregoing order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 409(d), 72 Stat. 1787; 21 U.S.C. 348(d))

Dated: December 14, 1964.

JOHN L. HARVEY,
*Deputy Commissioner*
*of Food and Drugs.*

[F.R. Doc. 64-12981; Filed, Dec. 17, 1964; 8:48 a.m.]

### PART 121—FOOD ADDITIVES

### Subpart D—Food Additives Permitted in Food for Human Consumption

SODIUM METHYL SULFATE

The Commissioner of Food and Drugs has evaluated data in a petition (FAP 1347) filed by General Foods Corporation, 250 North Street, White Plains, N.Y., and other relevant material, and has concluded that a food additives regulation should issue to prescribe the safety of residual sodium methyl sulfate resulting from the methylation treatment of pectin. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), a new section is added to Subpart D of the regulations, as follows:

**§ 121.1171 Sodium methyl sulfate.**

Sodium methyl sulfate may be present in pectin in accordance with the following conditions.

(a) It is present as the result of methylation of pectin by sulfuric acid and methyl alcohol and subsequent treatment with sodium bicarbonate.

(b) It does not exceed 0.10 percent by weight of the pectin.

Any person who will be adversely affected by the foregoing order may at any time within 30 days from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, written objections thereto, preferably in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1))

Dated: December 11, 1964.

JOHN L. HARVEY,
*Deputy Commissioner*
*of Food and Drugs.*

[F.R. Doc. 64-12980; Filed, Dec. 17, 1964; 8:48 a.m.]

### SUBCHAPTER C—DRUGS

### PART 141—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

### PART 146—GENERAL REGULATIONS FOR THE CERTIFICATION OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

### PART 146a—CERTIFICATION OF PENICILLIN AND PENICILLIN-CONTAINING DRUGS

### Miscellaneous Amendments

Under the authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463 as amended; 21 U.S.C. 357) and delegated to the Commissioner of Food and Drugs by the Secretary (21 CFR 2.90; 29 F.R. 471), the regulations for the certification and tests and methods of assay of antibiotic and antibiotic-containing drugs are amended as follows:

1. Section 146a.1 is renumbered § 146a.113.

2. Part 146a is amended by adding thereto the following new section, which contains the text formerly located in § 146.1-(*l*) (21 CFR 146.1(*l*), 1964 Revision):

**§ 146a.1 Interpretative statements relating to penicillin and penicillin-containing drugs.**

(a) *Penicillin and penicillin-containing drugs intended for treatment or prevention of mastitis in dairy animals by intramammary infusion; dosage limitation.* Whenever the labeling of a penicillin or penicillin-containing drug included in the regulations in this chapter suggests or recommends its use in the prevention or treatment of mastitis in dairy animals by intramammary infusion, the penicillin content of each single dose shall not exceed 100,000 units when used as directed in such labeling.

3. Part 141 is amended by adding thereto the following new section, which contains the text formerly located in § 146.1 (n) and (o) (21 CFR 146.1 (n) and (o), 1964 Revision):

**§ 141.1 Definitions and interpretations applicable to Part 141.**

(a) *Sterility tests; "filling operation" and "sample" defined.* (1) The term "filling operation" when used in connection with samples of a batch required for sterility testing refers to that period of time not longer than 24 consecutive hours during which a homogeneous quantity of a drug is being filled continuously into market-size containers and during which no changes are made in the equipment used for filling. (Short rest periods for operators of the filling equipment and the time required to change operators between consecutive shifts are not considered as a break in continuity of the filling operation.) If more than one filling device is used during the filling operation, the samples shall include immediate containers filled by each device, and each such container shall be identified with a mark corresponding to that assigned to the filling device. If more than one filling operation is required to fill a batch, each container in the sample shall be identified with the number of the operation.

(2) For the purpose of sterility testing, the term "sample" means the total number of containers taken from each filling operation.

(b) *Sterility tests; packaging requirements for samples.* If a batch of a sterile antibiotic is packaged for repacking or for use as an ingredient in the manufacture of another drug, the sample required for sterility testing may be packaged in one container, in lieu of 20 containers, or in two containers in lieu of 40 containers, under the following conditions:

(1) The weight or volume of the sample is equivalent to the composite weight or volume required for a multiple container sample;

(2) The sample is a composite of samples taken from all parts of the batch; and

(3) The sterility test method prescribed for the drug by the regulations in this chapter is "Bacterial membrane filter method" described in § 141.2(e)(1).

Notice and public procedure and delayed effective date are not necessary prerequisites to the promulgation of this order, and I so find, since the changes merely relocate existing regulations for a more logical arrangement.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 507, 59 Stat. 463 as amended; 21 U.S.C. 357)

Dated: December 11, 1964.

JOHN L. HARVEY,
*Deputy Commissioner*
*of Food and Drugs.*

# Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

## Chapter 8—Veterans Administration

### PART 8-7—CONTRACT CLAUSES

### Safety Requirements, Accident Prevention, Etc.

Section 8-7.650-20 is revised as follows:

**§ 8-7.650-20 Safety requirements, accident prevention, etc.**

*Safety Requirements, Accident Prevention, Etc.*

(a) In order to protect the lives and health of employees and others, the Contractor in performance of this contract shall take such safety precautions as are required by insurance underwriters, and shall comply with all provisions of Department of Army, Corps of Engineers, U.S. Army, "General Safety Requirements," EM 385-1-1, 13 March 1958, as amended prior to the date of this contract. If compliance with a provision of said "General Safety Requirements," would cause the Contractor to be in noncompliance with a requirement of the insurance underwriters, then the requirement of the insurance underwriters, in that specific instance, shall govern.

(b) The Contractor shall maintain an accurate record of, and shall report to the Contracting Officer through the Resident Engineer in the manner and on forms prescribed by the Contracting Officer, all cases of death, occupational disease, and traumatic injury arising out of, or in course of performance of this contract.

(c) The Contracting Officer, through the Resident Engineer, will notify the Contractor in writing of any noncompliance with the General Safety Requirements and necessary corrective action to be taken. Upon receipt of such notice, the Contractor will immediately correct the conditions to which attention has been directed.

(d) If the Contractor fails to promptly comply with the Contracting Officer's demand for necessary corrective action, as mentioned in the preceding paragraph, the Contracting Officer may order a stoppage of all or any part of the work and have corrective action taken by others and the cost of such corrective action shall be charged to the Contractor. Work stoppage(s), issued hereunder, will be lifted when necessary corrective action has been taken by the Contractor or the Government. Work stoppage(s) issued hereunder shall not be the basis of a claim for time lost or for any delays directly or indirectly attributable to Contractor's failure to comply with the above specified safety requirements.

(e) The General Safety Requirements, mentioned above, may be obtained from the Contracting Officer.

(Sec. 205(c), 63 Stat. 390, as amended, 40 U.S.C. 486(c); sec. 210(c), 72 Stat. 1114, 38 U.S.C. 210(c))

This regulations is effective 45 days following publication in the FEDERAL REGISTER, but may be observed earlier.

Approved: December 14, 1964.

By direction of the Administrator.

[SEAL] A. H. MONK,
*Associate Deputy Administrator.*

# Proposed Rule Making

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### [ 7 CFR Part 1003 ]

[Docket No. AO–293–A9]

### MILK IN WASHINGTON, D.C. MARKETING AREA

### Notice of Hearing on Proposed Amendments to Tentative Marketing Agreement and Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of a public hearing to be held at the Washingtonian Motel, U.S. Interstate Route 70 at Shady Grove Road, Gaithersburg, Md., beginning at 10:00 a.m. e.s.t., on January 6, 1965, with respect to proposed amendments to the tentative marketing agreement and to the order, regulating the handling of milk in the Washington, D.C., marketing area.

The public hearing is for the purpose of receiving evidence with respect to the economic and marketing conditions which relate to the proposed amendments, hereinafter set forth, and any appropriate modifications thereof, to the tentative marketing agreement and to the order.

The proposed amendments, set forth below, have not received the approval of the Secretary of Agriculture.

Proposed by Maryland and Virginia Milk Producers' Association, Inc.

*Proposal No. 1.* Delete § 1003.16(d) and substitute therefor:

(d) "Base Milk" means milk received from a producer by a pool handler during any of the months of April through June of each year which is not in excess of such producer's daily average base computed pursuant to § 1003.63 multiplied by the number of days during the month.

*Proposal No. 2.* In § 1003.63 "Computation of Base for each Producer" the provision in the introductory text is revised and a new paragraph (e) is added to read as follows: "*Provided*, That in no event shall the number of days used to compute a producer's base pursuant to this part be less than 154, except as set forth in paragraph (e) of this section: • • •"

• • • • • •

(e) For any producer whose milk has been directed to be held off of the Washington, D.C., market during the period of July 1, 1964, through December 31, 1964, because it contained residues of pesticide, the quantity of milk receipts shall be the total pounds of milk received from such producer during such July–December period by pool handlers divided by days of actual shipment, or the previous year's base, whichever is greater.

*Proposal No. 3.* Delete § 1003.64 in its entirety and substitute the following:

**§ 1003.64 Base rules.**

The following rules shall apply in connection with the establishment of bases:

(a) A base computed pursuant to § 1003.63 or as designated pursuant to paragraph (c) of this section may be transferred in its entirety to any other person upon written application to the market administrator on or before the second day of the month following the month of transfer. Such application shall be on a form approved by the market administrator and shall be signed by the base holder, or his heirs, or assigns and by the person to whom such base is to be transferred: *Provided*, That if a base is held jointly, the entire base shall be transferable only upon receipt of such application signed by all joint holders or their heirs, or assigns.

(b) If a producer operates more than one farm, and milk is received from each at a pool plant or by a cooperative association in its capacity as a handler pursuant to § 1003.10 (b) or (c), he shall establish a separate base with respect to producer milk delivered from each such farm;

(c) Only one base shall be allocated with respect to milk produced by one or more persons where the dairy farm is jointly owned or operated; *Provided*, That in the case of a base established jointly, if a copy of the partnership agreement setting forth as a percentage of the total the interests of the partners in the base is filed with the market administrator before the end of the base-making period, then upon termination of the partnership agreement each partner will be entitled to his stated share of the base to hold in his own right, or to transfer as provided in paragraph (a) of this section (including transfer to a partnership of which he is a member) such division with respect to any member of the partnership to be effective as of the end of any month during which an application for such division signed by each member is received by the market administrator.

Proposed by Sealtest Foods Division, National Dairy Products Corporation.

*Proposal No. 4.* In the first sentence of § 1003.15, delete the words "(except a plant fully subject to the pricing provisions of another Federal order)" and substitute therefor: "• • • (except a plant of a producer-handler or a plant where such milk would be priced as producer milk subject to the provisions of another order issued pursuant to the Act)",

Proposed by Breakstone Foods, Division National Dairy Products Corporation.

*Proposal No. 5.* Amend § 1003.16(a) by adding the words "yogurt (containing less than 3 percent butterfat)" after the word "except" in the second parenthesis.

*Proposal No. 6.* Make any other change in the Order necessary to clearly define yogurt as a Class II product.

Proposed by the Dairy Division, Agricultural Marketing Service.

*Proposal No. 7.* Make such changes as may be necessary to make the entire marketing agreement and the order conform with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and the order may be procured from the Market Administrator, Edward L. St. Clair, Post Office Box 9245, Rosslyn Station, Arlington, Va., 22209, or from the Hearing Clerk, Room 112, Administration Building, United States Department of Agriculture, Washington, D.C. 20250, or may be there inspected.

Signed at Washington, D.C., on December 15, 1964.

CLARENCE H. GIRARD,
*Deputy Administrator.*

[F.R. Doc. 64–12995; Filed, Dec. 17, 1964; 8:50 a.m.]

## FEDERAL AVIATION AGENCY

### [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 63–WE–92]

### CONTROL ZONE, CONTROL AREA EXTENSION AND TRANSITION AREA

### Proposed Alteration, Revocation and Designation

The Federal Aviation Agency is considering amendments to Part 71 [New] of the Federal Aviation Regulations which would alter the controlled airspace in the Redmond, Oregon, terminal area.

The following controlled airspace is presently designated in the Redmond, Oreg., terminal area:

1. The Redmond control zone is designated within a 5-mile radius of Roberts Field (latitude 44°15'11" N., longitude 121°08'55" W.) and within 2 miles either side of the Redmond VOR 090° radial extending from the 5-mile radius zone to the VOR.

2. The Redmond control area extension is designated as that airspace within 5 miles either side of the Redmond RR NW and SE courses extending from 17 miles NW to 15 miles SE of the RR, and within 5 miles either side of the Redmond VOR 090° and 270° radials extending from 17 miles W to 8 miles E of the VOR.

The FAA, having completed a comprehensive review of the terminal airspace structure requirements in the Redmond, Oregon, terminal area, including studies attendant to the implementation of the provisions of CAR Amendments 60–21/60–29, has under consideration the following airspace actions:

1. Redesignate the Redmond control zone as that airspace within a 5-mile radius of Roberts Field, Redmond, Oreg. (latitude 44°15'10" N., longitude 121°08'55" W.).

2. Revoke the Redmond control area extension.

3. Designate the Redmond transition area as that airspace extending upward from 700 feet above the surface within 2 miles each side of the Redmond VOR 089° and 269° True radials, extending from the arc of a 5-mile radius circle centered on Roberts Field, Redmond, Oreg. (latitude 44°15'10" N., longitude 121°08'55" W.) to 8 miles west of the VOR; within 2 miles each side of the 230° True bearing from Roberts Field, Redmond, Oreg., extending from the arc of a 5-mile radius circle centered on Roberts Field to 10 miles southwest of the airport; within 2 miles each side of the Redmond VOR 162° True radial, extending from the VOR to 5 miles south of the VOR and within 2 miles each side of the 302° True bearing from the Redmond radio beacon (radio range to be converted to radio beacon in March 1965), extending from the arc of a 5-mile radius circle centered on Roberts Field to 8 miles NW of the RBN; that airspace extending upward from 1,200 feet above the surface within 8 miles north and 5 miles south of the Redmond VOR 269° True radial, extending from the VOR to 12 miles west of the VOR; within 14 miles northeast and 2 miles southwest of the Redmond VOR 122° and 302° True radials, extending from 18 miles northwest to 15 miles southeast of the VOR and within 6 miles west and 9 miles east of the Redmond VOR 189° True radial, extending from the VOR to 19 miles south of the VOR."

The floors of the airways that traverse the transition area proposed herein would automatically coincide with the floor of the transition area.

The action proposed herein would, in part, reduce the size of the present Redmond control zone by revoking the west extension.

The portion of the proposed Redmond transition area with a floor of 700 feet above the surface would provide protection for aircraft executing the portions of prescribed instrument approach and departure procedures conducted beyond the limits of the Redmond control zone and below the floor of the proposed 1,200-foot floor area. The portion of the proposed transition area with a floor of 1,200 feet above the surface would provide protection for aircraft executing approach and holding procedures conducted within the Redmond terminal area above 1,500 feet above the surface.

At a future date, after adjacent terminal areas have been examined under the CAR 60–21/29 implementation program, it is planned that the floors of VOR airways connecting with Redmond will be raised to 1,200 feet or more above the surface.

Certain minor revisions to prescribed instrument procedures would accompany the actions proposed herein, but operational complexities would not be introduced nor would aircraft performance characteristics or established landing minimums be adversely affected. Specific details of the changes to procedures and minimum instrument flight rules altitudes that would be required may be examined by contacting the Chief, Airspace Utilization Branch, Air Traffic Division, Western Region, Federal Aviation Agency, 5651 West Manchester Avenue, Post Office Box 90007, Airport Station, Los Angeles, Calif., 90009.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Western Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 5651 West Manchester Avenue, Post Office Box 90007, Airport Station, Los Angeles, Calif., 90009. All communications received within thirty days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Agency, 5651 West Manchester Avenue, Los Angeles, Calif., 90045.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958, as amended (72 Stat. 749; 49 U.S.C. 1348).

Issued in Los Angeles, Calif., on December 11, 1964.

JOSEPH H. TIPPETS,
*Director, Western Region.*

By: A. E. Horning.

[F.R. Doc. 64–12956; Filed, Dec. 17, 1964; 8:45 a.m.]

### [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 64–EA–55]

### FEDERAL AIRWAY

### Proposed Revocation

The Federal Aviation Agency is considering an amendment to Part 71 [New] of the Federal Aviation Regulations which would revoke Red Federal airway No. 25 from the Baker, Maine Intersection to the United States-Canadian border.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Agency, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y., 11430. All communications received within 45 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

There is not a sufficient amount of aircraft using Red Federal airway No. 25 in the United States to justify its retention. An extension of VOR Federal airway No. 314 from Millinocket, Maine, to Quebec, Canada, presently is under consideration (airspace docket 64–WA–68). If this airway is designated it would remove a requirement for R–25. This proposal has been coordinated with the Canadian Department of Transport.

This amendment is proposed under section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Washington, D.C., on December 11, 1964.

H. B. HELSTROM,
*Acting Chief, Airspace Regulations and Procedures Division.*

[F.R. Doc. 64–12957; Filed, Dec. 17, 1964; 8:45 a.m.]

### [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 64–SW–50]

### FEDERAL AIRWAY

### Proposed Alteration

The Federal Aviation Agency is considering a proposal to amend Part 71 [New] of the Federal Aviation Regulations which would realign VOR Federal airway No. 198, in part, from Fort Stockton, Tex., to the Comfort, Tex., Intersection, via Junction, Tex., and which would revoke the Rock Springs, Tex., VOR as a low altitude reporting point.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southwest Region, Attention: Chief, Air Traffic Division, Federal Aviation Agency, Post Office Box 1689, Fort Worth, Tex., 76101. All communications received within 45 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendments. The proposals contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The present alignment of V–198 between Fort Stockton and San Antonio

via Rock Springs, Tex., is not required for air traffic control purposes. The action proposed, herein, would combine the traffic on V–222 and V–198 between Fort Stockton and San Antonio into a single airway. The mileage via Junction in lieu of Rock Springs would be essentially the same. If this segment of V–198 is realigned, the Rock Springs VOR would no longer be required for air traffic control purposes as a low altitude reporting point.

These amendments are proposed under section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Washington, D.C., on December 11, 1964.

H. B. HELSTROM,
*Acting Chief, Airspace Regulations and Procedures Division.*

[F.R. Doc. 64–12958; Filed, Dec. 17, 1964; 8:46 a.m.]

# SMALL BUSINESS ADMINISTRATION

## [ 13 CFR Part 107 ]

## SMALL BUSINESS INVESTMENT COMPANIES

### Notice of Proposed Rule Making

Notice is hereby given that pursuant to the authority contained in section 308 of the Small Business Investment Act of 1958, Public Law 85–699, 72 Stat. 694, as amended, it is proposed to amend, as set forth below, Part 107 of Subchapter B, Chapter I, of Title 13 of the Code of Federal Regulations, as revised in 29 F.R. 16946, by adding thereto two new §§ 107.750 and 107.751. Prior to the final adoption of such amendments, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, in triplicate, to the Investment Division, Small Business Administration, Washington 25, D.C., within a period of fifteen (15) days of the date of this notice in the FEDERAL REGISTER.

*Information.* Proposed new § 107.750 would authorize Licensees to acquire equity securities of a small business concern issued by it or sold by or through an underwriter in connection with a public offering by such concern. The purchase would have to be consummated within thirty (30) days after the offering is lawfully made. The securities could not be offered for the account of persons other than the issuer. The fact that title to the securities may rest temporarily with the underwriter or that, technically, the sale to the Licensee is being made by the underwriter rather than the issuer-concern would be deemed immaterial.

Section 107.751 would permit Licensees to maintain a Special Discretionary Portfolio. Under proposed paragraph (a), they could invest and have outstanding in such portfolio up to 20 percent of their total adjusted assets. "Total adjusted assets" means total assets reduced by the aggregate outstanding balance of SBA loans received by the Licensee from SBA under § 107.402 and from other sources with terms of less than 1 year. The 20 percent maximum would be computed as of the date of the Licensee's most recently required financial report to SBA (March 31 or September 30). Under proposed paragraph (b), Licensees would be permitted to make the following types of investments up to the 20 percent maximum authorized by paragraph (a), notwithstanding provisions of Part 107 to the contrary, except for restrictive or prohibitive provisions which are mandatorily required under the Act:

(1) *Amortization at rate of 40 percent of declining balance per annum.* Debt or equity securities with a minimum term of 5 years to be amortized at a rate not exceeding 40 percent per annum of the declining principal balance outstanding, except for the final year of the term.

(2) *Short-term financing to portfolio concern as incidental part of long-term financing by Licensee.* Debt or equity financing evidencing an indebtedness with a term of less than 5 years to a portfolio small concern as an incidental part of long-term financing actually disbursed by the Licensee, but not to exceed 25 percent of such long-term financing.

(3) *Financing small insurance companies.* Debt or equity financing of small insurance companies which are duly licensed and operating under State or Federal law.

(4) *Equity securities purchased from non-issuer as incidental part (not exceeding 25 percent) of direct financing.* Equity securities purchased in the open market or from individuals as an incidental part of financing provided directly to a small concern, but not to exceed 25 percent of the direct financing.

Proposed paragraph (c) makes it clear that SBA may from time to time, by amendment of the Regulations, exempt other types of investments from Part 107 provisions and permit them within the 20 percent maximum prescribed by paragraphs (a) and (b).

It is proposed to amend the Regulations Governing Small Business Investment Companies as follows:

1. By adding a new § 107.750, which would read as follows:

**§ 107.750 Purchases from underwriters.**

A Licensee may purchase debt or equity securities issued by a small business concern or sold by or through an underwriter in connection with a public offering thereof by such small business concern: *Provided, however,* That such purchase is consummated not later than 30 days after such offering is lawfully made: *And provided further,* That the securities are not offered for the account of persons other than the issuer.

2. By adding a new § 107.751, which would read as follows:

**§ 107.751 Special Discretionary Portfolio.**

(a) *Authorization.* A Licensee may establish and maintain a Special Discretionary Portfolio. The maximum amount which may be invested and outstanding in such portfolio at any time shall not exceed 20 percent of the Licensee's total adjusted assets as of the date of its most recently required financial report to SBA. "Total adjusted assets" means total assets reduced by the outstanding aggregate balance of SBA loans under § 107.402 and other loans having terms of less than 1 year.

(b) *Investments permitted.* Notwithstanding otherwise applicable provisions of Part 107, except restrictive provisions required under the Act, a Licensee may make the following types of investments up to the maximum authorized by paragraph (a) of this section:

(1) Long-term debt or equity securities evidencing a debt with a minimum term of 5 years amortized at a rate not exceeding 40 percent per annum of the declining principal balance outstanding, except for the final year of the term.

(2) Debt or equity financing with a term of less than 5 years to a portfolio small business concern when it constitutes an incidental part of long-term financing actually disbursed by the Licensee to such concern. Debt or equity financing with a term of less than 5 years shall not be deemed an incidental part when it exceeds 25 percent of the total amount of such long-term financing.

(3) Debt or equity financing of small insurance companies duly licensed and operating under applicable State or Federal law.

(4) Equity securities purchased in the open market or from individuals as an incidental part of financing provided directly to a small business concern. Such purchase shall not be deemed an incidental part if it exceeds 25 percent of the direct financing.

(c) *Further exemptions.* SBA may from time to time exempt, by amendment of these regulations in this part, other types of investments from the provisions of this Part 107 and permit them within the 20 percent maximum prescribed by paragraphs (a) and (b) of this section.

Dated: December 16, 1964.

EUGENE P. FOLEY,
*Administrator.*

# Notices

# DEPARTMENT OF THE INTERIOR

## Bureau of Land Management

## ALASKA

### Notice of Proposed Withdrawal and Reservation of Lands

DECEMBER 10, 1964.

The Bureau of Commercial Fisheries has filed an application, Serial Number Anchorage 061931, for the withdrawal of the lands described below, from all forms of appropriation under the public land laws. The applicant desires the land for an administrative site for shellfish investigations.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, 555 Cordova Street, Anchorage, Alaska, 99501.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, to eliminate lands needed for purposes more essential than the applicant's and to reach agreement on the concurrent management of the lands and their resources.

He will also prepare a report for the consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn as requested by the Bureau of Commercial Fisheries.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The lands involved in the application are:

Beginning at a point, at approximate latitude 59°27'40" N., longitude 151°33'30" W. on the south shore of Kasitsna Bay on Kenai Peninsula and from which corner No. 2, U.S. Survey 2675 bears approximately North 390 feet; thence South approximately 950 feet to a point; West approximately 1,800 feet to a point; North approximately 670 feet to a point on the line of mean high tide; thence By meanders Easterly and Northerly along the line of mean high tide to the point of beginning.

The area described aggregates approximately 25.0 acres.

JAMES W. SCOTT,
*Manager, Anchorage District and Land Office.*

## ELANCO PRODUCTS CO., DIVISION OF ELI LILLY AND CO.

### Notice of Withdrawal of Petition for Food Additive Tylosin and 3-Nitro-4-Hydroxyphenylarsonic Acid

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b), 72 Stat. 1786; 21 U.S.C. 348(b)), the following notice is issued:

In accordance with § 121.52 *Withdrawal of petitions without prejudice* of the procedural food additive regulations (21 CFR 121.52), Elanco Products Company, a division of Eli Lilly and Company, Indianapolis 6, Ind., has withdrawn its petition (FAP 1068), published in the FEDERAL REGISTER of August 23, 1963 (28 F.R. 9329), proposing the issuance of a regulation to provide for the use of tylosin and 3-nitro-4-hydroxyphenylarsonic acid in swine feed for growth promotion and feed efficiency.

The withdrawal of this petition is without prejudice to a future filing.

Dated: December 11, 1964.

MALCOLM R. STEPHENS,
*Assistant Commissioner for Regulations.*

# CIVIL AERONAUTICS BOARD

[Docket No. 15353; Order E-21586]

## INTERNATIONAL AIR TRANSPORT ASSOCIATION

### Order Relating to Cargo Rates

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 14th day of December 1964.

Agreement adopted by the Traffic Conferences of the International Air Transport Association at meetings in Athens relating to cargo rates; Docket 15353, Agreement C.A.B. 18081, R-1 through R-13.

There has been filed with the Board, pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations, an agreement between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA), and adopted at the Athens Traffic Conference meetings (October 1964). The agreement has been assigned the above-designated C.A.B. Agreement number.

For the most part, the resolutions in question are designed to effect improvements in IATA procedures with respect to cargo rate matters. The carriers have agreed that passenger and cargo conferences should be separated and held in alternate years. To this end, the agreement provides for the revalidation of existing cargo rate structures in all conference areas, now scheduled to expire March 31, 1965, for a five-month period through August 31, 1965. In this connection, it is our understanding that a composite cargo conference will be held next spring to negotiate world-wide rates for a two-year period beginning September 1, 1965. The agreement further provides for a revision in existing specific commodity rates board machinery so as to place under a single committee all joint conference specific commodity rates. It is our view that the revisions are reasonable and desirable from a practical and administrative standpoint. The establishment of a single committee with full authority to deal with specific commodity rates seems entirely appropriate in view of the interrelationship of rates involved. We will therefore approve the resolutions in question. We are, however, imposing essentially the same conditions as are attached to the existing commodity rates board machinery with respect to the submission of Minutes and Reports of committee meetings and the filing with, and approval by, the Board of rates agreed to prior to their being placed in effect.

The agreement also proposes changes in the containers program. Among other things, the revisions to be applicable on the North Atlantic and North and Central Pacific routes provide for: (1) A reduction in the minimum capacity requirements for the registration of containers and pallets owned by non-members from 18 cubic feet to 12 cubic feet to better accommodate their use in combination aircraft and (2) a straight reduction of 12 percent in charges for consignments sent in containers owned by non-members which have been approved and registered by the Containers Board, provided the total weight (or volume) is not less than 220 pounds. The present formula provides that charges will be based on the weight (or volume) less the weight of the container or pallet, or less 10 percent of gross weight (including the container or pallet), whichever results in the higher charge, and thus establishes a floor based on the net weight of the shipment without the container or pallet. The discount now proposed will in some degree offer a price incentive to shippers to use containers and pallets.

Although the rate incentive will result in lower rates for shipments in containers than for shipments not in containers, we believe the potential for cost savings to the carriers, increased efficiencies, and added protection from pilferage warrants the differential in price on an experimental basis. As in the case of most other cargo resolutions here involved, the resolution will expire on August 31, 1965.

We are conditioning our approval of the Containers Board (Resolution 520) so as to require the submission of the filing of Minutes or Reports of its meetings and also copies of the Register of Approved Containers or Pallets. The Containers Board is required to approve all applications for registration of containers and pallets, which registration is essential for eligibility for the incentive discount. In this connection, one forwarder has complained that absent the provision for automatic approval of containers owned by non-members, which was eliminated by mail-vote action, the Containers Board may act capriciously in denying approval of some applications while granting others. The complainant did not allege that the Containers Board has acted in this manner. Such a possibility does exist, but we believe that the discriminatory treatment of applications would only forestall the development of a sound containers program and is unlikely. The Containers Board is expected to have criteria and to evaluate applications on a nondiscriminatory basis. The requirement for the submission of Containers Board Minutes will afford the Board an opportunity to review the actions of the Containers Board and take any action that might be indicated.

As an additional point, it appears from the Cargo Minutes that Working or Policy Groups, e.g., The Cargo Agency Policy Sub-Committee, will concern themselves with various problems preparatory to the Cargo Conference to be held next spring. As we have indicated in discussions and in correspondence with the United States carriers, pertaining to documentation, we will expect that copies of reports and recommendations of such groups be submitted to the Board at the time of their circulation among IATA members.

The Board, acting pursuant to sections 102, 204(a) and 412 of the Act, makes the following findings:

1. The Board finds that on the basis of all facts presently known, the following resolutions contained in Agreement C.A.B. 18081, do not affect air transportation within the meaning of the Act:

| CAB No. | IATA No. | Title | Application |
|---|---|---|---|
| R-1 | 001c | Special Effectiveness Resolution—Cargo Revalidating and Amending insofar as it relates to: | |
| | | 590n—Specific Commodity Rates—South Atlantic | 1/2 |
| R-2 | 002a | Cargo Revalidation Resolution insofar as it relates to: | |
| | | 115g—Meeting Non-IATA Cargo Competition between Europe and the Middle East. | 2 |
| | | 203c—Reduced Fares for Consolidators | 2 |
| | | 501—Minimum Charges for Cargo | 2 |
| | | 511a—Live Animals Other than Monkeys and Primates | 2 |
| R-3 | 003a | Rescission Resolution—Cargo insofar as it relates to: | |
| | | 590—Commodity Rates Board | 2 |
| | | 590a—Specific Commodity Rates | 2 |
| | | 590b—Application Form for Specific Commodity Rate | 2 |
| | | 590r—Specific Commodity Rates Board—Amending | 2 |
| | | 590n—Specific Commodity Rates—South Atlantic | 1/2 |
| R-6 | 512c | Charge for Preparation of Air Waybill—Amending | 2 |
| R-11 | 590 | Specific Commodity Rates Committee | 2 |

2. The Board does not find the following resolutions contained in Agreement C.A.B. 18081 to be adverse to the public interest or in violation of the Act:

| CAB No. | IATA No. | Title | Application |
|---|---|---|---|
| R-1 | 001c | Special Effectiveness Resolution—Cargo-Revalidating and Amending [1] | 1/2; 1/2/3. |
| R-2 | 002a | Cargo Revalidation Resolution [1] | Worldwide. |
| R-3 | 003a | Rescission Resolution—Cargo [1] | 2; 3; 1/2; 2/3; 3/1; 1/2/3. |
| R-4 | 502 | Low Density Cargo—Amending | Worldwide. |
| R-5 | 511 | Monkeys and Primates—Amending | 2; 3; 2/3; 3/1; 1/2/3. |
| R-6 | 512c | Charge for Preparation of Air Waybill—Amending | 3; 1/2. |
| R-8 | 521 | Use of Containers and Pallets—Amending | Worldwide. |
| R-9 | 557 | Joint Conference 123 Cargo Rates—Readopting and Amending. | 1/2/3. |
| R-13 | 590f | Commodity Rates Board—Parts, Accessories and Supplies—Amending. | 1. |

[1] Except that portion over which jurisdiction is disclaimed as noted in finding paragraph 1.

3. The Board does not find the following resolutions contained in Agreement C.A.B. 18081 to be adverse to the public interest or in violation of the Act, provided that approval thereof is subject to the conditions specified with respect to each:

| CAB No. | IATA No. | Title | Application |
|---|---|---|---|
| R-7 | 520 | Containers Board—Amending Provided that copies of Minutes and/or Reports of meetings shall be submitted to the Board, as well as copies of Registers of Approved Containers and Pallets at the time of their circulation among members. | Worldwide. |
| R-10 | 590 | Specific Commodity Rates Committee | 1/2; 2/3; 3/1; 1/2/3. |
| R-12 | 590 | Specific Commodity Rates Committee | 3. |

*Provided*, That:

(a) With respect to R-10 which is applicable in Joint Conferences, copies of Minutes or Reports of meetings shall be submitted to the Board at the conclusion of meetings, as well as copies of all notices and status reports at the time of circulation among members.

(b) Rates established pursuant to said resolutions which are applicable in air transportation as defined by the Federal Aviation Act of 1958, or which are combinable with rates in air transportation, shall be filed with the Board under section 412 of the Act and approved by it prior to being placed in effect;

(c) The Board will not exercise jurisdiction with respect to rates adopted pursuant to said resolutions except as provided in (b) above.

*Accordingly, it is ordered*, That:

1. Jurisdiction over that portion of Agreement C.A.B. 18081 set forth in finding paragraph 1 is disclaimed;

2. That portion of Agreement C.A.B. 18081 set forth in finding paragraph 2 is approved; and

3. That portion of Agreement C.A.B. 18081 set forth in finding paragraph 3 is approved subject to the conditions stated therein.

Any air carrier party to the agreement, or any interested person, may, within 15 days from the date of service of this order, submit statements in writing containing reasons deemed appropriate, together with supporting data, in support of or in opposition to the Board's action herein. An original and nineteen copies of the statements should be filed with the Board's Docket Section. The Board may, upon consideration of any such statements filed, modify or rescind its action herein by subsequent order.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HAROLD R. SANDERSON,
*Secretary.*

[F.R. Doc. 64-12990; Filed, Dec. 17, 1964; 8:49 a.m.]

[Docket No. 15353; Order E-21588]

## INTERNATIONAL AIR TRANSPORT ASSOCIATION

### Order Relating to Specific Commodity Rates

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 14th day of December 1964.

Agreements adopted by Traffic Conference 1 and Joint Conference 1-2 of the International Air Transport Association relating to specific commodity rates; Docket 15353, Agreement C.A.B. 17666, R-66 through R-74; Agreement C.A.B. 17868, R-17.

There have been filed with the Board, pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations, agreements between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of Traffic Conference 1 and Joint Conference 1-2 of the International Air Transport Association (IATA), and adopted pursuant to the provisions of Resolution 590 (Commodity Rates Board).

The agreements, adopted pursuant to unprotested notices to the carriers and promulgated in IATA memoranda, name additional specific commodity rates as set forth in the attachment hereto.[1]

The Board, acting pursuant to sections 102, 204(a) and 412 of the Act, does not find the subject agreements to be adverse to the public interest or in violation of the Act, provided that approval thereof is conditioned as hereinafter ordered.

*Accordingly, it is ordered:*

That Agreement C.A.B. 17666, R-66 through R-74, and C.A.B. 17868, R-17, be approved, provided that such approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publication.

Any air carrier party to the agreements, or any interested person, may, within 15 days from the date of service of this order, submit statements in writing containing reasons deemed appropriate, together with supporting data, in support of or in opposition to the Board's action herein. An original and nineteen copies of the statements should be filed with the Board's Docket Section. The Board may, upon consideration of any

[1] Filed as part of original document.

such statements filed, modify or rescind its action herein by subsequent order.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HAROLD R. SANDERSON, *Secretary.*

## REOPENED SERVICE TO SPOKANE CASE

### Notice of Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that hearing in the above-entitled proceeding is assigned to be held on January 27, 1965, at 10:00 a.m., e.s.t., in Room 726, Universal Building, Florida and Connecticut Avenues, NW., Washington, D.C., before the undersigned Examiner.

Dated at Washington, D.C., December 15, 1964.

[SEAL] THOMAS L. WRENN, *Associate Chief Examiner.*

[F.R. Doc. 64-12993; Filed, Dec. 17, 1964; 8:50 a.m.]

# FEDERAL MARITIME COMMISSION

[Docket No. 1216]

## CONTAINERSHIPS, INC.

### Activities, Tariff Filing Practices and Carrier Status; Notice of Investigation and Hearing

Containerships, Inc. until recently filed tariffs as a common carrier in the trade from Atlantic Coast ports to ports in Puerto Rico. It established and maintained tariffs FMC-F Nos. 1 and 2, naming local commodity rates from, to, and between the United States and Puerto Rico as required by section 2, Intercoastal Shipping Act, 1933.

On October 19, 1964, Containerships, Inc. announced that henceforth it would operate non-common carrier service and cancelled its tariffs effective November 28, 1964.

The Commission is of the opinion that an expedited investigation should be undertaken to determine the exact manner in which Containerships, Inc. has solicited or transported cargo between North Atlantic ports and ports in Puerto Rico since September 1, 1964, so that it can determine whether Containerships' southbound operations since said date violate section 18(a), Shipping Act, 1916, or section 2, Intercoastal Shipping Act, 1933.

*Therefore, it is ordered,* That an investigation be, and it is hereby instituted, pursuant to sections 18(a) and 22 of the Shipping Act, 1916 (46 U.S.C. 817 and 821), and section 2, Intercoastal Shipping Act, 1933 (46 U.S.C. 844), to determine whether operations of Containerships, Inc., since September 1, 1964, from North Atlantic ports to ports in Puerto Rico are or have been in violation of section 18(a), Shipping Act, 1916, and section 2, Intercoastal Shipping Act, 1933, with a view of making such findings and orders in the premises as the facts and circumstances shall warrant;

*It is further ordered,* That (I) the investigation herein ordered be assigned for public hearing by the Chief Examiner, (II) the hearing be commenced on January 5, 1965, 45 Broadway, New York, N.Y., in Room No. 705, at 9:30 a.m., e.s.t., and the evidence taken at the hearing be limited to the nature of Containerships' service since September 1, 1964, and its contemplated service; (III) Containerships, Inc. is hereby made respondent in this proceeding; (IV) a copy of this order shall forthwith be served upon said respondent; (V) this order be published in the FEDERAL REGISTER.

All persons (including individuals, corporations, associations, firms, partnerships, and public bodies) having an interest in this proceeding and desiring to intervene therein should file petitions for leave to intervene in accordance with Rule 5(n) (46 CFR 502.73) of the Commission's rules of practice and procedure on or before December 29, 1964, with copy to respondent.

By the Commission.

[SEAL] THOMAS LISI, *Secretary.*

[F.R. Doc. 64-12979; Filed, Dec. 17, 1964; 8:48 a.m.]

[Docket No. 1212]

[Agreements 9361, 8680, 8680-3, 8680-4, 8680-5, 9233, 9060, 9060-1, 9020, 9020-2, 9020-3, 9020-4, 9020-5]

## MEDITERRANEAN POOLS INVESTIGATION

On July 1, 1964, seven of the members of the Marseilles/North Atlantic U.S.A. Freight Conference filed Agreement No. 9361, the Marseilles/North Atlantic Freight Pool, with the Federal Maritime Commission for approval under section 15 of the Shipping Act, 1916. Proposed Agreement No. 9361 provides for the division of revenue among the pool members on cargo moving from Marseilles to certain U.S. North Atlantic ports. The agreement is to be effective retroactively from July 1, 1964, to December 31, 1966, and provides for automatic extension thereafter for one year periods. The United States Department of Justice has filed a petition for hearing on the question of whether Agreement No. 9361 should be approved, disapproved or modified.

In making its decision as to whether agreements should be approved, disapproved or modified under section 15, and in determining under that section whether concerted anti-competitive practices among ocean common carriers should be granted an exemption from United States Anti-Trust laws, the Commission is charged with the responsibility of making an informed judgment as to whether the operation of such agreements will be unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or will operate to the detriment of the commerce of the United States or will be contrary to the public interest. In order to carry out its responsibilities under section 15 with respect to this pooling agreement the Commission considers it necessary that there be a full investigation to determine whether the agreement should be approved, disapproved or modified under the standards set forth in section 15.

There are four other pooling agreements covering inbound trades from various Mediterranean areas to U.S. North Atlantic and Great Lakes ports.

These are:

Agreement No. 8680, covering the trade from ports on the West Coast of Italy to U.S. North Atlantic ports.

Agreement No. 9233, covering the trade between Israel and U.S. North Atlantic ports.

Agreement No. 9060, covering the trade from Venice on the East Coast of Italy to U.S. North Atlantic ports.

Agreement No. 9020, covering the trade from various Mediterranean ports to U.S. Great Lakes ports.

Two of these pooling agreements, Agreement No. 8680 and Agreement No. 9233, are currently involved in Commission ordered docketed proceedings to determine whether they should be approved, disapproved or modified under section 15 (Dockets 1169 and 1178). There is a high degree of overlapping membership in these various pooling agreements, as indicated in attached Appendix A, and the agreements and the trading areas covered appear in other ways to be closely related and competitive with each other.

In order for the Commission to properly understand and evaluate the impact of this newly filed Marseilles Pooling Agreement No. 9361, and the other pooling agreements in the Mediterranean trade, certain of which have already been docketed for Commission investigation, the Commission considers it essential that its investigation encompass the inter-relationships and overlapping membership of all these various pools.

Examination of each of these separate pooling agreements on an isolated and segmented basis, without regard to the inter-relationship between them, would not permit the Commission to fully evaluate the effect of the pools and their total impact on the foreign commerce of the United States and the public interest.

The Commission has therefore decided that, in order to properly determine whether any or all of these agreements should be approved, disapproved or modified under the standards of section 15, it will order a single investigation into all these Mediterranean pooling agreements to determine the manner in which these pooling agreements operate, the degree of inter-relationships between the various pooling agreements, the purpose for which these agreements have been instituted and why they are considered necessary by the parties, whether these agreements as filed with the Commission represent the full and complete agreements of the parties, whether there are any additional unfiled understandings or arrangements among the various carrier members of these pools which have not been filed with and approved by the Commission, whether sailings, revenues, ports or trading areas have been allotted or divided up between these different trading areas through the inter-relationships of these pooling agreements, the effect these agreements have had and will have on the rate structure and service within these trades and related trades in the foreign commerce of the United States, the effect these agreements have had and will have on other carriers, shippers, exporters, importers, ports, and on these trades and related trades in the foreign commerce of the United States, and whether any one of these agreements, or any combination of them, will be unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operate to the detriment of the commerce of the United States, or be contrary to the public interest, or be in violation of the Shipping Act, 1916, and should be approved, disapproved or modified under the standards of section 15. The investigation will particularly determine whether any provisions of these agreements can be approved for any period of time prior to such approval or can be made applicable to any period of time prior to such approval.

With respect to the pooling agreement between the West Coast of Italy and U.S. North Atlantic ports, Agreement No. 8680, there is now pending before the Commission in Docket No. 1178, an investigation to determine whether continued approval should be accorded to that pooling agreement, and whether Agreements No. 8680, 8680-3, 8680-4, and 8680-5 should be approved, disapproved or modified pursuant to section 15. The investigation in Docket No. 1178 is hereby discontinued and the issues in that proceeding as to Agreements 8680, 8680-3, 8680-4 and 8680-5 will be included in the Mediterranean pools investigation herein ordered.

With respect to the pooling agreement in the trade between Israel and North Atlantic ports, Agreement No. 9233, there is now pending before the Commission in Docket No. 1169 a formal investigation to determine whether that pooling agreement should be approved, disapproved, or modified. The investigation in Docket No. 1169 is hereby discontinued and the issues in that proceeding as to Agreement 9233 will be included in the Mediterranean pools investigation herein ordered.

With respect to the pooling agreement in the trade from Venice on the East Coast of Italy to U.S. North Atlantic ports, Agreement No. 9060, the Commission considers that because of the overlapping membership and apparent interrelationships between this agreement and other pooling agreements in the Mediterranean trade the Mediterranean pools investigation herein ordered will include an investigation to determine whether continued approval should be accorded Agreement 9060.

In addition, there has been filed Agreement No. 9060-1, which would modify basic Agreement No. 9060 to change certain loading and discharging expenses and adjust pooling percentages retroactively to a period prior to Commission approval. The Commission considers that there should be a full investigation to determine whether Agreement No. 9060-1 should be approved, disapproved or modified. The Mediterranean pools investigation herein ordered will include such an investigation.

With respect to the pooling agreement from Mediterranean ports to U.S. Great Lakes Ports, Agreement No. 9020, the Commission considers that because of the overlapping membership and apparent competitive inter-relationships between that pooling agreement and the other pooling agreements in the Mediterranean trade, the Mediterranean pools investigation herein ordered will include an investigation to determine whether continued approval should be accorded Agreement 9020.

In addition, there have been filed with the Commission various modifications to basic Agreement No. 9020 for approval under section 15 of the Shipping Act, 1916, Agreements Nos. 9020-2, 9020-3, 9020-4, and 9020-5. These modifications would make various changes in membership, minimum number of calls, allocation of shares between parties, and various other provisions, many of them to be retroactive to a date prior to approval by the Commission. The Commission considers that there should be a full investigation to determine whether Agreements Nos. 9020-2, 9020-3, 9020-4, and 9020-5 should be approved, disapproved or modified. The Mediterranean pools investigation herein ordered will include such an investigation.

Now, Therefore, by authority vested in the Commission;

*It is ordered,* That pursuant to sections 15 and 22 of the Shipping Act, 1916, the Commission institute an investigation and hearing with respect to pooling Agreements 9361, 8680, 9233, 9060, and 9020, together with modification Agreements Nos. 8680-3, 8680-4, 8680-5, 9060-1, 9020-2, 9020-3, 9020-4, and 9020-5, which have been filed with the Commission for approval under section 15, in order to determine:

1. The manner in which these pooling agreements operate.

2. The degree of inter-relationships between the various pooling agreements.

3. The purpose for which these agreements have been instituted and why they are considered necessary by the parties.

4. Whether these agreements as filed with the Commission represent the full and complete agreements of the parties.

5. Whether there are any additional understandings or arrangements among the various carrier members of these pools which have not been filed with and approved by the Commission.

6. Whether sailings, revenues, ports or trading areas have been allotted or divided up between these different trading areas through the inter-relationships of these pooling agreements.

7. The effect these agreements have had and will have on the rate structure and service within these trades and related trades in the foreign commerce of the United States.

8. The effect these agreements have had and will have on carriers, shippers, exporters, importers, ports, and on these trades and related trades in the foreign commerce of the United States.

9. Whether any one of these agreements, or any combination of them, will be unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operate to the detriment of the commerce of the United States, or be contrary to the public interest, or be in violation of the Shipping Act, 1916.

10. Whether Agreement 9361 should be approved, disapproved or modified pursuant to the standards of section 15 of the Shipping Act, 1916.

11. Whether continued approval should be accorded to Agreement 8680, and whether such agreement should be disapproved or modified, and whether Agreements 8680-3, 8680-4, 8680-5 should be approved, disapproved or modified pursuant to section 15 of the Shipping Act, 1916.

12. Whether Agreement 9233 should be approved, disapproved or modified pursuant to the standards of section 15 of the Shipping Act, 1916.

13. Whether continued approval should be accorded Agreement 9060 and whether such agreement should be disapproved or modified, and whether Agreement 9060-1 should be approved, disapproved or modified pursuant to the standards of section 15 of the Shipping Act, 1916.

14. Whether continued approval should be accorded Agreement 9020, and whether such agreement should be disapproved or modified, and whether Agreements 9020-2, 9020-3, 9020-4, and 9020-5 should be approved, disapproved or modified pursuant to the standards of section 15 of the Shipping Act, 1916.

15. Whether any provisions of the foregoing agreements can be approved for any period of time prior to such ap-

proval or can be made applicable to any period of time prior to such approval.

*It is further ordered,*

1. That the investigation to determine whether Agreements 8680, 8680–3, 8680–4 and 8680–5 should be approved, disapproved or modified, previously ordered in Docket No. 1178, be discontinued, since the issues in that investigation have been included in this Mediterranean pools investigation, provided however, that approval of the modification to Agreement 8680 granted by the Commission in its order dated April 20, 1964, in Docket No. 1178, will continue in effect until the Commission approves, disapproves, cancels or modifies Agreements 8680, 8680–3, 8680–4 and 8680–5 in this proceeding, or until otherwise ordered by the Commission.

2. That the investigation to determine whether Agreement No. 9233 should be approved, disapproved or modified, previously ordered by the Commission in Docket No. 1169, be discontinued, since the issues in that investigation have been included in this Mediterranean pools investigation.

*It is further ordered,* That the parties to these agreements, as set forth in Appendix A below, be made respondents in this proceeding.

*It is further ordered,* That the proceeding herein ordered be assigned for hearing before an examiner of the Commission's Office of Hearing Examiners at a date and place to be hereafter determined and announced by the Chief Examiner;

*It is further ordered,* That notice of this Order and notice of hearing be published in the FEDERAL REGISTER, and copy of such order and notice of hearing be served upon respondents.

*It is further ordered,* That persons other than respondents who desire to become parties to this proceeding and to participate herein shall file with the Secretary, Federal Maritime Commission, Washington, D.C., 20573, a petition to intervene in accordance with Rule 5(n) of the Commission's rules of practice and procedure on or before December 30, 1964, with copy to each of the respondents.

*It is further ordered,* That all future notices issued by or on behalf of the Commission in this proceeding, including notice of time and place of hearing or prehearing conference, shall be mailed directly to all parties of record.

By the Commission.

[SEAL] THOMAS LISI,
*Secretary.*

# FEDERAL POWER COMMISSION

[Docket No. CP65–63]

## ALGONQUIN GAS TRANSMISSION CO.

### Notice of Application

DECEMBER 11, 1964.

Take notice that on September 3, 1964, as supplemented on October 12, 1964, Algonquin Gas Transmission Company (Applicant), Boston, Massachusetts, filed in Docket No. CP65–63 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain facilities and for a certificate of public convenience and necessity authorizing the construction and operation of other facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to relocate approximately two miles of its lateral pipeline J–1 in Lexington, Massachusetts by abandoning in place approximately two miles of the existing 26-inch lateral pipeline and constructing approximately two miles of 30-inch pipeline.

The application states that the proposed relocation is necessary due to the scheduled regrading of Massachusetts State Route 2 in Lexington, Massachusetts.

The total estimated cost of the relocation is $628,000. Applicant will be reimbursed approximately $15,000 by the Commonwealth of Massachusetts, and will finance the remaining costs with current funds.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that preliminary staff analysis has indicated that there are no problems which would warrant a recommendation that the Commission designate this application for formal hearing before an examiner and that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing may be held without further notice before the Commission on this application provided no protest or petition to intervene is filed within the time required herein. Where a protest or petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 7, 1965.

JOSEPH H. GUTRIDE,
*Secretary.*

[Docket No. CP65–108]

## MONTANA-DAKOTA UTILITIES CO.

### Notice of Application

DECEMBER 11, 1964.

Take notice that on October 26, 1964, Montana-Dakota Utilities Co. (Applicant), Minneapolis, Minn., filed in Docket No. CP65–108 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities and the sale of natural gas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to construct and operate a gas measurement station in Hot Springs County, Wyoming to meter natural gas to be sold to Wyoming Gas Company (Wyoming) for resale and distribution in Thermopolis and East Thermopolis, Wyoming. Applicant seeks further authorization to sell natural gas to Wyoming in accordance with Applicant's FPC Gas Tariff, Original Volume No. 3.

Estimated annual and peak day sales for the initial three year period are stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf) | 382,000 | 383,000 | 385,000 |
| Peak day (Mcf) | 3,250 | 3,250 | 3,250 |

The estimated cost of Applicant's proposed facilities is $12,300, and will be financed with internally generated funds.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that preliminary staff analysis has indicated that there are no problems which would warrant a recommendation that the Commission designate this application for formal hearing before an examiner and that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing may be held without further notice before the Commission on this application provided no protest or petition to intervene is filed within the time required herein. Where a protest or petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 7, 1965.

[Docket No. CP65–161]

## MORENCI NATIONAL GAS CO.

### Notice of Application

DECEMBER 11, 1964.

Take notice that on December 4, 1964, Morenci National Gas Company (Applicant), Morenci, Mich., filed in Docket No. CP65–161 an application pursuant to section 7(a) of the Natural Gas Act for an order of the Commission directing American Louisiana Pipe Line Company to establish physical connection of its natural gas transmission facilities with the facilities proposed to be constructed by Applicant, and to sell and deliver natural gas to Applicant for resale and distribution in Morenci and Weston, Michigan and environs, Lewanee County, Mich., all as more fully set forth in the application on file with the Commission and open to public inspection.

The estimated initial three year period of annual and peak day requirements are stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf) | 258,054 | 276,742 | 295,819 |
| Peak day (Mcf) | 1,898 | 2,086 | 2,281 |

Total estimated cost of Applicant's proposed distribution system is $579,255, and will be financed by means of First Mortgage Bonds, common stock, and equity capital.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 7, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that an order is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[Project No. 2062]

## OKANOGAN COUNTY, WASHINGTON

### Notice of Postponement of Hearing

DECEMBER 11, 1964.

Public Utility District No. 1 of Okanogan County, Project No. 2062.

Upon consideration of the motion filed December 9, 1964 by Commission Staff Counsel, notice is hereby given that the hearing fixed in the above-designated proceeding for December 16, 1964 by order issued November 25, 1964 (29 F.R. 16232) is postponed to January 20, 1965.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64–12962; Filed, Dec. 17, 1964; 8:46 a.m.]

[Docket No. CP65–81]

## SOUTHERN NATURAL GAS CO.

### Notice of Application

DECEMBER 11, 1964.

Take notice that on September 25, 1964, Southern Natural Gas Company (Applicant), Birmingham, Ala., filed in Docket No. CP65–81 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to construct and operate approximately 6.3 miles of 8⅝-inch loop line, 350 additional horsepower at Applicant's Rankin Station, and compressing facilities of 1,080 horsepower to be installed at Applicant's existing Gwinville Station.

The application states that the proposed facilities are requested to enable Applicant to deliver additional quantities of natural gas to Mississippi Chemical Corporaton (Mississippi) at Missssippi's plants located near Yazoo City, Miss., pursuant to a letter agreement between the parties dated August 26, 1964.

The application further states that Mississippi's proposed firm gas requirements of 29,000 Mcf per day are 21,000 Mcf more than its present maximum firm requirements of 8,000 Mcf per day.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that preliminary staff analysis has indicated that there are no problems which would warrant a recommendation that the Commission

designate this application for formal hearing before an examiner and that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing may be held without further notice before the Commission on this application provided no protest or petition to intervene is filed within the time required herein. Where a protest or petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-12963; Filed, Dec. 17, 1964; 8:46 a.m.]

[Docket No. CP65-99]

## SOUTHWEST GAS CORP.

### Notice of Application

DECEMBER 11, 1964.

Take notice that on October 13, 1964, Southwest Gas Corporation (Applicant), Las Vegas, Nev., filed in Docket No. CP 65-99 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities, authorizing the operation of its northern Nevada transmission system as a natural gas company, and authorizing the sale of natural gas, all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that Nevada Northern Gas Company (Nevada Northern) was merged into Applicant, effective December 31, 1963. The application further states that the facilities formerly operated by Nevada Northern are wholly intrastate, and have been from their inception exempt from the provisions of the Natural Gas Act pursuant to section 1(c).

The subject application is concerned with the construction of certain additional facilities on Applicant's northern Nevada system and the sale, in interstate commerce for resale and consumption beyond the border of the State of Nevada, of natural gas purchased from El Paso Natural Gas Company (El Paso). Accordingly, if the certificate is granted, Applicant anticipates that its operations with respect to its Northern Nevada Division will no longer be exempt from the provisions of the Natural Gas Act under section 1(c).

Specifically, Applicant seeks authorization to construct and operate metering and regulating facilities necessary to deliver natural gas to South Tahoe, El Dorado County, California, and seeks further authorization for the sale of natural gas in South Tahoe, California, to South Tahoe Gas Co. The estimated initial three year period of annual and peak day sales are stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf) | 498,000 | 894,000 | 1,046,000 |
| Peak day (Mcf) | 3,978 | 7,212 | 8,438 |

The estimated cost of Applicant's facilities is $5,392, and will be financed with current working funds.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 7, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-12964; Filed, Dec. 17, 1964; 8:46 a.m.]

[Docket No. CP65-93]

## TENNESSEE GAS TRANSMISSION CO.

### Notice of Application

DECEMBER 11, 1964.

Take notice that on October 6, 1964, as supplemented on November 6, 1964, Tennessee Gas Transmission Company (Applicant), Tennessee Building, Houston, Tex., filed in Docket No. CP65-93 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to transport the 10,000 Mcf of natural gas per day which Iroquois Gas Corporation (Iroquois) plans to purchase from Valley Gas Transmission, Inc. The gas will be transported by Applicant for Iroquois' account from producing areas in Texas and Louisiana to points of delivery to Iroquois in New York.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 7, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[Docket No. CP65-88]

## UNITED GAS PIPE LINE CO.

### Notice of Application

DECEMBER 11, 1964.

Take notice that on October 12, 1964, United Gas Pipe Line Company (Applicant), Post Office Box 1407, Shreveport, La., 71102, filed in Docket No. CP65-88 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities and the transportation of natural gas in interstate commerce to Stanton Prestressed Concrete Products, Division of Service Construction Company, Inc. (Stanton) located near Bryam, Hinds County, Miss., all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to construct and operate 400 feet of 2-inch pipeline to connect with its existing 2-inch lateral in Hinds County, and to construct and operate a meter and regulator station and appurtenant facilities in order to deliver and sell to Stanton its fuel requirements estimated to be 80 Mcf on a maximum day and 24,800 Mcf on an annual basis during the third year of operation.

Applicant states that Stanton will use the natural gas for boiler fuel to produce steam for utilization in the drying and running of precast concrete products and other miscellaneous uses.

The total estimated cost of such facilities is $3,658, which will be financed out of Applicants' current working funds.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that preliminary staff analysis has indicated that there are no problems which would warrant a recommendation that the Commission designate this application for formal hearing before an examiner and that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing may be held without further notice before the Commission on this application provided no protest or petition to intervene is filed within the time required herein. Where a protest or petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 4, 1965.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-12966; Filed, Dec. 17, 1964; 8:47 a.m.]

[Docket No. CP65-95]

## VILLAGE OF KARNAK, ILL.

### Notice of Application

DECEMBER 11, 1964.

Take notice that on October 9, 1964, the Village of Karnak, Ill. (Applicant), filed in Docket No. CP65-95 an application pursuant to section 7(a) of the Natural Gas Act for an order of the Commission directing Trunkline Gas Company to establish physical connection of its natural gas transmission facilities with the distribution facilities proposed to be constructed by Applicant, and to sell and deliver natural gas to Applicant for distribution and resale in the Village of Karnak, Ill. and environs, all as more fully set forth in the application on file with the Commission and open to public inspection.

The estimated initial three years period of annual and peak day requirements are stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf) | 18,270 | 23,060 | 28,730 |
| Peak day (Mcf) | 235 | 290 | 365 |

The estimated cost of Applicant's proposed distribution system is $143,000, and will be financed by means of Gas Public Utility Certificates to be issued by Applicant.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 7, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that an order is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,

# FEDERAL RESERVE SYSTEM

## FIRST VIRGINIA CORP.

### Notice of Application for Approval of Acquisition of Shares of Bank

Notice is hereby given that application has been made to the Board of Governors of the Federal Reserve System pursuant to section 3(a)(2) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(2)), by The First Virginia Corporation, a registered bank holding company located in Arlington, Va., for the Board's prior approval of the acquisition by Applicant of 80 per cent or more of the voting shares of Peoples Bank of Radford, Radford, Va.

In determining whether to approve an application submitted pursuant to section 3(a)(2) of the Bank Holding Company Act, the Board is required by that Act to take into consideration the following factors: (1) The financial history and condition of the company and the bank concerned; (2) their prospects; (3) the character of their management; (4) the convenience, needs, and welfare of the communities and the area concerned; and (5) whether or not the effect of such acquisition would be to expand the size or extent of the bank holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking.

Not later than thirty (30) days after the publication of this notice in the FEDERAL REGISTER, comments and views regarding the proposed acquisition may be filed with the Board. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., 20551.

Dated at Washington, D.C., this 11th day of December 1964.

By order of the Board of Governors.

[SEAL] MERRITT SHERMAN,
*Secretary.*

# OFFICE OF EMERGENCY PLANNING

## TRUST TERRITORY OF THE PACIFIC ISLANDS

### Notice of Major Disaster

Pursuant to the authority vested in me by the President under Executive Order 10427 of January 16, 1953, Executive Order 10737 of October 29, 1957, and Executive Order 11051 of September 27, 1962 (18 F.R. 407, 22 F.R. 8799, 27 F.R. 9683); Reorganization Plan No. 1 of 1958, Public Law 85-763, and Public Law 87-296; by virtue of the Act of September 30, 1950, entitled "An Act to authorize Federal assistance to States and local governments in major disasters, and for other purposes" (42 U.S.C. 1855-1855g), as amended; notice is hereby given of a declaration of "major disaster" by the President in his letter to me dated December 10, 1964, reading in part as follows:

I have determined the damage in various areas of the Trust Territory of the Pacific Islands adversely affected by Typhoon Louise to be of sufficient severity and magnitude to warrant disaster assistance by the Federal Government to supplement the efforts and resources of the Territorial Government.

I do hereby determine the following

# SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Area 496]

## WASHINGTON

### Declaration of Disaster Area

Whereas, it has been reported that during the month of December 1964, because of the effects of certain disasters, damage resulted to residences and business property located in Snohomish County in the State of Washington;

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the area affected;

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such area constitute a catastrophe within the purview of the Small Business Act, as amended.

Now, therefore, as Executive Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 7(b)(1) of the Small Business Act, as amended, may be received and considered by the Office below indicated from persons or firms whose property, situated in the aforesaid County and areas adjacent thereto, suffered damage or destruction resulting from floods and accompanying conditions occurring on or about December 4, 1964.

*Office*

Small Business Administration Regional Office,
506 Second Avenue,
Seattle 4, Wash.

2. Applications for disaster loans under the authority of this Declaration will not be accepted subsequent to June 30, 1965.

Dated: December 8, 1964.

ROSS D. DAVIS,
*Executive Administrator.*

[F.R. Doc. 64–12953; Filed, Dec. 17, 1964; 8:45 a.m.]

National Bureau of Standards

# Metrology Test Fee Schedules

# Title 15—COMMERCE AND FOREIGN TRADE

## Chapter II—National Bureau of Standards, Department of Commerce

### SUBCHAPTER A—TEST FEE SCHEDULES

## PART 202—METROLOGY

Pursuant to authority contained in 15 U.S.C. 275a the following revision is effective upon publication in the FEDERAL REGISTER.

Photometry and Colorimetry

Sec.
202.101 Lamp standards of candlepower.
202.102 Photometric instruments and accessories.
202.103 Miscellaneous photometric measurements and tests.
202.104 Rating of incandescent electric lamps.
202.105 Spectrophotometric standards.
202.106 Spectrophotometric measurements.
202.107 Colorimetry.
202.108 Reflectometry.
202.109 Opacimetry.
202.111 Lovibond glasses.
202.112 Signal glasses.
202.113 Haze standards.
202.114 Radiometry.

Refractometry

202.201 Optical instruments.
202.202 Photographic objectives.
202.203 Optical components, spectacle lenses, goggle lenses, etc.
202.204 Refractometric instruments.
202.205 Refractive indices.
202.206 Polarimetric instruments.

Photographic Research

202.311 Photography (step table density, residual thiosulfate concentration, etc.).

Length

202.401 Reference line standards of length.
202.402 Working line standards of length.
202.403 Commercial line standards of length.
202.404 Steel tapes.
202.405 Invar base-line tapes.
202.406 Surveyors' measuring instruments (other than tapes).
202.407 Sieves.
202.408 Haemacytometers.
202.409 Areas and area-measuring instruments.
202.410 Precision circles.
202.411 Linear thermal expansion of solids.
202.412 Gage blocks.

Engineering Metrology

202.500 General.
202.501 End standards of length.
202.502 Plain cylindrical plug and ring gages.
202.503 Thread plug and ring gages.
202.504 Instruments and components.
202.505 Optical reference planes.
202.506 Angle blocks.
202.507 Polygons.
202.508 Master balls.
202.509 Gears.

Mass and Volume

202.620 General.
202.621 Reference standards of mass.
202.622 Large mass standards.
202.623 Calibration of mass elements of pressure-gage testing equipment.
202.624 Recalibration of mass standards.
202.625 Glass volumetric apparatus.
202.626 Metal volumetric apparatus.
202.627 Hydrometers.
202.628 Density determination of solids and liquids.

AUTHORITY: The provisions of this Part 202 issued under sec. 9, 31 Stat. 1450, as amended; 15 U.S.C. 277. Interprets or applies sec. 7, 70 Stat. 959; 15 U.S.C. 275a.

PHOTOMETRY AND COLORIMETRY

### § 202.101 Lamp standards of candlepower.

(a) The Bureau is prepared to furnish to other standardizing laboratories lamps that have been seasoned and standardized, the respective fees being as given in the test fee schedule in this section.

(b) A normal incandescent lamp when operated at constant voltage usually increases slightly in candlepower for a short time, the length of which depends upon the temperature of the filament. A relatively stable period is then reached, after which there is a progressive drop in the candlepower. Therefore, in order that a lamp may be useful as a photometric standard, it must be seasoned by a preliminary burning sufficient to bring it to the stable state. This seasoning is usually done by operating the lamp at a voltage somewhat higher than the normal operating voltage of the lamp.

(c) Lamps with coiled filaments are not usually satisfactory as standards unless they have been specially constructed for this purpose. In particular, lamps of this type are not suitable for standards of horizontal candlepower unless they are of the monoplane-filament projection type. This type of gas-filled lamp with clear bulb (items 202.101 a, b, and c) has been found to be satisfactory as a standard of horizontal candlepower when standardized with a diaphragm in front of the lamp. This diaphragm is slightly larger than the filament and allows only the light coming directly from the filament to reach the photometer. In addition, great care must be taken to orient such standards properly because their candlepower varies appreciably with change of angle around both a vertical axis and a horizontal axis. Recently made available are gas-filled standards of horizontal candlepower in tubular, inside-frosted bulbs with medium-bipost bases (items 202.101 d, e, f, and g), which are calibrated and used without a diaphragm and for which accurate orientation has been found to be much less critical. These inside-frosted lamps are recommended for use where reproducibility of candlepower to 1 percent or better is required.

(d) In the reports which are issued with standard lamps, the voltage and the corresponding current and candlepower are given. The Bureau cannot guarantee the permanence of these values, since all lamps change gradually with use.

| Item | Description | Fee |
|---|---|---|
| | Incandescent lamps issued from stock as standards of luminous intensity: | |
| 202.101a | Clear bulb, approximately 120-volt lamps, horizontal candles in a specified direction, screw base, 100-watt size, calibrated at 105 volts, 1 lamp each | $42.00 |
| 202.101b | Same, 250-watt size, 1 lamp each | 48.00 |
| 202.101c | Same, 500-watt size, 1 lamp each | 51.00 |
| 202.101d | Inside-frosted, T-20 bulb, approximately 120-volt lamps, horizontal candles in a specified direction, medium-bipost base, 100-watt size, calibrated at 110 volts, 1 lamp each | 56.00 |
| 202.101e | Same, 300-watt size, 1 lamp each | 59.00 |
| 202.101f | Same, 500-watt size, 1 lamp each | 61.00 |
| 202.101g | Same, 1,000-watt size, 1 lamp each | 66.00 |
| 202.101z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.102 Photometric instruments and accessories.

| Item | Description | Fee |
|---|---|---|
| 202.102f | Standard of luminous directional transmittance (approximately 0.5 f/(f/e) supplied from stock, each | $43.00 |
| 202.102z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.103 Miscellaneous photometric measurements and tests.

| Item | Description | Fee |
|---|---|---|
| 202.103a | Determination of luminous transmittance of neutral or colored filter, one sample | $65.00 |
| 202.103z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.104 Rating of incandescent electric lamps.

| Item | Description | Fee |
|---|---|---|
| | Rating tests on lamps. These are routine photometric rating tests of the type made initially on lamps to be life-tested, the same standards and equipment being used. The purpose of these tests is to afford a quick check of the photometric values assigned to lamps by various lamp life-test laboratories. Lamp standards of candlepower are issued under 202.101. | |
| 202.104a | Rating of incandescent lamps up to 1,000 watts, 1 lamp | $27.00 |
| 202.104b | Same, each additional lamp of same size and type | 7.00 |
| 202.104z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.105 Spectrophotometric standards.

(a) Note on item a. Transmittances of these disks at wavelengths from 365 to 390 nm (nanometer, $10^{-9}$ meter) and from 750 to 1,000 nm will also be determined on request in accordance with item c of fee schedule 202.105. Values will be obtained for a temperature of 25° C. The effect of change of temperature has not been determined for these glasses outside the range from 390 to 750 nm. It is known, however, that for all four types of glass the temperature effects are very small from 750 to 1,000 nm, probably negligible for the usual room-temperature variations. On the other hand, temperature effects are always large for these kinds of glass when the transmittance curve is decreasing rapidly towards shorter wavelengths, so that increasingly large temperature effects may be expected for these filters in the ultraviolet.

(b) Note on items j and k. In the General Electric recording spectrophotometer the design is such that the radiant energy is incident in a slightly diverging beam whose axis is at 6° to the perpendicular to the surface. The specular component of the reflected energy is thus diverted away from the entrance aperture towards a port on the side. This port may be filled with MgO or with a black material, so that the specular component may be respectively "included" in, or (for plane surfaces) "excluded" from, the measurements. This is covered in items j and k.

(c) Only one Vitrolite working standard is needed for the measurement of spectral directional reflectance on the General Electric recording spectrophotometer. This calibrated Vitrolite standard and the samples to be tested are in turn placed at the sample aperture of the integrating spheres, and any highly reflecting substance such as MgO or $MgCO_3$ may be used at the comparison aperture provided the material to be tested does not reflect more than the comparison material. The directional reflectances of the test samples relative to freshly prepared MgO are then obtained by multiplying (at the respective corrected wavelength) the values for these samples read from the curve sheet, by the ratios of (1) the standard Vitrolite values reported to (2) the values for the Vitrolite read from the curve sheet.

| Item | Description | Fee |
|---|---|---|
| | Standards of spectral transmittance for checking the photometric scale of spectrophotometers; these consist of polished disks glass, 2 to 3 mm thick and 30 mm in diameter, designated as cobalt blue, copper green, carbon yellow, and selenium orange (copper green filter also available in 25 mm square size); report includes (1) values of transmittance at 25° C. at certain wavelengths from 390 to 750 nm, (2) estimated uncertainty of each value, (3) effect of temperature change on transmittance at each wavelength: | |
| 202.105a | Each disk | $120.00 |
| | Transmittance, 365 to 1,000 nm for standardization purposes. Samples submitted must be in good optical condition. Measurements at room temperature. (If the sample is a disk 29.7±0.2 mm in diameter, the measurements can be made at a specified temperature): | |
| 202.105b | One sample at one wavelength | 47.00 |
| 202.105c | Each additional wavelength on the same sample | 11.00 |
| 202.105d | Didymium glass standards for checking the wavelength calibration of General Electric recording spectrophotometers; these consist Corning 5120 glass, 2 x 2 in., 3.0 mm thick, polished; report includes table of wavelengths of minimum transmittance: 400 to 750 nm, 10 nm slits, each standard | $60.00 |
| 202.105e | 730 to 1,080 nm, 20 nm slits, each standard | 60.00 |
| 202.105f | For two calibrations on the same glass (items 202.105d and 202.105e), each standard | 92.00 |
| | Holmium oxide glass standards for checking the ultraviolet and visible wavelength calibrations of recording spectrophotometers with slit width less than 2 nm; these consist of Corning 3130 glass 2 x 2 in., 2.5 mm thick, polished; report includes table of wavelengths of minimum transmittance: | |
| 202.105g | 240 to 370 nm, each standard | 105.00 |
| 202.105h | 360 to 650 nm, each standard | 105.00 |
| 202.105i | For 2 calibrations on the same glass (items 202.105g and 202.105h), each standard | 130.00 |
| | Working standards of spectral directional reflectance for use on General Electric recording spectrophotometers with 6° from perpendicular irradiation and diffuse reception; standards consist of white structural Vitrolite glass, 4 by 4 in., ¾₁₆ in. thick; report includes table of spectral directional reflectances relative to freshly prepared MgO at every 10 nm: | |
| 202.105j | 400 to 750 nm, specular component both included and excluded (on same glass), 10 nm slits, each standard | 130.00 |
| 202.105k | 730 to 1,080 nm, specular component both included and excluded (on same glass), 20 nm slits, each standard | 130.00 |
| | Working standards of spectral directional reflectance for use on the Beckman Model DU quartz spectrophotometer with nearly perpendicular irradiation and approximately 45° circular reception; standards consist of white structural Vitrolite glass, 1½ by 2 in., ¾₁₆ in. thick; report includes table of spectral reflectances relative to freshly prepared MgO at every 10 nm: | |
| 202.105l | 380 to 770 nm, each standard | 76.00 |
| 202.105m | 750 to 1,000 nm, each standard | 76.00 |
| 202.105n | 350 to 1,000 nm, each standard | 140.00 |
| 202.105z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.106 Spectrophotometric measurements.

The tests described in this section are primarily made for informational purposes, and samples so tested should not be accepted as "standards." All measurements are made at room temperatures. For various types of spectrophotometric standards, see 202.105.

| Item | Description | Fee |
|---|---|---|
| | Spectral transmittance, 210 to 1,000 nm: | |
| 202.106a | One sample at one wavelength | $51.00 |
| 202.106b | Each additional wavelength on the same sample | 6.00 |
| 202.106c | Each additional sample, each wavelength | 6.00 |
| | Spectral directional reflectance relative to MgO, normal irradiation and 45° circular reception, as obtained with the Beckman Model DU spectrophotometer, 254 to 1,000 nm: | |
| 202.106d | One sample at one wavelength | 51.00 |
| 202.106e | Each additional wavelength on the same sample | 6.00 |
| 202.106f | Each additional sample, each wavelength | 6.00 |
| 202.106g | Testing a single sample, 400 to 750 nm or 730 to 1,080 nm, with slits approximately 10 nm or 20 nm (respectively) of spectrum, either spectral range | $69.00 |
| 202.106h | Each additional curve or each additional sample | 11.00 |
| 202.106i | Same as 202.106g, but with both spectral ranges, 400 to 1,080 nm | 95.00 |
| 202.106j | Each additional pair of curves or each additional sample | 17.00 |
| | Spectral directional reflectance curves obtained on General Electric recording spectrophotometer, including (1) Vitrolite calibration curve for correcting values relative to fresh MgO as 100 percent, (2) zero curve, (3) didymium glass curve for checking the wavelength calibration; report includes ozalids of tracings: | |
| 202.106k | One sample, 400 to 750 nm, or 730 to 1,080 nm, with slits approximately 10 nm or 20 nm (respectively) of spectrum, with specular component of reflected energy included or excluded, either specular range, and either condition of specular reflection | 69.00 |
| 202.106l | Each additional curve or each additional sample, each curve | 11.00 |
| 202.106m | Same as 202.106k, but both spectral ranges, 400 to 1,080 nm | 95.00 |
| 202.106n | Each additional pair of curves or each additional sample | 17.00 |
| 202.106o | Reduction of data obtained as in 202.106g to 202.106n, giving table of values of transmittance, transmittancy, or directional reflectance relative to MgO for every 10 nm, for each curve | 27.00 |
| 202.106z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.107 Colorimetry.

| Item | Description | Fee |
|---|---|---|
| 202.107a | Computing chromaticity coordinates and luminous directional reflectance or transmittance from spectrophotometric data for certain specified light sources, per source per sample | $15.00 |
| 202.107b | Computing luminous directional reflectance or transmittance from spectrophotometric data for certain specified light sources, per source per sample | 11.00 |
| 202.107c | Determination of the Munsell renotation or book notation of a specimen from its daylight reflectance and chromaticity coordinates, each specimen | 9.00 |
| 202.107d | Conformity to chromaticity of standard, sample and standard illuminated normally by artificial daylight or by incandescent-lamp light, chromaticity difference expressed in terms of chromaticity coordinates on fundamental colorimetric coordinate system, one sample relative to a standard | 37.00 |
| 202.107e | Each additional sample relative to the same standard | 9.00 |
| 202.107f | Each additional sample relative to an additional standard | 14.00 |
| 202.107g | Color temperature of 120-v, screw-base incandescent lamp, voltage for specified color temperature, current for neighboring voltage to check permanence, one color temperature, each lamp | 40.00 |

| Item | Description | Fee |
|---|---|---|
| 202.107h | Color temperature standard supplied from stock, 100-w, medium-screw base or 500-w, mogul-screw base projection type lamp, calibrated for 2,854° K., one lamp each | $40.00 |
| 202.107i | Same, calibrated for any one other specified color temperature, one lamp each | 43.00 |
| 202.107j | Each additional color temperature on the same lamp | 15.00 |
| 202.107k | Equation giving any color temperature from 2,000 to 2,854° K., each lamp (fee includes cost of 500-w projection lamp) | 105.00 |
| 202.107z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.108 Reflectometry.

Standards issued: Standards have been prepared for use in the measurement of daylight 450°0° directional reflectance (45° illumination, perpendicular viewing) of paints, paper, textiles, ceramic products, and other opaque materials. The standards are intended for use only with reflectometers designed to measure daylight 45°0° directional reflectance such as the multipurpose reflectometer developed at the Bureau. (Refer to J. Res. NBS 25, 581 (1940) RP 1345.) Standards are available also for the tristimulus colorimetry of reflecting specimens of nearly the same spectral character. A detailed discussion of the method of photoelectric tristimulus colorimetry, its capabilities and limitations, is contained in NBS Circular 429 (1942). The standards are calibrated in terms of the CIE tristimulus values X, Y, and Z. Information sheets describing these standards more fully are available on request.

| Item | Description | Fee |
|---|---|---|
| | *Standards issued* | |
| | KB chromatic reflectance standards—calibrated for CIE tristimulus values X, Y, Z; 3 x 5 in. plaques in colors commonly called white, bath green, kitchen green, orchid, ivory, bath blue, delphinium blue, royal blue, and red: | |
| 202.108d | One KB chromatic standard | $52.00 |
| 202.108e | Each additional KB chromatic standard | 21.00 |
| 202.108f | Set of 10 KB chromatic standards in above listed colors | 165.00 |
| | S chromatic reflectance standards—calibrated for CIE tristimulus values X, Y, Z; 4¼-in. sq with ¼-in., 90-dge fold at each edge; in colors commonly called safety red, aviation orange, safety orange, school bus chrome, safety yellow, safety green, and safety blue: | |
| 202.108g | One S chromatic standard | 52.00 |
| 202.108h | Each additional S chromatic standard | 21.00 |
| 202.108i | Set of 7 S chromatic standards in above listed colors | 155.00 |
| | *Samples or standards submitted for calibration* | |
| 202.108z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.109 Opacimetry.

Opacity of diffusing glass by contrast-ratio (ratio of luminous directional reflectance with black backing to that with white backing), illumination nearly perpendicular to surface of glass, reception of all reflected flux regardless of angle. Reflectance of white backing taken so as to accord with Bausch & Lomb type photoelectric opacimeter correctly adjusted to read contrast-ratio for thin samples with a white backing reflecting 0.915 relative MgO (TAPPI test method T425m–60). Diffusing glass rectangles, 5 x 12 cm, supplied by the Bureau.

| Item | Description | Fee |
|---|---|---|
| 202.109a | Each diffusing-glass opacity standard, opacity between 0.60 and 0.96 as desired | $43.00 |
| 202.109b | Set of four diffusing-glass opacity standards, opacities approximately equal to 0.72, 0.79, 0.86, and 0.93 | 130.00 |
| 202.109z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.111 Lovibond glasses.

Lovibond red glasses, determination of numeral on the AOCS scale established in 1961 by agreement with the Color Committee of the American Oil Chemists' Society, the value given being the effective value when the given red glass is used in combination with a 35-yellow glass, each glass to be engraved with the National Bureau of Standards test number and the numeral found for the glass.

| Item | Description | Fee |
|---|---|---|
| 202.111a | For testing a single red glass | $43.00 |
| 202.111b | For each additional red glass | 17.00 |
| 202.111z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.112 Signal glass limit glasses and IPL calibrating filters.

(a) Railroad, highway (traffic), and aviation signal glasses for use as chromaticity limits or transmittance standards in accord with specifications approved by the cognizant technical association or government agency will be issued when available. The report of calibration includes chromaticity coordinates, luminous transmittance, or both as determined relative to national standards filters for the specified color temperature or source.

(b) Instrument Panel Lighting (IPL) calibrating filters are available in 2-in. polished squares. They have the following designations (approximate chromaticity coordinates for color temperature 2,854° K are shown below in parentheses): NBS 3056 (x=0.723, y=0.277), NBS 3114 (x=0.712, y=0.288), NBS 3215 (x=0.698, y=0.302), and NBS 3648 (x=0.667, y=0.333). The NBS 3215 filters define the pale limit for airplane red instrument panel lighting and are usually used in pairs; the other types of filters listed are for calibrating photometers used for measuring panel luminance.

| Item | Description | Fee |
|---|---|---|
| 202.112a | Signal limit glasses, each | $165.00 |
| 202.112b | IPL calibrating filters, calibrated for chroma-coordinates and transmittance for 2,854° K | 67.00 |
| 202.112c | Calibration for transmittance at an additional color temperature | 12.00 |
| 202.112z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.113 Haze standards.

Standards are available for checking the accuracy of hazemeters designed to measure haze according to ASTM Method D1003. Standards consist of hazy cellulose acetate sheeting laminated between glass; they are 2-inch squares about ¼ inch thick. Several nominal haze values between 1 and 30 are usually available.

| Item | Description | Fee |
|---|---|---|
| | *Standards issued* | |
| 202.113a | One haze standard | $49.00 |
| 202.113b | Each additional haze standard ordered at the same time | 14.00 |
| 202.113v | Set of four haze standards | 76.00 |
| | *Samples or standards submitted for calibration* | |
| 202.113d | One haze sample or standard | 43.00 |
| 202.113e | Each additional haze sample or standard submitted at the same time | 11.00 |
| 202.113z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.114 Radiometry.

| Item | Description | Fee |
|---|---|---|
| 202.114a | Eye protective glasses—calibration for transmittance of ultraviolet, visible, and total radiation | $65.00 |
| 202.114b | Calibration of radiant energy meter for energy of 2537 Å | 65.00 |
| 202.114c | Measurement of radiant flux of 2537 Å, from germicidal or sterilamp | 65.00 |
| 202.114h | Standard of spectral irradiance—quartz iodine lamp seasoned and calibrated for spectral irradiance from 0.25 to 2.6μ | 380.00 |
| 202.114z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

## REFRACTOMETRY

### § 202.201 Optical instruments.

| Item | Description | Fee |
|---|---|---|
| 202.201z | Tests of telescopes, microscopes, binoculars, etc., to determine conformance to specifications of resolving power, aperture, alinement of axes, etc. Fees determined by the actual cost of the work. | |

### § 202.202 Photographic objectives.

The following information is pertinent to the tests a to o in this schedule.

a. This test is applied to photographic objectives that are mounted in a lens barrel or shutter. A visual or a photographic method is used, depending upon the probable use of the lens. The back focal distance determines the lens position with respect to the focal plane for an airplane camera or other fixed focus camera focused for an infinitely distant objective. The equivalent focal length determines the scale factor for the interpretation of aerial photographs.

b. This test is given to the photographic objectives that are to be used in precision copying cameras. The information is used in calibrating the camera scales that enable the user to obtain the proper settings of lens, object plane, and image plane for any desired magnification without visual focusing.

c, d. The test includes the information obtained in 202.202b, together with information on distortion. It is applied to photographic objectives that are to be used in precision copying cameras where the user wishes to be certain that the relative proportions of the image are not significantly different from those of the object. Since the distortion changes with magnification, it is advisable to specify a ratio for test that corresponds to the magnification most commonly used.

e. This is a general-purpose test to determine the suitability of a lens so far as its definition characteristics are concerned. It is performed photographically. In general, if a lens yields satisfactory results when subjected to this test, it is probable that no additional test for lateral aberration is necessary, and the lens will doubtless perform satisfactorily for either black-and-white or color photography.

f. This the qualifying test for photographic objectives intended for use in airplane mapping projects. It is a photographic test and the determinations are made for the plane of best average definition.

g, h. The f-number may be obtained by dividing the equivalent focal length of the lens by the diameter of the effective aperture. These tests are primarily of value in determining the accuracy of the geometric f-number markings at maximum aperture and at additional specified apertures.

i, j. This test is applied to photographic objectives mounted in cameras. As the test is a photographic one requiring a time exposure, it is necessary that the stop be open when the lens is submitted for test. This is a useful test for nonprecision type airplane cameras where the collimation index markers are located in a detachable magazine.

k. This test is applied to the platen of a precision aerial mapping camera, which is the surface against which the film is pressed during exposure. It is a test to determine conformance to specifications requiring that the platen shall not depart from a true plane by more than ±0.0005 inch.

l. This test is applied to photographic objectives mounted in cameras. It gives the same information as test 202.202f except for back-focal distance. It is preferable that these lens characteristics be determined for the lens as mounted in a barrel shutter, but occasionally it is desirable to determine these quantities for the lens mounted in a camera. The shutter of the lens should be open when the camera is submitted for test.

m. This test is applied to a lens-camera combination that is to be used in photogrammetric mapping. It gives the departure of the principal point from the center of collimation which is the intersection point of lines joining opposite pairs of collimation index markers. Since it is necessary to determine the shift of the principal point resulting from the prism effect in the lens, the equivalent focal length of the lens as mounted in the camera is incidentally determined in this test, which checks whether the lens has been properly mounted to yield best average definition throughout the image field.

This test cannot be performed on a camera having a detachable magazine which bears the collimation index markers. This is the preliminary test on a precision type camera to determine compliance with specification. If no provision has been made for ready adjustment of the collimation index markers and the 90° condition is not satisfied, the camera is returned to the firm or agency submitting the camera with recommendations regarding the necessary adjustments. If the 90° condition is satisfied, but no provision has been made for ready adjustment of the principal point with respect to the center of collimation, the camera is returned with recommendations regarding the necessary adjustments.

n. If no provision has been made for ready adjustment of the lens in a transverse direction to properly position the principal point with respect to the center of collimation, or if this can be done by ready movement of the collimation index markers, this task is done in the course of the test. Following adjustment, the camera is checked and, if satisfactory, pins are set to insure preservation of the space relations between collimation index markers and principal point.

When a camera is submitted for test, it is mandatory that the drill holes for the pins be already present in one of the members that move with respect to one another. In addition, a proper sized drill and reamer and a sufficient number of pins to perform the doweling must accompany the camera. It is desired that roll pins be submitted for this task.

| Item | Description | Fee |
|---|---|---|
| 202.202a | Determination of focal length and back focal distance | $38.00 |
| 202.202b | Determination of equivalent focal length, back focal distance, separation of nodal points, and thickness | 54.00 |
| 202.202c | Determination of equivalent focal length, back focal distance, separation of nodal points, and distortion at 5° intervals from the center to edge of field for one specified ratio of object to image size | 165.00 |
| 202.202d | Fee for each additional ratio | 81.00 |
| 202.202e | Determination of resolving power at 5° intervals from center to edge of field for parallel light at one aperture | 43.00 |
| 202.202f | Determination of back focal distance, equivalent focal length, distortion and resolving power at 5° intervals from the center to edge of the field. This is the test usually required for lenses that are to be mounted in precision airplane cameras. | 98.00 |
| 202.202g | Determination of equivalent focal length and true geometric f-number for one marked stop | 54.00 |
| 202.202h | Fee for each additional stop | 17.00 |
| 202.202i | Determination of focal length for lens mounted camera | 60.00 |
| 202.202j | Fee for each extra magazine | 38.00 |
| 202.202k | Determination of compliance of camera platen with flatness requirements to ±0.0005 in | 17.00 |
| 202.202l | Determination of equivalent focal length, distortion, and resolving power at 7.5° intervals from center to edge of field for lens mounted in camera | 130.00 |
| 202.202m | Location of the principal point, and check of 90° condition for lens mounted in camera | 135.00 |
| 202.202n | Setting the principal point and 90° condition, checking and doweling for lens mounted in camera | 110.00 |
| 202.202z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.203 Optical components, spectacle lenses, goggle lenses, etc.

| Item | Description | Fee |
|---|---|---|
| | *Optical components* | |
| 202.203a | Determination of equivalent focal length of single-component lens | $38.00 |
| 202.203b | Determination of a single radius of curvature (single surface or matched pair). Fee determined by the nature of the work required; minimum fee | 81.00 |
| 202.203c | Determination of spherical and cylindrical power, axis of sphere, and axis of cylinder for a single spectacle lens | 22.00 |
| 202.203d | Fee for each additional lens | 17.00 |
| 202.203e | Determination of spherical and cylindrical powers, axis of sphere, and axis of cylinder for a single spectacle lens with bifocal segment | 33.00 |
| 202.203f | Fee for each additional lens | 22.00 |
| | *Sunglass lenses* | |
| 202.203g | Determination of refractive power, surface quality, and definition to determine compliance of a single sunglass lens with commercial standards | 22.00 |
| 202.203h | Fee for each additional lens | 17.00 |
| | *Goggle lenses* | |
| 202.203i | Determination of lens dimensions, refractive power, prismatic power, and definition; and making drop test on a single hardened goggle lens to determine compliance with Federal Specification GGG–G–501b | 22.00 |
| 202.203j | Fee for each additional lens | 17.00 |
| 202.203z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.204 Refractometric instruments.

Every instrument submitted for test should be in good working order. The test slab or standard supplied by the maker, and the tables if any, must accompany each refractometer. Upon request special attention will be given to such portions of the scale as may be of particular importance in the contemplated use of the instrument. Refractometers with compensators will be tested with "white" light unless otherwise specified. Refractometers without compensators will be tested only with sodium light unless otherwise specified.

| Item | Description | Fee |
|---|---|---|
| 202.204z | For special tests and calibrations of refractometric measurements, fees will be charged dependent upon the nature of the test. | |

### § 202.205 Refractive indices.

When submitting media for index measurement, the temperature, wavelength of light (or spectral line), and approximate degree of desired precision should be specified. Liquid samples should usually be as large as 10 ml. Solids for item d must be in the form of test slabs, approximately 1 x ½ x $\frac{3}{16}$ inch, such as are commonly used for the adjustment of Abbe refractometers. Two surfaces must be pitch polished (plane within approximately one wavelength) and intersect at 90° to form an unbeveled edge.

| Item | Description | Fee |
|---|---|---|
| | Index of refraction ($\pm1\times10^{-4}$) for D spectrum line for one liquid by precision Abbe refractometer: | |
| 202.205a | Determination of index for single temperature | $43.00 |
| 202.205b | Determination of index for each additional sample submitted at the same time for same temperature, or for each determination and additional spectral lines for same temperature | 22.00 |
| 202.205c | One index determination at each additional temperature | 27.00 |
| | Index of refraction ($\pm1\times10^{-4}$) for D spectrum line for one solid by precision Abbe refractometer: | |
| 202.205d | Determination of index for one sample | 27.00 |
| 202.205e | Determination of index for each additional spectrum line, C, F, or G | 11.00 |
| | Determination of index of refraction ($\pm1\times10^{-4}$) of solid submitted in form of 60° prism for one visible spectrum line: | |
| 202.205f | Determination of index | 38.00 |
| 202.205g | For each additional line in the visible spectrum | 18.00 |
| 202.205z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.206 Polarimetric instruments.

| Item | Description | Fee |
|---|---|---|
| 202.206a | Calibration of quartz saccharimeter-control plates: | |
| | Single plate | $110.00 |
| | Double plates | 165.00 |

## PHOTOGRAPHIC RESEARCH

### § 202.311 Photography.

The following information is pertinent to the tests a to f in this schedule.

a. American Standard Printing Transmission Density (Type P2–b) is measured on step tablets of 21 steps or less, with a densitometer calibrated to ±0.01 density or ±1 percent of the density, whichever is the greater. This type of density is the one most commonly employed in the photographic industry and is customarily implied when the type of density is not specified.

b. American Standard Diffuse Visual Transmission Density (Type VI–b) is measured on step tablets of 21 steps or less, with a densitometer calibrated to ±0.01 density or ±1 percent of the density, whichever is the greater.

c, d. The determination of the residual sodium thiosulfate content of processed photographic film is made according to American Standard Method PH4.8–1958 or the latest revision thereof.

Hypo concentrations less than 0.005 mg per square inch are reported as "nil." When hypo concentration is 0.005 mg per square inch or over, it is reported to one significant figure.

Each sample submitted should be properly identified, contain no image (slight fog permissible), and must be submitted immediately after processing.

Each sample submitted should be 6 to 8 inches in length and should be attached securely to request letter by stapling.

Samples are not returned since they are destroyed during test.

e, f. The determination of residual sodium thiosulfate concentration of processed photographic paper is made according to American Standard Method PH4.30–1962 or the latest revision thereof.

Each sample submitted should be properly identified, contain no image (slight fog permissible), and be of such dimensions that two strips, 1 x 4 inches, can be cut for test.

| Item | Description | Fee |
|---|---|---|
| 202.311a | Calibration of photographic step tablets for printing density, one sample | $33.00 |
| 202.311b | Calibration of photographic step tablets for visual density, one sample | 33.00 |
| 202.311c | Residual sodium thiosulfate concentration of processed film, one sample | 14.00 |
| 202.311d | Each additional sample for the determination of residual sodium thiosulfate in film submitted at the same time | 4.00 |
| 202.311e | Residual sodium thiosulfate concentration of processed photographic paper, one sample | 24.00 |
| 202.311f | Each additional sample for the determination of residual thiosulfate concentration of processed photographic paper submitted at the same time | 6.00 |
| 202.311z | For special tests not covered by the above schedule, such as precise determination of contact printing density and measurements of resolving power of photographic materials, fees will be charged dependent upon the nature of the test. | |

## LENGTH

### § 202.401 Reference line standards of length.

| Item | Description | Fee |
|---|---|---|
| 202.401z | Calibrations of reference line standards to a higher degree of accuracy than that provided schedule 202.402 are regarded as special tests. Fees will be charged dependent upon the nature of the test; they may be approximately estimated as twice the corresponding fees of schedule 202.402. | |

### § 202.402 Working line standards of length.

| Item | Description | Fee |
|---|---|---|
| 202.402a | Working line standard 40 inches or less in length—determination of the total length, or other interval, at 68° Fahrenheit (20° Celsius) to an accuracy of 0.00004 inch 0.001 mm if the character of the graduation justifies | $165.00 |
| 202.402b | Working line standard—determination of any other single interval | 81.00 |
| 202.402c | Working line standard—determination of equal submultiples of the length determined under item a or b, each | 33.00 |
| 202.402z | For special tests not covered by the above schedule, including determination of linear thermal expansion, fees will be charged dependent upon the nature of the test. | |

### § 202.403 Commercial line standards of length.

| Item | Description | Fee |
|---|---|---|
| 202.403z | Calibrations of commercial line standards of length to an accuracy of 0.01 mm or 0.0004 in., if the character of the graduation justifies, are regarded as special tests. Fees will be charged dependent upon the nature of the test; they may be approximately estimated as one-half of the corresponding fees of schedule 202.402. | |

### § 202.404 Steel tapes.

(a) Steel tapes accepted by the Bureau as suitable for calibration will be issued a National Bureau of Standards Report of Calibration. Steel tapes are used for many types of long-interval measurements. The varied requirements for the application of calibrated steel tapes to length measurements necessarily require variance in type and location of interval markings and accessory attachments. Some tapes, although being of excellent quality and having application that justifies NBS calibration, are not necessarily suitable for use as reference tapes (see paragraph b). Such steel tapes for which a Report of Calibration has been issued will be engraved with an NBS serial number for identification purposes. A steel tape considered by the Bureau to be suitable for use as a reference tape for checking other calibrated or uncalibrated steel tapes, or for other appropriate uses, will also be engraved with a mark indicating the year of calibration. Reports of Calibration normally will indicate the measured lengths of intervals to the nearest 0.001 foot or 0.1 mm. Length values will be reported at 68° F (20° C).

(b) A steel tape considered suitable for use as a reference tape, as defined above, should possess the following minimum requirements: The error in total length of the tape at the standard temperature of 68° F (20° C) and at standard tension shall not exceed 0.1 inch per 100 feet (2 mm per 25 m). The standard tension is 10 lb. (4.5 kg) for tapes 25 to 100 feet, or from 10 to 30 m in length and 20 lb. (9 kg) for tapes longer than 100 feet or 30 m. From the standpoint of inherent stability and to prevent the possibility of accidental displacement of reference graduations, a reference tape should normally possess the following characteristic: All interval graduations should be on a single piece of metal ribbon. This is usually construed to imply that the graduations should not be on pieces of solder, sleeves, thin plates or blocks bonded or attached to the tape, or on wire loops, spring balances, tension handles, or other accessories likely to be detached or changed in shape.

| Item | Description | Fee |
|---|---|---|
| 202.404a | Steel tape—determination of correction to the total length of the tape when supported throughout at standard tension and at standard temperature, for a tape not exceeding 200 ft or 50 m in length | $30.00 |
| | This is the regular standard test which will be made and charged for in each case. To this amount must be added the fees for any additional tests made, and for item (n), if applicable, in accordance with the following schedule. | |
| 202.404b | Steel tape—determination of the correction to the total length when supported throughout at any tension other than standard tension, for a tape not exceeding 200 ft or 50 m in length | 6.00 |
| | Tension desired must be specified. | |
| 202.404c | Steel tape—determination of the correction to total length when supported at the ends only | 6.00 |
| | The Bureau is not prepared to make this test on tapes having a greater length than 200 ft or 50 m. | |
| | Standard tension will be used unless another tension is specified. | |
| 202.404d | Steel tape—determination of the correction to the total length when supported at the ends and at one or more intermediate points, for a tape not exceeding 200 ft or 50 m in length | 6.00 |
| | Standard tension will be used unless another tension is specified. | |

| Item | Description | Fee |
|---|---|---|
| 202.404e | Steel tape—determination of the correction to the length of a subinterval under the same conditions as to tension and points of support as for the total length | $5.00 |
| | The points at which these measurements are made must be points at which the tape is supported. | |
| | The Bureau is not prepared to test tapes supported at points more than 200 ft or 50 m apart. | |
| 202.404f | Steel tape—determination of the correction to the length of a subinterval under different specified conditions as to tension and points of support from those used for the total length | 6.00 |
| | See item (e) above. | |
| 202.404g | Steel tape—determination of the tension to the nearest integral half-pound or quarter kilogram at which the correction to the length of and interval is most nearly zero, under a specified condition of support, for a tape not exceeding 200 ft or 50 m | 6.00 |
| 202.404h | Steel tape—determination of the correction to a subinterval at the tension at which the correction to the total length is most nearly zero and under the conditions of support used in the test under item (e) | 5.00 |
| 202.404i | Steel tape—determination of correction to the total length of an interval on the reverse side of the tape, when supported at standard tension and at standard temperature, for a tape not exceeding 200 ft or 50 m in length | 6.00 |
| 202.404j | Steel tape—determination of the coefficient of expansion of a tape, fee will be determined in each individual case. | |
| 202.404k | Steel tape—determination of Young's modulus of elasticity, for a tape not exceeding 200 ft or 50 m in length | 22.00 |
| | Not recommended for tapes having enameled, plastic, or heavy varnish coatings. | |
| 202.404l | Steel tape—determination of the weight per foot or per meter of a tape | 9.00 |
| 202.404m | Spring balance—testing in horizontal position | 17.00 |
| 202.404n | Steel tape—additional charge for each tape sent without reel | 6.00 |
| 202.404o | Steel tape—determination of A.E. | 17.00 |
| 202.404p | Steel tape—computed values (this does not include charge for necessary measurements) | 6.00 |
| 202.404z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.405 Invar base-line tapes.

For testing of steel tapes, see schedule 202.404. The test of an Invar base-line tape of any length less than 50 m on the NBS geodetic-tape comparator will, in general, be made for the same fee as a 50-m Invar base-line tape. Attention is called to the fact that only Invar base-line tapes of certain lengths can be tested on this comparator. Invar tapes not tested on the geodetic-tape comparator will be tested on the bench standard under items 202.405 (l) and (m).

| Item | Description | Fee |
|---|---|---|
| 202.405a | Invar 50-m base-line tape—determination on the geodetic comparator of total length with a probable error not greater than ±0.050 mm | $165.00 |
| 202.405b | Invar 50-m base-line tape—determination on the geodetic comparator of total length at an additional tension and/or method of support, with a probable error not greater than ±0.50 mm | 43.00 |
| 202.405c | Invar 50-m base-line tape—determination of total length supported throughout, by computation from the observed length when supported at the ends and one or more intermediate points. | 22.00 |
| 202.405d | Invar 50-m base-line tape—high-precision calibration of a group of uniformly spaced subintervals when supported on a horizontal flat surface, using the same tension specified for test item 202.405c. Charge for each interval | $22.00 |
| 202.405e | Invar 50-m base-line tape—determination on the geodetic comparator of the coefficient of expansion with an accuracy of at least 0.000001 per degree Celsius using the electrical resistance method and calibration of its total length at one temperature, tension, and method of support with a probable error not greater than ±0.050 mm | 245.00 |
| 202.405f | Invar base-line tape—determination of Young's modulus of elasticity | 22.00 |
| 202.405g | Invar base-line tape—determination of the weight per meter (or per foot) | 9.00 |
| 202.405h | Spring balance—testing in horizontal position | 17.00 |
| 202.405i | Invar base-line tape—additional charge for each tape sent without a reel | 6.00 |
| 202.405j | Invar base-line tape—determination of A.E. | 17.00 |
| 202.405k | Invar base-line tape—computed values other than as provided in item 202.405e | 17.00 |
| 202.405l | Invar base-line tape not more than 50 m in nominal length—determination on bench standard at room temperature of length of one interval when supported at one method of support and under one tension, or determination of the tension to the nearest integral half pound or quarter kilogram at which the correction to the length of the interval is most nearly zero at a specified method of support | 49.00 |
| 202.405m | Invar base-line tape not more than 50 m in nominal length—each additional determination on bench standard at room temperature of length of interval, or tension to the nearest integral half pound or quarter kilogram at which the correction to the length of an interval is most nearly zero | 18.00 |
| 202.405z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.406 Surveyors' measuring instruments (other than tapes).

| Item | Description | Fee |
|---|---|---|
| 202.406a | Leveling rod—testing principal intervals | $52.00 |
| 202.406z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.407 Sieves.

NOTE: The precision seal of the National Bureau of Standards on any sieve indicates that the sieve has been tested at the Bureau and found to conform to specification. Except by special arrangements, the testing of sieves at the Bureau is limited to No. 2½ to No. 400 inclusive.

| Item | Description | Fee |
|---|---|---|
| 202.407 | Sieve—test of a sieve No. 2½ to No. 400 inclusive to determine conformity to specification, but not including the sieving test | $18.00 |
| 202.407z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.408 Haemacytometers.

Each haemacytometer chamber and each cover glass which passes the specification is marked with a National Bureau of Standards precision seal. In general, work will be discontinued when a substantial number of items in a lot fail to comply with the specifications, and the fee will be computed on the basis of the number of items tested plus a special handling charge. Items 202.408 a to e inclusive will be applicable if a minimum of 12 chambers are submitted at one time; otherwise item 202.408z will be applicable. Only one letter reporting results of test will be supplied for any one test at the prices of items 202.408 a to e inclusive.

| Item | Description | Fee |
|---|---|---|
| 202.408a | Single Neubauer haemacytometer chamber—testing single cell chamber (having Neubauer ruling) and two cover glasses for conformity with specification | $8.00 |
| 202.408b | Single Fuchs-Rosenthal haemacytometer chamber—testing single cell chamber (having Fuchs-Rosenthal ruling) and two cover glasses for conformity with specification | 11.00 |
| 202.408c | Double Neubauer haemacytometer chamber—testing double cell chamber (having two Neubauer rulings) and two cover glasses for conformity with specification | 9.00 |
| 202.408d | Double Fuchs-Rosenthal haemacytometer chamber—testing double cell chamber (having two Fuchs-Rosenthal rulings) and two cover glasses for conformity with specification | 22.00 |
| 202.408e | Quadruple haemacytometer chamber—testing quadruple cell chamber (having two Neubauer rulings and two Fuchs-Rosenthal rulings) and two cover glasses for conformity with specification | 23.00 |
| 202.408z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

### § 202.409 Areas and area-measuring instruments.

| Item | Description | Fee |
|---|---|---|
| 202.409z | Special tests only are conducted in this category and fees will be charged dependent upon the nature of the test. | |

### § 202.410 Precision circles.

| Item | Description | Fee |
|---|---|---|
| 202.410z | Special tests only are conducted in this category and fees will be charged dependent upon the nature of the test. | |

### § 202.411 Linear thermal expansion of solids.

| Item | Description | Fee |
|---|---|---|
| 202.411z | Special tests only are conducted in this category and fees for accepted tests will be charged dependent upon their nature. Only those tests that cannot be carried out elsewhere may be accepted. | |

### § 202.412 Gage blocks.

(a) Test fee schedules in 202.412 include a statement of the accuracy to which measurements are ordinarily made. *However*, If the character of the defining surfaces of a gage block is not such as to warrant this accuracy, the re-

port will show the accuracy actually obtained. All gage blocks submitted for test should be in substantially new block condition and each block should be marked with an identification number.

(b) In the shipment of gage blocks extreme care should be taken both against corrosion and damage by contact with other gage blocks during transit. All defining steel surfaces should be greased and the blocks padded with waxed paper or volatile rust inhibitor treated paper. A greased steel surface coming in contact with newspaper, wrapping paper (unwaxed) or excelsior is very likely to corrode. Sets of gage blocks should have packing inside the case, and the case should be bound shut as the clasps frequently open or break during shipment.

(c) Shipments and purchase orders should be sent to the National Bureau of Standards, Washington, D.C., 2034, marked to the attention of the Length Section.

| Item | Description | Fee |
|---|---|---|
| 202.412a | Gage blocks—determination of length to ±0.000004 in. and excessive errors in flatness and parallelism, for sizes from 0.100 in. to and including 1.000 in., in lots of 10 or more, each. Actual cost of calibration will be charged for smaller lots. | $8.00 |
| 202.412b | Gage blocks—determination of length to ±0.000005, ±0.000006, and ±0.000007 in., respectively, for blocks from 1 to 2 in., 2 to 3 in., and 3 to 4 in. in length, and excessive errors in flatness and parallelism, in lots of three or more, each. Actual cost of calibration will be charged for smaller lots. | 23.00 |
| 202.412ab | Measurements as described under items (a) and (b) for usual 81-block set, per set. Extra blocks will be charged for under items (a) or (e). | 570.00 |
| 202.412c | Gage blocks—determination of length to ±0.000002 in. and excessive errors in flatness and parallelism, for sizes from 0.100 in. to and including 1.000 in., in lots of 10 or more, each. Actual cost of calibration will be charged for smaller lots. | 12.00 |
| 202.412d | Gage blocks—determination of length to ±0.000002, ±0.000003, and ±0.000004 in., respectively, for blocks from 1 to 2 in., 2 to 3 in., and 3 to 4 in. in length, and excessive errors in flatness and parallelism, in lots of three or more, each. Actual cost of calibration will be charged for smaller lots. | 35.00 |
| 202.412cd | Measurements as described under items (c) and (d) for usual 81-block set, per set. Extra blocks will be charged for under items (c) or (e). | 960.00 |
| 202.412e | Gage blocks—determination of length to ±0.000003 in. and excessive errors in flatness and parallelism, for sizes from 0.010 in. to and including 0.060 in., in lots of 10 or more, each. Blocks in this size range are usually warped and do not warrant calibration to a higher accuracy. In special cases blocks 0.040 in. and thicker will be calibrated under item (c) if the errors in flatness of the blocks are not excessive. | 9.00 |
| 202.412f | Gage blocks—determination of length to ±0.000001 in. per inch of length and excessive errors in flatness and parallelism, for blocks of the following length: 5, 6, 7, 8, 10, 12, 16, and 20 in., in lots of three or more, each. Actual cost of calibration will be charged for smaller lots. | 54.00 |
| 202.412z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

ENGINEERING METROLOGY

## § 202.500 General.

(a) Test fee schedules 202.501 to 202.509 include a statement of the relative accuracy to which measurements are ordinarily made. However, if the character of the defining surface of a gage or other article is not such as to warrant the measurement to this accuracy, the report will show the accuracy actually obtained. If a greater accuracy is requested and the defining surfaces are such as to permit measurements to the accuracy requested, the necessary measurements will be made and a special fee will be charged.

(b) In addition to the items covered by schedules 202.501 to 202.509 other items such as gage block accessories, taper plug and ring gages, and gill net gages are occasionally calibrated. Other sizes than those listed in the fee schedules are also calibrated on special request. These tests and calibrations are made so infrequently that it is not practical to list a definite fee, and such work will be done on the basis of the cost of the work.

(c) In the shipment of gages, extreme precautions should be taken both against corrosion and damage by contact with other gages during transit. All defining steel surfaces should be greased and protected with waxed paper or a suitable strippable plastic coating. A greased steel surface coming in contact with newspaper, wrapping paper (unwaxed), or excelsior is very likely to corrode. Small gages suitably wrapped may be fastened in place in a strong rigid container so that no movement is possible. Plug and ring gages should ordinarily not be shipped mated. In the case of large-size threaded plugs and rings, however, mating is permissible as a means of protecting the plug threads. In such cases a grease must be used that will prevent electrolytic corrosion between the mating gages.

(d) Minimum test fee for calibration work is $20.00.

## § 202.501 End standards of length.

| Item | Description | Fee |
|---|---|---|
| | End standards with spherical or pointed ends, of flat ends with area of contact less than ¼ in.²: | |
| 202.501a | Determination of length to ±0.00005 in. for lengths up to and including 8 in., each. | $14.00 |
| 202.501b | Determination of length to ±0.000005 in. per inch of length for lengths over 8 in. up to and including 20 in., each. | 20.00 |
| 202.501c | Determination of length to ±0.000005 in. per inch of length for lengths over 20 in. up to and including 40 in., each. | 24.00 |
| 202.501d | Determination of length to ±0.000006 in. per inch of length for lengths over 40 in. up to and including 72 in., each. | 28.00 |
| 202.501e | Determination of length to ±0.00002 in. for lengths up to and including 8 in., each. | 28.00 |
| 202.501f | Determination of length to ±0.000008 in. per inch of length for lengths over 8 in. up to and including 20 in., each. | 38.00 |
| 202.501g | Determination of length to ±0.000008 in. per inch of length for lengths over 20 in. up to and including 40 in., each. | 43.00 |
| 202.501h | End standards with spherical or pointed ends, etc.—Con. Determination of length to ±0.000063 in. per inch of length for lengths over 40 in. up to and including 72 in., each. | $56.00 |
| 202.501z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

## § 202.502 Plain cylindrical plug and ring gages.

| Item | Description | Fee |
|---|---|---|
| 202.502a | Plain cylindrical plug gages—determination of diameter, taper, and roundness to ±0.00005 in. for sizes up to and including 4 in., each. | $14.00 |
| 202.502b | Plain cylindrical plug gages—determination of diameter, taper, and roundness to ±0.00001 in. for sizes up to and including 2 in., each. | 41.00 |
| 202.502c | Plain cylindrical plug gages—determination of diameter, taper, and roundness to ±0.000005 in. for sizes up to and including 2 in., each. | 50.00 |
| 202.502d | Plain cylindrical ring gages—determination of diameter, taper, and roundness to ±0.00001 in. for sizes 0.03 in. up to and including 2 in., each. | 59.00 |
| 202.502e | Plain cylindrical ring gages—determination of diameter, taper, and roundness to ±0.000005 in. for sizes 0.03 in. up to and including 2 in., each. | 89.00 |
| 202.502f | Plain cylindrical ring gages—determination of diameter, taper, and roundness to ±0.000003 in. for sizes 0.25 in. up to and including 2 in., each. | 115.00 |
| 202.502z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

## § 202.503 Thread plug and ring gages.

| Item | Description | Fee |
|---|---|---|
| 202.503a | Straight thread plug gages and setting thread plug gages—determination of angle to 3′ to 15′ depending on pitch and diameter; lead error and pitch diameter to 0.0001 in., major diameter to 0.0002 in. thread form as to clearance, for sizes ¼ in. to 6 in., each. | $36.00 |
| 202.503b | Straight thread ring gages—determination of angle to 3′ to 15′ depending on pitch and diameter, lead error to 0.0001 in., minor diameter to 0.0002 in., thread form as to clearance, and fit on setting plug, for sizes ¼ in. to 6 in., each. | $36.00 |
| 202.503c | Taper thread plug gages having 60° threads (except API Cable and Rotary gages)—determination of half angles to 3′ to 15′ depending on pitch and diameter, lead error, pitch diameter and taper to 0.0001 in., major diameter to 0.0003 in., and thread form as to clearance, for sizes up to and including 10 in., each. | 89.00 |
| 202.503d | Taper thread plug gages having 60° threads—determination of half angles to 3′ to 15′ depending on pitch and diameter, lead error and taper to 0.000k in., pitch diameter to 0.0002 in., major diameter to 0.0004 in., and thread form as to clearance, for sizes over 10 in., to 24 in., inclusive each. | 115.00 |
| 202.503e | Taper thread ring gages having 60° threads (except API Cable and Rotary gages)—determination of angle to 3′ to 15′ depending on pitch and diameter, lead error to 0.0001 in., taper to 0.0002 in., minor diameter to 0.0005 in. (or truncation of thread crest), thread form as to clearance, and standoff from mating plug to 0.002 in. for sizes up 10 in., each. | 71.00 |
| 202.503f | Taper thread ring gages having 60° threads—determination of angle to 3′ to 15′ depending on pitch and diameter, lead error to 0.0001 in., taper to 0.0002 in., minor diameter to 0.0005 in. (or truncation of thread crest), thread form as to clearance, and standoff from mating plug to 0.002 in. for sizes over 10 in. to 24 in., inclusive, each. | $115.00 |
| 202.503g | API Cable and Rotary taper thread plug gages—determination of dimensions specified in API Standard 7, each. | 130.00 |
| 202.503h | API Cable and Rotary taper thread ring gages—determination of dimensions specified in API Standard 7, each. | 89.00 |
| 202.503i | API Cable and Rotary tool connections gages—determination of mating standoff and standoff from grand master gages, per set. | 27.00 |
| 202.503j | API sucker rod plug gages designated as P1, P5, P7, B8, and B6—determination of dimensions specified in API Standard 11B, each. | 36.00 |
| 202.503k | API sucker rod plug gages designated as P3 and B4—determination of dimensions specified in API Standard 11B, each. | 71.00 |
| 202.503l | API sucker rod ring gages designated as P2, P6, P8, B1, and B5—determination of dimensions specified in API Standard 11B, each. | 36.00 |
| 202.503m | API sucker rod ring gages designated as P4 and B3—determination of dimensions specified in API Standard 11P, each. | 59.00 |
| 202.503n | API sucker rod gages—determination of dimensions specified in API Standard 11B for the inspection of used gages, per set of any size. | 165.00 |
| 202.503o | API buttress casing plug gages—determination of dimensions specified in API Standard 5B, for sizes up to 10 in., each. | 100.00 |
| 202.503p | API buttress casing plug gages—determination of dimensions specified in API Standard 5B, for sizes over 10 in., each. | 125.00 |
| 202.503q | API buttress casing ring gages—determination of dimensions specified in API Standard 5B, for sizes up to 10 in., each. | 82.00 |
| 202.503r | API buttress casing ring gages—determination of dimensions specified in API Standard 5B, for sizes over 10 in., each. | 115.00 |
| 202.503s | API extreme line casing plug gages—determination of dimensions specified in API Standard 5B, each. | 175.00 |
| 202.503t | API extreme line casing ring gages including seal element—determination of dimensions specified in API Standard 5B, each. | 175.00 |
| 202.503u | API extreme line casing gages—determination of mating standoff with grand master gages, R and S dimensions as specified in API Standard 5B, per set. | 120.00 |
| 202.503z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

## § 202.504 Instruments and components.

| Item | Description | Fee |
|---|---|---|
| 202.504a | Micrometer calipers—determination of errors at 10 points selected to test uniformity of graduations as well as lead errors. Also determination of planeness and parallelism errors of contact surfaces, each. | $54.00 |
| 202.504b | Dial micrometers—determination of errors in each one-tenth revolution of the pointer for one revolution and each half revolution up to five revolutions, each. In the case of dial micrometers, the accuracy obtainable depends on the value of the smallest division on the dial and on the mechanical condition of the instrument as evidenced by the degree to which it will repeat its indications. | 38.00 |
| 202.504c | Thread wires—determination of diameter, straightness, and roundness of each of three wires in a set in accordance with specification for wires in NBS Handbook H28, Screw Thread Standards for Federal Services, and determination of mean diameter and C correction, for the best sizes of wires for standard 60° screw threads, from 2 to 80 threads per inch and for 29° Acme screw threads from 1 to 20 threads per inch, per set of three wires. | $6.00 |
| 202.504d | Gear wires—determination of diameter, straightness, and roundness of each of two wires in a set to an accuracy of ±0.000010 inch, per set. | 8.00 |
| 202.504e | Master wires—determination of mean diameter, and straightness to an accuracy of ±0.000005 inch, each. | 18.00 |
| 202.504f | Penetration needles—test for compliance with ASTM Specification D5-61, without reporting actual dimensions, for one to ten needles. | 59.00 |
| 202.504g | Same, each additional needle. | 5.00 |
| 202.504h | Petroleum wax penetration needles—test for compliance with ASTM Specification D1321-61T, without reporting dimensions, each. | 6.00 |
| 202.504i | Penetration needle numbering—all needles must have individual identification numbers, needles received without identification will be marked, each. | 4.00 |
| 202.504j | Polariscope tubes—determination of the average length of polariscope observation tube and marking with NBS serial number if length is within ±0.03 mm of nominal length for 100 to 200 mm tubes and ±0.04 mm for 400 mm tubes, each. | 27.00 |
| 202.504z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

## § 202.505 Optical reference planes.

| Item | Description | Fee |
|---|---|---|
| | Optical reference planes are tested interferometrically, horizontally supported with test surface supported on three equally spaced pads located at 0.7 of the radius from the center. The test is performed along two marked diameters at 90° to each other on each surface, when each diameter is parallel to two of the support pads. Graphs of the profiles are supplied. | |
| 202.505a | Optical reference plane—to an accuracy of ±0.0000005 in. for sizes not exceeding 6 in., per surface. | $82.00 |
| 202.505b | Optical reference plane—to an accuracy of ±0.0000005 in. for sizes larger than 6 in. but not exceeding 8 in. in diameter, per surface. | 120.00 |
| 202.505c | Optical reference plane—to an accuracy of ±0.0000005 in. for sizes larger than 8 in. but not exceeding 10 in. in diameter, per surface. | 175.00 |
| 202.505z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

## § 202.506 Angle blocks.

| Item | Description | Fee |
|---|---|---|
| 202.506a | Calibration of set of AA grade angle blocks consisting of one each of the following sizes. 1, 3, 5, 20, and 30″; 1, 3, 5, 20, and 30′; 1, 3, 5, 15, 30, and 45°—determination of flatness of faces, parallelism of elements of surfaces and angle between faces. Accuracy of angle between faces 0.5″. Per set. | $410.00 |
| 202.506z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

## § 202.507 Polygons.

| Item | Description | Fee |
|---|---|---|
| | Calibration of polygons—determination of flatness of faces, variation of the angles between faces and the base of the polygon (where possible the polygon will be adjusted for minimum variation) and the angle between faces. Accuracy of values for angles between faces 0.5″ or less: | |
| 202.507a | Polygons having 4, 5, or 6 sides, each. | $205.00 |
| 202.507b | Polygons having 8, 9, or 10 sides, each. | 235.00 |
| 202.507c | Polygons having 12 sides, each. | 295.00 |
| 202.507d | Polygons having 15 sides, each. | 355.00 |
| 202.507e | Polygons having 24 sides, each. | 470.00 |
| 202.507f | Polygons having 36 sides, each. | 940.00 |
| 202.507g | Polygons having 72 sides, each. | 2,350.00 |
| 202.507z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

## § 202.508 Master balls.

| Item | Description | Fee |
|---|---|---|
| 202.508a | Steel or Carbide balls—determination of diameter to ±0.000050 in. for sizes from 1/16 in. to 1 in., each. | $12.00 |
| 202.508b | Steel or Carbide balls—determination of diameter to ±0.000010 in. for sizes from 1/16 in. to 1 in., each. | 18.00 |
| 202.508c | Master balls—determination of diameter to ±0.000005 in. by comparison with NBS master and measurement of roundness of two equators, for sizes from 1/16 in. to 1/4 in. by 1/32 in. steps and 1/4 in. to 1 in. by 1/16 in. steps. Tests applied only on balls with diameter variation of 0.000005 in. or less and deviation from nominal size within ±0.000030 in., each. | 29.00 |
| 202.508d | Master balls—determination of mean diameter from three interferometric readings to an accuracy of ±0.000003 in. and measurement of roundness of three equators. For sizes up to 1 in. in diameter. Test made only on balls with diameter variation of 0.000003 in. or less, each. | 71.00 |
| 202.508z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

## § 202.509 Gears.

| Item | Description | Fee |
|---|---|---|
| 202.509a | Tooth index measurement—calibration results recorded in tape form with each tooth location being represented by a plateau and another tape (taken simultaneously) of the reference diameter location during the tooth index calibration. Gears, master gears, gear cutters, and index plates, from 0.125 in. diameter to about 8.0 in. diameter and from about 24 teeth to 500 teeth. The maximum overall length of the part must be less than 3 in. Suitable reference and calibration surfaces must be available to obtain the estimated accuracy of ±3″ of arc. | |
| | For 71 teeth or less, each. | $190.00 |
| | For 72 teeth or more, each. | 235.00 |
| | The cost of any needed adaptors will be added to the calibration cost, if made by the Bureau. | |
| 202.509z | For special tests not covered by the above schedule, fees will be charged dependent upon the nature of the test. | |

MASS AND VOLUME

## § 202.620 General.

(a) *Calibration and testing.* (1) Calibration consists of determining the

value, either mass or volume, relative to an accepted standard. It is assumed that all items submitted for calibration will be used as reference standards. (This designation implies the use of a correction or actual value of the standard in all measurements relative to it.) Results of a calibration will be reported in a National Bureau of Standards Report of Calibration listing the value together with an appropriated uncertainty. The Report of Calibration makes no reference to the compliance with existing class tolerances which limit the departure of actual value from the nominal value.

(2) Testing consists of establishing compliance with applicable specifications or tolerances. If the need is critical and the service is not available elsewhere, items may be accepted for test. The results of the test will be reported in a National Bureau of Standards Report of Test, which generally is a statement indicating the compliance, or noncompliance, with the particular specification or tolerance.

(3) Acceptance for calibration or test is based on inspection at the Bureau. Acceptance is based on suitability for use as a reference standard. Items not accepted for calibration or test will be returned, the appropriate cleaning, handling, and inspection fee being applicable.

(4) The established fees are based on satisfactory test or calibration effected by normal procedures. Total cost of test or calibration will include cost of items required to facilitate the use of normal procedures. Examples of items, the cost of which will be added to the established fees as routine procedures, are replacement of missing small weights, repairs to damaged surfaces, the cleaning and greasing of glass stopcocks, repairs to shipping cases or crates, and the reconditioning or modification closures for weight-adjustment cavities.

(5) Occasionally items are received for test which vary excessively from nominal. Such variation becomes evident in the actual calibration or test. Completion of calibration or test may require considerable deviation from normal procedures. For such cases, the fee will be computed on a cost basis.

(6) When requested, receipt of items and purchase orders will be acknowledged. Such acknowledgment will not contain a price quotation. Actual cost of the calibration or test will be stated in the acknowledgment copy of NBS Form 64. Usually, this acknowledgment is issued sufficiently in advance of the completion of the work so that change orders can be processed prior to return shipment.

(b) *Correspondence and purchase orders.* (1) All correspondence concerning calibration and testing should be addressed to the National Bureau of Standards, Attention: Mass and Volume Section 213.31, Washington, D.C., 20234.

(2) The purchase order or calibration request must include complete information concerning the following items:

(i) Purchase order number or authority to charge against existing open purchase order.

(ii) Legal owner of item.

(iii) Nominal designation and total number of items by count.

(iv) Shipping instructions for shipment to other than name stated in (i).

(v) Previous Bureau of Standards test number if appropriate.

(3) After completion of calibration or test, items will be packed and shipped as directed. The Report of Calibration or the Report of Test, whichever is applicable, will be mailed under separate cover.

### § 202.621 Reference standards of mass.

(a) Reference standards of mass are weights or weight sets of design, material, and surface finish comparable to, but not necessarily limited to present Class A, B, M, S, or S–1 as described in Circulars 3 and 547 in Volume III of NBS Handbook 77. Standards accepted are calibrated with reference to NBS standards of mass, with an uncertainty compatible with the equipment and methods used.

(b) Packing and shipping: (1) Weights must be carefully packed. If shipped in their regular cases the weights should be tightly packed in their pockets by the use of extra materials of some sort.

(2) In many instances the sheet-metal weights that are packed under the glass covers of the regular cases reach the Bureau bent or otherwise damaged. Care should be given the packing of these weights. Sufficient extra packing should be used to hold the glass cover firmly in place.

(3) Many of the laboratory and storage weight cases now in service are not designed to retain the weights in the pockets during shipment. Also, shipments of weights are sometimes subjected to exceptionally rough handling. It is strongly recommended that weights larger than 200 g be removed from the laboratory or storage cases and packed for shipment as described in this section. Do not ship empty storage cases.

(4) Some soft but firm materials should be used next to weight and bound tightly against it to avoid possibility of abrasion. If tissue paper is used, many thicknesses should be firmly wrapped on. This then should be covered with thicker, tougher material such as cotton gauze or knit goods. The whole should then be wrapped securely in heavy wrapping paper to exclude the dust and grit from rough packing material. Each package should be clearly labeled.

(5) Weight identification, purchase order number, and legal owner must be clearly designated on the packing slip. Enclose packing slip in envelop and attach to outside of box (wrap with weights if package is small). Envelop should be clearly marked. Also package with the weights an information sheet stating the density and composition or accepted trade name of the material of which the weights are made, also the construction and surface protection of the weights.

(c) Calibration: (1) Cleaning, inspection, and handling in accordance with fee schedule 202.621 (a to d) will apply to all weights accepted for calibration.

(2) The true mass and/or apparent mass corrections are determined using computed volumes based on the manufacturers statement of density of the material. (In the absence of this information, estimated densities are used.) The apparent mass correction at 20° C is computed with reference to Normal Brass (density 8.4 g/cm³ at 0° C: Volume coefficient expansion 0.000054/C°, air density 1.2 mg/cm³). Apparent mass corrections computed to any other basis will be furnished if requested. Fee in accordance with 202.621 (e through z) will apply for calibration.

(3) Measurement of volumes for use in computing corrections will be done on a cost basis (202.621z). Correspondence or consultation as to the exact requirements must provide a basis for such calibration.

| Item | Description | Fee |
|---|---|---|
| | *Inspection, cleaning, and handling (also applies to weights not accepted for calibration)* | |
| 202.621a | For single weight not greater than 50 lb of 20 kg | $24.00 |
| 202.621b | For each set or group of weights submitted as a unit, when the largest weight is not greater than 2 lb or 1 kg | 30.00 |
| 202.621c | For each set or group of weights submitted as a unit, when the largest weight is not greater than 20 lb or 10 kg but is greater than 2 lb or 1 kg | 41.00 |
| 202.621d | For each set or group of weights submitted as a unit, when the largest weight is not greater than 50 lb but is greater than 20 lb or 10 kg | 54.00 |
| | *Calibration, in addition to appropriate inspection, cleaning, and handling fees* | |
| 202.621e | For sets 100 g to 1 mg, or sets within this range | 325.00 |
| 202.621f | For sets 100 g to 50 mg, or sets within this range | 290.00 |
| 202.621g | For sets 100 g to 1 g, or sets within this range | 145.00 |
| 202.621h | For sets 1 g to 1 mg, or sets within this range | 190.00 |
| 202.621i | For individual weights, 100 g or less | 24.00 |
| 202.621j | For each individual weight greater than 100 g but not greater than 2 kg | 30.00 |
| 202.621k | For each individual weight greater than 2 kg but not greater than 20 kg | 48.00 |
| 202.621z | Other operations will be charged for on the basis of actual cost of time and materials. | |

### § 202.622 Large mass standards.

(a) Large mass reference standards are weights over 50 pounds (up to and including 10,000 pounds). Acceptance for calibration is based on suitability with regard to general design and upon assurance of usage as a reference standard.

(b) Weights over 50 pounds will be accepted for testing or standardization provided the need is critical and the service is not available elsewhere. (Testing is to determine compliance or noncompliance with accepted specifications. Standardization includes testing and adjustment to comply with appropriate adjustment tolerance.)

(c) Packing and shipping: (1) Arrangements for testing or calibration should be completed before weights are shipped to the Bureau. All correspondence must be addressed to the National Bureau of Standards, Mass and Volume Section, 212.31, Washington, D.C., 20234.

(2) Weights from 51 pounds to approximately 250 pounds must be clean, suitably protected, and shipped in wooden boxes having screw-fastened covers. Larger weights must be clean, suitably protected, and shipped in reusable crates. Adjustment cavity seals must be packed separately and included with all new weights shipped to the Bureau of Standardization. The empty adjustment cavities must be suitably protected to exclude dirt and moisture while in transit.

(3) Ship weights as follows: (i) Test weights of 50 pounds and reference standards of 51 to 1,000 pounds: From the West Coast and Rocky Mountain area, ship to the National Bureau of Standards, Boulder, Colo., 80301; from the Midwest, ship to the National Bureau of Standards Master Scale Depot, 5800 West 69th Street, Chicago, Ill., 60600; from the East, ship to the National Bureau of Standards, Connecticut Avenue and Van Ness Street NW., Washington, D.C., 20234.

(ii) 1,001 to 10,000 pounds: It is desirable that weights larger than 1,001 pounds be submitted to the National Bureau of Standards Master Scale Depot, 5800 West 69th Street, Chicago, Ill., 60600; however, by previous correspondence, arrangements can be made for accepting such weights at the National Bureau of Standards in Washington, D.C.

(d) Adjusting material: When large amounts of adjusting material are required for new weights, the Bureau reserves the right to add the cost to the test fee or to require the owner or maker to furnish the material.

(e) Calibration, test, and standardization: For a calibration, the value of the weight or object (apparent mass with reference to Normal Brass) together with a statement of uncertainty will be reported on an NBS Report of Calibration. Weights accepted for test will be reported as either complying or not complying with appropriate specifications on an NBS Report of Test. Weights accepted for standardization will be reported as complying with appropriate Adjustment tolerance specifications on an NBS Report of Test. Fees in accordance with 202.622 (a through z) apply.

| Item | Description | Fee |
|---|---|---|
| | *Test weights, 50 lb, Class C, cast iron* | |
| 202.622a | A handling fee of $4.00 per weight in addition to the applicable test fee will be charged for each weight of a group submitted; the minimum handling charge shall be | $24.00 |
| | The Bureau no longer tests weights of this kind on a routine basis. Special need or requirement for this work must be established. | |
| 202.622b | Tolerance testing (no adjustment), per weight | 20.00 |
| 202.622c | Standardization, per weight | 38.00 |
| | *Test weights, 51 to 1,000 lb* | |
| 202.622d | Test and, when adjustable, standardize within Class C adjustment tolerances | 60.00 |
| 202.622e | Calibration only (precision 1/100,000) | 24.00 |

| Item | Description | Fee |
|---|---|---|
| | *Test weights, 1,001 to 2,500 lb* | |
| 202.622f | Test and, when adjustable, standardize to nominal value with precision of 0.01 lb | $87.00 |
| 202.622g | Calibration only (precision 1/100,000) | 71.00 |
| | *Test weights, 2,500 to 10,000 lb* | |
| 202.622h | Calibration only (precision 1/25,000) | 87.00 |
| 202.622i | Calibration only (precision 1/100,000) | 98.00 |
| 202.622j | Standardization, in addition to either 202.622h or 202.622i | 60.00 |
| | *Cars, railway track scale test* | |
| 202.622k | Standardization on Master Track Scale at National Bureau of Standards Master Scale Depot, 5800 West 69th St., Chicago, Ill. | $49.00 |
| | *Test weights, 10,000 to 150,000 lb* | |
| 202.622z | Fees for tests of weights in this grouping will be charged dependent upon the nature of the test. | |

### § 202.623 Calibration of mass elements of pressure-gage testing apparatus.

Calibration consists of cleaning, marking with suitable designation when required, and determining the value, which for weights of one pound and greater is reported to a precision of 1 part in 100,000. The fee is in accordance with fee schedule item 202.623a.

| Item | Description | Fee |
|---|---|---|
| 202.623a | Each item to be calibrated | $17.00 |

### § 202.624 Recalibration of mass standards.

Recalibration of reference mass standards should be based on monitoring the difference between weights or groups of weights in the set. As long as the differences as measured agree with the computed differences, the set can be considered constant. Mass standards submitted for recalibration will be cleaned, inspected, and tested by intercomparison. If this intercomparison shows there has not been a sufficient change to warrant complete recalibration, a letter so stating and referring to the previous National Bureau of Standards Report of Calibration will be issued. Such a letter may include new values for one or two weights if necessary. Fee will not exceed that listed under 202.621, 202.622, or 202.623, whichever is applicable.

### § 202.625 Glass volumetric apparatus.

(a) Glass volumetric apparatus is tested generally by weighing the amount of distilled water contained or delivered with reference to the graduations marked on the instrument. The quality of the markings and the care exercised in reading or setting the liquid level are major factors in both calibration and usage. Occasionally such instruments are used as reference or transfer standards which require calibration. Many usage requirements are satisfied by testing for compliance with existing capacity tolerance specifications. The Mass and Volume Section offers both calibration and testing, subject to certain restrictions.

(b) Instruments suitable for, and to be used for, reference or transfer standards will be accepted for calibration. Such instruments must essentially conform to the specifications contained in NBS Circular 602, Testing of Glass Volumetric Apparatus. Acceptance for calibration is based on correspondence or consultation concerning the exact manner in which the instrument is to be used. If accepted for calibration, the instrument will be marked with an identification number, calibrated, and the results reported on an NBS Report of Calibration. The report will state the capacity under the conditions of test together with an associated statement concerning uncertainty. Fee for calibration will be computed on a cost basis.

(c) Precision grade glass volumetric apparatus will be accepted for testing to determine compliance with specifications and tolerances if the need is critical and the service is not available elsewhere. Acceptance for test is based on conformance with the specifications contained in NBS Circular 602, or other appropriate specifications. The item will be marked with an appropriate stamp if test results indicate conformity with NBS–approved specifications and tolerances. No individual report will be issued (see paragraph d below for exception). Fee for testing is in accordance with 202.625 (a through l).

(d) A report will be furnished listing the test results for groups of blood pipets to be used as factory standards, if requested. Fees in accordance with 202.625p.

| Item | Description | Fee |
|---|---|---|
| | Testing in accordance with specifications in NBS Circular 602 or other approved specifications: | |
| 202.625a | Flasks of capacities up to and including 250 ml, each | $7.00 |
| 202.625b | Flasks of capacities exceeding 250 ml, each | 9.00 |
| 202.625c | Flasks marked both "to contain" and "to deliver," each | 12.00 |
| 202.625d | Flasks, of any capacity, when bearing more than one graduation mark. Primary capacity, each | 8.00 |
| 202.625e | Each capacity in addition to primary (number determined by the Bureau) | 4.00 |
| 202.625f | Flasks, specific gravity, each | 15.00 |
| 202.625g | Cylindrical graduates, capacities up to and including 250 ml, each | 18.00 |
| 202.625h | Cylindrical graduates, capacities exceeding 250 ml, each | 20.00 |
| 202.625i | Transfer pipets, each | 7.00 |
| 202.625j | Burets, except automatic, each | 21.00 |
| 202.625k | Burets, automatic, each | 24.00 |
| 202.625l | Measuring pipets, each | 17.00 |
| 202.625m | Items a thru l disqualified for test on initial inspection, per item | 7.00 |
| 202.625n | Dilution pipet, including Trenner automatic and Sahli, each | 4.00 |
| 202.625o | Dilution pipets, automatic, other than Trenner, each | 10.00 |
| 202.625p | Report of test for quality control purposes (applies to 202.625 n and o only), each item | 4.00 |
| 202.625q | Apparatus n and o disqualified for test on initial inspection, each | 4.00 |
| 202.625r | Items except those above for which there are accepted specifications, such as microozotomcters, spirits measuring flask, etc., will be tested on a cost basis in accordance with 202.625z. (Report of test will include capacities at test points if appropriate.) | |
| 202.625z | For special calibrations not covered by the above schedule, fees will be determined on a cost basis. | |

THE UNIVERSITY OF MICHIGAN

**§ 202.626 Metal volumetric apparatus.**

(a) Only those instruments suitable for use as reference standards (see, for example, specifications contained in NBS Monograph 62, Testing of Metal Volumetric Standards) will be accepted for calibration, based on inspection at the Bureau. Calibration consists of determining the value "to contain" or "to deliver" by either gravimetric means or by the use of transfer standards. The item will be marked, and the value determined will be reported, together with a statement concerning the uncertainty, on a National Bureau of Standards Report of Calibration. Fee in accordance with 202.626 (a thru z) applies. Specify "to contain," "to deliver," or both.

(b) Items not accepted for calibration as a result of initial inspection will be returned, fee in accordance with 202.626o being applicable.

(c) Packing and shipping: (1) The apparatus should be securely packed in cases or packages which will protect against possible damage.

(2) When submitting immersion bottles for calibration, do not include the tank as it is not used in the calibration.

(3) Arrangements for calibration of field standards in excess of 10 gallons capacity must be completed before shipping apparatus to the Bureau.

(4) If requested, the zero index or gage scales will be adjusted and sealed to within accepted tolerance specifications. Adjustment of slicker plate type standards should be made by the manufacturer.

| Item | Description | Fee |
|---|---|---|
| | Calibration "to contain." Fee for calibration "to deliver" is same. For both calibrations, double fee shown. | |
| 202.626a | Slicker plate measures of capacity less than 5 gallons, each | $38.00 |
| 202.626b | Slicker plate measures of 5-gallon capacity, each | 49.00 |
| | Adjustments of slicker plate measures to within accepted capacity tolerances, if requested, are done on a cost basis under 202.626z. | |
| 202.626c | ½ cubic foot bottles for use in testing gas meters, each | 49.00 |
| 202.626d | Cubic foot bottles for use in testing gas meters, each | 71.00 |
| 202.626e | Portable cubic foot standards (Stillman type) | 220.00 |
| 202.626f | Field standards of capacity less than 5 gallons (graduated neck type), each | $38.00 |
| 202.626g | Field standards of 5-gallon capacity, each | 49.00 |
| 202.626h | Field standards in excess of 5 gallons but less than 50-gallon capacity, first 10-gallon increment | 49.00 |
| 202.626i | Each additional 5-gallon increment, field standards of 50 gallons or more capacity | 11.00 |
| 202.626j | First 50-gallon increment | 74.00 |
| 202.626k | Each additional 50-gallon increment | 13.00 |
| 202.626l | Each additional 5-gallon increment | 10.00 |
| 202.626m | Calibration of field standards, graduated neck type, at more than one scale point, each additional point | 26.00 |
| 202.626n | Adjustment of zero index or gage, each | 24.00 |
| 202.626o | Apparatus disqualified for test, inspection and handling, each | 13.00 |
| 202.626z | For calibrations not covered by the above schedule, fees will be charged on a cost basis. | |

**§ 202.627 Hydrometers.**

(a) Hydrometers are considered reference standards. Those instruments conforming with the recommendations on construction contained in NBS Circular 555, Testing of Hydrometers, will be accepted for calibration, acceptance based on inspection at the Bureau.

(b) For the purposes of this fee schedule, the following changes are made in Circular 555:

(1) Hydrometers with duplex scales or flat scales are not considered suitable for use as laboratory standards and will not be accepted for calibration.

(2) The thermometer element of a thermohydrometer will not be calibrated. (See ASTM specification E100, Standard Specification for ASTM Hydrometers.)

(3) The results of calibration will be furnished together with a statement of uncertainty, on a National Bureau of Standards Report of Calibration. Use as a laboratory standard implies the use of corrections; therefore no reference to tolerance compliances will be made on the report.

(c) Calibration consists of comparison at three or more points with a standard hydrometer. Fee in accordance with 202.627 applies.

(d) Apparatus not accepted for calibration will be returned, appropriate inspection and handling fee being applicable. Each scale card must state the name of the manufacturer and his serial number, and standard temperature and type of scale.

| Item | Description | Fee |
|---|---|---|
| 202.627a | Hydrometers, calibrated at three points, lots of 10 or more of identical scale range and design, each | $21.00 |
| 202.627b | Hydrometers, calibrated at three points, lots of less than 10, each of identical range and design, each | 28.00 |
| 202.627c | Calibration at additional points, each point | 7.00 |
| 202.627d | Hydrometers disqualified for calibration—inspection and handling charge | 7.00 |
| 202.627z | For special calibrations not covered by the above schedule, fees will be determined on a cost basis. | |

**§ 202.628 Density determinations of solids and liquids.**

(a) If the need is critical and the service is not available elsewhere, request may be accepted for the following density determinations:

(1) Density of solids, determined by hydrostatic weighing in appropriate liquid. Solids generally to have a mass less than 175 g and a maximum dimension less than 15 cm.

(2) Density of liquids, determined by weighing in picnometers at temperatures between 0 and 70° C.

(3) Associated tests such as the volume of solids, coefficient of thermal expansion for both solids and liquids.

(b) Acceptance for test is based on consultation or correspondence regarding the exact nature of the requirements. Do not ship materials to the Bureau until all arrangements for test have been completed. Fees for all tests are computed on a cost basis.

| Item | Description | Fee |
|---|---|---|
| 202.628z | Density determinations for solids and liquids, fee computed on a cost basis. | |

## Title 5—ADMINISTRATIVE PERSONNEL

### Chapter I—Civil Service Commission

### PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

#### Advertising and Publicity

On June 5, 1964, August 19, 1964, and September 10, 1964, notices of proposed rule making were published in the FEDERAL REGISTER (29 F.R. 7327, 11844, 12784) stating that the Civil Service Commission was considering amendments of the regulations governing the Federal Employees Health Benefits Program.

Except for a proposed change relating to advertising by carriers all of these proposed rule-making procedures were terminated on October 29, 1964, by publication in the FEDERAL REGISTER (29 F.R. 14711) of the proposed amendments.

As indicated in the material accompanying the October 29, 1964, publication, so many comments—or questions—were received about the proposed advertising regulations published as proposed rule making on June 5, 1964, that different regulations were drafted and circulated to carriers by letter of October 8, 1964.

The present regulations have restricted advertising of plans by carriers since 1960, when the Federal Employees Health Benefits Program began. The main reason for the ban was to enable employees to choose a plan from among the large number available to them based on the factual description of benefits in the official brochure. Prior to the program, most employees had never had to exercise such a choice. The Commission now believes that employees, after experiencing three opportunities in five years to study and select or change plans, have learned to rely on the official brochures for an accurate description of a plan's benefits, limitations, and exclusions.

Comments received from carriers on the proposals of June 5 and October 8, 1964, indicate that most of them favor some restrictions on advertising. However, many object to regulations so restrictive as to terminate customary carrier practices which incidentally advertise their plans. While many of these practices are moderate, their variety and number is such that a regulation permitting all of them would in fact permit all forms of advertising. Upon consideration, it appears that removal of the restrictions on advertising will not adversely affect the interests of employees, and is the best solution to the problem confronting carriers.

This change does not affect existing contractual provisions and accounting practices which prohibit carriers from charging advertising costs to health benefit contracts.

Accordingly, § 890.204 of Part 890 of Title 5 is revoked, effective on the date of publication in the FEDERAL REGISTER.

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] MARY V. WENZEL,
*Executive Assistant to the Commissioners.*

[F.R. Doc. 64-13014; Filed, Dec. 18, 1964; 8:47 a.m.]

## Title 7—AGRICULTURE

### Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Tree Nuts), Department of Agriculture

[Navel Orange Reg. 65]

### PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

#### Limitation of Handling

**§ 907.365 Navel Orange Regulation 65.**

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 1001–1011) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on December 17, 1964.

(b) *Order.* (1) The respective quantities of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a.m., P.s.t., December 20, 1964, and ending at 12:01 a.m., P.s.t., December 27, 1964, are hereby fixed as follows:

(i) District 1: 400,000 cartons;
(ii) District 2: 75,000 cartons;
(iii) District 3: 60,000 cartons;
(iv) District 4: Unlimited movement.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," "District 4," and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 18, 1964.

PAUL A. NICHOLSON,
*Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

[Lemon Reg. 143]

### PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

#### Limitation of Handling

**§ 910.443 Lemon Regulation 143.**

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910; 27 F.R. 8346), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendation and information submitted by the Lemon Administrative

Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons as hereinafter provided will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 1001–1011) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on December 15, 1964.

(b) *Order.* (1) The respective quantities of lemons grown in California and Arizona which may be handled during the period beginning at 12:01 a.m., P.s.t., December 20, 1964, and ending at 12:01 a.m., P.s.t., December 27, 1964, are hereby fixed as follows:

(i) District 1: 46,500 cartons;

(ii) District 2: 97,650 cartons;

(iii) District 3: 60,450 cartons.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in the said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 17, 1964.

FLOYD F. HEDLUND,
*Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

## Chapter X—Agricultural Marketing Service (Marketing Agreements and Orders; Milk), Department of Agriculture

[Milk Order No. 32]

## PART 1032—MILK IN SUBURBAN ST. LOUIS MARKETING AREA

### Order Amending Order

**§ 1032.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Suburban St. Louis marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as herein amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Suburban St. Louis marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended and as hereby further amended, as follows:

1. Sections 1032.6 through 1032.19 are revised and renumbered to read as follows:

**§ 1032.6 Suburban St. Louis marketing area.**

"Suburban St. Louis marketing area", hereinafter called "marketing area" means all the territory within the following counties all of which are in the State of Illinois together with all municipal corporations therein and all institutions owned or operated by the Federal, State, county or municipal governments located wholly or partially within such counties:

(a) *Northern zone.* The counties of Bond, Calhoun, Fayette, Greene, Jersey, Macoupin and Montgomery.

(b) *Base zone.* The counties of Clinton, Franklin, Jackson, Jefferson, Madison, Marion, Monroe, Perry, Randolph, St. Clair (except Scott Military Reservation, East St. Louis, Centerville, Canteen and Stites Townships and the city of Belleville), Washington and Williamson.

**§ 1032.7 Producer.**

"Producer" means any person, other than a producer-handler as defined in any order (including this part) issued pursuant to the Act, who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority, and whose milk is (a) received at a pool plant, or (b) diverted as producer milk pursuant to § 1032.14.

**§ 1032.8 Producer-handler.**

"Producer-handler" means a person who:

(a) Operates a distributing plant and processes milk from his own farm production, and who distributes all or a portion of such milk within the marketing area on a route but who receives no milk from other dairy farmers or from nonpool plants in the form of fluid milk products; and

(b) Assumes as his personal enterprise and risk the processing and distribution of fluid milk products and the maintenance, care and management of dairy animals and other resources necessary to produce his own farm milk production.

**§ 1032.9 Handler.**

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant;

(b) Any person in his capacity as the operator of a partially regulated distributing plant;

(c) Any cooperative association with respect to milk from producers diverted for its account from a pool plant to a nonpool plant or another pool plant pursuant to § 1032.14;

(d) Any cooperative association with respect to the milk of its members which is delivered from the farm to the pool plant of another handler in a tank truck owned and operated by, or under contract to such cooperative association, if the cooperative association, prior to delivery, notifies in writing the market administrator and the handler to whose plant the milk is delivered, that it will be the handler for the milk. Milk so delivered shall be deemed to have been received by the cooperative association at a pool plant at the location of the pool plant to which it is delivered; and

(e) A producer-handler, or any person who operates an other order plant described in § 1032.61.

**§ 1032.10 Distributing plant.**

"Distributing plant" means any plant at which fluid milk products are processed and packaged and from which Grade A fluid milk products are disposed of on a route(s) in the marketing area during the month.

**§ 1032.11 Supply plant.**

"Supply plant" means any plant at which Grade A milk is received from dairy farmers and from which fluid milk products are moved to a distributing plant.

**§ 1032.12 Pool plant.**

"Pool plant" means:

(a) A distributing plant, other than that of a producer-handler or one described in § 1032.61, from which during the month:

(1) Disposition of fluid milk products in the marketing area on routes is equal to 10 percent or more of its Grade A receipts from dairy farmers and cooperative associations in their capacity as handlers pursuant to § 1032.9(d), or from which an average of not less than 7,000 pounds per day of fluid milk products is distributed on routes in the marketing area; and

(2) Total disposition of fluid milk products on routes is equal to 50 percent or more of its Grade A receipts from dairy farmers and cooperative associations in their capacity as handlers pursuant to § 1032.9(d) during the months of August through February and 40 percent during all other months;

(b) A supply plant from which during the month an amount equal to 50 percent or more of its receipts of Grade A milk from dairy farmers and from cooperative associations in their capacity as handlers pursuant to § 1032.9(d) is moved to and received at a pool plant(s) described in paragraph (a) of this section.

(c) Any supply plant during the months of February through August that was a pool plant during each of the preceding months of September through January, unless the operator of such plant notifies the market administrator in writing before the first day of any such month of his intention to withdraw such plant as a pool plant, in which case such plant shall thereafter be a nonpool plant until it again meets the shipping requirements set forth in paragraph (b) of this section.

**§ 1032.13 Nonpool plant.**

"Nonpool plant" means any milk receiving, manufacturing or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act;

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act;

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which fluid milk products labeled Grade A in consumer-type packages or dispenser units are distributed on routes in the marketing area during the month;

(d) "Unregulated supply plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which Grade A fluid milk products are shipped to a pool plant.

**§ 1032.14 Producer milk.**

"Producer milk" means all skim milk and butterfat contained in milk which is:

(a) Received during the month (1) by a cooperative association in its capacity as a handler pursuant to § 1032.9 (c) or (d), or (2) at a pool plant directly from producers (including milk which is commingled at a reload point) except that received by diversion pursuant to paragraph (b)(1) of this section: *Provided*, That milk received at a pool plant by diversion from a plant at which such milk would be fully subject to the pricing and pooling under the terms or provisions of another order issued pursuant to the Act shall not be producer milk; or

(b) Diverted by the operator of a pool plant or by a cooperative association subject to the following conditions:

(1) Diverted during the month from a pool plant to another pool plant(s) for not more days of production of producer milk by such producer than is physically received at a pool plant(s) pursuant to paragraph (a) of this section;

(2) Diverted from a pool plant to a nonpool plant(s) at which the handling of milk is not fully subject to the pricing and pooling provisions of another order issued pursuant to the Act on any day during the months of February through August and in any other month for not more days of production of producer milk by such producer than is physically received at a pool plant(s) pursuant to paragraph (a) of this section;

(3) Diverted during the month from a pool plant to a nonpool plant(s) at which the handling of milk is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act for not more days of production of producer milk by such producer than is received at a pool plant(s) pursuant to paragraph (a) of this section: *Provided*, That milk so diverted shall not be producer milk if, notwithstanding the provisions of this subparagraph, the milk is unconditionally subject to the pricing and pooling provisions of the other order;

(4) Milk diverted for the account of a handler in his capacity as operator of a pool plant shall be deemed to have been received at the pool plant from which diverted; and

(5) Milk diverted for the account of a cooperative association shall be deemed to have been received by the cooperative association at a pool plant at the location of the pool plant from which diverted.

**§ 1032.15 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in:

(a) Receipts during the month of fluid milk products except:

(1) Fluid milk products received from pool plants;

(2) Producer milk; and

(3) Inventory of fluid milk products on hand at the beginning of the month;

(b) Products other than fluid milk products, from any source (including those produced at the plant) which are reprocessed or converted to another product in the plant during the month; and

(c) Any disappearance of nonfluid milk products not otherwise accounted for.

**§ 1032.16 Fluid milk product.**

"Fluid milk product" means milk, skim milk, buttermilk, flavored milk, milk drinks (plain or flavored), cream (sweet or sour), concentrated milk, fortified milk or skim milk, reconstituted milk or skim milk and mixtures of milk, skim milk or cream (except frozen dessert mixes, eggnog, aerated cream, and sterilized products in hermetically sealed containers).

**§ 1032.17 Route.**

"Route" means a delivery (including disposition from a plant store or from a distribution point and distribution by a vendor or vending machine) of any fluid milk product to a retail or wholesale outlet other than a pool plant or a nonpool plant.

**§ 1032.18 Chicago butter price.**

"Chicago butter price" means the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of 92-score bulk creamery butter at Chicago as reported during the month by the Department.

**§ 1032.19 Reload point.**

"Reload point" means a location at which facilities approved, by a health authority exercising jurisdiction in the marketing area, only for the transfer of milk from one tank truck to another and for the washing of tank trucks and at which milk moved from the farm in a tank truck is commingled in a tank truck with milk from other tank trucks before

entering a milk plant: *Provided*, That reloading facilities on the premises of a plant having equipment for the receiving, cooling, storing and processing milk, which equipment is in current use, shall be considered a supply plant rather than a reload point.

2. Paragraph (i) of § 1032.22 is revised to read as follows:

**§ 1032.22 Duties.**

* * * * *

(i) On or before the 12th day after the end of each month, report to each cooperative association which so requests, the class utilization of producer milk received by each handler from members of the association. For the purpose of this report, the milk caused to be so delivered by an association shall be prorated to each class in the proportion that the total receipts of milk received from producers by such handler were used in each class.

* * * * *

3. Section 1032.41 is revised to read as follows:

**§ 1032.41 Classes of utilization.**

Subject to the conditions set forth in §§ 1032.42 to 1032.46 the classes of utilization shall be as follows:

(a) *Class I.* Class I shall be all skim milk and butterfat:

(1) Disposed of in the form of fluid milk products, except those classified pursuant to paragraph (b) (2), (3), (4), (5), and (6) of this section. Fluid milk products which have been fortified by the addition of nonfat solids shall be Class I in an amount equal only to the weight of an equal volume of an unmodified product of the same nature and butterfat content; and

(2) Not accounted for as Class II.

(b) Class II. Class II shall be:

(1) All skim milk and butterfat used to produce any product other than a fluid milk product;

(2) All skim milk and butterfat disposed of in bulk to commercial food processors and used in a food product prepared for consumption off the premises;

(3) All skim milk authorized by the market administrator to be dumped;

(4) All skim milk and butterfat accounted for as disposed of for livestock feed;

(5) The inventories of fluid milk products on hand at the end of the month;

(6) The skim milk and butterfat contained in that portion of "fortified" fluid milk products not classified as Class I pursuant to paragraph (a)(1) of this section;

(7) In shrinkage of skim milk and butterfat, respectively, assigned pursuant to § 1032.46(b)(1), but not to exceed the following:

(i) Two percent of milk received directly from producers; plus

(ii) One and one-half percent of milk received in bulk tank lots from pool plants of other handlers; plus

(iii) One and one-half percent of milk received from a cooperative association which is the handler for such milk pursuant to § 1032.9(d); plus

(iv) One and one-half percent of receipts of fluid milk products in bulk from an other order plant, exclusive of the quantity for which Class II utilization was requested by the operator of such plant and the handler; less

(v) One and one-half percent of milk disposed of in bulk tank lots to plants of other handlers (except when the milk is diverted, the applicable percentage shall be two percent) and to nonpool plants; and

(8) In shrinkage of skim milk and butterfat, respectively, assigned pursuant to § 1032.46(b)(2).

4. In § 1032.43 the text of paragraph (a) preceding subparagraph (1), all of paragraph (c), the text of paragraph (d) preceding subparagraph (1), and the text of paragraph (e) preceding subparagraph (1) are revised to read as follows:

**§ 1032.43 Transfers.**

* * * * *

(a) At the utilization indicated by both handlers, otherwise as Class I milk, if transferred or diverted to the pool plant of another handler, subject in either event to the following conditions:

* * * * *

(c) As Class I milk, if transferred or diverted to a nonpool plant that is neither an other order plant nor a producer-handler plant, located more than 450 miles from the County Courthouse in Vandalia, Illinois, by shortest highway distance as determined by the market administrator, except that cream so transferred may be classified as Class II if the handler claims Class II use and establishes that such cream was transferred to a nonpool plant without Grade A certification and that each container was labeled or tagged to indicate that the contents were for manufacturing use and that the shipment was so invoiced.

(d) As Class I milk, if transferred or diverted in bulk to a nonpool plant that is neither an other order plant nor a producer-handler plant, located not more than 450 miles from the County Courthouse in Vandalia, Illinois, unless the requirement of subparagraphs (1) and (2) of this paragraph are met, in which case the skim milk and butterfat so transferred or diverted shall be classified in accordance with the assignment resulting from subparagraph (3) of this paragraph;

* * * * *

(e) As follows, if transferred or diverted to an other order plant in excess of receipts from such plant in the same category as described in subparagraph (1), (2), or (3) of this paragraph:

**§ 1032.45 [Amended]**

5. In § 1032.45(a)(1) the reference "§ 1032.41(b)(6)" is changed to "§ 1032.41(b)(7)".

**§ 1032.46 [Amended]**

6. In § 1032.46(b) the references to "1032.41(b)(6)" are changed to "§ 1032.46(b)(7)".

7. Section 1032.50 is revised to read as follows:

**§ 1032.50 Basic formula price.**

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the Department for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

8. Section 1032.51 is revised to read as follows:

**§ 1032.51 Class prices.**

The respective minimum prices per hundredweight to be paid by each handler f.o.b. his plant for milk received from producers or from a cooperative association during the month shall be as follows:

(a) *Class I price.* (1) The Class I price for plants located in the Base Zone shall be the basic formula price for the preceding month plus $1.50 during each of the months of August through November; plus $1.10 during each of the months of March through June and plus $1.30 during all other months. Such price shall be increased or decreased respectively, by whatever amounts the Class I prices computed pursuant to Part 1030 (Chicago) and Part 1062 (St. Louis, Missouri) are increased or decreased by the supply-demand adjustors computed for such month under such Parts: *Provided*, That the price so determined shall be increased 15 cents per hundredweight from the effective date of this amended order through March 31, 1965; and

(2) The Class I price at plants in the Northern Zone shall be five cents less than the price computed pursuant to subparagraph (1) of this paragraph;

(b) *Class II price.* The Class II price shall be the basic formula price for the month.

9. Section 1032.61 is revised to read as follows:

**§ 1032.61 Plants subject to other Federal orders.**

In the case of a handler in his capacity as operator of a plant specified in paragraphs (a), (b), and (c) of this section the provisions of this part shall not apply except that such handler shall, with respect to his total receipts and disposition of skim milk and butterfat, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

(a) A distributing plant from which the Secretary determines a greater portion of fluid milk products is disposed of on routes in another marketing area regulated by another order issued pursuant to the Act and which is fully subject to such other order: *Provided*, That a distributing plant which was a pool plant under this order in the immediately preceding months shall continue to be subject to all of the provisions of this part until the third consecutive month in which a greater proportion of its Class I

disposition on routes is made in such other marketing area unless, notwithstanding the provisions of this paragraph, it is regulated by such other order;

(b) A distributing plant meeting the requirements of § 1032.12(a) which also meets the pooling requirements of another marketing order on the basis of distribution in such other marketing area and from which the Secretary determines a greater quantity of Class I milk is so disposed of during the month on routes in this marketing area than is so disposed of in such other marketing area but which plant is nevertheless fully regulated under such other marketing order; and

(c) Any plant qualified pursuant to § 1032.12(c) for any portion of the period of February through August, inclusive, that the milk at such plant is subject to the classification and pricing provisions of another order issued pursuant to the Act.

**§ 1032.62 [Amended]**

10. In § 1032.62(a) the reference to "§ 1032.13(b)" is changed to "§ 1032.12(b)".

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: February 1, 1965.

Signed at Washington, D.C., on December 16, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

[Milk Order 62]

## PART 1062—MILK IN ST. LOUIS, MO., MARKETING AREA

### Order Amending Order

**§ 1062.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the St. Louis, Missouri, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in the order as hereby amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, two and one-half cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to (a) producer milk and such handler's own production, (b) other source milk allocated to Class I pursuant to § 1062.45(a) (3) and (7) and the corresponding steps of § 1062.45 (b) and (c) Class I milk disposed of on routes in the marketing area from partially regulated city plants that exceeds the hundredweight of Class I milk received during the month at such plant from pool plants and other order plants.

(b) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as herein amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period were engaged in the production of milk for sale in the marketing area.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof the handling of milk in the St. Louis, Missouri, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

1. Section 1062.6 is revised to read as follows:

**§ 1062.6 St. Louis, Missouri, marketing area.**

"St. Louis, Missouri, marketing area", hereinafter called the "marketing area", means the territory within the corporate limits of the cities of St. Louis and St. Charles and the territory within the counties of Bollinger, Cape Girardeau, Crawford, Franklin, Jefferson, Perry, St. Francois, Ste. Genevieve, St. Louis, and Washington, all in Missouri; and the territory within Scott Military Reservation, and East St. Louis, Centerville, Canteen, and Stites Townships, and the city of Belleville, all in St. Clair County, Illinois.

2. Section 1062.7 is revised to read as follows:

**§ 1062.7 Producer.**

"Producer" means any person, other than a producer-handler as defined in any order (including this part) issued pursuant to the Act, who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority and whose milk is (a) received at a pool plant, or (b) diverted as producer milk pursuant to § 1062.14.

3. Section 1062.10 is revised to read as follows:

**§ 1062.10 Pool plant.**

"Pool plant" means:

(a) A city plant from which not less than 50 percent of the receipts of approved milk from dairy farmers, cooperative associations in their capacity as handlers pursuant to § 1062.12(d), and country plants is distributed during the month as Class I milk on routes and from which not less than 10 percent of such receipts or an average of not less than 7,000 pounds per day, whichever is less, is distributed on routes in the marketing area: *Provided*, That a plant which qualifies as a pool plant pursuant to this paragraph during the month shall be a pool plant during the following month;

(b) A country plant from which not less than 20 percent of receipts during the month of approved milk from dairy farmers and cooperative associations in their capacity as handlers pursuant to § 1062.12(d) is shipped to city plants which are pool plants pursuant to paragraph (a) of this section;

(c) A country plant during the months of March through August that was a pool plant in each of the preceding months of September through February, unless the operator of such plant submits a written request to the market administrator that such plant not be a pool plant, such nonpool status to be effective the first month following receipt of such notice and thereafter until the plant qualifies as a pool plant on the basis of shipments;

(d) A country plant operated by, or under contract to a cooperative association if 50 percent of the total milk supply of producers who are members of such an association has during the immediately preceding 12 months been:

(1) Shipped directly from farms to pool city plants;

(2) Transferred from a country plant operated by, or under contract to, the

cooperative association to a city pool plant; or

(3) Shipped directly from farms to pool country plants not operated by a

product in the plant during the month; and

(c) Any disappearance of nonfluid milk products not otherwise accounted

revoked; and the semicolon and the word "and" at the end of paragraph (e)(6) are deleted and a period is substituted

**§ 1062.51 Class prices.**

Subject to the provisions of §§ 1062.52

1062.72, and 1062.80 through 1062.89 shall not apply to a producer-handler.

tance exceeds 40 miles from the City Hall in Cape Girardeau.

cooperative association to a city pool plant; or

(3) Shipped directly from farms to pool country plants not operated by a cooperative association.

4. Section 1062.14 is revised to read as follows:

**§ 1062.14 Producer milk.**

"Producer milk" means all skim milk and butterfat contained in milk which is:

(a) Received during the month (1) by a cooperative association in its capacity as a handler pursuant to § 1062.9(c) or (d), or (2) at a pool plant directly from producers (including milk which is commingled at a reload point) except that received by diversion pursuant to paragraph (b)(1) of this section: *Provided*, That milk received at a pool plant by diversion from a plant at which such milk would be fully subject to the pricing and pooling under the terms and provisions of another order issued pursuant to the Act shall not be producer milk; or

(b) Diverted pursuant to subparagraphs (1), (2), and (3) of this paragraph by the operator of a pool plant or by a cooperative association in its capacity as a handler. Milk so diverted shall be deemed to have been received at the location of the pool plant from which diverted, except that milk diverted from a pool city plant to a nonpool plant located more than 110 airline miles from the City Hall in St. Louis shall be deemed to have been received at a pool plant at the same location as the nonpool plant to which diverted.

(1) Diverted during the month from a pool plant to another pool plant(s) for not more than 16 days' production;

(2) Diverted from a pool plant to a nonpool plant(s) at which the handling of milk is not fully subject to the pricing and pooling provisions of another order issued pursuant to the Act on any day during the months of March through August and in any other month for not more than 16 days' production;

(3) Diverted during the month from a pool plant to a nonpool plant(s) at which the handling of milk is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act for not more than 16 days' production: *Provided*, That milk so diverted shall not be producer milk if, notwithstanding the provisions of this subparagraph, the milk is fully subject to the pricing and pooling provisions of the other order.

5. Section 1062.16 is revised to read as follows:

**§ 1062.16 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in:

(a) Receipts during the month of fluid milk products except:

(1) Fluid milk products received from pool plants;

(2) Producer milk; and

(3) Inventory of fluid milk products on hand at the beginning of the month;

(b) Products, other than fluid milk products, from any source (including those produced at the plant) which are reprocessed or converted to another product in the plant during the month; and

(c) Any disappearance of nonfluid milk products not otherwise accounted for.

**§ 1062.17 [Revoked]**

6. Section 1062.17 is revoked.

7. Section 1062.41 is revised to read as follows:

**§ 1062.41 Classes of utilization.**

Subject to the conditions set forth in §§ 1062.42 through 1062.46, the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of fluid milk products, except those classified pursuant to paragraph (b)(2), (3), and (4) of this section. Fluid milk products which have been fortified by the addition of nonfat solids shall be Class I in an amount equal only to the weight of an equal volume of an unmodified product of the same nature and butterfat content; and

(2) Not accounted for as Class II.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Accounted for and used to produce any product other than a fluid milk product;

(2) All skim milk and butterfat authorized by the market administrator to be dumped;

(3) All skim milk and butterfat accounted for as disposed of for livestock feed;

(4) In inventory of fluid milk products on hand at the end of the month;

(5) The weight of the skim milk in fortified fluid milk products not classified as Class I pursuant to paragraph (a)(1) of this section;

(6) In shrinkage of skim milk and butterfat, respectively, but not to exceed the following:

(i) Two percent of milk received from dairy farmers exclusive of that diverted pursuant to § 1062.14; plus

(ii) One and one-half percent of milk received in bulk tank lots from pool plants of other handlers; plus

(iii) One and one-half percent of receipts of fluid milk products in bulk tank lots from other order plants, exclusive of the quantity for which Class II utilization was requested by the operators of such plants and the handler; plus

(iv) One and one-half percent of receipts of fluid milk products in bulk tank lots from unregulated country plants, exclusive of the quantity for which Class II utilization was requested by the handler; less

(v) One and one-half percent of milk disposed of in bulk tank lots to pool plants of other handlers and to nonpool plants (exclusive of milk diverted pursuant to § 1062.14); and

(7) In shrinkage of skim milk and butterfat, respectively, assigned pursuant to § 1062.46(b)(2).

8. In § 1062.43 the text of paragraph (a) preceding subparagraph (1), the text of paragraph (c) preceding subparagraph (2), all of paragraph (d) and the text of paragraph (e) preceding subparagraph (1) are revised; paragraph (f) is revoked; and the semicolon and the word "and" at the end of paragraph (e)(6) are deleted and a period is substituted therefor to read as follows:

**§ 1062.43 Transfers.**

* * * * *

(a) At the utilization indicated by both handlers, otherwise as Class I milk, if transferred or diverted to the pool plant of another handler, subject in either event to the following conditions:

* * * * *

(c) As Class I milk if moved to a nonpool plant which is neither an other order plant nor the plant of a producer-handler unless the requirements of subparagraphs (1), (2) and (3) of this paragraph are met, in which case the skim milk and butterfat so transferred or diverted shall be classified in accordance with the assignment set forth in subparagraph (4) of this paragraph:

(1) The transferee plant is located within 350 airline miles of the City Hall in St. Louis, Missouri;

* * * * *

(d) As Class I milk if moved in bulk to a nonpool plant that is neither an other order plant nor a producer-handler plant, located more than 350 airline miles from the City Hall in St. Louis, Missouri, except that cream so transferred may be classified as Class II if the handler claims Class II use and establishes that such cream was transferred to a nonpool plant without Grade A Certification and that the contents were for manufacturing use and that the shipment was so invoiced; and

(e) As follows, if transferred or diverted to an other order plant in excess of receipts from such plant in the same category as described in subparagraph (1), (2) or (3) of this paragraph:

* * * * *

**§ 1062.45 [Amended]**

9. In § 1062.45 the reference in paragraph (a)(1) which reads "§ 1062.41(b)(4)" is revised to read "§ 1062.41(b)(6)" and the provision in paragraphs (a)(4)(i) and (7) which reads "and from dairy farmers for other markets" is revoked.

**§ 1064.46 [Amended]**

10. In § 1062.46 the reference in paragraphs (b)(1) and (c) which reads "§ 1062.41(b)(4)" is revised to read "§ 1062.41(b)(6)".

11. Section 1062.50 is revised to read as follows:

**§ 1062.50 Basic formula price.**

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the Department for the month. Such price shall be adjusted to 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the Chicago butter price for the month. The basic formula price shall be rounded to the nearest full cent.

12. In § 1062.51 the text preceding paragraph (a)(1) and paragraph (b) are revised to read as follows:

**§ 1062.51 Class prices.**

Subject to the provisions of §§ 1062.52 and 1062.53, the class prices per hundredweight shall be as follows:

(a) *Class I milk price.* The Class I price shall be the basic formula price for the preceding month plus $1.60 during the months of August, September, October and November; plus $1.40 during the months of December, January, February and July; and plus $1.20 during all other months. Such price shall be increased or decreased by whatever amount the Class I price computed pursuant to Part 1030 (Chicago) is increased or decreased by the supply-demand adjustor computed for such month under such part; and plus or minus the amounts provided in subparagraphs (1) and (2) of this paragraph: *Provided*, That the price so determined shall be increased 15 cents per hundredweight from the effective date of this amended order through March 31, 1965.

(1) * * *

(b) *Class II milk price.* The Class II price shall be the basic formula price for the month.

13. Section 1062.52(a) is revised to read as follows:

**§ 1062.52 Location adjustments to handlers.**

(a) For producer milk which is received at a pool plant located more than 30 airline miles from the City Hall in St. Louis, Missouri, which is classified as Class I milk, and for other source milk for which a location adjustment credit is applicable, the price specified in § 1062.51(a) shall, except as provided in subparagraphs (1), (2), and (3) of this paragraph, be reduced by 16 cents per hundredweight plus one cent for each 10 miles or fraction thereof that such distance exceeds 40 miles.

(1) At a pool plant located more than 30 airline miles from the City Hall in St. Louis but located in Madison, Monroe or St. Clair County or in Sugar Creek, Looking Glass, St. Rose, Breese or Germantown Township in Clinton County, all in the State of Illinois, the price specified in § 1062.51(a) shall be reduced 10 cents per hundredweight; and

(2) At a pool plant located in Cape Girardeau, Perry or Ste. Genevieve County, Missouri, the price specified in § 1062.51(a) shall be increased 15 cents per hundredweight; and

(3) At a pool plant outside the counties of Cape Girardeau, Perry or Ste. Genevieve and more than 30 airline miles from the City Hall in Cape Girardeau but nearer to the City Hall in Cape Girardeau than to the City Hall in St. Louis, the price specified in § 1062.51(a) shall be reduced one cent plus an additional one cent for each 10 miles or fraction thereof that such distance exceeds 40 miles from the City Hall in Cape Girardeau.

* * * * *

14. Section 1062.60 is revised to read as follows:

**§ 1062.60 Producer-handlers.**

Sections 1062.40 through 1062.46, 1062.50 through 1062.54, 1062.70 through 1062.72, and 1062.80 through 1062.89 shall not apply to a producer-handler.

15. In § 1062.61 paragraph (b) is revised to read as follows:

**§ 1062.61 Plants subject to other Federal orders.**

* * * * *

(b) Any country plant which would be subject to the classification and pricing provisions of another order issued pursuant to the Act unless such plant qualifies as a pool plant pursuant to § 1062.10 and ships more milk to city plants regulated under this order than to city plants regulated pursuant to such other order.

16. In § 1062.70 paragraph (e) is revised to read as follows:

**§ 1062.70 Computation of the net pool obligation of each pool handler.**

* * * * *

(e) Add an amount equal to the value at the Class I price, adjusted for location of the nearest nonpool plant(s) from which an equivalent volume of skim milk and butterfat was received from an unregulated country plant and which was subtracted from Class I pursuant to § 1062.45(a)(7) and the corresponding step of § 1062.45(b).

17. In § 1062.71 paragraph (b) is revised to read as follows:

**§ 1062.71 Computation of uniform price.**

* * * * *

(b) Add an amount equal to the value of the net location differentials (reduction minus increases) applicable to the uniform price pursuant to § 1062.82;

* * * * *

18. Section 1062.82 is revised to read as follows:

**§ 1062.82 Location differential to producers.**

(a) The uniform price for producer milk received at a pool plant located more than 30 miles from the City Hall in St. Louis, Missouri, shall, except as provided in subparagraphs (1), (2) and (3) of this paragraph, be reduced 16 cents per hundredweight plus one cent for each 10 miles or fraction thereof that such distance exceeds 40 miles;

(1) At a pool plant located more than 30 miles from the City Hall in St. Louis but located in Madison, Monroe or St. Clair County or in Sugar Creek, Looking Glass, St. Rose, Breese or Germantown Township in Clinton County, all in the State of Illinois, the uniform price shall be reduced 10 cents per hundredweight; and

(2) At a pool plant located in Cape Girardeau, Perry or Ste. Genevieve County, Missouri, the uniform price shall be increased 15 cents per hundredweight.

(3) At a pool plant outside the counties of Cape Girardeau, Perry or Ste. Genevieve and more than 30 miles from the City Hall in Cape Girardeau but nearer to the City Hall in Cape Girardeau than to the City Hall in St. Louis, the uniform price shall be reduced one cent plus an additional one cent for each 10 miles or fraction thereof that such distance exceeds 40 miles from the City Hall in Cape Girardeau.

(b) For purposes of computations pursuant to §§ 1062.84 and 1062.85 the weighted average price shall be adjusted at the rates set forth in paragraph (a) of this section applicable at the location of the nonpool plant from which the milk was received.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: February 1, 1965.

Signed at Washington, D.C., on December 16, 1964.

[Milk Order 63]

## PART 1063—MILK IN QUAD CITIES-DUBUQUE MARKETING AREA

### Order Amending Order

**§ 1063.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Quad Cities-Dubuque marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in the order as hereby amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, three cents per hundredweight or such amount not to exceed three cents per hundredweight as the Secretary may prescribe, with respect to (a) producer milk, (b) other source milk allocated to Class I pursuant to § 1063.46 (a) (3) and (7) and the corresponding steps of § 1063.46 (b), and (c) Class I milk disposed of from a partially regulated distributing plant on routes in the marketing area that exceeds Class I milk received during the month at such plant from pool plants and other order plants.

(b) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as herein amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period were engaged in the production of milk for sale in the marketing area.

*Order relative to handling.* It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Quad Cities-Dubuque marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended and as hereby further amended, as follows:

Section 1063.6 is revised to read as follows:

**§ 1063.6 Quad Cities-Dubuque marketing area.**

"Quad Cities-Dubuque marketing area" hereinafter called the marketing area means the territory within the boundaries of the counties of Clinton, Dubuque, Jackson, Muscatine and Scott in the State of Iowa; the counties of Henry, Mercer and Rock Island, and the city of East Dubuque, in the State of Illinois, including territory within such boundaries that is occupied by Government (Municipal, State or Federal) reservations, installations, institutions, or other establishments.

(Secs. 1–9, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: February 1, 1965.

Signed at Washington, D.C., on December 16, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

[Milk Order 67]

## PART 1067—MILK IN OZARKS MARKETING AREA

### Order Amending Order

**§ 1067.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Ozarks marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as herein amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof the handling of milk in the Ozarks marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

1. In § 1067.11 paragraph (a) is revised to read as follows:

**§ 1067.11 Pool plant.**

"Pool plant" means:

(a) An approved plant from which not less than 50 percent of its receipts of approved milk during the month is disposed of as Class I milk to wholesale or retail outlets (including sales through plant stores or vendors but not including sales to pool plants or nonpool plants) and from which not less than 10 percent of such receipts or an average of not less than 7,000 pounds per day, whichever is less, is disposed of as Class I milk in the marketing area to wholesale or retail outlets (including sales through plant stores or vendors but not including sales to pool plant or nonpool plants).

* * * * *

2. Section 1067.14 is revised to read as follows:

**§ 1067.14 Other source milk.**

"Other source milk" means all skim milk and butterfat contained in:

(a) Receipts during the month of fluid milk products except:

(1) Fluid milk products received from pool plants;

(2) Producer milk; and

(3) Inventory of fluid milk products on hand at the beginning of the month;

(b) Products, other than fluid milk products, from any source (including those produced at the plant) which are reprocessed or converted to another product in the plant during the month; and

(c) Any disappearance of nonfluid milk products not otherwise accounted for.

3. Section 1067.41 is revised to read as follows:

**§ 1067.41 Classes of utilization.**

Subject to the conditions set forth in §§ 1067.43 through 1067.46, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of fluid milk products, except those classified pursuant to paragraph (b) (2), (3) and (4) of this section. Fluid milk products which have been fortified by the addition of nonfat solids shall be Class I in an amount equal only to the weight of an equal volume of an unmodified product of the same nature and butterfat content; and

(2) Not specifically accounted for as Class II.

(b) Class II milk shall be:

(1) All skim milk and butterfat used to produce any product other than a fluid milk product;

(2) All skim milk and butterfat authorized by the market administrator to be dumped;

(3) All skim milk and butterfat accounted for as disposed of for livestock feed;

(4) The inventories of fluid milk products on hand at the end of the month;

(5) The weight of the skim milk in fortified fluid milk products not classified as Class I pursuant to paragraph (a) (1) of this section;

(6) In shrinkage of skim milk and butterfat, respectively, assigned pursuant to § 1067.42(b) (1), but not to exceed the following:

(i) Two percent of milk received directly from producers (except producer milk diverted in producer cans to a nonpool plant pursuant to § 1067.7) and from a cooperative association which is the handler for such milk pursuant to § 1067.8(b); plus

(ii) One and one-half percent of milk received in bulk tank lots from pool plants of other handlers; plus

(iii) One and one-half percent of receipts of fluid milk products in bulk from other order plants, exclusive of the quantity for which Class II utilization was requested by the operators of such plants and the handler; plus

(iv) One and one-half percent of receipts of fluid milk products in bulk from unregulated supply plants, exclusive of the quantity for which Class II utilization was requested by the handler; less

(v) One and one-half percent of milk disposed of in bulk tanks lots to pool plants of other handlers; and

(7) In shrinkage of skim milk and butterfat, respectively, assigned pursuant to § 1067.42(b) (2).

**§ 1067.46 [Amended]**

4. In section 1067.46(a) (1) the reference "§ 1067.41(b) (4)" is changed to "§ 1067.41(b) (6)".

5. Section 1067.50 is revised to read as follows:

**§ 1067.50 Basic formula price.**

The basic formula price shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Wisconsin and Minnesota, as reported by the United States Department of Agriculture for the month. Such price shall be adjusted to a 3.5 percent butterfat basis by a butterfat differential rounded to the nearest one-tenth cent computed at 0.12 times the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture for the month. The basic formula price shall be rounded to the nearest full cent.

6. In section 1067.51 paragraph (b) is revised to read as follows:

**§ 1067.51 Class prices.**

* * * * * *

(b) *Class II price.* The Class II price shall be the basic formula price for the month.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: February 1, 1965.

Signed at Washington, D.C., on December 16, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

# Title 12—BANKS AND BANKING

## Chapter I—Bureau of the Comptroller of the Currency, Department of the Treasury

### PART 1—INVESTMENT SECURITIES REGULATION

### Massachusetts Port Authority Revenue Refunding and Improvement Bonds

**§ 1.162 Massachusetts Port Authority Revenue Refunding and Improvement Bonds.**

(a) *Request.* The Comptroller of the Currency has been requested to rule on the eligibility of the $107,500,000 Massachusetts Port Authority Revenue Refunding and Improvement Bonds, dated July 1, 1964, for investment by National Banks under the provisions of paragraph seventh of 12 U.S.C. 24.

(b) *Opinion.* (1) The Massachusetts Port Authority, a body corporate and a public instrumentality of the Commonwealth of Massachusetts, was created to assume and coordinate the control, operation and management of the Mystic River Bridge, Logan International Airport (Boston), Hanscom Field (Bedford) and certain Port properties in Boston, and to construct or acquire additional facilities when authorized by the legislature of the Commonwealth. The bonds were issued to redeem, on October 1, 1969, all of the then outstanding Authority Revenue Bonds, Series A, dated February 1, 1959, and to pay certain costs of extensions and improvements to the Airport and Port Properties of the Authority.

(2) The bonds mature serially from 1969 to 1989 and are payable from the tolls and revenues (over and above the costs of operation and maintenance) from the properties owned by the Authority. The Authority is obligated to fix and collect revenues for the use of its properties sufficient to pay the cost of maintaining, repairing and operating the properties and to pay the principal of and the interest on all bonds issued by the Authority as the same become due. The projections of revenues from the properties appear to be sufficient to pay the debt service and administrative expenses of the bond issue as well as the operating expenses of the properties.

(c) *Ruling.* It is the conclusion of this Office that a National Bank may, in these circumstances, determine that there is adequate evidence that the Authority will be able to perform all that it undertakes to perform and that the $107,500,000 Massachusetts Port Authority Revenue Refunding and Improvement Bonds, dated July 1, 1964, meet the requirements of § 1.5(a) of this part and, therefore, are eligible for investment by National Banks under the provision and subject to the 10 percent limitation of paragraph Seventh of 12 U.S.C. 24.

Dated: December 11, 1964.

[SEAL] JAMES J. SAXON,
*Comptroller of the Currency.*

# Title 14—AERONAUTICS AND SPACE

## Chapter I—Federal Aviation Agency

[Airspace Docket No. 64–CE–50]

### PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Designation of Control Zone and Transition Area and Revocation of Control Area Extension

On October 16, 1964, a notice of proposed rule meking was published in the FEDERAL REGISTER (29 F.R. 14236) stating that the Federal Aviation Agency proposed to alter controlled airspace in the Great Falls, Mont., terminal area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable. Inasmuch as weather reporting service is provided at both Great Falls International Airport and Malmstrom Air Force Base, the Agency has determined that it is advisable to provide control zones at each airport rather than the single control zone originally proposed. There will be no change in the amount of airspace proposed for the single control zone. Since this change in the proposed rule is minor in nature and imposes no additional burden on any person, further notice and public procedure hereon are not necessary.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., February 4, 1965, as hereinafter set forth.

1. Section 71.165 (29 F.R. 1073) is amended as follows: The Great Falls, Mont., control area extension is revoked.

2. In § 71.171 (29 F.R. 1101), the Great Falls, Mont., control zone is amended to read:

GREAT FALLS, MONTANA (INTERNATIONAL AIRPORT)

Within a 5-mile radius of Great Falls International Airport (latitude 47°29'00" N., longitude 111°22'00" W.); within 2 miles each side of the Great Falls ILS localizer S course, extending from the 5-mile radius zone to the OM; within 2 miles each side of the Great Falls VOR 222° radial; extending from the 5-mile radius zone to 8 miles SW of the VOR; and within 2 miles each side of the Malmstrom AFB VOR 222° radial, extending from the arc of a 5-mile radius from Malmstrom AFB (latitude 47°30'35" N., longitude 111°11'35" W.) to 10 miles SW of the Malmstrom AFB VOR, excluding the portion within the Great Falls (Malmstrom AFB) control zone.

GREAT FALLS, MONTANA (MALMSTROM AIR FORCE BASE)

Within a 5-mile radius of Malmstrom AFB (latitude 47°30'35" N., longitude 111°11'35" W.); within 2 miles each side of the Malmstrom AFB VOR 036° radial extending from the 5-mile radius zone to 8 miles NE of the VOR; within 2 miles each side of the Malmstrom AFB VOR 042° radial, extending from the 5-mile radius zone to 10 miles NE of the VOR; within 2 miles each side of the Malmstrom AFB VOR 038° radial, extending from the 5-mile radius zone to 10 miles NE of the VOR; and within 2 miles each side of the 225° bearing from the Malmstrom AFB RBN, extending from the 5-mile radius zone to the RBN, excluding the portion SW of a line between the INT's of the 5-mile radius zone and the 5-mile radius of the Great Falls (International Airport) control zone.

3. In § 71.181 (29 F.R. 1160), the following is added:

GREAT FALLS, MONTANA

That airspace extending upward from 700 feet above the surface within a 20-mile radius of Malmstrom AFB (latitude 47°-30'35" N., longitude 111°11'35" W.); and that airspace extending upward from 1,200 feet above the surface within a 40-mile radius of Malmstrom AFB; within 12 miles N and 8 miles S of the Great Falls VOR 074° radial, extending from the 40-mile radius area to 61 miles E of the VOR; and within 12 miles S and 8 miles N of the Great Falls VOR 271° radial, extending from the 40-mile radius area to 56 miles W of the VOR.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Kansas City, Mo., on December 10, 1964.

HENRY L. NEWMAN,
*Acting Director, Central Region.*

[F.R. Doc. 64-12998; Filed, Dec. 18, 1964; 8:45 a.m.]

[Airspace Docket No. 64-SW-51]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zone

The purpose of this amendment to Part 71 [New] of the Federal Aviation Regulations is to alter the time of designation of the Junction, Tex., control zone.

The Junction control zone is presently designated on a full-time basis. However, effective January 4, 1965, weather and communications service will be available only from 0600 to 1800 hours, local time, daily. Therefore, action is taken herein to redesignate the Junction control zone with effective hours coincident with those during which weather and communications service is provided.

Since the change effected by this amendment is less restrictive in nature than present requirements, notice and public procedure hereon are unnecessary and it may be made effective in less than 30 days.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended 0001 e.s.t., January 4, 1965, as hereinafter set forth.

In § 71.171 (29 F.R. 1127) the Junction, Tex., control zone is amended to read:

JUNCTION, TEX.

Within a 3-mile radius of the Kimble County Airport, Junction, Tex. (latitude 30°30'35" N., longitude 99°45'45" W.); within 2 miles each side of the Junction VOR 150° radial, extending from 4 miles SE of the airport to the VOR; and within 2 miles each side of the extended centerline of the Kimble County Airport Runway 17, extending from the 3-mile radius zone to 4 miles S of the S end of Runway 17. This control zone is effective from 0600 to 1800 hours, local time, daily.

(Sec. 307(a) Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Fort Worth, Tex., on December 9, 1964.

ARCHIE W. LEAGUE,
*Director, Southwest Region.*

[F.R. Doc. 64-12999; Filed, Dec. 18, 1964; 8:45 a.m.]

[Airspace Docket No. 63-SW-55]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zone; Designation of Transition Area; and Revocation of Control Zone and Control Area Extension

On October 9, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 13974) stating that the Federal Aviation Agency proposed to alter the controlled airspace in the Killeen, Tex., terminal area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

A full-time control zone was proposed in the notice for Killeen, Tex. Since communications and weather services will not be available on a full-time basis, the Killeen control zone is designated herein as a part-time control zone. The hours of designation of the control zone will be published in the Airman's Information Manual. This is necessary to allow for minor variations in the time of designation as dictated by military training activities conducted at Robert Gray and Fort Hood AAF's. Since this change imposes no additional burden on any person, notice and public procedure thereon are unnecessary.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., April 1, 1965, as hereinafter set forth.

1. In § 71.171 (29 F.R. 1128), the Killeen, Tex., control zone is amended to read as follows:

KILLEEN, TEX.

That airspace within a 5-mile radius of Robert Gray AAF, Killeen, Tex. (latitude 31°04'20" N., longitude 97°49'45" W.), within a 5-mile radius of Fort Hood AAF (latitude 31°08'15" N., longitude 97°42'50" W.), within 2 miles each side of the 339° bearing from the Gray RBN extending from the 5-mile radius zone to 7 miles N. of the RBN, within 2 miles each side of the Hood VOR 271° radial extending from the 5-mile radius zone to the VOR, and within 2 miles each side of the Hood VOR 352° radial extending from the 5-mile radius zone to the VOR. The portion of this control zone within R-6302A, R-6302B, and R-6302C shall be used only after obtaining prior approval from appropriate authority. This control zone is effective during the dates and times established in advance by publication of special Notices in the Airman's Information Manual.

2. In § 71.171 (29 F.R. 1119) the Fort Hood, Tex., control zone is revoked.

3. In § 71.165 (29 F.R. 1086) the Lometa, Tex., control area extension is revoked.

4. In § 71.181 (29 F.R. 1160) the following transition area is added:

KILLEEN, TEX.

That airspace extending upward from 700 feet above the surface within a 6-mile radius of Hood AAF (latitude 31°08'15" N., longitude 97°42'50" W.), within a 7-mile radius of Robert Gray AAF (latitude 31°04'20" N., longitude 97°49'45" W.), within 2 miles each side of the 339° bearing from the Gray RBN extending from the Robert Gray AAF 7-mile radius area to 8 miles N of the RBN, and within 8 miles W and 5 miles E of the Hood VOR 352° and 172° radials extending from 5 miles N to 12 miles S of the VOR; that airspace extending upward from 1,200 feet above the surface within the area bounded by a line beginning at latitude 30°48'00" N., longitude 97°39'00" W.; to latitude 30°48'00" N., longitude 98°03'00" W.; to latitude 30°-33'30" N., longitude 98°31'30" W.; to latitude 31°13'00" N., longitude 98°38'00" W.; to latitude 31°23'31" N., longitude 97°47'45" W.; to latitude 31°22'33" N., longitude 97°42'45" W.; to latitude 31°20'48" N., longitude 97°40'32" W.; to latitude 31°19'-37" N., longitude 97°40'32" W.; to latitude 31°13'45" N., longitude 97°32'35" W.; to latitude 31°06'06" N., longitude 97°32'42" W.; to latitude 30°57'00" N., longitude 97°36'00" W.; to point of beginning. The portions of this transition area within R-6302A, R-6302B, and R-6302C shall be used only after obtaining prior approval from appropriate authority.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Fort Worth, Tex., on December 9, 1964.

ARCHIE W. LEAGUE,
*Director, Southwest Region.*

[Airspace Docket No. 63-SW-113]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zones, Designation and Alteration of Transition Areas, and Revocation of Control Area Extension

On October 8, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 13905) stating that the Federal Aviation Agency proposed to alter the controlled airspace in the Brownsville, Tex., terminal area. On October 30, 1964, a correction to the notice was published in the FEDERAL REGISTER (29 F.R. 14797) correcting a typographical error in the description of the proposed Brownsville transition area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

Subsequent to the publication of the notice in the FEDERAL REGISTER, the name of the Harlingen, Tex. Municipal Airport was officially changed to Harlingen Industrial Airpark and, accordingly, is changed herein. Since the changes herein are editorial in nature and impose no additional burden on any person, notice and public procedure thereon are unnecessary.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., March 4, 1965, as hereinafter set forth.

1. In § 71.171 (29 F.R. 1107), the Brownsville, Tex., control zone is amended to read:

BROWNSVILLE, TEX.

That airspace within a 5-mile radius of Rio Grande Valley International Airport (latitude 25°54'25" N., longitude 97°26'25" W.); within 2 miles each side of the 344° bearing from the Brownsville RBN extending from the 5-mile radius zone to 7 miles N of the RBN, and within 2 miles each side of the Brownsville VORTAC 071° radial extending from the 5-mile radius zone to 7 miles E of the VORTAC, excluding the portion outside the United States.

2. In § 71.171 (29 F.R. 1133) the McAllen, Tex., control zone is amended to read:

MCALLEN, TEX.

That airspace within a 5-mile radius of Miller International Airport (latitude 26°10'40" N., longitude 98°14'25" W.), within 2 miles each side of the McAllen VOR 095° radial extending from the 5-mile radius zone to 7 miles E of the VOR, within 2 miles each side of the McAllen VOR 322° and 324° radials extending from the 5-mile radius zone to 7 miles NW of the VOR, and within two miles each side of the 320° bearing from latitude 26°12'20" N., longitude 98°16'05" W. extending from the 5-mile radius zone to 7 miles NW of latitude 26°12'20" N., longitude 98°16'05" W., excluding the portion outside the United States.

3. In § 71.165 (29 F.R. 13164) the Brownsville, Tex., control area extension is revoked.

4. In § 71.181 (29 F.R. 1160) the following transition area is added:

BROWNSVILLE, TEX.

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the Rio Grande Valley International Airport (latitude 25°54'25" N., longitude 97°-25'25" W.), within 2 miles each side of the Brownsville ILS localizer N course extending from the 7-mile radius area to 8 miles N of the OM, within 2 miles each side of the Brownsville VORTAC 071° radial extending from the 7-mile radius area to 8 miles E of the VORTAC, and within 2 miles each side of the 344° bearing from the Brownsville RBN extending from the 7-mile radius area to 8 miles N of the RBN, excluding the portion outside the United States; and that airspace extending upward from 1,200 feet above the surface within the area bounded by a line beginning at latitude 26°30'00" N., longitude 98°18'00" W.; to latitude 26°51'00" N., longitude 97°58'30" W.; to latitude 26°50'-00" N., longitude 97°51'00" W.; thence NE to a point 3 nautical miles from the shoreline at latitude 27°11'20" N.; thence 3 nautical miles from and parallel to the shoreline south to the United States/Mexican border, thence W via the United States/Mexican border to longitude 98°25'00" W.; thence N via longitude 98°25'00" W. to latitude 26°17'00" N., longitude 98°25'00" W.; to point of beginning.

5. In § 71.181 (29 F.R. 1160) the following transition area is added:

HARLINGEN, TEX.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Harlingen Industrial Airpark (latitude 26°12'10" N., longitude 97°45'10" W.), and within 2 miles each side of the Harlingen VOR 337° and 157° radials extending from the 5-mile radius area to 8 miles N. of the VOR.

6. In § 71.181 (29 F.R. 1187) the McAllen, Tex., transition area is amended to read:

MCALLEN, TEX.

That airspace extending upward from 700 feet above the surface within 2 miles each side of the McAllen VOR 095° radial extending from the VOR to 8 miles E., within 2 miles each side of the 320° bearing extending from latitude 26°12'20" N., longitude 98°16'-05" W. to 8 miles NW., and within 2 miles each side of the McAllen VOR 322° and 324° radials extending from the VOR to 8 miles NW.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Fort Worth, Tex., on December 9, 1964.

ARCHIE W. LEAGUE,
*Director, Southwest Region.*

[F.R. Doc. 64-13001; Filed, Dec. 18, 1964; 8:45 a.m.]

# Title 21—FOOD AND DRUGS

## Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

### SUBCHAPTER A—GENERAL

## PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT

### SUBCHAPTER C—DRUGS

## PART 130—NEW DRUGS

### Miscellaneous Amendments

The following changes are made in Parts 1 and 130 of Title 21, necessitated by amendments to the Federal Food, Drug, and Cosmetic Act effected by Public Law 87-781 (76 Stat. 788 et seq.):

§ 1.106 [Amended]

1. In Part 1, the word "effective" is changed to read "approved" in the following places: § 1.106 (b) (3) (iii), first sentence, and (b) (4) (i), (c) (3) (ii) and (4) (i), (g) (1) and (2); (i), second sentence, (k) (3), (l) (1) and (2).

§ 130.102 [Amended]

2. In Part 130, the word "effective" is changed to "approved" in the following places: § 130.102(a) (1) (iii), (2) (iii), (3) (iii), (4) (iii), (6) (iii), (7) (iii), (8) (iii), (10) (iii), (11) (iii), (12) (iii), (13) (iii), (14) (iii), (15) (iii), (16) (iii), (18) (iii), (19) (iii), (20) (iii), (21) (iii), (22) (iii), (23) (iii), (24) (iii), (25) (iii), and (26) (iii).

3. Oxytetracycline, polymyxin B sulfate, and neomycin sulfate drug preparations for human use are now certified pursuant to section 507 of the Federal Food, Drug, and Cosmetic Act. Therefore, § 130.102(a) is further amended by deleting therefrom subparagraphs (5), (9), and (17).

*Effective date.* The nature of these amendments is such that the requirement for notice, public procedure, and delayed effective date are not essential; therefore, this order shall become effective upon publication in the FEDERAL REGISTER.

(Secs. 505, 507, 76 Stat. 788, 59 Stat. 463 as amended; 21 U.S.C. 355, 357)

Dated: December 16, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

[F.R. Doc. 64-13055; Filed, Dec. 18, 1964; 8:49 a.m.]

### SUBCHAPTER B—FOOD AND FOOD PRODUCTS

## PART 121—FOOD ADDITIVES

### Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

CELLOPHANE

The Commissioner of Food and Drugs, having evaluated the data submitted in petitions filed by FMC Corporation, American Viscose Division, Marcus Hook, Pa. (FAP 1009); E. I. du Pont de Nemours & Co., Inc., Wilmington, Del., 19898 (FAP 972); Transparent Paper Limited, Bridge Hall Mills, Heap Bridge, Bury, Lancashire, England (FAP 4B1377), and other relevant material, has concluded that the food additive regulations (21 CFR 121.2507; 29 F.R. 12871) should be amended to provide for the use of additional substances as optional components of food-packaging cellophane. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29

F.R. 471), § 121.2507(c) is amended by inserting alphabetically in the list of substances new items, as follows:

§ 121.2507 Cellophane.

* * * * * *

(c) List of substances:

| | *Limitations (residue and limits of addition expressed as percent by weight of finished packaging cellophane)* |
|---|---|
| * * * | * * * |
| Di-*n*-octyltin bis(2-ethylhexyl maleate) | For use only as a stabilizer at a level not to exceed 0.55 percent by weight of the coating solids in vinylidene chloride copolymer waterproof coatings prepared from vinylidene chloride copolymers identified in this paragraph, provided that such vinylidene chloride copolymers contain not less than 90 percent by weight of polymer units derived from vinylidene chloride. |
| * * * | * * * |
| Epoxidized polybutadiene | For use only as a primer subcoat to anchor surface coatings to the base sheet. |
| * * * | * * * |
| Sorbitan monooleate | |
| * * * | * * * |
| Sorbitan trioleate | |
| Sorbitan tristearate | |
| * * * | * * * |

* * * * * *

Any person who will be adversely affected by the foregoing order may at any time within 30 days from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, written objections thereto, preferably in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1))

Dated: December 16, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

[F.R. Doc. 64-13056; Filed, Dec. 18, 1964; 8:49 a.m.]

## PART 121—FOOD ADDITIVES

### Subpart G—Radiation and Radiation Sources Intended for Use in the Production, Processing, and Handling of Food

X-RADIATION FOR PROCESSING FOOD

The Commissioner of Food and Drugs, having evaluated the data submitted in a petition (FAP 4M1433) filed by Radiation Dynamics, Inc., 1800 Shames Drive, Westbury Industrial Park, Westbury, N.Y., and other relevant material, has concluded that the food additive regulations should be amended to provide for conditions under which X-radiation may be safely used in the radiation processing of canned bacon. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)) and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471) Part 121 is amended by adding to Subpart G the following new section:

§ 121.3005 X-radiation for the processing of food.

X-radiation for the processing of food may be safely used under the following conditions:

(a) The radiation is a beam of X-rays produced by an electron beam from a particle accelerator striking a target, where the electrons do not exceed an energy level of 5 million electron volts.

(b) The X-radiation is used or intended for use as follows:

| Irradiated food | Limitation | Use |
|---|---|---|
| Canned bacon... | Irradiated in cans coated with polymeric and resinous coatings meeting the specifications in § 121.2514, after packing under vacuum or in an inert atmosphere; absorbed dose 4.5 to 5.6 megarads. | Radiation preservation. |

(c) In the case of X-radiation used for the preservation of food, the following permanent records shall be obtained:

(1) A record of total dose absorbed, by the use of phantoms having the same geometry as the containers of food, and containing dosimeters suitable for the maintenance of a permanent record of exposure.

(2) A record of the operating intensity of the beam by use of a permanent pen trace of the beam current used.

Such records shall be identified with the particular lot or batch number involved, and shall be retained for Food and Drug Administration inspection for a period of 1 year.

Any person who will be adversely affected by the foregoing order may at any time within 30 days from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington 25, D.C., written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof. All documents shall be filed in quintuplicate.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1))

Dated: December 15, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

[F.R. Doc. 64-13057; Filed, Dec. 18, 1964; 8:49 a.m.]

## SUBCHAPTER D—HAZARDOUS SUBSTANCES

## PART 191—HAZARDOUS SUBSTANCES; DEFINITIONS AND PROCEDURAL AND INTERPRETATIVE REGULATIONS

### Paste Waxes; Exemption From Labeling Requirements

There has been submitted to the Commissioner of Food and Drugs, as provided in the Federal Hazardous Substances Labeling Act and § 191.62 of the regulations thereunder, a request to exempt certain paste waxes from the labeling which would otherwise be required by section 2(p)(1) of the act because such waxes are flammable solids.

The Commissioner has concluded, on the basis of information supplied to him by the petitioner and obtained on his own initiative, that flammable paste waxes which contain only solvents which are not flammable liquids as defined by section 2(1) of the act need not bear a warning statement required by section 2(p)(1) of the act. Therefore, pursuant to the provisions of the Federal Hazardous Substances Labeling Act (sec. 3(c), 74 Stat. 374, 15 U.S.C. 1262) and under the authority vested in the Secretary of Health, Education, and Welfare and delegated to the Commissioner (21 CFR 2.90; 29 F.R. 471), § 191.63(a) is amended by changing subparagraph (8) to read as follows:

§ 191.63 Exemptions for small packages, minor hazards, and special circumstances.

(a) * * *

(8) Containers of paste shoe waxes, paste auto waxes, and paste furniture and floor waxes containing toluene (also known as toluol), xylene (also known as xylol), petroleum distillates and/or turpentine in the concentrations described in § 191.7(a) (4) and (6) are exempt from the labeling requirements of § 191.7(b) (3)(ii) and (5) if the viscosity of such products is sufficiently high that they will not flow from their opened containers when inverted for 5 minutes at a temperature of 80° F., and are exempt from bearing a flammability warning statement if the flammability of such waxes is due solely to the presence of solvents which have flashpoints above 80° F. when tested by the method described in § 191.13.

* * * * * *

Notice and public procedure and delayed effective date are not necessary prerequisites to the promulgation of this order since the amendment relaxes existing requirements and the Commissioner finds that it is not necessary for the protection of the public health and safety for the products involved to be labeled with the warning statement required by section 2(p)(1) of the Federal Hazardous Substances Labeling Act.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 3(c), 74 Stat. 374; 15 U.S.C. 1262)

Dated December 16, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

# Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

## Chapter 1—Federal Procurement Regulations

### USE OF CERTAIN STANDARD FORMS

The revision of the Federal Procurement Regulations (29 F.R. 10102) prescribed the use, among others, of the June 1964 editions of Standard Forms 18, 19A, 21, 22, 23A, 32, 147, and 148. Due to delays in the availability of stocks of these revised forms in some procurement offices, use is hereby authorized of the 1955 edition of Standard Form 147, the 1953 edition of Standard Form 148, the 1959 editions of Standard Forms 18 and 19A, and the 1961 editions of Standard Forms 21, 22, 23A, and 32 in invitations for bids and requests for proposals issued prior to March 1, 1965.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date: This regulation is effective December 1, 1964.

Dated: December 15, 1964.

LAWSON B. KNOTT, JR.,
*Acting Administrator of General Services.*

# Title 47—TELECOMMUNICATION

## Chapter I—Federal Communications Commission

## PART 89—PUBLIC SAFETY RADIO SERVICES

### Miscellaneous Amendments

In the matter of amendment of Part 89[1] of the Commission's rules and regulations to effect certain editorial changes therein:

The Commission having under consideration the desirability of making certain editorial changes in Part 89 of its rules and regulations; and,

It appearing, that, by its Report and Order (FCC 62-1254) in Docket No. 14712, in the matter of amendment of Parts 2, 6, 7, 9, 10, 11, 16 and 21 of the Commission's rules to designate portions of the 2110-2200 Mc/s band exclusively for the use of Domestic Fixed Public Stations and for the use of Operational Fixed and International Control Stations and to reserve a portion thereof for omnidirectional operations, released December 10, 1962; its Report and Order (FCC 63-637) in Docket No. 14729, in the matter of amendment of Parts 2, 4, 7, 8, 9, 10, 11, 16 and 21 of the Commission's rules concerning the allocation of the frequency bands 6425-6575, 10550-10680 and 11700-12200 Mc/s, released July 12, 1963; and its Report and Order (FCC 63-722) in Docket No. 14744, in the matter of amendment of Parts 2 and 4 of the Commission rules and regulations to establish a new class of educational television service for the transmission of instructional and cultural material to multiple receiving locations on channels in the 1990-2110 Mc/s or 2500-2690 Mc/s frequency band, amendment of Parts 1, 7, 9, 10, 11 and 16, released July 30, 1963, the Commission, inter alia, amended Part 89 to conform with the determinations made in these proceedings, the formal codification of such changes to be accomplished by a subsequent order of the Commission; and,

It further appearing, that, formal codification of the changes herein ordered in Part 89 conforms without any substantive changes to the terms in the above-described Orders and, being editorial in nature, the prior public notice and effective date provisions of section 4 of the Administrative Procedure Act are inapplicable; and,

It further appearing, that the amendments adopted herein are issued pursuant to authority contained in section 4(i) and 303(r) of the Communications Act of 1934, as amended, and § 0.261 of the Commission's rules and regulations;

*It is ordered*, This 14th day of December 1964, that Part 89 of the Commission's rules is amended as set forth below, effective December 31, 1964.

(Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U.S.C. 303)

[1] Prior to December 21, 1963, Part 89 of the Commission's rules had been designated Part 10.

Released: December 15, 1964.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
*Secretary.*

1. Section 89.101 is amended by adding the attached charts for channels 4 and 5 following paragraph (c); by revising subparagraph (f)(3); by revising the table in paragraph (h); by adding assignment limitations (7), (8), and (9) in paragraph (i); and by adding paragraphs (m), (n), and (o), all to read as follows:

§ 89.101 Frequencies.

* * * * * *

(f) * * *

(3) The application is accompanied by a signed statement that the licensees of all stations located within a radius of 75 miles of the proposed location and authorized to operate on the same or adjacent channels have concurred with such assignment, or is accompanied by a report based on a field study which indicates the probable interference to the operation of existing stations, together with a signed statement that the licensees of all stations located within a radius of 75 miles of the proposed location and authorized to operate on the same or adjacent channels have been notified of applicant's intention to request the assignment.

(i) * * *

(7) Available on a developmental basis only for omnidirectional operation.

(8) Only operational fixed stations employing television transmissions will be authorized in this band. The transmitting equipment for such stations must meet the technical standards for Instructional Television Fixed stations as contained in Part 74, Subpart I, § 74.901, et seq., of this chapter. Operational fixed systems authorized in this band prior to September 9, 1963, may continue to be authorized herein. Such systems may also be modified, or expanded by the addition of new stations, upon appropriate application therefor.

(9) Authorizations in this band are subject to the condition that no harmful interference is caused to Government services.

* * * * * *

(m) Stations authorized to operate in the bands 2110–2130, 2150–2160, and 2160–2180 Mc/s prior to January 15, 1963, will be authorized to continue to operate in those bands until January 15, 1968.

(n) Stations authorized to operate in the band 6425–6525 Mc/s prior to July 15, 1963, will be authorized to continue to operate in that band until July 15, 1968.

(o) Operational fixed stations authorized to operate in the 10550–10680 Mc/s band prior to July 15, 1963, will be authorized to continue to operate in that band until July 15, 1968.

2. Section 89.117(c) is amended to read as follows:

**§ 89.117 Acceptability of transmitters for licensing.**

* * * * *

(c) Transmitters to be operated in any of the frequency bands between 952 and 12700 Mc/s, except the 8400–8500 Mc/s band, authorized under this part shall be type accepted if specified in an application filed after July 20, 1962, except that equipment authorized prior thereto may continue to be used provided such operation does not result in harmful interference to other stations or systems which are conforming to the microwave technical standards in § 89.121.

3. Section 89.121 is amended to read as follows:

**§ 89.121 Microwave technical standards.**

The technical standards indicated in the table in this section shall govern, beginning July 20, 1961, the issuance of authorizations for private microwave systems using the frequency bands above 952 Mc/s listed in the table. However, these standards shall not be applicable to transmitting equipment (including antennas) which were authorized to be operated on these frequencies prior to July 20, 1961, or for which an authorization is issued based on an application filed with the Commission prior to July 20, 1961. Such licensees of equipment and systems not subject to these technical standards, including their successors or assigns in business, will be permitted to utilize such equipment provided such operation does not result in harmful interference to another station or system which is conforming to these technical standards. In case of such harmful interference, such non-conforming licensee will be required to take whatever corrective measures are necessary to alleviate the interference.

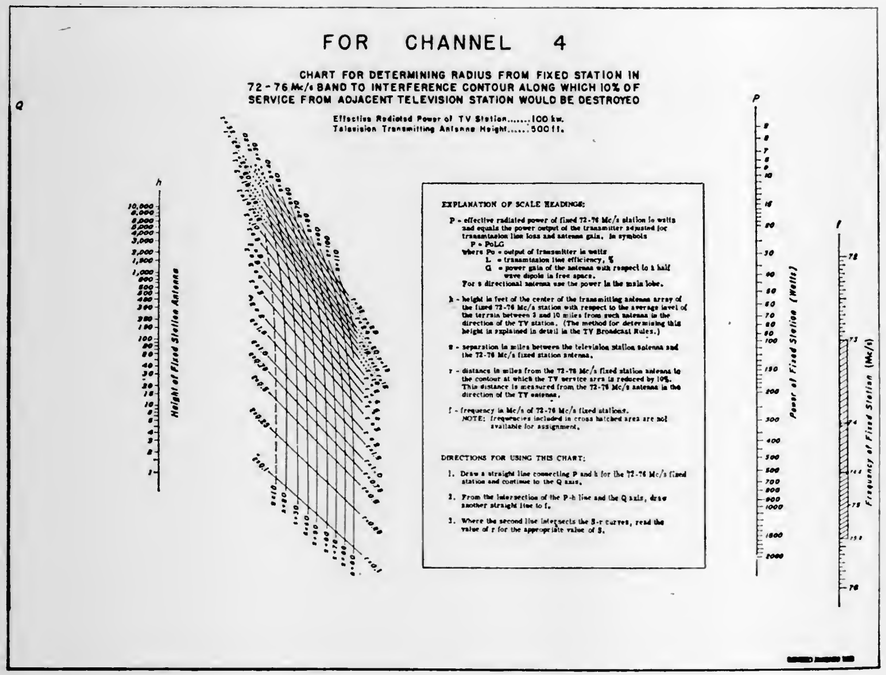
| Frequency band—Mc/s | Power [1] (watts) | Tolerance (percent) | Bandwidth [2] | Beamwidth [3] (degrees) |
|---|---|---|---|---|
| 952–960 | [9] 30 | 0.0005 | 100 kc/s | [9] 20 |
| 1850–1990 | 18 | .02 | 8 Mc/s | 10 |
| 2130–2150 | 15 | [7] .001 | 800 kc/s [7] | 10 |
| 2150–2160 | 15 | [7] .001 | 10 Mc/s | 360 |
| 2180–2200 | 15 | [7] .001 | 800 kc/s [7] | 10 |
| 2450–2500 [4] | 12 | [5] | [4] | [5] |
| 2500–2690 [6] | 12 | .02 | 4 Mc/s | 10 |
| 6525–6575 | 7 | .02 | 25 Mc/s | 7 |
| 6575–6875 | 7 | .02 | 10 Mc/s | 5 |
| 10550–10680 | 5 | [5] | 25 Mc/s | 4 |
| 12200–12700 | 5 | .05 | 20 Mc/s | 4 |
| Above 16000 | 5 | [5] | 50 Mc/s | [5] |

[1] Maximum rated power output of transmitter. Power in excess of that shown herein will be authorized only under exceptional circumstances based upon a factual showing of need. For pulsed systems average power shall be limited to the values shown, peak power shall not exceed five times this limit.

[2] Maximum bandwidth (necessary or occupied, whichever is greater) which will be authorized. Except in the 2130–2150 and 2180–2200 Mc/s bands, consideration will be given, on a case-by-case basis, to requests for additional adjacent channels based upon a complete and specific factual showing of unique or unusual circumstances, apart from economic considerations, requiring such additional channels. In the band 952–960 Mc/s, bandwidths up to 500 kc/s may be authorized.

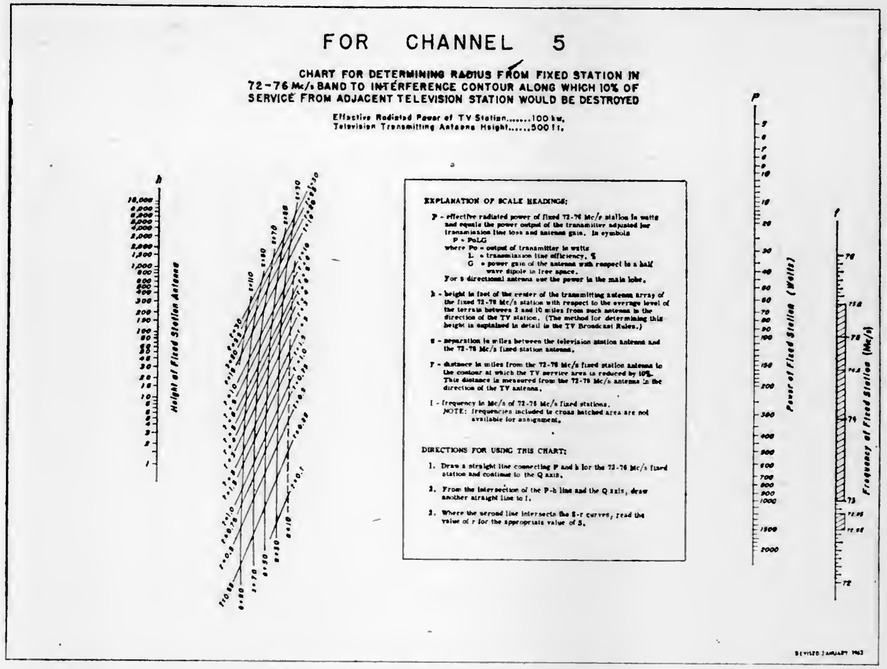
[3] Maximum beamwidth of major lobe between 0.5 power points in horizontal plane. Exceptions may be granted for stations in remote areas or until harmful interference is caused to other stations operating in accordance with these provisions.

[4] Subject to no protection from ISM equipment on 2450 Mc/s.



[5] To be specified in the station authorization.

[6] Operational fixed stations employing television transmissions in this band must utilize transmitting equipment which meets the technical requirements for Instructional Television Fixed stations as contained in Part 74, Subpart I, § 74.901, et seq., of this chapter. See also § 89.101(i)(8).



[7] Stations authorized prior to January 15, 1963, will not be required to comply with these standards until January 15, 1968.

[8] Except for the frequencies 952.1, 952.2, 952.3, 952.4, 952.5, 952.6, and 952.7 Mc/s and the frequency pairs 959.9 and 956.3; 959.8 and 956.2; 956.5 and 952.9; and 956.4 and 952.8 Mc/s, where the beamwidth may be 360°.

[9] Except for the frequencies 952.1, 952.2, 952.3, 952.4, 952.5, 952.6, and 952.7 Mc/s, where the maximum power may be 100 watts.

[F.R. Doc. 64–13015; Filed, Dec. 18, 1964; 8:47 a.m.]

# Title 48—TRADE AGREEMENTS AND ADJUSTMENT ASSISTANCE PROGRAMS

## Chapter III—Department of Commerce

## PART 310—ADJUSTMENT ASSISTANCE FOR FIRMS

Pursuant to authority contained in the Trade Expansion Act of 1962 (Public Law 87–794, 76 Stat. 872), Executive Order 11075 of January 15, 1963 (28 F.R. 473), as amended by Executive Order 11106 of April 20, 1963 (28 F.R. 3911), and Commerce Department Order No. 181 (Revised) of October 14, 1963 (28 F.R. 11430), there is hereby established Part 310 of Title 48 of the Code of Federal Regulations to provide for carrying out the functions and the responsibilities of the Secretary of Commerce relating to adjustment assistance to firms under title III of the Act.

The provisions of section 4 of the Administrative Procedure Act (5 U.S.C. 1003) which require notice of proposed rule making, opportunity for public participation, and delay in effective date are not applicable because these rules relate to public benefits. Accordingly, these regulations shall become effective upon publication in the FEDERAL REGISTER.

Part 310 is added to Chapter III, Title 48 of the Code of Federal Regulations to read as follows:

### Subpart A—General

Sec.
310.1 Scope and purpose.
310.2 Definitions.
310.3 Applications and communications.
310.4 Inspection of records.
310.5 Records not available for examination.
310.6 Denial of certification.
310.7 Records.
310.8 Audit and inspection.
310.9 Disclosure.
310.10 Penalties.

### Subpart B—Certification of Eligibility to Apply for Adjustment Assistance

310.20 Certification under section 302(b)(1) of the Act, following Tariff Commission report of affirmative finding of injury to an industry.
310.21 Certification under section 302(c) of the Act, following Tariff Commission report of affirmative finding of injury to a firm.

### Subpart C—Adjustment Assistance to Eligible Firms

310.30 General.
310.31 Applications for adjustment assistance.
310.32 Adjustment proposals.

### Subpart D—Adjustment Assistance Guidelines

310.40 Technical assistance.
310.41 Financial assistance.
310.42 Tax assistance.

AUTHORITY: The provisions of this Part 310 issued under sec. 401 of the Trade Expansion Act of 1962, 76 Stat. 902, 19 U.S.C. 1802; E.O. 11075, 28 F.R. 473; E.O. 11106, 28 F.R. 3911.

### Subpart A—General

**§ 310.1 Scope and purpose.**

The purpose of this chapter is to set forth regulations relating to the responsibilities vested in the Secretary of Commerce under the Trade Expansion Act of 1962. This Part 310 relates generally to the responsibilities vested in the Secretary of Commerce by title III, chapters 1 and 2 of the Act, and by section 7 of Executive Order 11075 of January 15, 1963 (28 F.R. 473). This part reflects the delegations of authority contained in Department Order No. 152 (Revised), including the Organization and Function Supplement thereto, both dated April 2, 1964 (29 F.R. 5408–5410).

**§ 310.2 Definitions.**

(a) "Act" means the Trade Expansion Act of 1962, 76 Stat. 872, 19 U.S.C. 1801, et seq.

(b) "Secretary" means the Secretary of Commerce.

(c) "Assistant Secretary" means the Assistant Secretary of Commerce for Domestic and International Business.

(d) "Director" means the Director of the Office of Trade Adjustment of the Department of Commerce.

(e) "Firm" includes an individual proprietorship, partnership, joint venture, association, corporation (including a development corporation), business trust, cooperative trustees in bankruptcy, and receivers under decree of any court.

(f) "Eligible firm" means a firm certified as eligilible to apply for adjustment assistance.

**§ 310.3 Applications and communications.**

Applications or other documents relating to adjustment assistance under this Part 310, supporting material, and communications in connection therewith, shall be addressed to and filed with the Director, Office of Trade Adjustment, Department of Commerce, Washington, D.C., 20230. Copies of application forms referred to in this Part 310 may be obtained from the Office of Trade Adjustment or from the Department of Commerce Field Offices.

**§ 310.4 Inspection of records.**

All documents and communications filed with the Director, except as set forth in § 310.5, may be inspected by persons concerned on request to the Director.

**§ 310.5 Records not available for examination.**

(a) Documents transmitted in confidence by the Tariff Commission or other Government agency the release of which has not been authorized by the Commission or such other Government agency shall not be available to the public.

(b) Confidential business data, within the meaning of 18 U.S.C. 1905, shall not be available to the public. Information submitted in confidence shall be on separate sheets clearly marked "Business Confidential". The firm or its authorized representative will be notified and permitted to withdraw information determined by the Director not to be entitled to confidential treatment.

**§ 310.6 Denial of certification.**

A denial of application for certification of eligibility to apply for adjustment assistance will include an explanatory statement therefor.

**§ 310.7 Records.**

Each recipient of adjustment assistance under section 313, 314, or 317 of the Act shall make and preserve for at least 3 years records which fully disclose the amount and disposition by such recipient of the proceeds, if any, of such adjustment assistance, and which will facilitate an effective audit. The recipient shall also keep such other records as the Director may prescribe.

**§ 310.8 Audit and inspection.**

The Director and the Comptroller General of the United States shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient pertaining to adjustment assistance under sections 313, 314, and 317 of the Act.

**§ 310.9 Disclosure.**

No adjustment assistance shall be extended under section 313, 314, or 317 of the Act to any firm unless the owners, partners, or officers certify to the Director—

(a) The names of any attorneys, agents, and other persons engaged by or on behalf of the firm for the purpose of expediting applications for such adjustment assistance, and

(b) The fees paid or to be paid to any such person.

**§ 310.10 Penalties.**

Whoever makes a false statement of a material fact knowing it to be false, or knowingly fails to disclose a material fact, or whoever willfully overvalues any security, for the purpose of influencing in any way the action of the Secretary under title III, chapter 2, of the Act, or for the purpose of obtaining money, property, or anything of value under that chapter, shall be fined not more than $5,000 or imprisoned for not more than two years, or both. (Section 319 of the Act.)

## Subpart B—Certification of Eligibility to Apply for Adjustment Assistance

**§ 310.20 Certification under section 302 (b)(1) of the Act, following Tariff Commission report of affirmative finding to injury to an industry.**

(a) *General.* Under section 302(b)(1) of the Act, the Assistant Secretary shall certify, as eligible to apply for adjustment assistance, any firm in an industry with respect to which the President has acted under section 302(a)(2) of the Act, upon a showing by such firm to the satisfaction of the Assistant Secretary that the increased imports (which the Tariff Commission has determined to result from concessions granted under trade agreements) have caused serious injury or threat thereof to such firm.

(b) *Who may apply.* Any firm in an industry with respect to which the President has acted under section 302(a)(2) of the Act may apply for certification of eligibility under this § 310.20.

(c) *When application may be made.* Application may be made within such time as may be specified by the President in acting under section 302(a)(2) of the Act or, if no time is specified, within six months from the date on which the President so acted.

(d) *How to apply.* Application for certification of eligibility to apply for adjustment assistance under this § 310.20 shall be made on Form OTA–1, completed in triplicate, and forwarded to the Director.

(e) *Processing and certification procedure.* Upon receipt of a completed application under this section 310.20, the Director will conduct, or order to be conducted, such investigation as he determines to be necessary and appropriate. Within 60 days after receipt of the application, properly filed, the Director shall forward the application, together with pertinent material developed during investigation and his recommendation that the application be approved or denied, to the Assistant Secretary. The applicant will be promptly advised of the Assistant Secretary's determination in the matter.

**§ 310.21 Certification under section 302 (c) of the Act, following Tariff Commission report of affirmative finding of injury to a firm.**

(a) *General.* Under section 302(c) of the Act, the Assistant Secretary may certify as eligible to apply for adjustment assistance any firm with respect to which the Tariff Commission has reported an affirmative finding of injury under section 301(c) of the Act.

(b) *Processing and certification procedure.* Upon receipt of the Tariff Commission report of its affirmative finding of injury to a firm, the Director will conduct, or order to be conducted, such investigation as he determines necessary and appropriate. Within 20 days after receipt of the Tariff Commission report, the Director shall forward the report to the Assistant Secretary, together with pertinent material developed during any investigation, and also the Director's recommendation as to whether certification under this § 310.21 should be approved or denied. The firm involved will be promptly advised of the Assistant Secretary's determination in the matter.

## Subpart C—Adjustment Assistance to Eligible Firms

**§ 310.30 General.**

Adjustment assistance may be provided to eligible firms to assist them in adjusting to the impact of increased imports and in reestablishing their competitive strength. A firm certified as eligible to apply for adjustment assistance may, at any time within two years after the date of such certification, file an application for adjustment assistance. Concurrently, or within a reasonable time thereafter, the firm shall present a proposal for its economic adjustment. Types of adjustment assistance which may be furnished to carry out a firm's certified adjustment proposal are technical assistance, financial assistance, and tax assistance, either singly or in any combination thereof.

**§ 310.31 Applications for adjustment assistance.**

(a) *Who may apply.* Any firm certified as eligible to apply for adjustment assistance under Subpart B in this Part 310 may apply for such assistance.

(b) *When application may be made.* Application for adjustment assistance may be made at any time within two years after the date on which the firm is certified under Subpart B in this Part 310 as eligible to apply therefor.

(c) *How to apply.* Application for adjustment assistance shall be made on Form OTA–3, completed in triplicate, and forwarded to the Director.

**§ 310.32 Adjustment proposals.**

(a) *Preparation and presentation.* A firm's proposal for its economic adjustment shall be made on Form OTA–4, completed in triplicate, and, together with such supporting material as the firm or the Director may deem appropriate, forwarded to the Director. The adjustment proposal shall describe in detail the firm's plan for its economic recovery, the anticipated benefits of the plan, and the type and extent of the adjustment assistance requested to carry out the plan. The adjustment proposal shall conform with the conditions prescribed for adjustment assistance in title III, chapter 2, of the Act, and in the adjustment assistance guidelines set forth in Subpart D of this Part 310. The Director may furnish technical assistance to an eligible firm which has applied for adjustment assistance to assist it in preparing a sound adjustment proposal.

(b) *Processing proposals.* The Director will conduct, or order to be conducted, such investigation of the firm's adjustment proposal as he determines to be necessary and appropriate. Thereafter the Director shall promptly forward the application for adjustment assistance, the adjustment proposal, the material developed during his investigation of the proposal, and his recommendation as to the action to be taken thereon, to the Secretary.

(c) *Certification.* The Secretary may approve and certify an adjustment proposal as submitted by the applicant, or he may approve and certify such proposal with such modifications and upon such terms and conditions as he may deem appropriate, or he may deny such proposal. No proposal shall be certified unless the Secretary determines that the proposal:

(1) Is reasonably calculated materially to contribute to the economic adjustment of the firm,

(2) Gives adequate consideration to the interests of the workers of such firm adversely affected by such actions taken in carrying out trade agreements, and

(3) Demonstrates that the firm will make all reasonable efforts to use its own resources for economic development.

Certification, unless sooner revoked, shall remain in force for such period as may be prescribed therein by the Secretary.

(d) *Administration of adjustment assistance.* The Director shall provide or arrange for financial and technical assistance in accordance with the provisions of the certified adjustment proposal. Such assistance shall be provided through existing Government agencies to the maximum extent practicable, and for this purpose the Director shall refer the certified adjustment proposal to such Federal agency or agencies as he determines to be appropriate to furnish the technical and financial assistance necessary to carry out such proposal. The agencies to which such proposal may be referred include the Department of Commerce and agencies thereunder. In the event and to the extent that any agency determines not to furnish this assistance, the Director, if he determines that such assistance is necessary to carry out the certified proposal, may provide such assistance on terms and conditions consistent with the guidelines set forth in Subpart D of this part and other applicable provisions of law. The Director shall be responsible for ascertaining the firm's progress toward adjustment objectives and for assuring compliance with the terms of certified adjustment proposals, including the use of funds for approved purposes.

## Subpart D—Adjustment Assistance Guidelines

**§ 310.40 Technical assistance.**

(a) Technical assistance includes, but is not limited to, information, market and other economic research, managerial advice and counseling, and training and assistance in research and development.

(b) To the maximum extent practicable, technical assistance shall be furnished through existing Federal agencies, and otherwise through private individuals, firms, or institutions.

(c) Firms receiving technical assistance, either under a certified adjustment proposal or in the preparation of an adjustment proposal, shall be required to share the cost thereof to the extent administratively determined to be appropriate.

**§ 310.41 Financial assistance.**

(a) Funds made available through financial assistance (direct loans, loan guarantees, or agreements for deferred participation in loans) shall be used only for acquisition, construction, installation, modernization, development, conversion, or expansion of land, plant, buildings, equipment, facilities, or machinery, or, in exceptional cases as determined by the Secretary, to supply working capital. The term "working capital" includes funds for financing technical assistance.

(b) No loan guarantee or agreement for deferred participation in a loan shall be made in an amount which exceeds 90 percent of that portion of the loan made for the purposes described in this paragraph (a).

(c) Any loan made or deferred participation taken up shall bear interest at a rate not less than the greater of:

(1) Four percent per annum, or

(2) The rate fixed by the Secretary of the Treasury under section 315(b)(2) of the Act for the year in which the loan is made or the agreement for deferred participation is entered into.

(d) Loan guarantees or agreements for deferred participation shall be made only with respect to loans bearing interest at a rate determined to be reasonable in comparison with normal terms for comparable loans from private sources. In no event shall the guaranteed portion of any loan, or the portion covered by an agreement for deferred participation, bear interest at a rate in excess of 1 percent per annum more than the rate prescribed under paragraph (c) of this section unless it is determined that special circumstances justify a higher rate, which, however, shall not be in excess of 2 percent per annum more than such prescribed rate.

(e) No direct loan, loan guarantee, or loan in which a deferred participation is taken shall have a maturity period in excess of 25 years including renewals and extensions except as provided in section 315(d) of the Act.

(f) No financial assistance shall be provided unless it is determined that such assistance is not otherwise available to the firm on reasonable terms from sources other than the United States, and that there is reasonable assurance of the firms's repayment of the loan.

(g) No financial assistance shall be provided to any firm unless its owners, partners, or officers shall execute an agreement binding them and the firm for a period of 2 years after such financial assistance is provided, to refrain from employing, tendering any office or employment to, or retaining for professional services, any person who, on the date such assistance or any part thereof was provided, or within one year prior thereto, shall have served as an officer, attorney, agent, or employee occupying a position or engaging in activities which shall have been administratively determined to involve discretion with respect to the provision of such financial assistance.

**§ 310.42 Tax assistance.**

(a) *Application.* Any eligible firm may apply for tax assistance, as authorized by section 317 of the Act, with respect to a net operating loss alleged to have been sustained by the applicant in a taxable year which closed not more than 24 months prior to such application. Application may be made by specific request therefor included in the application for adjustment assistance (Form OTA–3), or in the adjustment proposal (Form OTA–4) or may be made by separate letter to the Director. In each case, the applicant shall identify by its closing date the taxable year in which the net operating loss is alleged to have occurred.

(b) *Notice.* At such time and in such manner as may be prescribed in regulations issued by the Commissioner of Internal Revenue, the firm (and its proprietor if a sole proprietorship, its partners if a partnership, or its shareholders if an electing small business corporation under subchapter S of Chapter 1 of the Internal Revenue Code of 1954) must file with the appropriate District Director of Internal Revenue notice of the application for tax assistance and, if such assistance is approved, a copy of the Secretary's certification of eligibility therefor (Form OTA–6).

(c) *Certification.* Eligibility for tax assistance, to carry out a firm's certified adjustment proposal, will be certified by the Secretary, if he determines that:

(1) The application for tax assistance was filed within 24 months after the close of a taxable year in which a net operating loss is alleged to have been sustained by the firm,

(2) The alleged net operating loss of the firm arose predominantly out of carrying on a trade or buiness which was seriously injured, during the year of the loss, by the increased imports which the Tariff Commission has determined to result from concessions granted under trade agreements, and

(3) The tax assistance requested will materially contribute to the economic adjustment of the firm.

NOTE: The record keeping and reporting requirements of this part have been ap-

proved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Signed at Washington, D.C., this 16th day of December, 1964.

THOMAS G. WYMAN,
*Assistant Secretary of Commerce for Domestic and International Business.*

# Title 49—TRANSPORTATION

## Chapter I—Interstate Commerce Commission

### SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. No. 957]

### PART 95—CAR SERVICE

### Missouri-Kansas-Texas Railroad Company Rerouting of Traffic; Substitute Switching Service at Mangum and Frederick, Okla.

At a Session of the Interstate Commerce Commission, Division 3, held in Washington, D.C., on the 10th day of December A.D., 1964.

It appearing, that the Missouri-Kansas-Texas Railroad Company due to track and roadbed conditions between its yard limits at Wichita Falls, Texas, on the south and a point designated as Hocker, Oklahoma, on the north is unable to transport traffic routed over that line. The Missouri-Kansas-Texas Railroad Company having filed a petition with the Commission wherein the petitioner prays that the Commission enter an emergency order or orders under sections 1(15) and 1(16), (1) authorizing petitioner to discontinue or suspend service on its lines between its yard limits at Wichita Falls, Texas, on the south and a point designated as Hocker, Oklahoma, on the north; (2) authorizing petitioner as to all traffic to or from points on said line to disregard shippers' routing and to reroute such traffic over other railroads; and (3) directing petitioner to arrange for the performance of its switching service at Mangum and Frederick, Oklahoma, by other railroads serving those points. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

*It is ordered,* That,

§ 95.957 **Missouri-Kansas-Texas Railroad Company rerouting of traffic; substitute switching service at Mangum and Frederick, Oklahoma.**

(a) The Missouri-Kansas-Texas Railroad Company and its connections, being unable to transport traffic because of track and roadbed conditions between yard limits at Wichita Falls, Texas, and a point designated as Hocker, Oklahoma, in accordance with shippers' routing is hereby authorized to disregard shippers' routing and reroute over other railroads all traffic to or from all points on the Missouri-Kansas-Texas Railroad Company's line between yard limits at Wichita Falls, Texas, and a point designated as Hocker, Oklahoma, over any available route to expedite the movement, regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) The Missouri-Kansas-Texas Railroad Company shall permit other carriers, as far as practicable, to operate over their said tracks for the purpose of serving industries located on the said Missouri-Kansas-Texas line; and arrange for the performance of its switching at Mangum and Frederick, Oklahoma, by other railroads serving those points.

(c) The Missouri-Kansas-Texas Railroad Company will continue to maintain switching service at Altus and Hocker, Oklahoma.

*It is further ordered,* That the petition in all other respects is denied.

*Application.* The provisions of this order shall apply to intrastate and foreign traffic as well as to interstate traffic.

*Rules and regulations suspended.* The operation of all rules and regulations insofar as they conflict with the provisions of this order is hereby suspended.

(Secs. 1, 12, 15, 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15. Interprets or applies Secs. 1(10-17), 15(4), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4))

*It is further ordered,* That this order shall become effective at 12:01 a.m., December 17, 1964, and shall remain in force and effect until further order of the Commission; that copies of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order shall be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Division 3.

[SEAL] HAROLD D. McCOY,
*Secretary.*

# Proposed Rule Making

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

[ 26 CFR Parts 1, 301 ]

### INCOME TAX

### Treatment of Employee Stock Options and Purchase Plans

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: CC:LR, Washington, D.C., 20224, within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. Any person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner within the 30-day period. In such case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

In order to conform the Income Tax Regulations (26 CFR Part 1) under sections 402, 421 through 425, 691, 1012, 1014, 6039, 6071, and 6091 of the Internal Revenue Code of 1954, and the Procedure and Administration Regulations (26 CFR Part 301) under sections 6652, and 6678 of the Internal Revenue Code of 1954, to section 221 of the Revenue Act of 1964 (78 Stat. 63), such regulations are amended as follows:

PARAGRAPH 1. Section 1.402(a) is amended by revising section 402(a)(3)(B) and by adding a historical note. These amended and added provisions read as follows:

§ 1.402(a) **Statutory provisions; taxability of beneficiary of employees' trust; exempt trust.**

*Sec. 402. Taxability of beneficiary of employees' trust*—(a) *Taxability of beneficiary of exempt trust.* • • •

(3) *Definitions.* • • •

(B) The term "securities of the employer corporation" include securities of a parent or subsidiary corporation (as defined in subsections (e) and (f) of section 425) of the employer corporation.

• • • • •

[Sec. 402(a) as amended by sec. 4(c), Self-Employed Individuals Tax Retirement Act 1962 (76 Stat. 825); sec. 221(c)(1), Rev. Act 1964 (78 Stat. 75)]

PAR. 2. Paragraph (b)(1)(ii) of § 1.402(a)-1 is amended to read as follows:

§ 1.402(a)-1 **Taxability of beneficiary under a trust which meets the requirements of section 401(a).**

• • • • •

(b) *Distributions including securities of the employer corporation*—(1) *In general.* • • •

(ii) For purposes of section 402(a) and of this section, the term "securities" means only shares of stock and bonds or debentures issued by a corporation with interest coupons or in registered form, and the term "securities of the employer corporation" includes securities of a parent or subsidiary corporation (as defined in subsections (e) and (f) of section 425) of the employer corporation.

• • • • •

PAR. 3. The center heading "Miscellaneous Provisions" which immediately precedes § 1.421 is revised to read as follows:

CERTAIN STOCK OPTIONS

PAR. 4. Section 1.421 is amended by revising the heading thereof, by revising section 421 (including the heading), and by revising the historical note at the end thereof. These amended provisions and historical note read as follows:

§ 1.421 **Statutory provisions; general rules.**

Sec. 421. *General rules*—(a) *Effect of qualifying transfer.* If a share of stock is transferred to an individual in a transfer in respect of which the requirements of section 422(a), 423(a), or 424(a) are met—

(1) Except as provided in section 422(c)(1), no income shall result at the time of the transfer of such share to the individual upon his exercise of the option with respect to such share;

(2) No deduction under section 162 (relating to trade or business expenses) shall be allowable at any time to the employer corporation, a parent or subsidiary corporation of such corporation, or a corporation issuing or assuming a stock option in a transaction to which section 425(a) applies, with respect to the share so transferred; and

(3) No amount other than the price paid under the option shall be considered as received by any of such corporations for the share so transferred.

(b) *Effect of disqualifying disposition.* If the transfer of a share of stock to an individual pursuant to his exercise of an option would otherwise meet the requirements of section 422(a), 423(a), or 424(a) except that there is a failure to meet any of the holding period requirements of section 422(a)(1), 423(a)(1), or 424(a)(1), then any increase in the income of such individual or deduction from the income of his employer corporation for the taxable year in which such exercise occurred attributable to such disposition, shall be treated as an increase in income or a deduction from income in the taxable year of such individual or of such employer corporation in which such disposition occurred.

(c) *Exercise by estate*—(1) *In general.* If an option to which this part applies is exercised after the death of the employee by the estate of the decedent, or by a person who acquired the right to exercise such option by bequest or inheritance or by reason of the death of the decedent, the provisions of subsection (a) shall apply to the same extent as if the option had been exercised by the decedent, except that—

(A) The holding period and employment requirements of sections 422(a), 423(a), and 424(a) shall not apply, and

(B) Any transfer by the estate of stock acquired shall be considered a disposition of such stock for purposes of sections 423(c) and 424(c)(1).

(2) *Deduction for estate tax.* If an amount is required to be included under section 422(c)(1), 423(c), or 424(c)(1) in gross income of the estate of the deceased employee or of a person described in paragraph (1), there shall be allowed to the estate or such person a deduction with respect to the estate tax attributable to the inclusion in the taxable estate of the deceased employee of the net value for estate tax purposes of the option. For this purpose, the deduction shall be determined under section 691(c) as if the option acquired from the deceased employee were an item of gross income in respect of the decedent under section 691 and as if the amount includible in gross income under section 422(c)(1), 423(c), or 424(c)(1) were an amount included in gross income under section 691 in respect of such item of gross income.

(3) *Basis of shares acquired.* In the case of a share of stock acquired by the exercise of an option to which paragraph (1) applies—

(A) The basis of such share shall include so much of the basis of the option as is attributable to such share; except that the basis of such share shall be reduced by the excess (if any) of (i) the amount which would have been includible in gross income under section 422(c)(1), 423(c), or 424(c)(1) if the employee had exercised the option on the date of his death and had held the share acquired pursuant to such exercise at the time of his death, over (ii) the amount which is includible in gross income under such section; and

(B) The last sentence of sections 422(c)(1), 423(c), and 424(c)(1) shall apply only to the extent that the amount includible in gross income under such sections exceeds so much of the basis of the option as is attributable to such share.

[Sec. 421 as amended by sec. 1, Act of February 11, 1958 (Pub. Law 85-320, 72 Stat. 4); sections 25 and 26, Technical Amendments Act 1958 (72 Stat. 1623, 1624); sec. 221(a), Rev. Act. 1964 (78 Stat. 63)]

PAR. 5. Section 1.421-1 is amended by revising the heading thereof, and by adding a new paragraph (g) at the end thereof. These revised and added provisions read as follows:

§ 1.421-1 **Taxable years affected and meaning and use of certain terms.**

• • • • •

(g) *Taxable years affected.* Sections 1.421-1 through 1.421-5 are applicable only to taxable years ending before January 1, 1964, and only with respect to options granted after February 26, 1945, and before January 1, 1964, and all ref-

erences therein to sections of the Code are to the Internal Revenue Code of 1954, before the amendments made by section 221 of the Revenue Act of 1964 (78 Stat. 63). Section 1.421–6 is applicable only to options granted on or after February 26, 1945, and all references to sections of the Code are to the Internal Revenue Code of 1954, as amended. Sections 1.421–7 and 1.421–8 are applicable only to taxable years beginning after December 31, 1963, and all references therein to sections of the Code are to the Internal Revenue Code of 1954, as amended.

PAR. 6. Section 1.421–6 is amended by revising paragraphs (a) (1), (d) (7), and (f) thereof. These amended provisions read as follows:

**§ 1.421–6 Options to which section 421 does not apply.**

(a) *Scope of section.* (1) If an employer or other person grants to an employee or other person for any reason connected with the employment of such employee an option to purchase stock of the employer or other property, and if section 421 is not applicable, then this section shall apply. This section will apply, for example, when an option is not a qualified or restricted stock option at the time it is granted or an option granted under an employee stock purchase plan, or when an option is modified so that it no longer qualifies as such an option, or when there is a disqualifying disposition of stock acquired by the exercise of such an option so that section 421 does not apply. When an option is granted for any reason connected with the employment of an employee, this section applies, if section 421 does not apply, irrespective of whether the option is granted by the employer, by a parent or subsidiary of the employer, by a stockholder of any of such corporations, or by any other person, and irrespective of whether the option is granted to the employee, to a member of his family, or to any other person, and irrespective of whether the option is to purchase the stock of the employer, the stock of the parent or subsidiary of the employer, the stock of any other corporation, or to purchase any other property. In addition, § 1.61–15 makes the rules of this section applicable in determining the time when certain other options result in the realization of income and the amount of such income.

* * * * *

(d) *Options without a readily ascertainable fair market value.* * * *

(7) Notwithstanding the other provisions of this paragraph, if this section is applicable because of a disqualifying disposition of stock acquired by the exercise of a qualified or restricted stock option, or acquired by the exercise of an option granted under an employee stock purchase plan, the taxable year of the employee for which he is required to include in his gross income the compensation resulting from such option is determined under section 421(b) and paragraph (b) of § 1.421–8 (or, in the case of taxable years ending before January 1, 1964, under section 421(f) and paragraph (e) of § 1.421–5) and, in the case of a disqualifying disposition of a share of stock acquired by the exercise of a qualified stock option, the amount of such compensation shall be subject to the limitation provided by section 422(c)(4) and paragraph (b) of § 1.422–1.

* * * * *

(f) *Deductions.* If the employer grants an option to which this section applies, the employer of the employee in connection with whose employment the option is granted is considered to have paid compensation to such employee at the same time and in the same amount as such employee is considered under paragraph (c) or (d) of this section to have realized compensation. The deductibility of the amount considered so paid is determined under section 162 or other provision of the Code which is applicable to such a payment. Whether such amount may be deducted in the taxable year considered so paid, or whether such amount is a capital expenditure which is not deductible or which may be amortized, depends upon the nature of the transaction involved and the facts and circumstances of each case. If this section is applicable because of a disqualifying disposition of stock acquired by the exercise of a qualified or restricted stock option, or acquired by the exercise of an option granted under an employee stock purchase plan, the employer's taxable year for which such compensation is deductible is determined under section 421(b) and paragraph (b) of § 1.421–8 (or, in the case of taxable years ending before January 1, 1964, under section 421(f) and paragraph (e) of § 1.421–5).

PAR. 7. There are inserted immediately after § 1.421–6 the following new sections:

**§ 1.421–7 Meaning and use of certain terms.**

(a) *Option.* (1) For purposes of sections 421 through 425, the term "option" includes the right or privilege of an individual to purchase stock from a corporation by virtue of an offer of the corporation continuing for a stated period of time, whether or not irrevocable, to sell such stock at a price determined under paragraph (e) of this section, such individual being under no obligation to purchase. Such right or privilege, when granted, must be evidenced in writing. The individual who has such right or privilege is referred to as the optionee and the corporation offering to sell stock under such an arrangement is referred to as the optionor. While no particular form of words is necessary, the written option should express, among other things, an offer to sell at the option price and the period of time during which the offer shall remain open.

(2) An option may be granted as part of or in conjunction with an employee stock purchase plan or subscription contract. See section 423.

(3) An arrangement between a corporation and an employee may involve more than one option. For example, if a corporation on June 1, 1964, grants to an employee the right to purchase 1,000 shares of its stock on or after June 1, 1965, another 1,000 shares on or after June 1, 1966, and a further 1,000 shares on or after June 1, 1967, all shares to be purchased before June 1, 1968, provided the employee at the time of exercise of any of the purchase rights is employed by the corporation, such an arrangement will be construed as the grant to the employee on June 1, 1964, of three options, each for the purchase of 1,000 shares. However, if a corporation grants to an employee on January 1, 1965, the right to purchase 1,000 shares of its stock at $65 per share during 1965, or at $75 per share during 1966, or at $85 per share during 1967, such an arrangement will be construed as the grant to the employee on January 1, 1965, of but one option for the purchase of 1,000 shares, which ceases to be outstanding when fully exercised at the price in effect at the time of exercise.

(b) *Statutory options.* (1) The term "statutory option", used for purposes of convenience hereinafter in this section and in §§ 1.421–8 through 1.425–1, means a qualified stock option, as defined by section 422(b) and § 1.422–2; an option granted under an employee stock purchase plan, as defined by section 423(b) and § 1.423–2; and a restricted stock option, as defined in section 424(b) and § 1.424–2.

(2) An option may qualify as a statutory option only if the option is not transferable (other than by will or by the laws of descent and distribution) by the individual to whom it is granted, and is exercisable, during the lifetime of such individual, only by him. See sections 422(b)(6), 423(b)(9), and 424(b)(2). Accordingly, an option which is transferable by the individual to whom it is granted during his lifetime, or is exercisable during such individual's lifetime by another person, is not a statutory option. However, in case the option or the plan under which the option was granted contains a provision permitting the individual to whom the option was granted to designate the person who may exercise the option after his death, neither such provision, nor a designation pursuant to such provision, disqualifies the option as a statutory option.

(3) (i) The determination of whether an option is a statutory option is made as of the date such option is granted. An option which is a statutory option when granted does not lose its character as such an option by reason of subsequent events, and an option which is not a statutory option when granted does not become such an option by reason of subsequent events. See, however, paragraph (e) of § 1.425–1, relating to modification, extension, or renewal of an option.

(ii) The application of this subparagraph may be illustrated by the following examples:

*Example (1).* S–1 Corporation is a subsidiary of S Corporation which, in turn, is a subsidiary of P Corporation. On June 1, 1964, P grants to an employee of P a statutory option to purchase a share of stock of S–1. On January 1, 1965, S sells a portion of the S–1 stock which it owns to an unrelated corporation and, as of that date, S–1 ceases to be a subsidiary of S. On May 1, 1965, while still employed by P, the employee exercises his option to purchase a share of S–1 stock. Section 421 applies to such exercise.

*Example (2).* Assume P grants an option to an employee under the same facts as in example (1) above, except that on June 1, 1964, S–1 is not a subsidiary of either S or P. Such option is not a statutory option on June 1, 1964. On January 1, 1965, S purchases from an unrelated corporation a sufficient number of shares of S–1 stock to make S–1, as of that date, a subsidiary of S. On May 1, 1965, while still employed by P, the employee exercises his option to purchase a share of S–1 stock. The employee has not exercised a statutory option.

(c) *Time and date of granting option.* (1) For purposes of sections 421 through 425, the words "the date of the granting of the option" and "the time such option is granted", and similar phrases refer to the date or time when the corporation completes the corporate action constituting an offer of stock for sale to an individual under the terms and conditions of a statutory option. Ordinarily, if the corporate action contemplates an immediate offer of stock for sale to an individual or to a class including such individual, or contemplates a particular date on which such offer is to be made, the time or date of the granting of the option is the time or date of such corporate action if the offer is to be made immediately, or the date contemplated as the date of the offer, as the case may be. However, an unreasonable delay in the giving of notice of such offer to the individual or to the class will be taken into account as indicating that the corporation contemplated that the offer was to be made at the subsequent date on which such notice is given.

(2) If the corporation imposes conditions on the granting of an option (as distinguished from conditions governing the exercise of the option), such conditions shall be given effect in accordance with the intent of the corporation. However, under section 425(f), if the grant of an option is subject to approval by stockholders, the date of grant of the option shall be determined as if the option had not been subject to such approval. A condition which does not require corporate action, such as the approval of some regulatory or governmental agency, for example, a stock exchange or the Securities and Exchange Commission, is ordinarily considered a condition upon the exercise of the option unless the corporate action clearly indicates that the option is not to be granted until such condition is satisfied. If an option is granted to an individual upon the condition that such individual will become an employee of the corporation granting the option or of a related corporation, such option is not granted prior to the date the individual becomes such an employee.

(3) In general, conditions imposed upon the exercise of an option will not operate to make ineffective the granting of the option. For example, on June 1, 1964, the A Corporation grants to X, an employee, an option to purchase 5,000 shares of the corporation's stock, exercisable by X on or after June 1, 1965, provided he is employed by the corporation on June 1, 1965, and provided that A's profits during the fiscal year preceding the year of exercise exceed $200,000. Such an option is granted to X on June 1, 1964, and will be treated as outstanding as of such date.

(d) *Stock.* For purposes of sections 421 through 425, the term "stock" means capital stock of any class, including voting or nonvoting common or preferred stock. Except as otherwise provided, the term includes both treasury stock and stock of original issue. Special classes of stock authorized to be issued to and held by employees are within the scope of the term "stock" as used in such sections, provided such stock otherwise possesses the rights and characteristics of capital stock.

(e) *Option price.* (1) For purposes of sections 421 through 425, the term "option price" or "price paid under the option" means the consideration in money or property which, pursuant to the terms of the option, is the price at which the stock subject to the option is purchased. The term "option price" does not include amounts paid as interest under a deferred payment arrangement or treated as interest under section 483 and the regulations thereunder.

(2) In the case of a statutory option, any reasonable valuation method may be used for the purpose of determining whether at the time the option is granted the option price satisfies the pricing requirements of section 422(b)(4) (relating to qualified stock options), section 423(b)(6) (relating to employee stock purchase plans), or section 424(b)(1) (relating to restricted stock options), whichever is applicable, with respect to the stock subject to the option. Such methods include the valuation methods described in § 20.2031–2 of this chapter (Estate Tax Regulations).

(f) *Exercise.* For purposes of sections 421 through 425, the term "exercise", when used in reference to an option, means the act of acceptance by the optionee of the offer to sell contained in the option. In general, the time of exercise is the time when there is a sale or a contract to sell between the corporation and the individual. A promise to pay the option price does not constitute an exercise of the option unless the optionee is subject to personal liability on such promise. An agreement or undertaking by the employee to make payments under an employee stock purchase plan does not constitute the exercise of an option so long as the payments made remain subject to withdrawal by the employee.

(g) *Transfer.* For purposes of sections 421 through 425, the term "transfer", when used in reference to the transfer to an individual of a share of stock pursuant to his exercise of a statutory option, means the transfer of ownership of such share, or the transfer of substantially all the rights of ownership. Such transfer must, within a reasonable time, be evidenced on the books of the corporation.

(h) *Employment relationship.* (1) Section 421 is applicable to the exercise of a statutory option only if at the time the option is granted, the optionee is an employee of the corporation granting the option, or a related corporation of such corporation, unless the option has been assumed or a new option has been issued in its place under section 425(a). In case of such an assumption or issuance, the optionee must, at the time of such assumption or issuance, be an employee of the corporation so assuming or issuing the option, or a related corporation of such corporation. The determination of whether the optionee is an employee at the time the option is granted (or at the time of the assumption or issuance under section 425(a)) will be made in accordance with the rules contained in section 3401(c) and the regulations thereunder. As to the granting of an option conditioned upon employment, see paragraph (c)(2) of this section. A statutory option must be granted for a reason connected with the individual's employment by the corporation or by its related corporation.

(2) In order to qualify for the special tax treatment of section 421, in addition to meeting the rquirements of subparagraph (1) of this paragraph, an individual exercising a qualified stock option or an option granted under an employee stock purchase plan must, at all times during the period beginning with the date of the granting of such option and ending at the time of such exercise or on the day 3 months before the date of such exercise, be an employee of either the corporation granting such option, a related corporation of such corporation, or a corporation or a related corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies. For this purpose, the employment relationship in respect of an option granted in accordance with the requirements of subparagraph (1) of this paragraph will be treated as continuing intact while the individual is on military or sick leave if the period of such leave does not exceed 90 days, or, if longer, so long as the individual's right to reemployment with the corporation granting the option (or a related corporation of such corporation, or a corporation or a related corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies) is guaranteed either by statute or by contract.

(3) For purposes of determining whether an individual meets the requirements of this paragraph, the term "employer corporation", as used in section 425 (e) and (f), shall be read as "grantor corporation" or "corporation issuing or assuming a stock option in a transaction to which section 425(a) is applicable", as the case may be. For purposes of the employment requirement, the determination of whether a corporation is a related corporation is based upon whether such corporation was a related corporation of the corporation granting an option at the time of such grant or of a corporation which issued or assumed an option under section 425(a) at the time of such issuance or assumption.

(4) The application of this paragraph may be illustrated by the following examples:

*Example (1).* On June 1, 1964, X Corporation granted a statutory option to A, an employee of X Corporation, to purchase a share of X stock. On February 1, 1965, X sold the plant where A was employed to M

Corporation, an unrelated corporation, and A was employed by M. If A exercises his statutory option on June 1, 1965, section 421 is not applicable to such exercise, because on June 1, 1965, A is not employed by the corporation which granted the option or by a related corporation of such corporation, nor was he employed by any of such corporations within three months before June 1, 1965.

*Example* (2). Assume the facts to be the same as in example (1), except that when A was employed by M Corporation, the option to purchase X stock was terminated and was replaced by an option to buy M stock in such circumstances that M Corporation is treated as a corporation issuing an option under section 425(a). If A exercises the option to purchase the share of M stock on June 1, 1965, section 421 is applicable for A is then employed by a corporation which issued an option under section 425(a).

*Example* (3). E is an employee of S Corporation, which is a subsidiary of P Corporation. On June 1, 1964, P grants E a statutory option to purchase a share of P stock. On June 1, 1965, P sells a portion of its S stock so that S Corporation is no longer a subsidiary of P Corporation. E continues to be employed by S Corporation until June 1, 1966, on which date he exercises his option to purchase the share of P stock. Section 421 is applicable to such exercise.

*Example* (4). E is an employee of P Corporation. On June 1, 1964, P grants E a statutory option to purchase a share of P stock. On June 1, 1965, P acquires 100 percent of the stock of S Corporation; on such date S becomes a subsidiary of P. On July 1, 1965, E ceases to be employed by P and becomes employed by S. On October 10, 1965, while still employed by S, E exercises his option to buy P stock. Since E's exercise occurs more than 3 months after he ceased to be an employee of P Corporation, and since E is not at the time he exercises the option an employee of a corporation which was, at the time such option was granted, a parent or subsidiary of the grantor corporation, section 421 is not applicable to such exercise.

*Example* (5). Assume the same facts as in example (4) except assume that at the time E became an employee of S Corporation, S assumed E's option to purchase P stock under section 425(a). Section 421 is applicable to E's exercise of his option to buy P stock.

*Example* (6). M Corporation grants a qualified stock option to E, an employee of such corporation. E is an officer in a reserve Air Force unit. E goes on military leave with his unit for three weeks. Regardless of whether E is an employee of M within the meaning of section 3401(c) and the regulations thereunder during such 3-week period, E's employment relationship with M is treated as uninterrupted during the period of E's military leave.

*Example* (7). Assume the same facts as in example (6) and assume further that E's active duty status is extended indefinitely, but that E has an employment contract with M which provides that upon the termination of any military duty E may be required to serve, E will be entitled to re-employment with M or a parent or subsidiary of M. E exercises his M option while on active military duty. Irrespective of whether E is an employee of M within the meaning of section 3401(c) and the regulations thereunder at the time of such exercise or within 3 months before such exercise, section 421 can apply to such exercise.

*Example* (8). X Corporation grants a qualified stock option to A, an employee of X Corporation, whose employment contract provides that in the event of illness, A's right to re-employment with X, or a parent or subsidiary of X, will continue for one year after the time A becomes unable to perform his duties for X. A falls ill for 90 days. For purposes of section 422(a)(2), A's employment relationship with X will be treated as uninterrupted during the 90-day period. If A's incapacity extends beyond 90 days, then, for purposes of section 422(a)(2), A's employment relationship with X will be treated as continuing uninterrupted until A's re-employment rights terminate. Under section 422(a)(2), A has 3 months in which to exercise his qualified stock option after his employment relationship with X (and its parent and subsidiary corporation) is terminated.

(i) *Related corporation.* The term "related corporation", used for purposes of convenience in this section and §§ 1.421–8 through 1.425–1, means a corporation which is a parent or subsidiary corporation (as defined by section 425 (e) and (f) and the regulations thereunder)

**§ 1.421–8 General rules.**

(a) *Effect of qualifying transfer.* (1) If a share of stock is transferred to an individual pursuant to his exercise of a statutory option, and if the requirements of section 422(a) (relating to qualified stock options), section 423(a) (relating to employee stock purchase plans), or section 424(a) (relating to restricted stock options), whichever is applicable, are met, then—

(i) Except as provided in section 422 (c)(1) (relating to exercise of option when price is less than value of stock), and paragraph (e)(2) of § 1.422–2, no income shall result at the time of the transfer of such share to the individual upon his exercise of the option with respect to such share;

(ii) No deduction under section 162 or the regulations thereunder (relating to trade or business expenses) shall be allowable at any time to the employer corporation, a related corporation of such corporation, or a corporation issuing or assuming a stock option in a transaction to which section 425(a) and paragraph (a) of § 1.425–1 (relating to corporate reorganizations, liquidations, etc.) applies, with respect to the share so transferred; and

(iii) No amount other than the price paid under the option shall be considered as received by any of such corporations for the share so transferred.

(2) For the purpose of this paragraph, each share of stock transferred pursuant to a statutory option is treated separately. For example, if an individual, while employed by a corporation granting him a statutory option, exercises the option with respect to part of the stock covered by the option, and if such individual exercises the balance of the option more than three months after leaving such employment, the application of section 421 to the stock obtained upon the earlier exercise of the option is not affected by the fact that the income taxes of the employer and the individual with respect to the stock obtained upon the later exercise of the option are not determined under section 421.

(b) *Effect of disqualifying disposition.* (1) The disposition of a share of stock, acquired by the exercise of a statutory option before the expiration of the applicable holding period as determined under section 422(a)(1), 423(a)(1), or 424(a)(1), makes section 421 inapplicable to the transfer of such share. The income attributable to such transfer shall be treated by the individual as income received in the taxable year in which such disposition occurs. Similarly, the deduction attributable to the transfer of the share of stock pursuant to the exercise of the option shall be allowable to the grantor of the option for the taxable year in which such disposition occurs. In such cases, no amount shall be treated as income, and no amount shall be allowed as a deduction, for any taxable year other than the taxable year in which the disposition occurs. If the stock was transferred pursuant to the exercise of the option in a taxable year other than the taxable year of the disposition, the amount of the deduction shall be determined as if the employee had been paid compensation at the time provided in paragraph (d) of § 1.421–6.

(2) Section 421 is not made inapplicable by a transfer before the expiration of the applicable holding period as determined under section 422(a)(1), 423(a)(1), or 424(a)(1), if such transfer is not a disposition of the stock as defined in section 425(c) and paragraph (c) of § 1.425–1, for example, a transfer from the decedent to his estate or a transfer by bequest or inheritance. Similarly, a disposition by the executor, administrator, heir, or legatee is not a disposition by the decedent. In case a statutory option is exercised by the estate of the individual to whom the option was granted, or by a person who acquired the option by bequest or inheritance or by reason of the death of such individual, see paragraph (c) of this section.

(3) For special rules relating to a disqualifying disposition of a share of stock acquired by the exercise of a qualified stock option, see paragraph (b) of § 1.422–1.

(c) *Exercise by estate.* (1) If a statutory option is exercised by the estate of the individual to whom the option was granted, or by any person who acquired such option by bequest or inheritance or by reason of the death of such individual, section 421(a) applies to such exercise in the same manner as if such option had been exercised by such deceased individual. Consequently, except as provided by section 422(c)(1) and paragraph (e)(2) of § 1.422–2, neither the estate nor such person is required to include any amount in gross income as a result of a transfer of stock pursuant to such exercise of the option. Nor does section 421(a) become inapplicable if such executor, administrator, or person disposes of the stock so acquired before the expiration of the applicable holding period as determined under section 422(a)(1), 423(a)(1), or 424(a)(1). This special rule does not affect the applicability of section 1222, relating to what constitutes a short-term and long-term capital gain or loss. The executor, administrator, or such person need not exercise the option within three months after the death of the individual to whom the option was granted for section 421(a) to be applicable. However, the exercise of the option must be pursuant to the terms of the option, and any change in the terms of the option is subject to the rules of paragraph (e) of § 1.425–1, relating to the modification, extension, or renewal of the option. Section 421(a) is applicable even though such executor, administrator, or person is not employed by the corporation granting the option, or a related corporation, either when the option is exercised or at any time. However, section 421(a) is not applicable to an exercise of the option by the estate or by such person, unless the individual to whom the option was granted met the employment requirements of section 422(a)(2), 423(a)(2), or 424(a)(2), whichever is applicable, either at the time of his death or within three months before such time. If the option is exercised by a person other than the executor or administrator, or other than a person who acquired the option by bequest or inheritance or by reason of the death of such deceased individual, section 421(a) is not applicable to the exercise. For example, if the option is sold by the estate, section 421(a) does not apply to an exercise of the option by such buyer; but if the option is distributed by the administrator to an heir as part of the estate, section 421(a) is applicable to an exercise of the option by such heir.

(2) Any transfer by the estate, whether a sale, a distribution of assets, or otherwise, of the stock acquired by its exercise of the option under this paragraph is a disposition of the stock. Therefore, if section 423(c), or 424(c)(1) is applicable, the estate must include an amount as compensation in its gross income. Similarly, if section 423(c) or 424(c)(1) is applicable in case of an exercise of the option under this paragraph by a person who acquired the option by bequest or inheritance or by reason of the death of the individual to whom the option was granted, there must be included in the gross income of such person an amount as compensation, either when such person disposes of the stock, or when he dies owning the stock.

(3)(i) If, under section 422(c)(1), 423(c), or 424(c)(1), an amount is required to be included in the gross income of the estate or of such person, the estate or such person shall be allowed a deduction as a result of the inclusion of the value of the option in the estate of the individual to whom the option was granted. Such deduction shall be computed under section 691(c) by treating the option as an item of gross income in respect of a decedent under section 691 and by treating the amount required to be included in gross income under section 422(c)(1), 423(c), or 424(c)(1), as an amount included in gross income under section 691 in respect of such item of gross income. No such deduction shall be allowable with respect to any amount other than an amount includible under section 422(c)(1), 423(c), or 424(c)(1). For the rules relating to the computation of a deduction under section 691(c), see § 1.691(c)–1.

(ii) The application of subdivision (i) may be illustrated by the following example:

*Example.* On June 1, 1964, E was granted an option under an employee stock purchase plan to purchase for $85 one share of the stock of his employer. On such day, the fair market value of such stock was $100 per share. E died on February 1, 1966, without having exercised such option. The option was, however, exercisable by his estate, and for purposes of the estate tax was valued at $30. On March 1, 1966, the estate exercised the option, and on March 15, 1966, sold for $150 the share of stock so acquired. For its taxable year including March 15, 1966, the estate is required by sections 421(c)(1)(B) and 423(c) to include in its gross income as compensation the amount of $15. During such taxable year, no amounts of income were properly paid, credited, or distributable to the beneficiaries of the estate. However, under section 421(c)(2), the estate is entitled to a deduction determined in the following manner. E's estate includes no other items of income in respect of a decedent referred to in section 691(a), and no deductions referred to in section 691(b), so that the value for estate tax purposes of the option, $30, is also the net value of all items of income in respect of the decedent. The estate tax attributable to the inclusion of the option in the estate of E is $10. Since $15, the amount includible in gross income by reason of sections 421(c)(1)(B) and 423(c), is less than the value for estate tax purposes of the option, only 15/30 of the estate tax attributable to the inclusion of the option in the estate is deductible; that is, 15/30 of $10, or $5. No deduction under section 421(c)(2) is allowable with respect to any capital gain.

(4)(i) In the case of an employee dying before January 1, 1957, the basis of any share of stock acquired by the exercise of a restricted stock option under this paragraph, determined under section 1011, shall be increased by an amount equal to the amount includible as compensation in his gross income under section 424(c)(1). The basis of the share shall not be increased by reason of the inclusion of the value of the restricted stock option in the estate for estate tax purposes.

(ii)(*a*) In the case of an employee dying after December 31, 1956, the basis of any share of stock acquired by the exercise of an option under this paragraph, determined under section 1011, shall be increased by an amount equal to the portion of the basis of the option attributable to such share. For example, if a statutory option to acquire 10 shares of stock has a basis of $100, the basis of one share acquired by a partial exercise of the option, determined under section 1011, would be increased by 1/10th of $100, or $10. The option acquires a basis, determined under section 1014(a), only if the transfer of the share pursuant to the exercise of such option qualifies for the special tax treatment provided by section 421(a). To the extent the option is so exercised, in whole or in part, it will acquire a basis equal to its fair market value at the date of the employee's death or, if an election is made under section 2032, its value at its applicable valuation date. In certain cases, the basis of the share is subject to the adjustments provided by (*b*) and (*c*) of this subdivision, but such adjustments are only applicable in the case of an option which is subject to section 422(c)(1), 423(c), or 424(c)(1).

(*b*) If the amount which would have been includible in gross income under section 422(c)(1), 423(c), or 424(c)(1) had the employee exercised the option on the date of his death and held the share at the time of his death exceeds the amount which is includible in gross income under such section, the basis of the share, determined under (*a*) of this subdivision, shall be reduced by such excess. For example, if $15 would have been includible in the gross income of the employee had he exercised the option and held such share at the time of his death, and only $10 is includible under section 422(c)(1), 423(c), or 424(c)(1), the basis of the share, determined under (*a*) of this subdivision, would be reduced by $5. For purposes of determining the amount which would have been includible in gross income under section 422(c)(1), 423(c), or 424(c)(1), if the employee had exercised the option and held such share at the time of his death, the amount which would have been paid for the share shall be computed as if the option had been exercised on the date the employee died.

(c) If the amount includible in gross income under section 422(c)(1), 423(c), or 424(c)(1), exceeds the portion of the basis of the option attributable to the share, the basis of the share, determined under (*a*) of this subdivision, shall be increased by such excess. Thus, if $15 is includible in gross income under such section, and the basis of the option with respect to the share is $10, the basis of the share, determined under (*a*) of this subdivision, will be increased by $5.

(iii) If a statutory option is not exercised by the estate of the individual to whom the option was granted, or by the person who acquired such option by bequest or inheritance or by reason of the death of such individual, the option shall be considered to be property which constitutes a right to receive an item of income in respect of a decedent to which the rules of sections 691 and 1014(c) apply.

(iv) The application of this subparagraph may be illustrated by the following examples:

*Example (1).* On June 1, 1955, the X Corporation granted to E, an employee, a restricted stock option to purchase a share of X Corporation's stock for $85. The fair market value of the X Corporation stock on such date was $100 per share. On June 1, 1956, E died. The fair market value of X Corporation stock on such date exceeded $100 per share and the fair market value of the option on the applicable valuation date was $35. On August 1, 1964, the estate of E exercised the option and sold the share of X Corporation stock at a time when the fair market value of the share was $90. The estate is required by section 424(c)(1) to include $5 in its gross income as compensation. Since E died before January 1, 1957, the basis of the share is $90 (the $85 paid for the stock plus the $5 includible in gross income as compensation), and the basis of the share is not increased by reason of the inclusion of the value of the option in the estate of E (see section 1014(d) (as in effect with respect to taxable years ending before January 1, 1957)). Thus, no gain or loss is realized on the disposition of the share since the basis of the share is equal to the sale price.

*Example (2).* On June 1, 1964, the X Corporation granted to E, an employee, an option under its employee stock purchase plan to purchase a share of X Corporation stock for $85. The fair market value of X

Corporation stock on such date was $100 per share. On June 1, 1966, E died. The fair market value of X Corporation stock on such date exceeded $100 per share and the fair market value of the option on the applicable valuation date was $35. On August 1, 1966, the estate of E exercised the option and sold the share of X Corporation stock at a time when the fair market value of the share was $120. The basis of the share is $120 (the $85 paid for the stock plus the $35 basis of the option). When the share is sold for $120, the estate is required to include $15 in its gross income as compensation. Since $15 would have been includible in E's gross income if he had exercised the option and held such share at the time of his death, subdivision (ii)(*b*) of this subparagraph does not apply. Moreover, since the $15 includible in the gross income of the estate does not exceed the basis of the option ($35), subdivision (ii)(*c*) of this subparagraph does not apply. Since the basis of the stock and the sale price are the same, no gain or loss is realized by the estate on the disposition of the share.

*Example* (3). Assume the same facts as in example (2), except that the fair market value of the share of stock at the time of its sale was $90. The basis of the share, determined under subdivision (ii)(*a*) of this subparagraph, is $120 (the $85 paid for the stock plus the $35 basis of the option). When the share is sold for $90, the estate is required to include $5 in its gross income as compensation. If the employee had exercised the option and held the share at the time of his death, $15 would have been includible in gross income as compensation for the taxable year ending with his death. Since such amount exceeds by $10 the amount which the estate is required to include in its gross income, subdivision (ii)(*b*) of this subparagraph applies, and the basis of the share ($120), determined under subdivision (ii)(*a*) of this subparagraph is reduced by $10. Accordingly, the basis is $110, and a capital loss of $20 is realized on the disposition of the share.

*Example* (4). Assume the same facts as in example (2), except that the fair market value of the option on the applicable valuation date was $5, and that the fair market value of X Corporation stock on the date the employee died did not exceed $100. The basis of the share, determined under subdivision (ii)(*a*) of this subparagraph, is $90 (the $85 paid for the stock plus the $5 basis of the option). When the share is sold for $120, the estate is required to include $15 in its gross income as compensation. Since such amount exceeds by $10 the basis of the option, subdivision (ii)(*c*) of this subparagraph applies, and the basis of the share ($90), determined under subdivision (ii)(*a*) of this subparagraph, is increased by $10. Accordingly, the basis is $100 and a capital gain of $20 is realized on the disposition of the share.

*Example* (5). Assume the same facts as in example (2), except that on June 1, 1966, the date the employee died, the fair market value of X Corporation stock was $98, and that on June 1, 1967, the alternate valuation date, the fair market value of the stock had declined substantially, and the fair market value of the option was $5. On August 1, 1967, the estate of E exercised the option and sold the share when its fair market value was $92. The basis of the share, determined under subdivision (ii)(*a*) of this subparagraph, is $90 (the $85 paid for the stock plus the $5 basis of the option). When the share is sold for $92, the estate is required to include $7 in its gross income as compensation. Since $13 would have been includible in E's gross income if he had exercised the option and held such share at the time of his death, subdivision (ii)(*b*) of this subparagraph applies, and the basis of the share ($90), determined under subdivision (ii)(*a*) of this subparagraph, is reduced by $6 to $84. Furthermore, since the $7 that the estate is required to include in its gross income when the share is sold for $92 exceeds by $2 the basis of the option, subdivision (ii)(*c*) of this subparagraph applies, and the basis of the share ($84), determined under subdivision (ii)(*a*) and (ii)(*b*) of this subparagraph, is increased by $2. Accordingly, the basis is $86 and a capital gain of $6 is realized on the disposition of the share.

### § 1.422 Statutory provisions; qualified stock options.

Sec. 422. *Qualified stock options*—(a) *In general.* Subject to the provisions of subsection (c)(1), section 421(a) shall apply with respect to the transfer of a share of stock to an individual pursuant to his exercise of a qualified stock option if—

(1) No disposition of such share is made by such individual within the 3-year period beginning on the day after the day of the transfer of such share, and

(2) At all times during the period beginning with the date of the granting of the option and ending on the day 3 months before the date of such exercise, such individual was an employee of either the corporation granting such option, a parent or subsidiary corporation of such corporation, or a corporation or a parent or subsidiary corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies.

(b) *Qualified stock option.* For purposes of this part, the term "qualified stock option" means an option granted to an individual after December 31, 1963 (other than a restricted stock option granted pursuant to a contract described in section 424(c)(3)(A)), for any reason connected with his employment by a corporation, if granted by the employer corporation or its parent or subsidiary corporation, to purchase stock of any of such corporations, but only if—

(1) The option is granted pursuant to a plan which includes the aggregate number of shares which may be issued under options, and the employees (or class of employees) eligible to receive options, and which is approved by the stockholders of the granting corporation within 12 months before or after the date such plan is adopted;

(2) Such option is granted within 10 years from the date such plan is adopted, or the date such plan is approved by the stockholders, whichever is earlier;

(3) Such option by its terms is not exercisable after the expiration of 5 years from the date such option is granted;

(4) Except as provided in subsection (c)(1), the option price is not less than the fair market value of the stock at the time such option is granted;

(5) Such option by its terms is not exercisable while there is outstanding (within the meaning of subsection (c)(2)) any qualified stock option (or restricted stock option) which was granted, before the granting of such option, to such individual to purchase stock in his employer corporation or in a corporation which (at the time of the granting of such option) is a parent or subsidiary corporation of the employer corporation, or in a predecessor corporation of any of such corporations;

(6) Such option by its terms is not transferable by such individual otherwise than by will or the laws of descent and distribution, and is exercisable, during his lifetime, only by him; and

(7) Such individual, immediately after such option is granted, does not own stock possessing more than 5 percent of the total combined voting power or value of all classes of stock of the employer corporation or of its parent or subsidiary corporation; except that if the equity capital of such corporation or corporations (determined at the time the option is granted) is less than $2,000,000, then, for purposes of applying the limitation of this paragraph, there shall be added to such 5 percent the percentage (not higher than 5 percent) which bears the same ratio to 5 percent as the difference between such equity capital and $2,000,000 bears to $1,000,000.

(c) *Special rules*—(1) *Exercise of option when price is less than value of stock.* If a share of stock is transferred pursuant to the exercise by an individual of an option which fails to qualify as a qualified stock option under subsection (b) because there was a failure in an attempt, made in good faith, to meet the requirement of subsection (b)(4), the requirement of subsection (b)(4) shall be considered to have been met, but there shall be included as compensation (and not as gain upon the sale or exchange of a capital asset) in his gross income for the taxable year in which such option is exercised, an amount equal to the lesser of—

(A) 150 percent of the difference between the option price and the fair market value of the share at the time the option was granted, or

(B) The difference between the option price and the fair market value of the share at the time of such exercise.

The basis of the share acquired shall be increased by an amount equal to the amount included in his gross income under this paragraph in the taxable year in which the exercise occurred.

(2) *Certain options treated as outstanding.* For purposes of subsection (b)(5)—

(A) Any restricted stock option which is not terminated before January 1, 1965, and

(B) Any qualified stock option granted after December 31, 1963,

shall be treated as outstanding until such option is exercised in full or expires by reason of the lapse of time. For purposes of the preceding sentence, a restricted stock option granted before January 1, 1964, shall not be treated as outstanding for any period before the first day on which (under the terms of such option) it may be exercised.

(3) *Options granted to certain shareholders.* For purposes of subsection (b)(7)—

(A) The term "equity capital" means—

(i) In the case of one corporation, the sum of its money and other property (in an amount equal to the adjusted basis of such property for determining gain), less the amount of its indebtedness (other than indebtedness to shareholders), and

(ii) In the case of a group of corporations consisting of a parent and its subsidiary corporations, the sum of the equity capital of each of such corporations adjusted, under regulations prescribed by the Secretary or his delegate, to eliminate the effect of intercorporate ownership and transactions among such corporations;

(B) The rules of section 425(d) shall apply in determining the stock ownership of the individual; and

(C) Stock which the individual may purchase under outstanding options shall be treated as stock owned by such individual.

If an individual is granted an option which permits him to purchase stock in excess of the limitation of subsection (b)(7) (determined by applying the rules of this paragraph), such option shall be treated as meeting the requirement of subsection (b)(7) to the extent that such individual could, if the option were fully exercised at the time of grant, purchase stock under such option without exceeding such limitation. The portion of such option which is treated as meeting the requirement of subsection (b)(7) shall be deemed to be that portion of the option which is first exercised.

(4) *Certain disqualifying dispositions where amount realized is less than value at exercise.* If—

(A) An individual who has acquired a share of stock by the exercise of a qualified stock option makes a disposition of such share within the 3-year period described in subsection (a)(1), and

(B) Such disposition is a sale or exchange with respect to which a loss (if sustained) would be recognized to such individual,

then the amount which is includible in the gross income of such individual, and the amount which is deductible from the income of his employer corporation, as compensation attributable to the exercise of such option shall not exceed the excess (if any) of the amount realized on such sale or exchange over the adjusted basis of such share.

(5) *Certain transfers by insolvent individuals.* If an insolvent individual holds a share of stock acquired pursuant to his exercise of a qualified stock option, and if such share is transferred to a trustee, receiver, or other similar fiduciary, in any proceeding under the Bankruptcy Act or any other similar insolvency proceeding, neither such transfer nor any other transfer of such share for the benefit of his creditors in such proceeding, shall constitute a "disposition of such share" for purpoees of subsection (a)(1).

(6) *Application of subsection (b)(5) where options are for stock of same class in same corporation.* The requirement of subsection (b)(5) shall be considered to have been met in the case of any option (referred to in this paragraph as "new option") granted to an individual if—

(A) The new option and all outstanding options referred to in subsection (b)(5) are to purchase stock of the same class in the same corporation, and

(B) The new option by its terms is not exercisable while there is outstanding (within the meaning of paragraph (2)) any qualified stock option (or restricted stock option) which was granted, before the granting of the new option, to such individual to purchase stock in such corporation at a price (determined as of the date of grant of the new option) higher than the option price of the new option.

[Sec. 422 as added by sec. 221(a), Rev. Act 1964 (78 Stat. 63)]

### § 1.422–1 Qualified stock options—general rules.

(a) *Applicability of section 421(a).* (1)(i) Subject to the provisions of section 422(c)(1), the special rules of income tax treatment provided in section 421(a) are applicable with respect to the transfer of a share of stock to an individual pursuant to his exercise of a qualified stock option provided that the following conditions are satisfied—

(*a*) The individual must make no disposition of such share before the expiration of the 3-year period beginning on the day after the day of the transfer of such share, and

(*b*) At all times during the period beginning with the date of the granting of the option and ending on the day 3 months before the date of such exercise, the individual was an employee of either the corporation granting the option, a related corporation of such corporation, or a corporation or a related corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies.

(ii) For rules relating to the requisite employment relationship, see paragraph (h) of § 1.421–7.

(2)(i) An exception to the holding period requirement of section 422(a)(1) is provided with respect to certain transfers by insolvent individuals. If an insolvent individual holds a share of stock acquired pursuant to his exercise of a qualified stock option, and if such share is transferred to a trustee, receiver, or other similar fiduciary in any proceeding under the Bankruptcy Act or any other similar insolvency proceeding (such as an assignment for the benefit of creditors, a composition, etc.), neither such transfer, nor any other transfer of such share for the benefit of the insolvent individual's creditors in such proceeding shall constitute a disposition of such share for the purpose of section 422(a)(1). For the purpose of this subparagraph, an individual is an insolvent only if his liabilities exceed his assets, or if he is unable to satisfy his liabilities as they become due.

(ii) Notwithstanding that a transfer by the trustee or other fiduciary is not treated as a disposition for the purpose of section 422(a)(1), such transfer may constitute a sale or exchange for purposes of recognizing capital gain or loss with respect to the share so transferred. For example, if the trustee transfers the share to a creditor in the insolvency proceeding in complete or partial satisfaction of such creditor's claim against the insolvent individual, capital gain or loss must be recognized by the insolvent individual to the extent of the difference between the fair market value of the share on the date of such transfer and the adjusted basis of such share. To the extent any transfer by the trustee or other fiduciary (other than a transfer back to the insolvent individual) is not for the exclusive benefit of the creditors in such insolvency proceeding, such transfer will be treated as a disposition for purposes of section 422(a)(1). Similarly, if the trustee or other fiduciary transfers the share back to the insolvent individual, any subsequent disposition of the share which is not made in respect of the insolvency proceeding and for the exclusive benefit of the creditors in such proceeding will be treated as a disposition for purposes of section 422(a)(1).

(b) *Failure to satisfy holding period.* (1) The special tax treatment of section 421(a) is not applicable with respect to the transfer of a share of stock pursuant to the exercise of a qualified stock option if the individual disposes of the share before the expiration of the 3-year period beginning on the day after the day of the transfer of such share to him. For general rules relating to the effect of such a disqualifying disposition, see section 421(b) and paragraph (b) of § 1.421–8. For definition of the term "disposition", see section 425(c) and paragraph (c) of § 1.425–1.

(2) If an individual who has acquired a share of stock by the exercise of a qualified stock option makes a disqualifying disposition of such share, and if such disposition is a sale or exchange with respect to which a loss (if sustained) would be recognized to the individual, then, under section 422(c)(4), the amount includible in the gross income of such individual, and deductible from the income of his employer corporation, as compensation attributable to the exercise of such option, shall not exceed the excess (if any) of the amount realized on such sale or exchange over the adjusted basis of such share. Thus, the limitation does not apply when the disqualifying disposition is a sale described in section 1091 (relating to loss from wash sales of stock or securities), a gift, or a sale described in section 267(a)(1) (relating to sales between related persons), since a loss sustained in any such transaction would not be recognized. Subject to the limitation provided by section 422(c)(4) and this subparagraph, the amount of compensation attributable to the exercise of the option is determined under § 1.421–6 and paragraph (b) of § 1.421–8.

(3) The application of this paragraph may be illustrated by the following examples:

*Example* (1). On June 1, 1964, X Corporation grants a qualified stock option to A, an employee of X Corporation, entitling A to purchase one share of X Corporation stock. On June 1, 1965, A exercises his option and the share of X Corporation stock is transferred to him on June 10, 1965. In order to meet the 3-year holding period requirement of section 422(a)(1), A must not dispose of the share acquired by exercise of his qualified stock option before June 11, 1968.

*Example* (2). Assume the same facts as in example (1) and assume further that the option price was $100, the fair market value of X Corporation stock on June 1, 1964, and that the fair market value of X Corporation stock was $200 on June 1, 1965, the date of exercise. A makes a disposition by selling his share on June 1, 1967, for $250. Under section 422(c)(4), the amount of compensation includible in A's income, and deductible by X Corporation, attributable to the exercise of A's option cannot exceed $150 (the excess of the amount realized on the sale, $250, over the adjusted basis of the share, $100). Under § 1.421–6 (relating to options to which section 421 does not apply) the amount of compensation attributable to A's exercise is $100 (the difference between the fair market value of the share at the date of exercise, $200, and the amount paid for the share, $100). Thus, section 422(c)(4) does not affect the amount of compensation attributable to the exercise of A's option which is includible by A and deductible by X Corporation. A must include in his gross income for the taxable year in which the sale occurred $100 as compensation and $50 as capital gain ($250, the amount realized from the sale, less A's basis of $200, the $100 paid for the share plus the $100 increase in basis resulting from the inclusion of that amount in A's gross income as compensation attributable to the exercise of the option). For its taxable year in which the disqualifying disposition occurs, X Corporation is allowed a deduction of $100 for compensation attributable to A's exercise of the qualified stock option.

*Example* (3). Assume the same facts as in example (2), except that A sells the share for $150. Under section 422(c)(4), A must include only $50 (the excess of the amount realized on such sale, $150, over the adjusted basis of the share, $100) in his gross income as compensation attributable to the exercise of his qualified stock option instead of the $100 which otherwise would have been includible as compensation under § 1.421–6. A realizes no capital gain or loss as a result of the sale, since his basis for the share is $150 (the $100 which he paid for the share, plus the $50 increase in basis resulting from the inclusion of that amount in A's gross income as compensation attributable to the exercise of the option). For its taxable year in which the disqualifying disposition occurs, X Corporation is allowed a deduction of $50 for com-

pensation attributable to A's exercise of the qualified stock option.

*Example (4).* Assume the same facts as in example (2), except that A sells the share for $50. The limitation of section 422(c)(4) applies and A is not required to include any amount in gross income as compensation attributable to the exercise of his qualified stock option. A is allowed a capital loss of $50 (the difference between the amount realized on the sale, $50, and the adjusted basis of the share, $100). X Corporation is not allowed any deduction for compensation attributable to A's exercise of the qualified stock option and disqualifying disposition.

*Example (5).* Assume the same facts as in example (3) except that A sells the share to his son for $150. Under section 267, a loss sustained in such a sale would not be recognized. Therefore, the limitation of section 422(c)(4) does not apply. Accordingly, under § 1.421–6, A must include $100 (the difference between the fair market value of the share at the date of exercise, $200, and the amount paid for the share, $100) in his gross income as compensation attributable to the exercise of his qualified stock option in the taxable year in which the disqualifying disposition occurred. A will recognize no capital gain or loss on the transaction. X Corporation will be allowed a $100 deduction for compensation paid to A in its taxable year in which the disqualifying disposition occurred.

*Example (6)* Assume the same facts as in example (3) except assume that, as a result of the failure of a good-faith attempt to set the option price at the fair market value of X Corporation stock on the date of grant, the option price was set at $90 instead of $100. Under section 422(c)(1), A includes $15 (the lesser of 150 percent of the difference between the option price, $90, and the fair market value of the share at grant, $100; or the difference between the option price, $90, and the fair market value of the share at exercise, $200) in his gross income as compensation in the year of exercise. Under section 421(a)(2), X Corporation is allowed no deduction at such time. Upon his sale of the share, A will include $45 (the excess of the amount realized on such sale, $150, over the adjusted basis of the share, $105 ($90, the option price, plus $15, the amount included in A's gross income as compensation at exercise)) in his gross income as compensation attributable to his exercise in the taxable year in which the disqualifying disposition occurs. A will have no capital gain or loss as a result of such sale. Under section 422(c)(4), X Corporation will be allowed a deduction of $45 as compensation attributable to A's exercise, in the taxable year of A's disqualifying disposition.

**§ 1.422–2 Qualified stock options defined.**

(a) *Qualified stock option defined.* (1)(i) The term "qualified stock option" means an option which meets the requirements of section 422(b) (1) through (7) and this section. Section 422(b)(1) requires that a qualified stock option be granted pursuant to a plan which meets certain requirements. See paragraph (b) of this section. However, options granted after December 31, 1963, and before January 1, 1965, need not be granted under an option plan to be qualified stock options. See paragraph (b)(4) of this section. Section 422(b)(2) limits the duration of a qualified stock option plan to 10 years. In order to grant qualified stock options after the expiration of such 10-year period, a new plan must be adopted and approved. See paragraph (c) of this section. Paragraphs (3) through (6) of section 422(b) establish certain requirements which must be met by the terms of a qualified stock option. An option which, when granted, does not by its terms meet these requirements cannot be a qualified stock option. See paragraphs (d) through (g) of this section. However, if the terms of an option granted after December 31, 1963, are amended before January 1, 1965, to permit the option to satisfy the requirements of section 422(b) (3), (4), or (5), such amendment will be given retroactive effect. See paragraphs (d)(2), (e)(3), and (f)(3)(ii) of this section. In addition, if the terms of an option are amended at any time to permit such option to meet the requirement of section 422(b)(6), such amendment will be given retroactive effect. See section 425(b)(3)(B) and paragraph (e)(5)(ii) of § 1.425–1. Section 422(b)(7) bars the grant of a qualified stock option to any employee whose stock ownership exceeds the limits provided by such section. To the extent the grant of an option entitles the employee to purchase stock in excess of such limitation, the option cannot be a qualified stock option. See paragraph (h) of this section.

(ii) The determination of whether a particular option is a qualified stock option is made at the time such option is granted. Accordingly, except as is otherwise specifically provided by sections 421 through 425 and the regulations thereunder, events subsequent to the grant of an option cannot affect the status of the option. For example, an option which is granted to an employee whose stock ownership exceeds the limitation provided by section 422(b)(7) is not a qualified stock option when granted and can never become a qualified stock option, irrespective of whether the individual's stock ownership exceeds such limitation at the time such option is exercised.

(2) Section 422 and this section do not apply to an option which is a restricted stock option.

(b) *Option plan.* (1) A qualified stock option granted after December 31, 1964, must be granted pursuant to a plan which is approved by the stockholders of the granting corporation within 12 months before or after the date the plan is adopted. Stockholder approval must be expressed in the manner provided by the corporate by-laws or by the laws of the state of incorporation which relate to stockholder approval of an increase in the authorized shares of the class of shares with respect to which the options are to be granted. For example, if the applicable corporate by-law or the law of the state of incorporation requires that an increase in the authorized shares of a class of stock be by a ⅔ majority of the shareholders of the classes of stock affected, the approval of the option plan must meet this standard.

(2) The plan required by section 422 must be approved within 12 months before or after the date the plan is adopted. Ordinarily, a plan is adopted when approved by the board of directors and the date of such board action will be the reference point for determining whether stockholder approval comes within the 12-month period.

(3) The plan as adopted and approved must indicate the aggregate number of shares which may be issued under the plan and the employees or class of employees eligible to receive options under the plan. A plan which merely provides that the number of shares which may be issued under options shall not exceed a stated percentage of the shares outstanding at the time of each grant under the plan will not satisfy the requirement that the plan state the aggregate number of shares which may be issued under options. The requirement that the plan as adopted and approved must indicate the employees (or class of employees) eligible to receive options will be considered satisfied although the board of directors or another group is given the authority to select the particular employees to whom options are to be granted from a described class, and to determine the number of shares to be optioned to each such employee. For example, a provision that the board of directors or some executive committee of the corporation may select the particular employees to receive options from among the key employees of the corporation (or a related corporation) will meet the requirements of section 422(b)(1). The provisions relating to the aggregate number of shares to be issued under the plan and the employees (or class of employees) eligible to receive options under the plan, are the only provisions of a stock option plan which require stockholder approval for purposes of section 422(b)(1). Any change in the aggregate number of shares which may be issued under the plan (other than a change merely reflecting a change in capitalization such as a stock dividend or stock split-up), or in the description of the employees or class of employees eligible to receive options under the plan will be considered as the adoption of a new plan requiring stockholder approval within the prescribed 12-month period. Amendments to a stock option plan which do not affect the number of shares which may be issued under the plan or the employees (or class of employees) eligible to receive options under the plan need not be submitted for stockholder approval under section 422(b)(1). An option will be treated as having been issued pursuant to a plan notwithstanding that the terms of the option conflict with certain terms of the plan unless such option is issued to an employee not eligible to receive options under the plan or options have been issued on stock in excess of the aggregate number of shares which may be issued under the plan. A stock option plan which otherwise meets the requirements of section 422(b)(1) and this paragraph may be availed of for the granting of qualified stock options although the adoption and approval of such plan occurred before January 1, 1964.

(4) In the case of an option granted after December 31, 1963, and before January 1, 1965, section 422(b) (1) and (2), and this paragraph do not apply. Thus, an option granted during the calendar year 1964, which meets the requirements of section 422(b) (3) through (7), will be a qualified stock option irrespective of whether such option is granted pursuant to a plan; or, if granted pursuant to a plan, irrespective of whether such option was granted within 10 years from the date such plan was adopted or approved by shareholders, and irrespective of whether such plan specifies the employees or class of employees to whom options may be granted or the number of shares which may be granted under options.

(c) *Duration of plan.* A qualified stock option must be granted within 10 years from the date the option plan (required by section 422(b)(1) and paragraph (b) of this section) is adopted, or the date such plan is approved by the stockholders, whichever is earlier. Thus, a plan for the granting of qualified stock options expires 10 years after the adoption or approval of such plan, whichever is earlier. This is equally true whether the adoption or approval occurred before January 1, 1964 (as in the case of a restricted stock option plan which met the requirement of section 422(b)(1) when adopted and approved), or after such date. For example, a restricted stock option plan which was adopted June 1, 1956, and approved August 1, 1956, and which otherwise met the requirements of section 422(b)(1) and paragraph (b) of this section may be availed of for the granting of qualified stock options only through May 31, 1966, after which date the plan will expire for purposes of section 422(b)(1) and (2).

(d) *Period for exercising options.* (1) A qualified stock option by its terms must not be exercisable after the expiration of 5 years from the date the option is granted. Except as provided by subparagraph (2) of this paragraph, an option which does not contain such a provision when granted cannot be a qualified stock option.

(2) An exception to the requirement of section 422(b)(3) and this paragraph is provided in the case of options granted after December 31, 1963, and before January 1, 1965. If, at the time of grant, such an option did not contain the provision required by section 422(b)(3) and this paragraph, the option may be amended before January 1, 1965, to add such a provision and such amendment will not be treated as a modification under section 425(h)(1) or § 1.425–1. Furthermore, the amendment will be considered as retroactive to the date of grant of the option and will in no way affect such grant.

(e) *Option price.* (1) In general, the option price of a qualified stock option must not be less than the fair market value of the stock subject to the option at the time the option is granted. For general rules relating to the option price see paragraph (e) of § 1.421–7. For rules relating to the determination of when an option is granted, see paragraph (c) of § 1.421–7. The option price may be determined in any manner so long as the minimum price possible under the terms of the option cannot (except as provided by section 422(c)(1) and subparagraph (2) of this paragraph) be less than the fair market value of the stock at the date of grant.

(2)(i) Under section 422(c)(1), if a share of stock is transferred to an individual pursuant to his exercise of an option which fails to qualify as a qualified stock option because there was a failure of an attempt, made in good faith, to meet the requirements of section 422(b)(4) and subparagraph (1) of this paragraph, the requirements of such section and subparagraph shall be considered to have been met. However, in such a case there shall be included as compensation (and not as gain upon the sale or exchange of a capital asset) in the gross income of the individual for his taxable year in which such option is exercised, an amount equal to the lesser of—(*a*) 150 percent of the difference between the option price and the fair market value of the stock at the time the option was granted, or (*b*) the difference between the option price and the fair market value of the stock at the time of such exercise. The basis of the stock acquired shall be increased by an amount equal to the amount included in the gross income of the individual.

(ii) Whether there was a good-faith attempt to set the option price at not less than the fair market value of the stock subject to the option at the time the option was granted, depends on the facts and circumstances surrounding the case. For example, if it is shown that the fair market value of the stock at the date of grant was established by using an average of the fair market values as of such date set forth in the opinions of completely independent and well-qualified experts, such a showing will establish that there was a good-faith attempt to meet the requirements of section 422(b)(4) and this paragraph. In order to establish a good-faith attempt for purposes of applying the rule of section 422(c)(1) and this subparagraph in the case of a publicly held stock which was actively traded in an established market at the time the option was granted, the fair market value of such a stock must be determined by the valuation methods described in § 20.2031–2 of this chapter (Estate Tax Regulations).

(3) A further exception to the requirement of section 422(b)(4) and subparagraph (1) of this paragraph is provided in the case of options granted after December 31, 1963, and before January 1, 1965. An amendment to the terms of such an option made before January 1, 1965, to satisfy the requirements of section 422(b)(4) and subparagraph (1) of this paragraph will not be considered a modification for purposes of section 425(h) and § 1.425–1. Furthermore, the amendment will be considered as retroactive to the date of grant of the option, and will in no way affect such grant.

(f) *Prior outstanding options.* (1)(i) Section 422(b)(5) provides that a qualified stock option must, by its terms, not be exercisable while there is outstanding any qualified or restricted stock option which was granted, before the granting of the new qualified stock option, to the individual to purchase stock in his employer corporation, or in a corporation which, at the time of the granting of the new qualified stock option, is a parent or subsidiary corporation of the employer corporation, or a predecessor corporation of any of such corporations. Thus, in general, under section 422(b)(5), a qualified stock option must not be exercisable until all qualified and restricted stock options which were previously granted to the individual by the grantor corporation, or by related or predecessor corporations, have been exercised in full or have expired solely by reason of the lapse of time. The limitation of section 422(b)(5) applies irrespective of whether the transfer of stock pursuant to such prior outstanding restricted or qualified stock options can qualify for the special tax treatment of section 421. The exercisability of a qualified stock option is not affected by options which are not qualified or restricted stock options.

(ii) If the new qualified stock option being granted to the individual, and all the outstanding qualified and restricted stock options previously granted to the individual, are to purchase stock of the same class in the same corporation, section 422(c)(6) provides that the requirement of section 422(b)(5) will be considered to have been met if the new option by its terms is not exercisable while there is outstanding (within the meaning of section 422(c)(2)) any such previously granted option with an option price (determined as of the date of grant of the new option) higher than the option price of the new option. Thus, a qualified stock option to which section 422(c)(6) applies may be exercisable without regard to a prior outstanding option to purchase stock of the same class in the same corporation, if the option price payable under such prior outstanding option is not greater than the price of the new option.

(iii) The restriction imposed by section 422(b)(5) (or section 422(c)(6)) must be set forth in the terms of the option unless the individual in fact has no prior outstanding qualified or restricted stock options (or restricted stock options previously granted which will become outstanding at a future time) to purchase stock of the grantor corporation, a related corporation, or a predecessor corporation of any of such corporations, at the time the new qualified stock option is granted. Except as provided by this subdivision, if an option is granted which does not contain the restriction imposed by section 422(b)(5), such option cannot be a qualified stock option, irrespective of whether such restriction is in fact complied with at the time the option is exercised, and irrespective of whether the plan under which the option is granted contains the restriction required by section 422(b)(5). If the terms of an option granted after December 31, 1963, and before January 1, 1965, are amended before January 1, 1965, to satisfy the requirements of this subdivision, the amendment will not be considered a modification for purposes of section 425(h) and § 1.425–1, the amendment will be considered as retroactive to the date of grant of the option, and the amended op-

tion will be treated as an outstanding qualified stock option as of the date of the original grant.

(2) For purposes of section 422(b)(5) and this paragraph, the term "predecessor corporation" means a corporation which was a party to a transaction described in section 425(a) (irrespective of whether a substitution or assumption under such section was in fact effected) with the grantor corporation, or a corporation which, at the time the new qualified stock option is granted, is a related corporation of the grantor corporation, or a predecessor corporation of any of such corporations.

(3)(i) Except as is otherwise provided by this subparagraph, for purposes of section 422(b)(5), a qualified or restricted stock option is treated as outstanding according to its original terms until such option is exercised in full. If any portion of such an option is not exercised, such portion will be treated as outstanding until the expiration of the maximum period for which such portion, according to the terms of the option when granted, could have been exercised under any circumstances. A qualified or restricted stock option previously held by an individual and replaced in a transaction to which section 425(a) applies will not thereafter be treated as outstanding.

(ii) A restricted stock option granted before January 1, 1964, will not be treated as outstanding for any period before the first day on which (under the terms of such option) it may be exercised. If such an option is exercisable in installments, each installment will be treated as a separate option for purposes of this rule, with each installment becoming outstanding as of the first day it becomes exercisable under the terms of the option. However, this special rule does not affect the date on which the option is treated as granted. Thus, such a restricted stock option affects the exercise of a qualified stock option granted subsequent to the grant of such a restricted stock option to the extent the qualified stock option is not exercised before the restricted stock option becomes outstanding. See example (7) under subparagraph (4) of this paragraph.

(iii) A restricted stock option terminated before January 1, 1965, will not be treated as outstanding irrespective of the reason for which such option was terminated. If, under this subdivision, the number of shares subject to a restricted stock option is reduced, such option will be treated as outstanding for purposes of section 422(b)(5) only with respect to such reduced number of shares.

(4) The application of this paragraph may be illustrated by the following examples:

*Example (1).* S Corporation is a subsidiary of P Corporation. In 1963 E was an employee of S Corporation and was granted a restricted stock option by S to buy S stock. In June of 1964 E left S and became an employee of X Corporation, where he was granted a qualified stock option to purchase X stock. X Corporation is neither a related nor predecessor corporation of P or S. On June 1, 1965, E leaves X to become an employee of P Corporation, and on such date E is granted a qualified stock option by P to purchase P stock. E's restricted stock option to buy S stock was not cancelled during 1964, and both his restricted stock option on S stock and his qualified stock option on X stock are outstanding on June 1, 1965, when E is granted a qualified stock option to purchase P stock. In order to meet the requirement of section 422(b)(5), E's qualified stock option on P stock must, by its terms, not be exercisable until E's restricted stock option on S stock is exercised in full or expires solely by reason of the lapse of time.

*Example (2).* E is an employee of P Corporation. E holds a restricted stock option granted June 1, 1963, and a qualified stock option granted June 1, 1965. Both options were granted to him by P to purchase P stock. E has been granted no other qualified or restricted stock options by P, a related corporation, or a predecessor corporation of any of such corporations. The price payable under E's restricted stock option as of June 1, 1965, is $100; the option price of E's qualified stock option is $90. On June 1, 1966, P grants another qualified stock option to E to purchase P stock at $95. Under section 422(b)(5) and (c)(6), neither of E's qualified stock options may be exercisable until E's restricted stock option is exercised in full or expires solely by reason of the lapse of time. Assuming the restricted stock option is fully exercised on June 1, 1967, E will be free to exercise either his 1965 or 1966 qualified stock option.

*Example (3).* Assume the same facts as in example (2). On November 30, 1964, P cancels E's restricted stock option and in exchange therefor issues a qualified stock option to E in place of the cancelled restricted stock option. For purposes of section 422(b)(5), E's restricted stock option is treated as terminated and no longer outstanding as of such date, and will not affect the exercise of E's 1964, 1965, or 1966 qualified stock options. The qualified stock option issued in place of E's restricted stock option will be treated as outstanding for purposes of section 422(b)(5) as of November 30, 1964.

*Example (4).* Assume the same facts as in example (3) except assume that the cancellation of the restricted stock option takes place on November 30, 1965, and that the new option is a qualified stock option as of such date. Assume further that the option prices are as follows:

| | |
|---|---|
| Restricted stock option | $100 |
| Qualified stock option (granted June 1, 1965) | 90 |
| Qualified stock option (granted November 30, 1965, upon cancellation of restricted stock option) | 85 |
| Qualified stock option (granted June 1, 1966) | 95 |

and that each qualified stock option runs 5 years from grant, and that the restricted stock option, according to its terms when granted, would have expired solely by reason of the lapse of time at the close of business on May 31, 1969. Under section 422 (b)(5), and (c)(2) and (6), E's restricted stock option is treated as outstanding according to its original terms when granted, and E cannot exercise any of his qualified stock options until June 1, 1969 (the first day after the expiration of the original period for which E's restricted stock option was granted). On June 1, 1969, E's June 1, 1965, qualified stock option will be fully exercisable. E's November 30, 1965, qualified stock option will not be exercisable until after the full exercise or expiration of E's June 1, 1965, qualified stock option. The exercise of E's June 1, 1966, qualified stock option is barred only by E's restricted stock option. Thus, upon the expiration of E's restricted stock option, E is free to exercise either his June 1965 qualified stock option, or his June 1966 qualified stock option, while the exercise of his November 1965 qualified stock option must await the full exercise or expiration of his June 1965 qualified stock option.

*Example (5).* Assume the same facts as in example (4). On June 1, 1968, P Corporation sells all of its assets to M Corporation, and on such date E becomes an employee of M Corporation. Assume further that M Corporation substitutes new options to purchase M stock for the P options held by E, in a transaction to which section 425(a) applies. For purposes of section 422(b)(5), each M Corporation option received by E in substitution of a P Corporation option will be treated as outstanding to the same extent and in the same manner as the P option which it replaces. Thus, none of the M options received by E in substitution for his qualified stock options on P stock may be exercisable before June 1, 1969, and the M option issued in substitution for E's November 1965, qualified stock option may be exercisable only after the full exercise or expiration of the M option issued in substitution for E's June 1, 1965, option on P stock. If, in 1969, E is granted another qualified stock option by M Corporation, such qualified stock option will be subject to the qualified stock options granted by M to E in 1968 in substitution for E's qualified stock options to purchase P stock. The qualified stock options to purchase P stock which were replaced by M in the transaction to which section 425(a) applied will not be treated as outstanding for any purpose under section 422(b)(5).

*Example (6).* Assume the same facts as in example (5) except assume that M does not effect a substitution or assumption of E's P Corporation qualified stock options under section 425(a). Although P is neither a parent nor subsidiary of M, for purposes of section 422(b)(5), P is a predecessor corporation of M Corporation. Accordingly, any qualified stock options granted to E by M (or its parent or subsidiary corporations, or a predecessor corporation of any of such corporations) must, by their terms, not be exercisable until the expiration of the option periods for all of E's qualified and restricted stock options granted to E by P Corporation. Section 422(c)(6) cannot apply to permit E to exercise his M options before the expiration of the option periods of his P options because not all of E's qualified and restricted stock options which are outstanding (within the meaning of section 422(c)(2)) are to purchase stock of the same class in the same corporation.

*Example (7).* F is an employee of N Corporation. Prior to January 1, 1964, N granted a restricted stock option to F to purchase 100 shares of N Corporation stock at a price of $100 per share. The option is exercisable in installments as follows: 20 shares on or after June 1, 1965; another 40 shares on or after June 1, 1967; and the last 40 shares on or after June 1, 1969. Under section 422(c)(2), each installment of F's restricted stock option will be treated as becoming outstanding as of the first day on which such installment may be exercised. Thus, under the facts given, any qualified stock options granted to F by N Corporation to purchase N stock at less than $100 per share will be affected by F's restricted stock option as follows: Before June 1, 1965, F may exercise such qualified stock options without regard to his restricted stock option; between May 31, 1965, and June 1, 1967, F may exercise such qualified stock options only after the full exercise of the first installment of his restricted stock option; between May 31, 1967, and June 1, 1969, F may exercise such qualified stock options only after the full exercise of the first and second installments of his restricted stock option; after May 31, 1969, F may exercise such qualified stock options only after the full exercise or expiration of all installments of his restricted stock option.

(g) *Restriction on transferability.* A qualified stock option must, by its terms, not be transferable by the individual to whom it is granted otherwise than by will or the laws of descent and distribution, and must be exercisable, during the lifetime of such individual, only by him. For general rules relating to the restriction on transferability required by section 422(b)(6), see paragraph (b)(2) of § 1.421-7. For a limited exception to the requirement of section 422(b)(6), see section 425(h)(3).

(h) *Options granted to certain shareholders.* (1)(i) In general, an option is not a qualified stock option to the extent that, immediately after such option is granted, the optionee owns stock possessing more than 5 percent of the total combined voting power or value of all classes of stock of the employer corporation, or a related corporation of such corporation. Section 422(c)(3) provides that, in applying the limitation of section 422(b)(7), the rules of section 425(d) (relating to attribution of stock ownership) shall apply in determining the stock ownership of the individual, and stock which the individual may purchase under outstanding options (whether or not such options qualify for the special tax treatment afforded by section 421(a)) shall be treated as stock owned by the individual. An option is outstanding for purposes of section 422(b)(7) although under its terms it may be exercised only in installments or after the expiration of a fixed period of time. The rules of section 422(c)(2) which are applied in determining whether an option is outstanding for purposes of section 422(b)(5) do not apply with respect to section 422(b)(7) and paragraph (c)(3).

(ii) The determination of the percentage of the total combined voting power or value of all classes of stock of his employer corporation (or a related corporation of such corporation) that is owned by the individual is made by comparing the voting power or value of the shares owned (or treated as owned) by the individual to the aggregate voting power or value of all shares actually issued and outstanding immediately after the grant of the option to such individual. The aggregate voting power or value of all shares actually issued and outstanding immediately after the grant of the option does not include the voting power or value of treasury shares or shares authorized for issue under outstanding options held by the individual or any other person.

(2) If an individual is granted an option which permits him to purchase stock in excess of the limitation of section 422(b)(7) (determined by applying the rules of section 422(c)(3) and this paragraph), such option shall be treated as meeting the requirement of section 422(b)(7) to the extent that such individual could, if the option were exercised in full at the time of grant, purchase stock under such option without exceeding such limitation. If shares in excess of the number allowable under section 422(b)(7) are transferred to the individual under an option, such shares will not be treated as transferred pursuant to the exercise of a qualified stock option, irrespective of whether the stock ownership of the individual at the time of such transfer exceeds the limitation of section 422(b)(7). The shares purchased under an option described in this subparagraph which will be treated as shares transferred pursuant to the exercise of a qualified stock option will be the first shares acquired under the option. If more shares are acquired in any one exercise of the option than can qualify as being transferred pursuant to the exercise of a qualified stock option under the rules of section 422(b)(7) and this paragraph, the individual must designate which shares are to be treated as having been transferred pursuant to the exercise of a qualified stock option.

(3)(i) If at the time the option is granted the combined equity capital of the employer corporation and its related corporations does not exceed $2,000,000, the 5-percent limitation of section 422(b)(7) is increased by adding to such 5 percent the percentage (not higher than 5 percent) which bears the same ratio to 5 percent as the difference between such combined equity capital and $2,000,000 bears to $1,000,000. Thus, if the employer corporation and its related corporations have combined equity capital of $1,000,000 or less, an employee may be granted a qualified stock option so long as the value or voting power of the stock owned (or treated as owned) by such employee does not exceed 10 percent of the total combined voting power or value of all classes of stock of any of such corporations.

(ii)(a) Section 422(c)(3) provides that the term "equity capital" means, in the case of one corporation, the sum of its money and other property (in an amount equal to the adjusted basis of such property for determining gain), less the amount of its indebtedness (other than indebtedness to shareholders). In the case of a group of corporations consisting of a parent and its subsidiary corporations, the term "equity capital" means the sum of the equity capital of each of such corporations adjusted in the manner provided by (b) of this subdivision.

(b) In determining the equity capital of a corporation which is a member of a group of corporations consisting of a parent and its subsidiary corporations, the following adjustments shall be made:

(i) The sum of the money and other property (in an amount equal to the adjusted basis of such property for determining gain) of such corporation shall be reduced by the amount included in the equity capital of such corporation in respect of: stock owned by such corporation in any other corporation in the group; cash, property, or services due such corporation by any other corporation in the group; inventory owned by such corporation, to the extent the adjusted basis (for determining gain) of such inventory includes profits realized by any other corporation in the group; and fixed assets owned by such corporation, to the extent the adjusted basis (for determining gain) of such fixed assets includes profits realized by any other corporation in the group; and

(ii) The total indebtedness of such corporation which is taken into account in determining its equity capital shall be reduced by the amount of such indebtedness which is owed to any other corporation in the group.

In making the reductions required by this subdivision, no adjustments shall be made to reflect any minority interest in intercompany profits, indebtedness, or stock ownership; and no reduction is required to be made in respect of amounts representing profits in the inventory or fixed assets of a corporation arising from intercompany transactions which occurred before such corporation became a member of the group.

(4) The application of this paragraph may be illustrated by the following examples:

*Example (1).* E, an employee of M Corporation, owns 6,000 shares of the common stock of M Corporation, the only class of M stock outstanding. M has 100,000 shares of its common stock outstanding. M's equity capital (as defined by section 422(c)(3) and this paragraph) exceeds $2,000,000. Since E owns 6 percent of the combined voting power or value of all classes of M Corporation stock, M cannot grant a qualified stock option to E. Any option granted to E which purports to be a qualified stock option will be treated as a compensatory option, and as such, subject to the rules of § 1.421-6 of the regulations. If E's father and brother each owned 3,000 shares of M stock, and E owned no M stock in his own name, the result in this case would be the same, since under section 425(d) a person is treated as owning stock held by his father and his brother. Similarly, the result would be the same if, instead of actually owning 6,000 shares, E merely held an option on 6,000 shares of M stock, irrespective of whether the transfer of stock under such option could qualify for the special tax treatment of section 421, since section 422(c)(3)(C) provides that stock which the individual may purchase under outstanding options shall be treated as stock owned by such individual.

*Example (2).* Assume the same facts as in example (1) and assume further that M is a subsidiary corporation of P Corporation. Irrespective of whether E owns any P stock, and irrespective of the amount of P's equity capital or number of P shares outstanding, E cannot receive a qualified stock option from P. This results from E's ownership of more than 5 percent of the total combined voting power of all classes of stock of a subsidiary of P Corporation, i.e., M Corporation. Thus, an individual who owns (or is treated as owning) stock in excess of the limitation of section 422(b)(7), in any corporation in a group of corporations, consisting of a parent and its subsidiary corporations, cannot receive a qualified stock option from any corporation in the group.

*Example (3).* F is an employee of R Corporation. R's equity capital is in excess of $2,000,000. R has only one class of stock, of which 100,000 shares are issued and outstanding. Assuming F owns no stock in R or in any parent or subsidiary of R for purposes of section 422(b)(7), R can grant a qualified stock option to F for 5,000 shares, since immediately after the grant of the option F will be treated as owning 5,000 shares of a total of 100,000 shares actually issued and outstanding at such time. The 5,000 shares which F will be treated as owning by reason of section 422(c)(3)(C) will not be added to the 100,000 shares actually issued and outstanding immediately after the grant for purposes of determining whether F's stock ownership exceeds the limitation of section 422(b)(7).

*Example (4).* Assume the same facts as in example (3) and assume further that on

June 1, 1965, R grants F an option, purporting to be a qualified stock option, for 5,200 shares at an option price of $100 per share, the fair market value of R stock on such date. This option will only be a qualified stock option to the extent of 5,000 shares. Assume R transfers 5,000 shares to F pursuant to F's partial exercise of the option. Such transfer can qualify for the special tax treatment of section 421. However, no further transfer of shares pursuant to an exercise of this option can qualify for the special tax treatment of section 421, since the option was not a qualified stock option when granted to the extent it covered more than 5,000 shares. This is true although F's stock ownership immediately after the transfer of the 5,000 shares to him does not exceed the 5-percent limitation of section 422(b)(7), since F owns only 5,200 shares (5,000 shares outright, plus 200 shares by reason of section 22(c)(3)(C) of a total 105,000 shares actually issued and outstanding (the 100,000 shares issued and outstanding when the option was granted to F, plus an additional 5,000 shares issued and outstanding as a result of F's exercise).

*Example (5).* E is an employee of P Corporation. P owns 60 percent in value of the stock of S Corporation, and P and S have combined equity capital (as defined by section 422(c)(3)(A)(ii) and subparagraph (3) of this paragraph) of $1,600,000. Since the combined equity capital of P and S is less than $2,000,000, there may be added to the 5-percent limitation of section 422(b)(7) the additional percentage which bears the same proportion to 5 percent as the difference between the combined equity capital of P and S and $2,000,000 ($2,000,000 minus $1,600,000, or $400,000) bears to $1,000,000. Accordingly, there may be added to the 5-percent limitation of section 422(b)(7) an additional 2 percent ($400,000 is to $1,000,000, as 2 percent is to 5 percent), resulting in a limitation of 7 percent (5 percent plus 2 percent) for purposes of section 422(b)(7). Thus, an option which otherwise meets the requirements of section 422(b) and which is granted to E by P or S to purchase the stock of either of such corporations will meet the requirement of section 422(b)(7) to the extent that, immediately after such option is granted, E will not own (or be treated as owning) stock in either P or S possessing more than 7 percent of the total combined voting power or value of all classes of the stock of either of such corporations which is actually issued and outstanding at such time. If, at the time the option is granted, E owns stock possessing more than 7 percent of the total combined voting power or value of the stock of either P or S, the option could not qualify as a qualified stock option, irrespective of which corporation's stock was the subject of the option.

### § 1.423 Statutory provisions; employee stock purchase plans.

Sec. 423. *Employee stock purchase plans*—(a) *General rule.* Section 421(a) shall apply with respect to the transfer of a share of stock to an individual pursuant to his exercise of an option granted after December 31, 1963 (other than a restricted stock option granted pursuant to a plan described in section 424(c)(3)(B)), under an employee stock purchase plan (as defined in subsection (b)) if—

(1) No disposition of such share is made by him within 2 years after the date of the granting of the option nor within 6 months after the transfer of such share to him; and

(2) At all times during the period beginning with the date of the granting of the option and ending on the day 3 months before the date of such exercise, he is an employee of the corporation granting such option, a parent or subsidiary corporation of such corporation, or a corporation or a parent or subsidiary corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies.

(b) *Employee stock purchase plan.* For purposes of this part, the term "employee stock purchase plan" means a plan which meets the following requirements:

(1) The plan provides that options are to be granted only to employees of the employer corporation or of its parent or subsidiary corporation to purchase stock in any such corporation;

(2) Such plan is approved by the stockholders of the granting corporation within 12 months before or after the date such plan is adopted;

(3) Under the terms of the plan, no employee can be granted an option if such employee, immediately after the option is granted, owns stock possessing 5 percent or more of the total combined voting power or value of all classes of stock of the employer corporation or of its parent or subsidiary corporation. For purposes of this paragraph, the rules of section 425(d) shall apply in determining the stock ownership of an individual, and stock which the employee may purchase under outstanding options shall be treated as stock owned by the employee;

(4) Under the terms of the plan, options are to be granted to all employees of any corporation whose employees are granted any of such options by reason of their employment by such corporation, except that there may be excluded—

(A) Employees who have been employed less than 2 years,

(B) Employees whose customary employment is 20 hours or less per week,

(C) Employees whose customary employment is for not more than 5 months in any calendar year, and

(D) Officers, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees;

(5) Under the terms of the plan, all employees granted such options shall have the same rights and privileges, except that the amount of stock which may be purchased by any employee under such option may bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of employees, and the plan may provide that no employee may purchase more than a maximum amount of stock fixed under the plan;

(6) Under the terms of the plan, the option price is not less than the lesser of—

(A) An amount equal to 85 percent of the fair market value of the stock at the time such option is granted, or

(B) An amount which under the terms of the option may not be less than 85 percent of the fair market value of the stock at the time such option is exercised;

(7) Under the terms of the plan, such option cannot be exercised after the expiration of—

(A) Five years from the date such option is granted if, under the terms of such plan, the option price is to be not less than 85 percent of the fair market value of such stock at the time of the exercise of the option, or

(B) 27 months from the date such option is granted, if the option price is not determinable in the manner described in subparagraph (A);

(8) Under the terms of the plan, no employee may be granted an option which permits his rights to purchase stock under all such plans of his employer corporation and its parent and subsidiary corporations to accrue at a rate which exceeds $25,000 of fair market value of such stock (determined at the time such option is granted) for each calendar year in which such option is outstanding at any time. For purposes of this paragraph—

(A) The right to purchase stock under an option accrues when the option (or any portion thereof) first becomes exercisable during the calendar year;

(B) The right to purchase stock under an option accrues at the rate provided in the option, but in no case may such rate exceed $25,000 of fair market value of such stock (determined at the time such option is granted) for any one calendar year; and

(C) A right to purchase stock which has accrued under one option granted pursuant to the plan may not be carried over to any other option; and

(9) Under the terms of the plan, such option is not transferrable by such individual otherwise than by will or the laws of descent and distribution, and is exercisable, during his lifetime, only by him.

For purposes of paragraphs (3) to (9), inclusive, where additional terms are contained in an offering made under a plan, such additional terms shall, with respect to options exercised under such offering, be treated as a part of the terms of such plan.

(c) *Special rule where option price is between 85 percent and 100 percent of value of stock.* If the option price of a share of stock acquired by an individual pursuant to a transfer to which subsection (a) applies was less than 100 percent of the fair market value of such share at the time such option was granted, then, in the event of any disposition of such share by him which meets the holding period requirements of subsection (a), or in the event of his death (whenever occurring) while owning such share, there shall be included as compensation (and not as gain upon the sale or exchange of a capital asset) in his gross income, for the taxable year in which falls the date of such disposition or for the taxable year closing with his death, whichever applies, an amount equal to the lesser of—

(1) The excess of the fair market value of the share at the time of such disposition or death over the amount paid for the share under the option, or

(2) The excess of the fair market value of the share at the time the option was granted over the option price.

If the option price is not fixed or determinable at the time the option is granted, then for purposes of this subsection, the option price shall be determined as if the option were exercised at such time. In the case of the disposition of such share by the individual, the basis of the share in his hands at the time of such disposition shall be increased by an amount equal to the amount so includible in his gross income.

[Sec. 423 as added by sec. 221(a), Rev. Act 1964 (78 Stat. 63)]

### § 1.423–1 Applicability of section 421(a).

(a) *General rule.* Subject to the provisions of section 423(c) and paragraph (k) of this section, the special rules of income tax treatment provided in section 421(a) apply with respect to the transfer of a share of stock to an individual pursuant to his exercise of an option granted after December 31, 1963, under an employee stock purchase plan provided that the following conditions are satisfied—

(1) The individual must make no disposition of such share within 2 years from the date of the granting of the option, nor within 6 months after the transfer of such share to him; and

(2) At all times during the period beginning with the date of the granting of the option and ending on the day three months before the date of such exercise, the individual must be an employee of either the corporation granting the option, a related corporation of such corporation, or a corporation or a related

corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies.

(b) *Cross-references.* For rules relating to the employment relationship, see paragraph (h) of § 1.421–7. For rules relating to the effect of a disqualifying disposition, see section 421(b) and paragraph (b) of § 1.421–8. For definition of the term "disposition", see section 425(c) and paragraph (c) of § 1.425–1.

### § 1.423–2 Employee stock purchase plan defined.

(a) *In general.* (1) The term "employee stock purchase plan" means a plan which meets the requirements of paragraphs (1) through (9) of section 423(b). If the terms of the plan do not satisfy the requirements of paragraphs (3) through (9) of section 423(b), such requirements may be satisfied by the terms of an offering made under such plan. However, in such a case, such requirements will be treated as satisfied only with respect to options exercised under such offering.

(2) The determination of whether a particular option is an option granted under an employee stock purchase plan is made at the time such option is granted. If the terms of an option are inconsistent with the terms of the employee stock purchase plan or an offering under such a plan, the option will not be treated as granted under an employee stock purchase plan. If such an option is granted to an employee who is entitled to the grant of an option under the terms of the plan or offering, and such employee is not granted an option under such offering which qualifies as an option granted under an employee stock purchase plan, such offering will not meet the requirements of section 423(b)(4). Accordingly, none of the options granted under such offering will be eligible for the special tax treatment of section 423(b)(4). If such an option is granted to an individual who is not entitled to the grant of an option under the terms of the plan or offering, such option will not be treated as an option granted under an employee stock purchase plan, and the grant of the option will not disqualify the plan or the options granted under such plan or offering. For example, an option granted to an individual who is ineligible to receive an option under an employee stock purchase plan by reason of his ownership of 5 percent or more of the voting power or value of the stock of the grantor corporation (or a related corporation of such corporation), will not be treated as an option granted under an employee stock purchase plan, and the grant of such an option will not disqualify options granted under such plan from the special tax treatment of section 421. If all the options granted under an offering do not give the respective optionees the same rights and privileges, none of the options granted under such offering will be treated as having been granted under an employee stock purchase plan. If, at the time an option is granted, it qualifies as an option granted under an employee stock purchase plan, but the terms of the option are not in fact met, the option will not qualify for the special tax treatment of section 421. However, the failure of such an option to qualify for the special tax treatment of section 421, will not disqualify other options granted under the plan.

(b) *Options restricted to employees.* An employee stock purchase plan must provide that options are to be granted only to employees of the employer corporation or of its related corporations to purchase stock in any such corporation. If such a provision is not included in the terms of the plan, the plan will not be an employee stock purchase plan and options granted under such plan will not qualify for the special tax treatment of section 421. For rules relating to the employment requirement, see paragraph (h) of § 1.421–7.

(c) *Stockholder approval.* (1) An employee stock purchase plan must be approved by the stockholders of the granting corporation within 12 months before or after the date such plan is adopted. Stockholder approval must be expressed in the manner provided by the corporate by-laws or by the laws of the state of incorporation which relate to stockholder approval of an increase in the authorized shares of the class of shares to be issued under options granted under the plan. For example, if the applicable corporate by-law or the law of the state of incorporation requires that approval of an increase in the authorized shares of a class of stock be by a ⅔ majority of the shareholders of the classes of stock affected, the approval of the employee stock purchase plan must meet this standard.

(2) The plan required by section 423 must be approved within 12 months before or after the date the plan is adopted. Ordinarily, a plan is adopted when approved by the board of directors and the date of such board action will be the reference point for determining whether stockholder approval comes within the 12-month period.

(3) The plan as adopted and approved must indicate the aggregate number of shares which may be issued under the plan, and the corporations whose employees will be offered options under such plan. A plan which merely provides that the number of shares which may be issued under options shall not exceed a stated percentage of the shares outstanding at the time of each offering or grant under the plan will not satisfy the requirement that the plan state the aggregate number of shares which may be issued under options.

(4) Any change in the aggregate number of shares which may be issued under the plan (other than a change merely reflecting a change in capitalization such as a stock dividend or stock split-up) will be treated as the adoption of a new plan requiring approval of the stockholders with 12 months of such adoption. Similarly, any change in the designation of corporations whose employees will be offered options under the plan will be treated as the adoption of a new plan requiring shareholder approval, irrespective of whether, at the time the plan was first approved, the board of directors or an option committee of the grantor corporation was authorized to designate from time to time which corporations of the group of corporations consisting of the grantor corporation and its parent and subsidiary corporations would participate in offerings under the plan. No other change in the terms of an employee stock purchase plan will be considered the adoption of a new plan.

(5) A plan which otherwise meets the requirements of section 423(b) and this section may be used as an employee stock purchase plan although the adoption and approval of such plan occurred before January 1, 1964.
